

CREATION OF A LEADING WEST AFRICAN GOLD PRODUCER

› March 23, 2020

DISCLAIMER & FORWARD LOOKING STATEMENTS

This presentation contains “forward-looking statements” including but not limited to, statements with respect to Endeavour’s plans and operating performance, the estimation of mineral reserves and resources, the timing and amount of estimated future production, costs of future production, future capital expenditures, and the success of exploration activities. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as “expects”, “expected”, “budgeted”, “forecasts” and “anticipates”. Forward-looking statements, while based on management’s best estimates and assumptions, are subject to risks and uncertainties that may cause actual results to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: risks related to the successful completion and integration of acquisitions; risks related to agreeing on the pricing of, and risks related to the successful completion of the investment commitment from La Mancha risks related to international operations; risks related to general economic conditions and credit availability; actual results of current exploration activities; unanticipated reclamation expenses; changes in project parameters as plans continue to be refined; fluctuations in prices of metals including gold; fluctuations in foreign currency exchange rates, increases in market prices of mining consumables; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes, title disputes, claims and limitations on insurance coverage and other risks of the mining industry; delays in the completion of development or construction activities; changes in national and local government regulation of mining operations; tax rules and regulations; risks relating to COVID 19 and political and economic developments in countries in which Endeavour operates. Although Endeavour has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Please refer to Endeavour’s most recent Annual Information Form filed under its profile at www.sedar.com for further information respecting the risks affecting Endeavour and its business. Endeavour does not intend and does not assume any obligation to update this forward-looking information except as otherwise required by applicable law.

ENDEAVOUR QUALIFIED PERSON

The scientific and technical content of this news release has been reviewed, verified and compiled by Gérard de Hert, EurGeol, Senior VP Exploration for Endeavour Mining. Gérard de Hert has more than 20 years of mineral exploration and mining experience, and is a "Qualified Person" as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101").

SEMAFO QUALIFIED PERSON

All production information and other scientific and technical information in this news release with respect to SEMAFO and its assets were prepared in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum and NI 43-101 and were prepared, reviewed, verified and compiled by SEMAFO’s geological and mining staff under the supervision of Patrick Moryoussef, P. Eng., Vice-President, Mining Operations. The exploration programs across the company’s land holdings were prepared, reviewed, verified and compiled by Richard Roy, P. Geo., Vice-President, Exploration. All reserve and resource estimates for the SEMAFO properties have been audited and verified, and the technical disclosure has been approved by François Thibert, P. Geo., MScA, Manager, Reserves and Resources Estimation Group who is a Qualified Person under NI 43-101. Sample preparation, analytical techniques, laboratories and quality assurance-quality control protocols used during the exploration drilling programs are done consistent with industry standards and independent certified assay labs.

NON IFRS MEASURES

The information in this investor presentation includes non-IFRS financial measures including all-in sustaining costs per ounce of gold sold (“AISC”), EBITDA, adjusted EBITDA and LTM adjusted EBITDA. Endeavour believes that in addition to conventional measures prepared in accordance with GAAP, certain investors use the all-in sustaining margins and adjusted earnings before interest, tax, depreciation and amortization (“Adjusted EBITDA”) to evaluate Endeavour’s performance and ability to generate cash flows and service debt. These financial measures do not have any standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other issuers, even as compared to other issuers who may also be applying the World Gold Council guidelines, which can be found at <http://www.gold.org>. However, AISC does have limitations as an analytical tool as it may be influenced by the point in the life cycle of a specific mine and the level of additional exploration or expenditures a company has to make to fully develop its properties. Accordingly, these non-IFRS measures should not be considered in isolation, or as a substitute for, analysis of the companies; results as reported under IFRS. A reconciliation of certain the non-IFRS measures presented in this investor presentation is contained in Endeavour’s most recently filed annual MD&A, which is available on SEDAR at www.sedar.com

CREATION OF A LEADING WEST AFRICAN GOLD PRODUCER

Strong strategic rationale for regional consolidation

1
ENHANCED STRATEGIC POSITIONING

- › Creates partner of choice for governments and key stakeholders
- › Enhances ability to manage risks
- › Offers significant synergies
- › Consolidates the Houndé belt to create a world class mining district
- › Creates a pool of extensive management experience

2
STRENGTHENED ASSET PORTFOLIO

- › 4 cornerstone mines producing above 800koz on a combined basis providing a solid base
- › Strong cash flow capabilities
- › Attractive growth project pipeline
- › Potential to unlock exploration value with the opportunity to deploy a significant exploration budget

3
ENHANCED CAPITAL MARKET PROFILE

- › Ability to pursue future organic growth with sustained cash flow profile and sound balance sheet
- › Ability to meet investment hurdles of larger funds
- › Increased free float and greater stock liquidity
- › La Mancha strongly supports the transaction and commits to inject \$100m in the combined entity

