²⁾ The APMs "Non-performing loans to loans" and "Loan loss allowance to non-performing loans", which has been in use since reporting under IAS 39, has in Q2 2020 been replaced by the new APMs "Stage 3 loans to loans" and "Loan loss allowance coverage ratio stage 3" due to established market practice and reduced relevance after the implementation of IFRS9

Letter from the CEO

Although the ongoing COVID-19 and related economic impact remain focus areas, sentiment has improved during the quarter. We at Bank Norwegian experience that the positive development from the end of the second quarter has continued in the beginning of the third quarter. While the high level of uncertainty related to the pandemic remains, the current sentiment is more positive than feared in April.

Second quarter results turned out strong with a net interest income increase of 7% compared to the same quarter last year and profit after tax of NOK 582.1 million, a 22% increase from the same quarter last year. Combined effects of appreciation of securities, strict cost control and normalized provisions contribute to the strong result. All markets see a positive development in payment behavior. Development in delinquent loans and credits transferred to debt collections was record low in June. Despite the improved economic backdrop the bank has adopted a cautious view to the Nordic market going forward and removed the positive scenario from our macro model resulting in extraordinary provisioning for this quarter. Strong fundamentals for the bank and cost control provide stability and ensure we can make the right decisions also in demanding times.

The focus during the second quarter has been on customer follow-up and major core business improvements to ensure our leading position as a digital bank. New automated features to help our customers to even more seamless self-service were introduced, as well as new contactless payment alternatives that provide improved convenience.

Our focus and marketing efforts have shifted from the beginning to the end of the quarter. Initially, all efforts were concentrated on ensuring support for our customers and stability in earnings for the bank. As visibility improved toward the end of the quarter, focus expanded to include growth and activity levels were again scaled up.

Pending more visibility on the consequences of the COVID-19, our European expansion was put on hold in March. The process will be re-initiated once a sufficient level of comfort is obtained regarding the economic development for individual countries to prioritize our efforts. The bank has nonetheless chosen to continue our development in areas like SEPA payments and universal electronic ID solutions in anticipation of a future expansion and to improve core products in the Nordic region.

The exploratory phase with CBI was concluded during the quarter. At this point in time, CBI pointed out several areas of attention that mirrors the bank's own agenda on the near-term focus and development. As such, this does not pose any definite conclusion on the way forward and the bank will review its options based on the further development in the Nordics and Europe. We believe that our competitive advantage first and foremost lie with our financial strength, cost efficient organization and digital platform throughout the value chain.

The second quarter and beginning of the third quarter provides good confirmation regarding the bank's resilience and ability to continue its attractive journey of profitable growth.

Bærum, August 12, 2020

Tine Wollebekk CEO

Report for the second quarter 2020

COVID-19 and the resulting partial shutdown of Nordic societies in the spring led to a sharp drop in economic activity, which was countered by decisive government measures to soften the impact on the economies. The reduction in mortgage interest rates and payment holidays provided debt service relief for households. The NFH Group initially experienced a fall in credit card purchase volumes and lower demand for instalment loans due to lower private consumption. The NFH Group experienced a positive development in the later part of the second quarter which has continued into the beginning of the third quarter.

At the end of the second quarter 2020 the NFH Group had a customer base of 1 746 500 customers, which can be broken down into 1 272 200 credit card customers, 207 100 instalment loan customers and 267 200 deposit customers.

Profit and loss as of June 30, 2020

The NFH Group's comprehensive income amounted to NOK 950.1 million, compared with NOK 963.3 million for the same period in 2019.

Net interest income totaled NOK 2 781 million, net other operating income amounted to NOK 195.0 million, while total operating expenses were NOK 647.3 million. Provisions for loan losses were NOK 1 068 million.

Profit and loss for the second quarter 2020

The NFH Group's comprehensive income amounted to NOK 582.1 million compared with NOK 368.0 million in the first quarter. The increase is mainly caused by lower provision for loan loss as the first quarter included the discretionary additional provision for loan losses of NOK 230.0 million related to COVID-19. In addition, the increase is caused by gains on securities compared to loss in the first quarter, and lower digital marketing costs, partly offset by decrease in commission income.

Return on equity was 24.5%, compared with 16.2% in the first quarter and the return on assets was 3.9%, compared with 2.5% in the first quarter. Adjusting for the additional provision in the first quarter, the return on equity was 23.9% and the return on assets was 3.7%.

Net interest income amounted to NOK 1 386 million, a decrease of NOK 8.1 million from the first quarter. The decrease is mainly explained by lower interest income as interest income in the first quarter increased from currency appreciation, and through lower credit card balance. The net interest margin was 9.3%, compared with 9.5% in the first quarter.

