### CEO comments

We brought a record-breaking order backlog into the new year despite challenges such as the Corona pandemic and the large component shortage, and I can happily state after the first quarter of the year that we have had a good start to 2022.

## Increased invoicing and order intake with reduced gross margin

Invoicing for the quarter amounted to MSEK 47 (29), a substantial increase of 60% compared to the same period last year. Order intake also increased, amounting to MSEK 40 (28). During the quarter, we delivered a larger share of highly competitive volume orders, which in combination with increased costs caused by the global component shortage has resulted in the gross margin decreasing to 37% (43). We expect that component costs will remain at a higher level, while the product mix will of course vary from quarter to quarter. To compensate for the increased costs, we, like most in the industry, implemented price increases on our products last year. The effects of these are still lingering and have not yet had full effect.

### Continued impact from the global component shortage

The global component shortage has characterized the market for over a year. In this situation, the highest priority is to maintain the ability to deliver to our customers in the best possible way. Thanks to measures such as expanding the component stock and some adaptations to the product constructions, we have largely succeeded in this.

As JLT's computers are often part of a complete solution that also contains products from other suppliers, customers may suffer from delays despite the fact that our own delivery capacity is high, and our sales work is therefore hampered by the current situation.

We expect that the component shortage will continue to be a major challenge.

### The return of international trade fairs and events opens new opportunities to meet customers

After several years of canceled events and limited possibilities for customer visits due to the Corona pandemic, we now see how activity in the global market is increasingly returning to normal. In the

quarter, after a long wait, it was time to exhibit at the fairs again. First out was MODEX in March, one of the largest annual events in logistics and supply chain in the United States. Next up was the transport and logistics fair SITL in France, which kicked off in early April. During the spring, the logistics fair LogiMAT in Germany and the port logistics fair TOC in the Netherlands are also waiting.

### Investments made in 2021 are beginning to yield results

At the end of January, the acquisition of our French sales partner ID Work was completed and the wholly owned subsidiary JLT France was established. The work of integrating the French operations into the JLT Group and the recruitment of additional sales resources is in full swing. In terms of order intake France continues to be one of our largest markets in Europe and the conditions ahead look good.

Last year, the JLT6012A was launched, an Android-based vehicle mounted computer for use in harsh environments. Sales are ongoing and the new computer has been delivered to several customers and is being demonstrated at the fairs this spring as well as on customer visits to find new business opportunities.

Our work in developing software solutions, which was intensified last year with the establishment of JLT Software Solutions AB, also progressed during the quarter. The first software products are now being tested by customers and are planned to be launched during the year.

# Comments on the result for the first quarter

The Groups order intake increased by 60 percent in the first guarter compared to the same period last year. The increase in sales is due to larger orders with a lower margin, this together with extra costs in component supply driven by the global component shortage, has had a negative effect on the gross margin.

Sales and marketing costs have increased compared to the same period last year. This is mainly because of recruitments within the marketing department, but also increased sales costs as a result of the increased order intake. Additionally, travels and participation at various events have increased when restrictions related to the Covid pandemic have been removed in many countries, which also have impacted the sales and marketing costs.

JLT Software Solutions is in a build-up phase to establish the business that develops JLT's complementary software solutions and impacted the Group's result with MSEK -0.6 (0.0).

As part of securing our delivery capacity in a situation where the component situation remains problematic, the safety stocks have been increased, which has led to the stock value increasing by MSEK 3 during the period.

On January 11, 2022 the acquisition of ID Work SAS was completed and the company renamed to JLT Mobile Computers France SAS. The purchase price amounts to equity with the addition of EUR 100,000 and 160,000 JLT shares. Surplus value in the form of Goodwill in the Group amounts to MSEK 2.4 and the acquisition had a cash flow impact of MSEK -1.0.

# Financial position and cash flow

Cash flow amounted to MSEK -3.2 (4.5). The Group's cash and cash equivalents amounted to MSEK 36.9 (54.6) on the balance sheet date.

The solidity was 60 percent (64), and the equity amounted to MSEK 63.7 (61.7).

Parts of the cash and cash equivalents are under discretionary management according to a stated investment policy with a maximum of 20 percent in shares or share-based investments. The amount held is determined by the current cash requirement.

There are no interest-bearing liabilities.

### Parent Company

The parent company performs services for the subsidiary and pass on the expenses. The operating result amounted to MSEK -1.3 (-1.1).