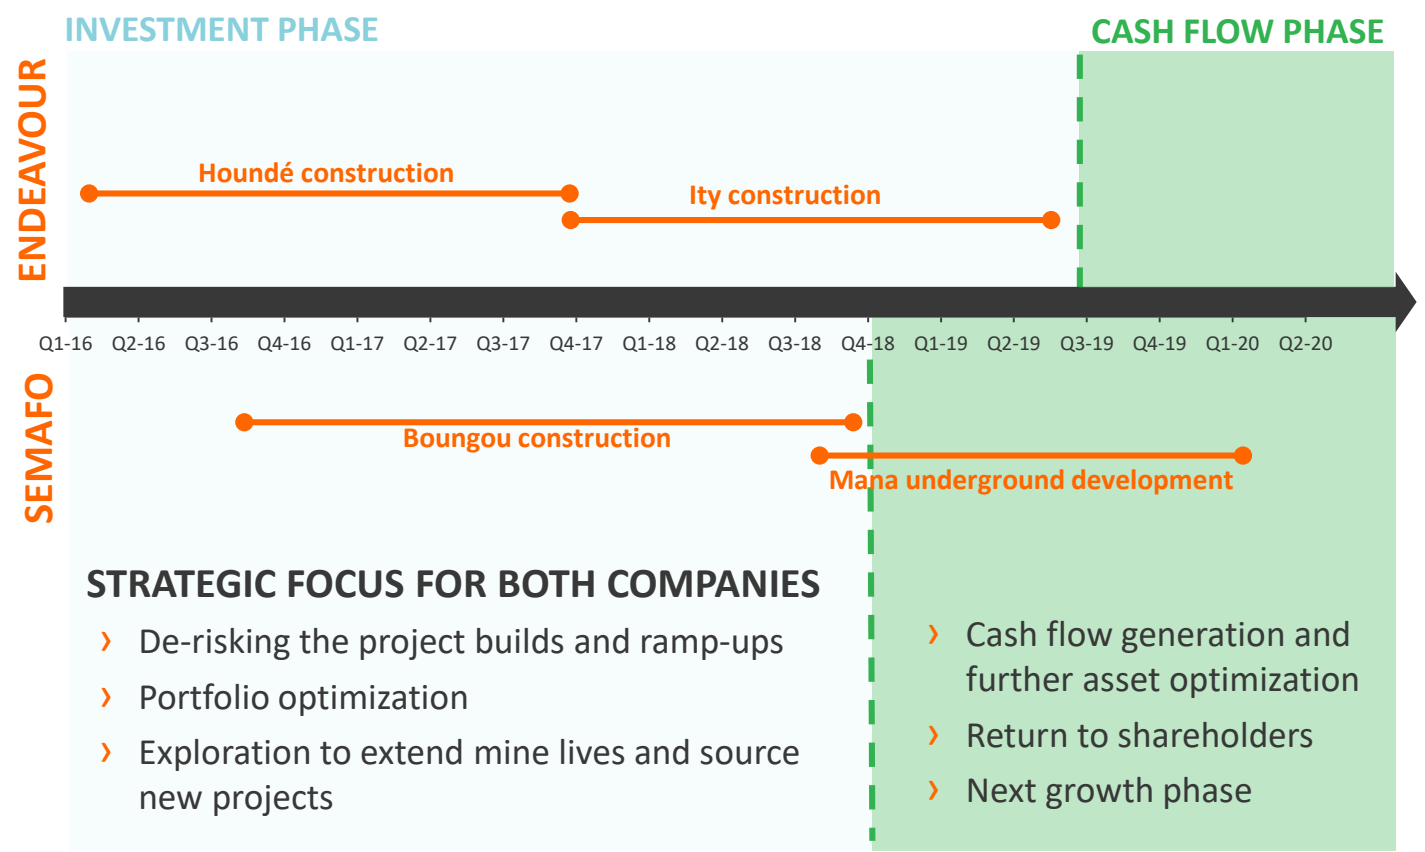

GOOD STRATEGIC TIMING DUE TO BUSINESS ALIGNMENT

Both companies are transitioning to cash flow generation phase

INSIGHTS

- > Both companies completed construction phases and are now fully ramped-up
- > Both companies are at the right juncture to combine operations, and be stronger together
- > Strong alignment in upcoming strategic focus