Net other operating income amounted to NOK 123.2 million compared with NOK 71.8 million in the first quarter. Net commission income decreased NOK 122.7 million to NOK 18.2 million mainly due to credit card network and insurance incentives in the first quarter and lower credit card activity in the second quarter. Net gain on securities and currency amounted to NOK 105.0 million, compared with a net loss of NOK 69.1 million in the first quarter. The increase

is mainly due to gain on securities of NOK 45.0 million, compared to loss of NOK 109.5 million in the first quarter, and higher currency gains in the second quarter of NOK 54.9 million.

Total operating expenses amounted to NOK 288.7 million, a decrease of NOK 69.8 million in the second quarter. Personnel expenses decreased NOK 7.4 million due to accrual effects. Administrative expenses decreased NOK 67.4 million, due to lower digital marketing spending. Depreciation increased NOK 5.8 million, mainly as depreciation of the pre-paid rights to the Norwegian brand for banking services and access to customers across Europe started-up during the quarter. Other operating expenses decreased NOK 0.8 million.

Provisions for loan losses were NOK 447.0 million. During the second quarter the NFH Group has amended the ECL-models to be able to better calculate the expected effects of COVID-19. The calculated effects in the second quarter have absorbed the additional discretionary provision of NOK 230.0 million in the first quarter. Due to the uncertain outlook the NFH Group has further decided to extraordinarily alter the macro-model. The positive scenario has been removed in the macro-model in the second quarter resulting in a one-off increase in the loan loss provision of NOK 55.5 million. Including this, the provision equalled 3.9% of average gross loans, compared with 5.5% in the first quarter, and 3.5% adjusted for the additional provision.

Stage 3 loans were NOK 9 506 million, compared with NOK 9 312 million at the end of the first quarter. Stage 3 loans accounted for 21.3% of gross loans, compared with 19.8% as of March 31, 2020. Stage 3 loans to loans are developing as expected and while the relative share of stage 3 is increasing due to the overall lower loan growth, the stage 3 growth has declined.

Balance sheet as of June 30, 2020

Total assets increased NOK 1 170 million in the quarter and amounted to NOK 61 125 million.

Gross loans to customers decreased NOK 2 292 million compared with an increase NOK 2 860 million in the previous quarter and totaled NOK 44 723 million. Currency adjusted gross loan growth was NOK -1 276 million compared with NOK -733.3 million in the previous quarter. Broken down by product the currency adjusted loan growth for instalment loans was NOK -653.0 million compared with NOK 375.4 million in the previous quarter, and for credit cards NOK -623.0 million compared with NOK -1 109 million in the previous quarter. The negative growth in instalment loans and credit card is mainly due lower new sales and lower spending related to COVID-19. Instalment loans amounted to NOK 31 878 million and credit card loans amounted to NOK 12 821 million.

Customer deposits increased NOK 1 530 million compared with a decrease of NOK 557.3 million in the first quarter and

amounted to NOK 41 091 million at the end of the second quarter. Currency adjusted growth was NOK 2 362 million compared with NOK -3 301 million in the previous quarter. The increase is mainly in Norway and Denmark.

Liquid assets increased NOK 3 373 million and amounted to NOK 20 222 million, equivalent to 33.1% of total assets.

Loans to credit institutions decreased NOK 399 million in the quarter after repaying a 3-month F-loan from Norges Bank at maturity.

Financial derivatives debt decreased NOK 457.2 in the quarter and amounted to NOK 200.4 million. Financial derivatives comprise of currency swaps and forwards and the decrease relates mainly to currency depreciation in the second quarter.

Total equity amounted to NOK 10 407 million, compared with NOK 9 830 million as of March 31, 2020. The total capital ratio was 24.3%, the core capital ratio was 22.2% and the common equity tier 1 ratio was 20.7%.

The financial statements as of June 30, 2020 have been subject to an auditor review of interim financial statements.

Outlook

The Nordic economies have proven resilient and the governments proactive in their handling of the pandemic and the subsequent consequences. There is still high level of uncertainty related to the future development of the pandemic. The NFH Group's resilient financial position with high profitability, strong capitalization and high levels of liquid assets make the NFH Group well equipped to withstand the anticipated adverse effects of COVID-19.

The NFH Group has maintained normal operations and underwriting of credit throughout the crisis and will continue to support its customers.

New legislations have been implemented as of July 1, 2020 in both Finland and Denmark. In Finland the temporary legislation regarding interest rate cap and advertising limitations was implemented and the legislation is expected to reduce instalment loan growth in Finland. In Denmark new legislations regulating effective interest rate, total cost on loans and advertising were implemented and are expected to have a limited impact on interest income and may reduce loan growth.

The financial markets have stabilized and developed strongly during the second quarter and into the third quarter. The volatility in the foreign exchange rates that we experienced in the previous quarter has been lower in the second quarter and into the third quarter. The widening credit spreads in the first quarter have continued to tighten. The debt funding market for financial institutions proved strong into the summer months and appears to continue the positive trend.

