

Already More than 20,000 Customers Signed Up for Switch™, Quadiant's Secure Online Mail Platform for Small Businesses

Paris, March 29, 2023

[Quadiant](#) (Euronext Paris: QDT), a leader in helping businesses create meaningful customer connections through digital and physical channels, announces the growth of its digital mail business, supported by [Switch™](#), a cloud-based platform for sending business mail online, replacing traditional document printing and mailing processes, as well as saving valuable time.

Quadiant continuously invests in mail management solutions for businesses of all sizes, leveraging innovation and digital solutions to enable compliancy, security, productivity and tracking of mail processes. Designed to help small businesses adopt new strategies for their transactional and marketing communications, Switch is a flexible, secure, and cost-effective service to optimize mail and package processing.

More than 20,000 customers have already signed up at switchmail.com, an online mailing service that allows users to upload documents from a computer or mobile device, verify addresses, choose printing and mailing options, and track the entire automated mail process, all from a single platform.

"At Quadiant, we constantly innovate to meet the evolving needs of our clients, leveraging our long-time experience providing solutions for businesses small and large," said Alain Fairise, chief solution officer, Mail-Related Solutions at Quadiant. *"Thanks to a simple user interface and seamless API integration, Switch is the ideal online solution for small mailers to securely process their critical mail and packages more efficiently. Additionally, Switch is a great alternative to PC postage because it removes the chore of having to manage paper, envelopes and postage."*

With Switch, there are no subscriptions or long-term agreements required. Small businesses can send many letters at once to multiple recipients with Switch's batch mail feature. Additionally, Switch offers API and Zapier integration to simplify and automate business mail at scale and to connect to popular third-party business applications.