STRONG STRATEGIC ALIGNMENT

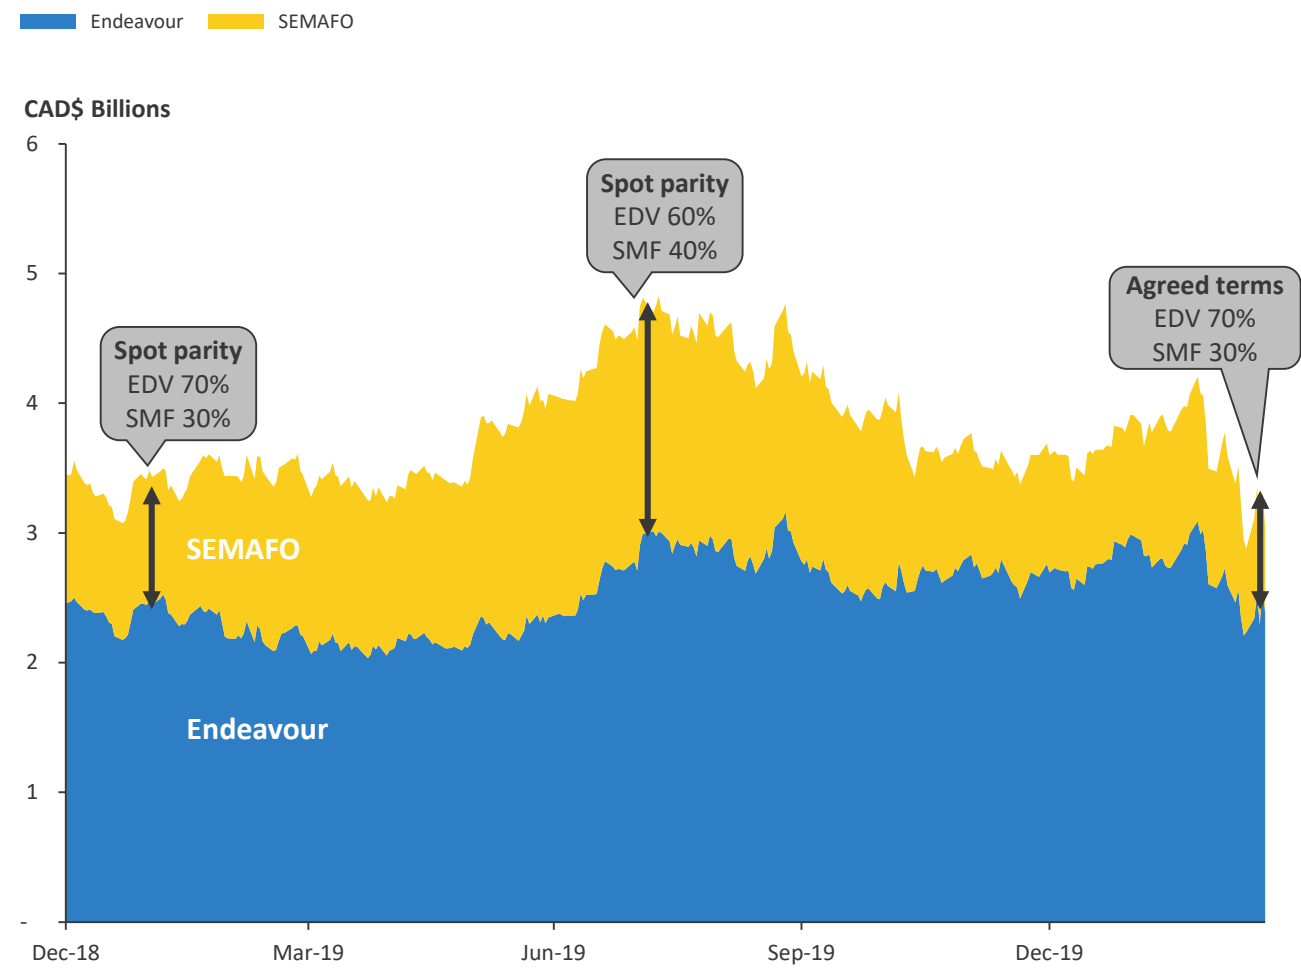

EXTENSIVE DIALOGUE AND DUE DILIGENCE

Both companies believe that the terms are attractive for both sets of shareholders

BACKGROUND

- › For the past several years, Endeavour and SEMAFO have worked as industry partners to consider shared issues common to companies operating in West Africa.
- › In early 2019, both companies engaged in a mutual dialogue in order to evaluate the merits of a business combination.
- › The dialogue included extensive mutual due diligence as well as discussion of potential terms of a transaction, with a final proposal in May 2019.
- › At that time, it was not possible to agree on terms which appropriately shared the risks and rewards of a combination.
- › In early 2020, discussions between Endeavour and SEMAFO recommenced.
- › Both companies completed on-site due diligence at SEMAFO's operations in Burkina Faso during February 2020, including a comprehensive assessment of security, operations and exploration.