The EU's Bank Recovery and Resolution Directive (BRRD) has been effective in Norway since January 1, 2019. On December 20, 2019, the minimum requirement for own funds and eligible liabilities (MREL) was determined for the NFH Group. The MREL requirement applied from June 30, 2020. Preferred senior debt issued before January 1, 2020, with more than one year's remaining maturity, qualifies as MREL-eligible debt until the end of the phase-in period, initially ending December 31, 2022. Due to the demanding market conditions caused by the COVID-19, Finanstilsynet announced on May 26, 2020 that the phase-in period was to be extended to January 1, 2024. As of June 30, 2020, the bank was compliant with the MREL requirement and is currently in the process of finalizing all necessary preparations to issue MREL-eligible debt.

Deposit volumes have developed positively due to attractive terms. The NFH Group has announced three deposit interest rate reductions in the third quarter in Norway and Denmark, all with upcoming implementations aiming to reduce the deposit growth.

In March, the European expansion was put on hold pending the development of the COVID-19 and will be re-initiated when the economic development for individual countries following the development in COVID-19 are more visible. The NFH Group has nonetheless chosen to continue development in key areas for the future European roll-out.

The NFH Group's exploratory phase to apply for an EU banking license in Ireland was concluded in the quarter. Based on the feedback from CBI, the Board will evaluate the next steps in the process considering the feedback from CBI and not at least the consequences of the COVID-19.

While the uncertainty is still high there are signs of recovery in the Nordic markets and the NFH Group is well positioned to strengthen its leading position further.

Notes

Note 1. General accounting principles

The quarterly financial statements for the Norwegian Finans Holding Group (NFH Group) have been prepared in accordance with IAS 34 Interim Financial Reporting as issued by the International Accounting Standards Board and as adopted by the European Union. When preparing the consolidated financial statements, management makes estimates, judgments and assumptions that affect the application of the accounting principles and the carrying amount of assets, liabilities, income and expenses. Estimates and assumptions are subject to continual evaluation and are based on historical experience and other factors, including expectations of future events that are believed to be probable on the balance sheet date. A description of the accounting policies, significant estimates and areas where judgment is applied by the NFH Group, can be found in Note 1 Accounting principles in the annual report of 2019. Figures for 2019 have been revised due to changes in accounting principles, for further information see note 1 and 36 in the annual report of 2019.

Note 2. Segments

The profit and loss and balance sheet presentation for segments are based on internal financial reporting as it is reported to management. The figures are based on Bank Norwegian's governance model. Other contains eliminations for group contributions.

Liquidity Coverage Ratio

Total capital %

The Liquidity Coverage Ratio (LCR) is defined as the bank's liquid assets relative to net liquidity output 30 days forward in time in any given stress situation. The bank has significant positions in Norwegian, Swedish and Danish kroner in addition to Euro. The legal requirement for liquidity reserve at total level and for significant currencies is 100% at 30.6.20, except for Norwegian kroner where the legal requirement is 50%.

Note 4. Expected credit loss

The NFH Group applies the expected credit loss (ECL) methodology subject to the IFRS 9 rules with three stages of impairment calculation. Stage 1 is not impaired and uses a 12-month ECL calculation. Stage 2 has a significant increase in credit risk since its origination, according to the triggers disclosed below, and uses the lifetime approach to ECL calculation. Stage 3 is impaired with the 90 days past due definition and calculates the ECL based on the

Significant increase in credit risk (SICR)

Probability of default (PD) is an experience-based probability that a commitment is in breach for more than 90 days in the next 12 months. A significant increase in credit risk is assessed on the basis of several criteria, including late payment beyond 30 days after invoice due date. The most important factor for the assessment is a comparison between the lifetime original probability of default and the lifetime probability of default at the reporting date. The trigger-model below utilizes an assessment of the forward looking lifetime of the exposure, taking into account the probability of early repayment and the lifetime probability of defaulting on the loan. Hence it is neither the contractual length of the loan, nor the normal 12-month PD that is reflected in the figures. It is an accumulation of monthly behaviour default probabilities that for example for credit cards will be very low for high quality clients until it is activated. As such, a high trigger level is needed for an indication of a significant increase in credit risk when the lifetime PD is very low. Each product has its own threshold values when one considers an increase to be significant. An increase of more than 0% indicates that any increase above the lifetime PD at origination is a significant increase in credit risk.

| | Instalment I | loans | Credit car | d loans |

Economic variables used to measure ECL

The NFH group has chosen to disclose the three most important modelling variables in each individual country. The data is modelled across three scenarios: a base, an optimistic and a pessimistic case for expected credit loss. The model is based on the NiGEM-model developed by UK's Institute of Economic and Social Research.