Market Capitalization since the beginning of 2019

AGREED TERMS OF COMBINATION

Both boards have unanimously approved the transaction

Proposed transaction

- Endeavour has entered into a definitive agreement whereby it **will acquire all of the issued and outstanding securities of SEMAFO** by way of a Plan of Arrangement under the Business Corporations Act (Québec)
- **Values the entire issued share capital of SEMAFO at approximately CAD1,030 million or US\$716 million**, based on Endeavour's share price on March 20, 2020, and CAD:US\$ exchange rate of 0.695

Consideration

- **Exchange ratio of 0.1422 Endeavour shares for each SEMAFO share representing a 27.2% premium to the 20-day VWAPs** of Endeavour and SEMAFO (ending March 20, 2020)
 - 20-day VWAPs (as at March 20, 2020) of Endeavour and SEMAFO of **CAD22.72** and **CAD2.54**
- **The exchange ratio represents a 26.0% premium to the 60-day VWAPs** of Endeavour and SEMAFO (ending March 20, 2020)
 - 60-day VWAPs (as at March 20, 2020) of Endeavour and SEMAFO of **CAD23.93** and **CAD2.70**

Ownership

- **Pro forma ownership: 70% Endeavour / 30% SEMAFO**

Other

- › Board of Directors to be comprised of 10 directors:
 - › 7 nominated by Endeavour
 - › 3 nominated by SEMAFO
- › Key management team appointees:
 - › CEO: Sébastien de Montessus
 - › President: Benoit Desormeaux
 - › CFO: Martin Milette
- › Headquarters to be located in London; Montréal will become the primary support office to our operations
- › Transaction will be effected by a SEMAFO plan of arrangement, which will require SEMAFO shareholder approval (66 2/3% present & voting)
- › Endeavour shareholder approval required (simple majority) under TSX rules given quantum of share issuance (>25% of current shares)
- › La Mancha, as well as Directors of both companies, to sign support agreement to vote in favour of the transaction
- › La Mancha has committed to invest \$100m in the combined entity at a price to be agreed

STRONG BENEFITS FOR BOTH SETS OF SHAREHOLDERS

Transaction presents a significant opportunity to create value

BENEFITS FOR ENDEAVOUR SHAREHOLDERS¹

- › Adds two cornerstone mines and enhances growth optionality
- › Strengthens strategic positioning in West Africa
- › Immediately accretive on all key financial metrics

BENEFITS FOR SEMAFO SHAREHOLDERS

- › Immediate premium and significant re-rating opportunity
- › Brings diversification and enhances growth optionality
- › Brings benefits of long-term strategic partner with La Mancha

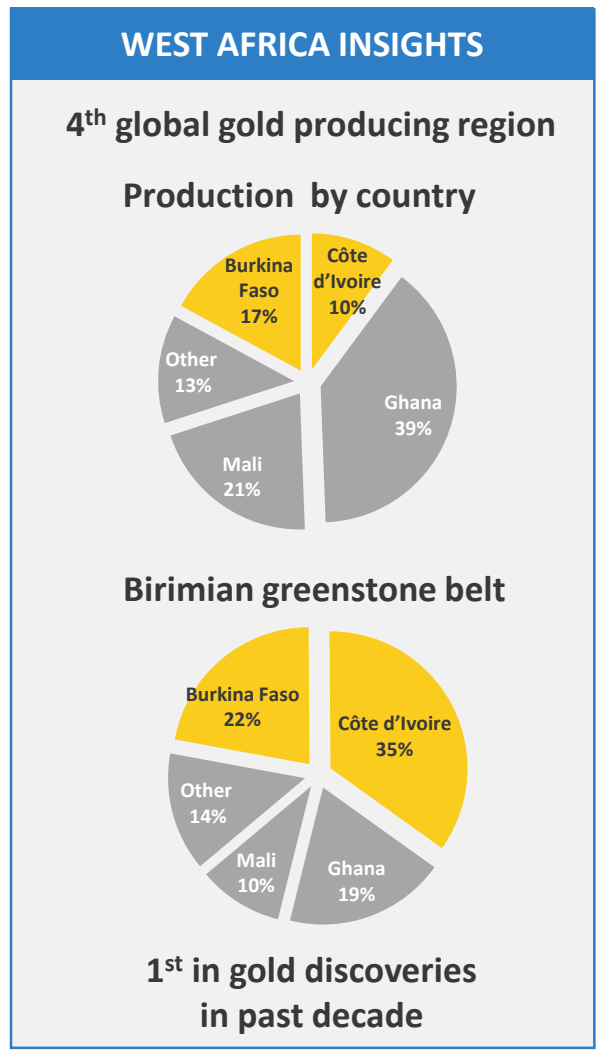

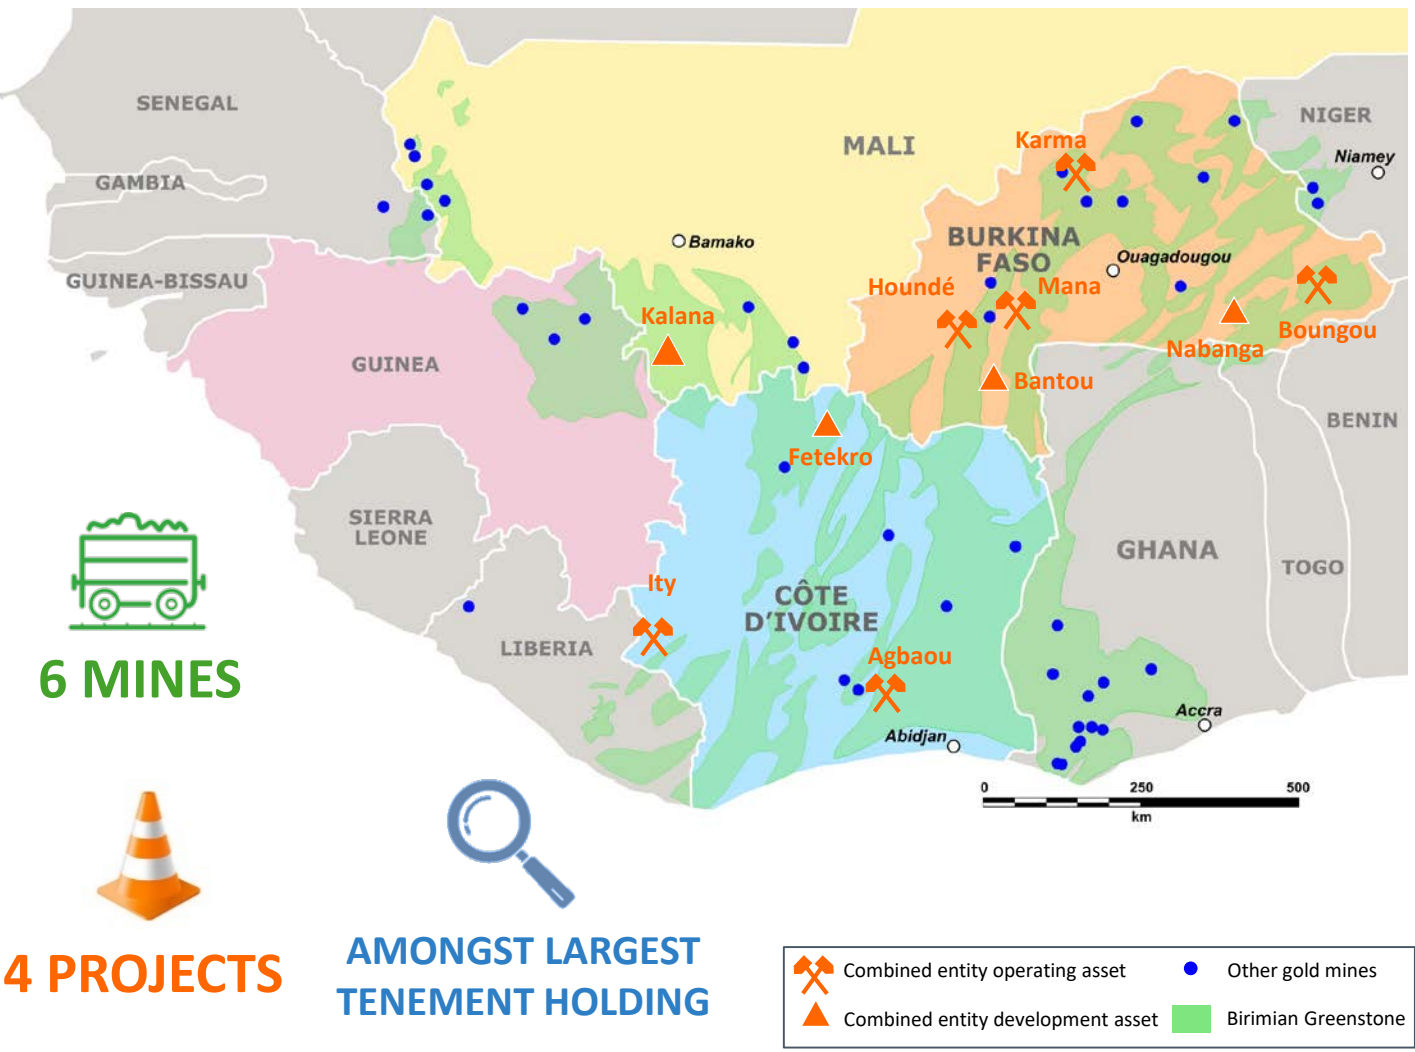

BENEFITS FOR BOTH COMPANIES' SHAREHOLDERS

- › Diversified across 4 cornerstone mines in multiple jurisdictions
- › Strong cash flow profile and sound balance sheet underpin the ability to pursue future organic growth
- › Enhances ability to manage risks
- › Combined company provides much stronger base in dealings with governments and key stakeholders
- › Brings together experienced management teams with complementary skills
- › Strong potential to further optimize the portfolio through exploration and active portfolio management
- › Enhances capital markets profile

1

STRONG Foothold IN A HIGHLY PROSPECTIVE BELT

Endeavour becomes the largest producer in Côte d'Ivoire and Burkina Faso

Source: S&P Global Market Intelligence. West Africa includes: Burkina Faso, Cote d'Ivoire, Ghana, Mali, Senegal, Liberia, and Sierra Leone