| | | Base scer | nario | Optimistic s | cenario | Pessimistic s | cenario |
|---------|-------------------------|-----------|---------|--------------|---------|---------------|---------|
| Norway | | 12 months | 5 years | 12 months | 5 years | 12 months | 5 years |
| | 3-month interbank rate | 0.40 % | 1.37 % | 0.40 % | 1.66 % | 0.40 % | 1.19 % |
| | Hourly pay in NOK | 446 | 508 | 449 | 527 | 443 | 492 |
| | Real interest rate | -3.58 % | -1.34 % | -3.58 % | -1.06 % | -3.58 % | -1.53 % |
| Sweden | | | | | | | |
| | 3-month interbank rate | -0.13 % | 0.68 % | -0.13 % | 0.91 % | -0.13 % | 0.56 % |
| | GDP in million SEK | 396 957 | 432 017 | 404 879 | 455 276 | 393 068 | 418 653 |
| | Real interest rate | -1.64 % | -1.88 % | -1.64 % | -1.65 % | -1.64 % | -2.00 % |

| | Unemployment percentage | 5.35 % | 5.23 % | 5.22 % | 5.05 % | 5.97 % | 5.47 % |
| Finland | | | | | | | |
| | 3-month interbank rate | -0.30 % | 0.44 % | -0.11 % | 0.61 % | -0.35 % | 0.01 % |
| | Consumption in millions | 8 979 | 9 536 | 9 172 | 9 799 | 8 744 | 9 293 |
| | Unemployment percentage | 8.10 % | 6.41 % | 7.60 % | 6.20 % | 9.77 % | 6.97 % |

Macro scenario sensitivity on ECL

| | mano sonsitivity on Loc | Final | Base | Optimistic | Pessimistic |
|---------|-------------------------|-----------|-----------|------------|-------------|
| Norway | | ECL | scenario | scenario | scenario |
| | Credit card | 449 612 | 440 364 | 404 908 | 471 189 |
| | Instalment loans | 1 066 559 | 1 040 599 | 942 966 | 1 127 133 |
| Sweden | | | | | |
| | Credit card | 257 827 | 257 822 | 257 572 | 257 839 |
| | Instalment loans | 849 007 | 848 691 | 846 092 | 849 743 |
| Denmark | | | | | |
| | Credit card | 108 191 | 108 061 | 107 771 | 108 492 |
| | Instalment loans | 741 451 | 741 152 | 740 374 | 742 150 |
| Finland | | | | | |
| | Credit card | 172 306 | 166 936 | 159 401 | 184 837 |
| | Instalment loans | 977 179 | 947 251 | 906 927 | 1 047 011 |
| | | | | | |

The following weights have been used across all portfolios per 30.6.2020: 70% - 0% - 30% for base, optimistic and pessimistic scenario for expected credit loss. The choice to deviate from the normal 40% - 30% - 30% probability weighting is based on a low expectation for the optimistic scenario.

The estimated effects of COVID-19 as of end of the first quarter of MNOK 230 are now incorporated into the model estimates. The more adverse macro data now being used increases the levels of lifetime PD on stages one and two, increasing ECL by about MNOK 32. New development of more dynamic LGD models, also incorporating macro-factors, increases the LGD levels for all stages by about MNOK 205. The weighting associated with the more pessimistic outlook increases the ECL by about MNOK 55.

Note 5. Loans to customers by product groups and change in loan loss allowance

Fair value of financial instruments at amortized cost

Financial instruments at amortized cost are valued at originally determined cash flows, adjusted for any impairment losses. Amortized cost will not always give values that match the market's assessment of the same instruments, due to different perceptions of market conditions, risk and return requirements.

Debt securities issued and subordinated loan

The fair value of debt securities issued and subordinated loan are based on observable market data where available.

Notes for Norwegian Finans Holding ASA

Note 1. General accounting principles

The quarterly financial statements for Norwegian Finans Holding ASA have been prepared in accordance with IAS 34 Interim Financial Reporting as issued by the International Accounting Standards Board and as adopted by the European Union. When preparing the consolidated financial statements, management makes estimates, judgments and assumptions that affect the application of the accounting principles and the carrying amount of assets, liabilities, income and expenses. Estimates and assumptions are subject to continual evaluation and are based on historical experience and other factors, including expectations of future events that are believed to be probable on the balance sheet date. A description of the accounting policies, significant estimates and areas where judgment is applied, can be found in Note 1 Accounting principles in the annual report for 2019.

Norwegian Finans Holding ASA owns 100 % of the shares in Bank Norwegian AS and Lilienthal Finance Ltd. The shares are recognized at cost, and eliminated in the group accounts.

Note 2. Capital adequacy

Norwegian Finans Holding ASA uses the standardized approach for credit risk and the standardized approach for operational risk to calculate capital adequacy in accordance with current capital adequacy regulations - Basel II.