1

CREATES THE LARGEST WEST AFRICAN GOLD PRODUCER

Ability to leverage its size to enhance risk management

Annual West African Gold Production

+1Moz
For the combined entity

No. 1
Producer in West Africa

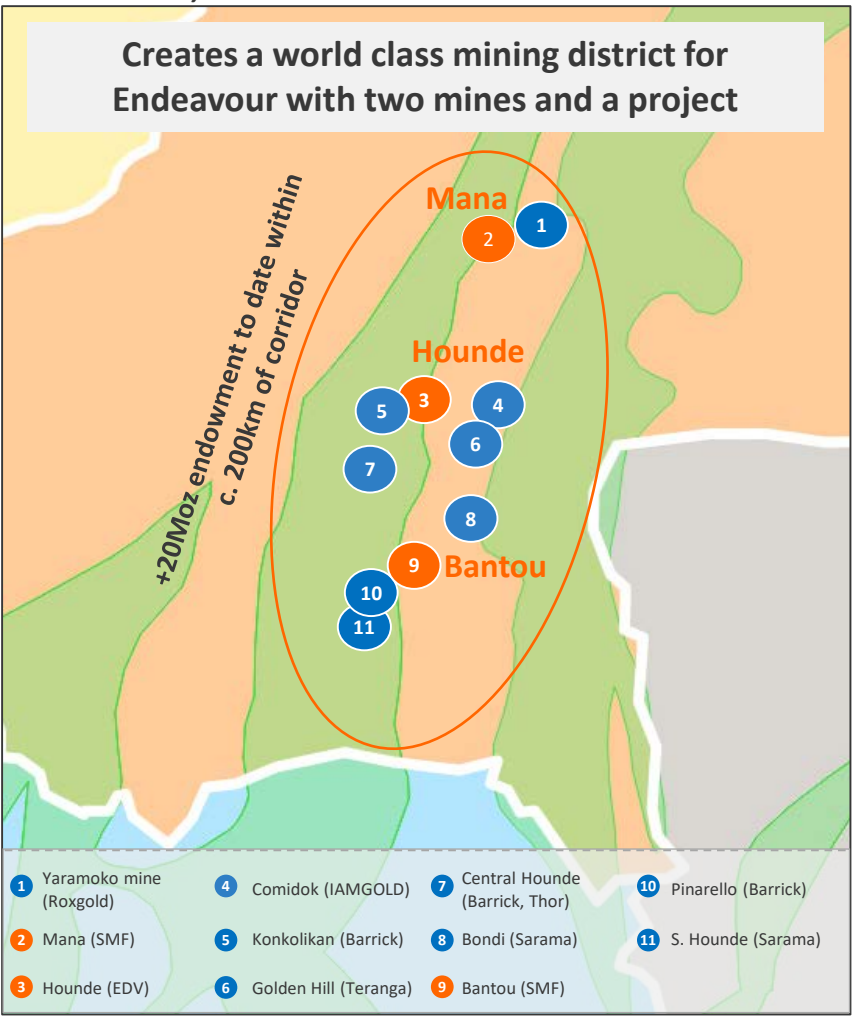

1. 2020 mid-point guidance
2. Based on 100% production and equity method for JV production
3. 2019 Actuals

1

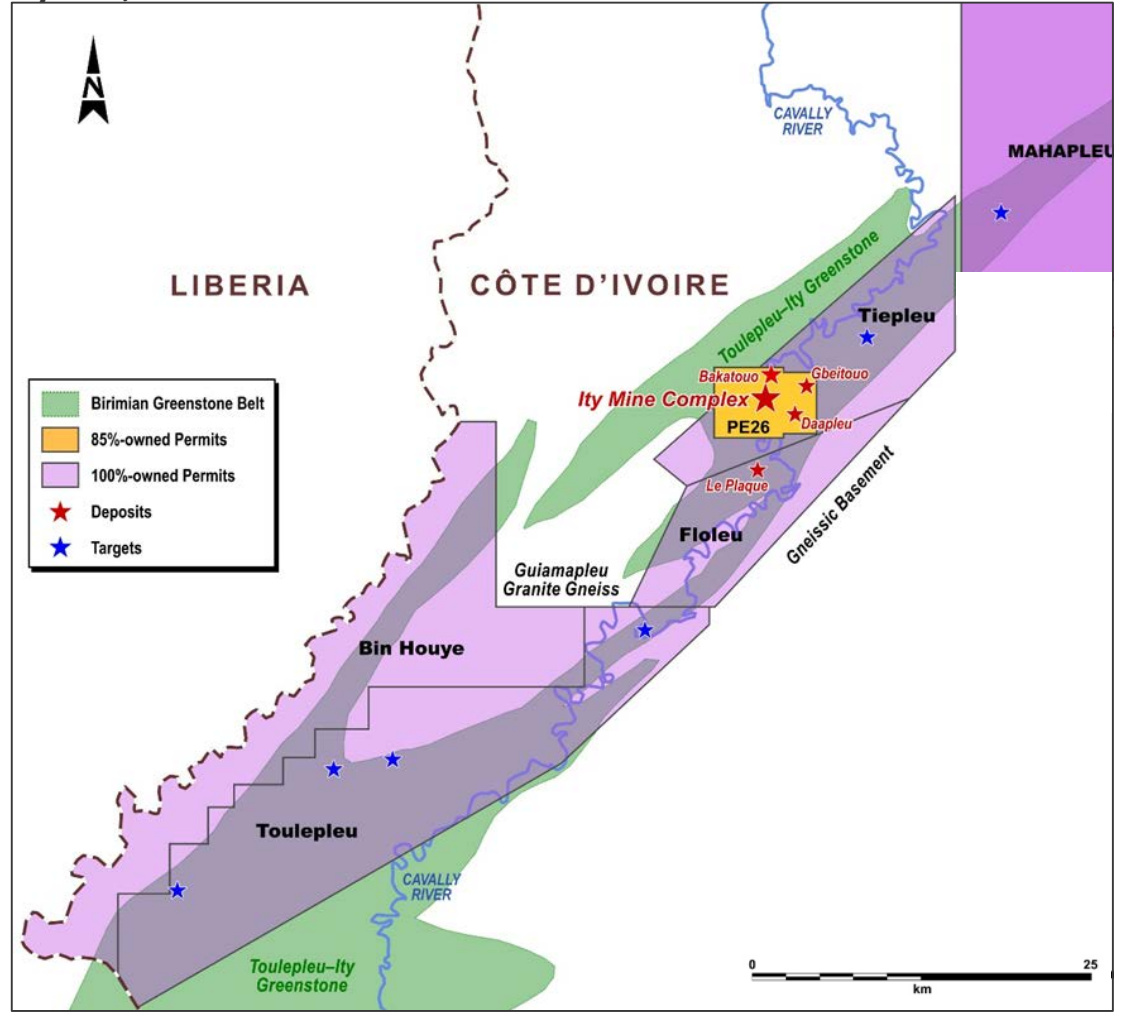

CONSOLIDATES THE HOUNDÉ GREENSTONE BELT

Endeavour will have a strong foothold in two world-class belts

Hounde Belt, Burkina Faso

Ity Belt, Côte d'Ivoire

1

OFFERS SIGNIFICANT SYNERGIES

Synergies across the corporate, regional and asset levels

CORPORATE

- › Creates a pool of extensive management experience and complementary expertise
- › Potential for G&A cost savings in the first year

REGIONAL / IN-COUNTRY

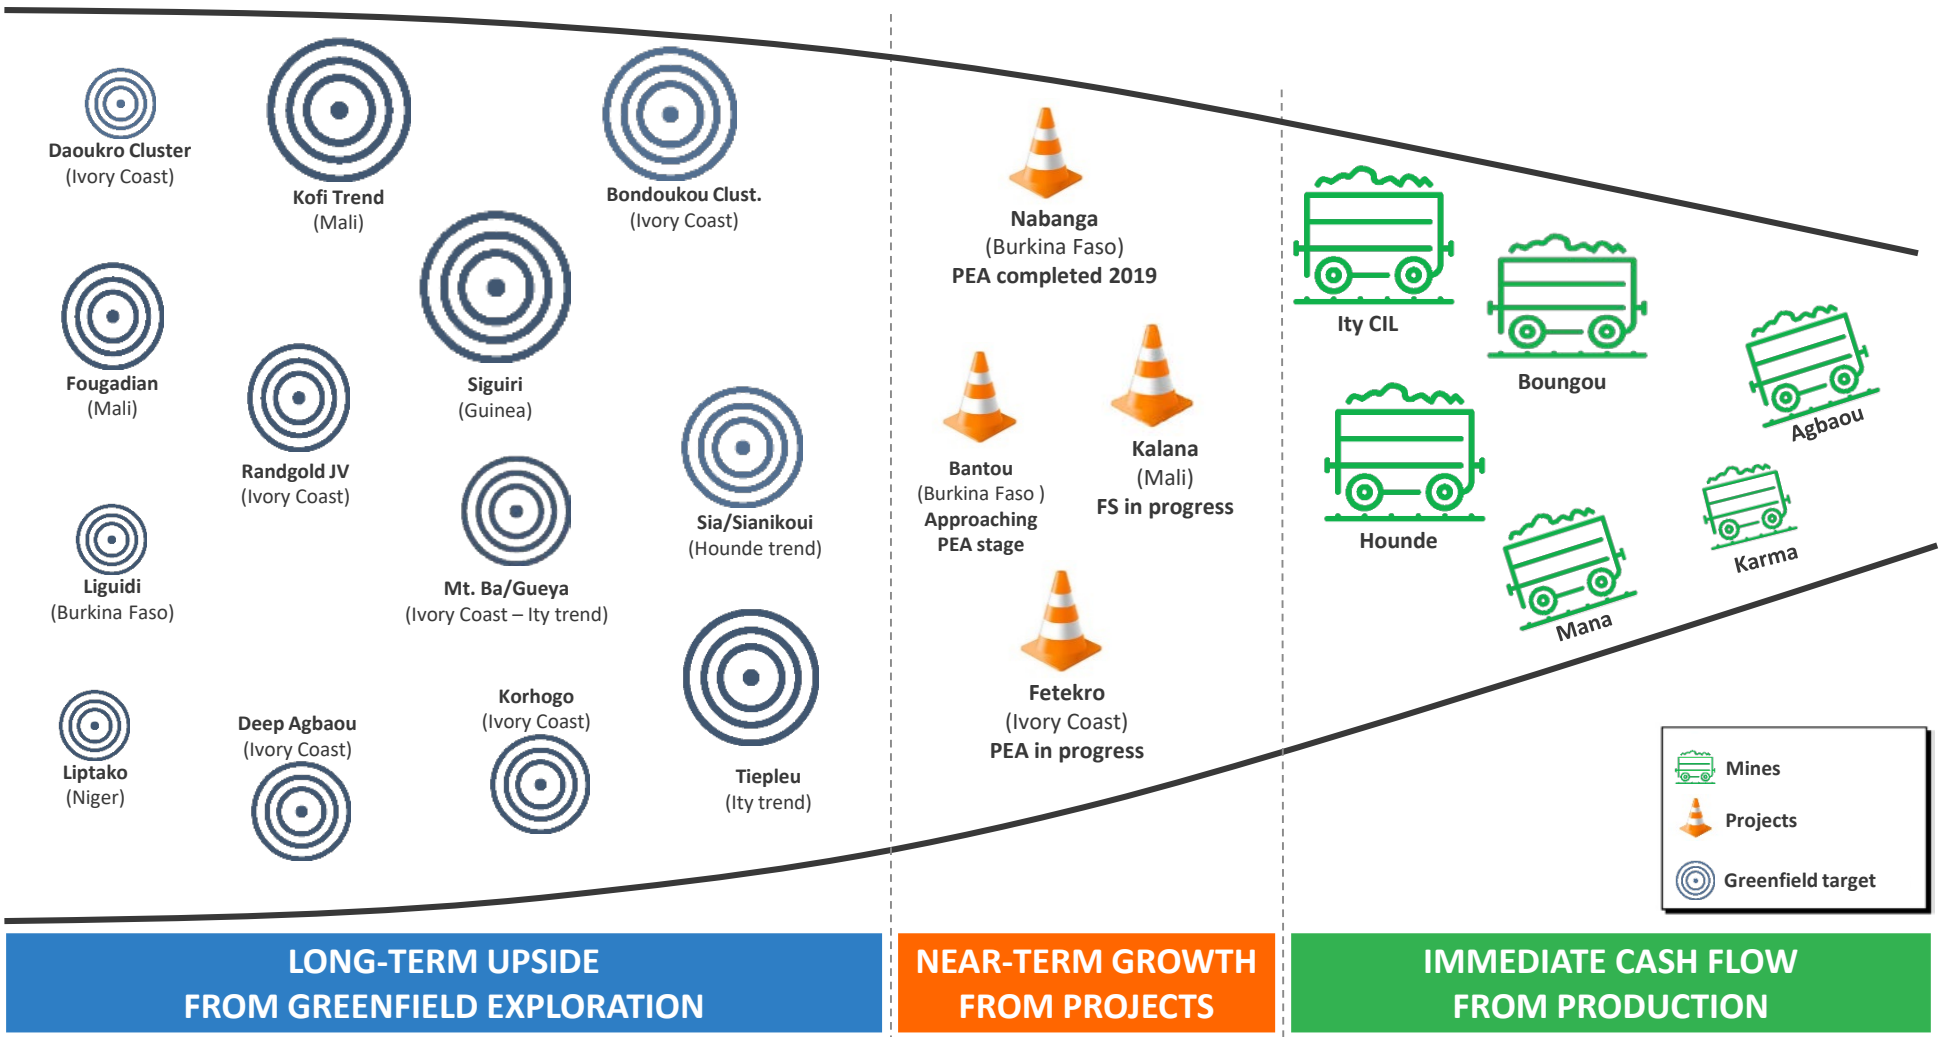

- › Combined operating and financial teams
- › Procurement
- › Transport and logistics
- › Centralized technical services
- › Supply-chain management
- › Enhanced security

MINE SITE

- › Creation of a mining district along the Houndé belt
- › Operating synergies between Hounde and Mana
- › Exploration synergies
- › Potential to share mining equipment
- › Potential to share human resources

2 STRENGTHENED ASSET PORTFOLIO WITH OPTIONALITY

Potential to increase capital allocation efficiency with enhanced pipeline

2

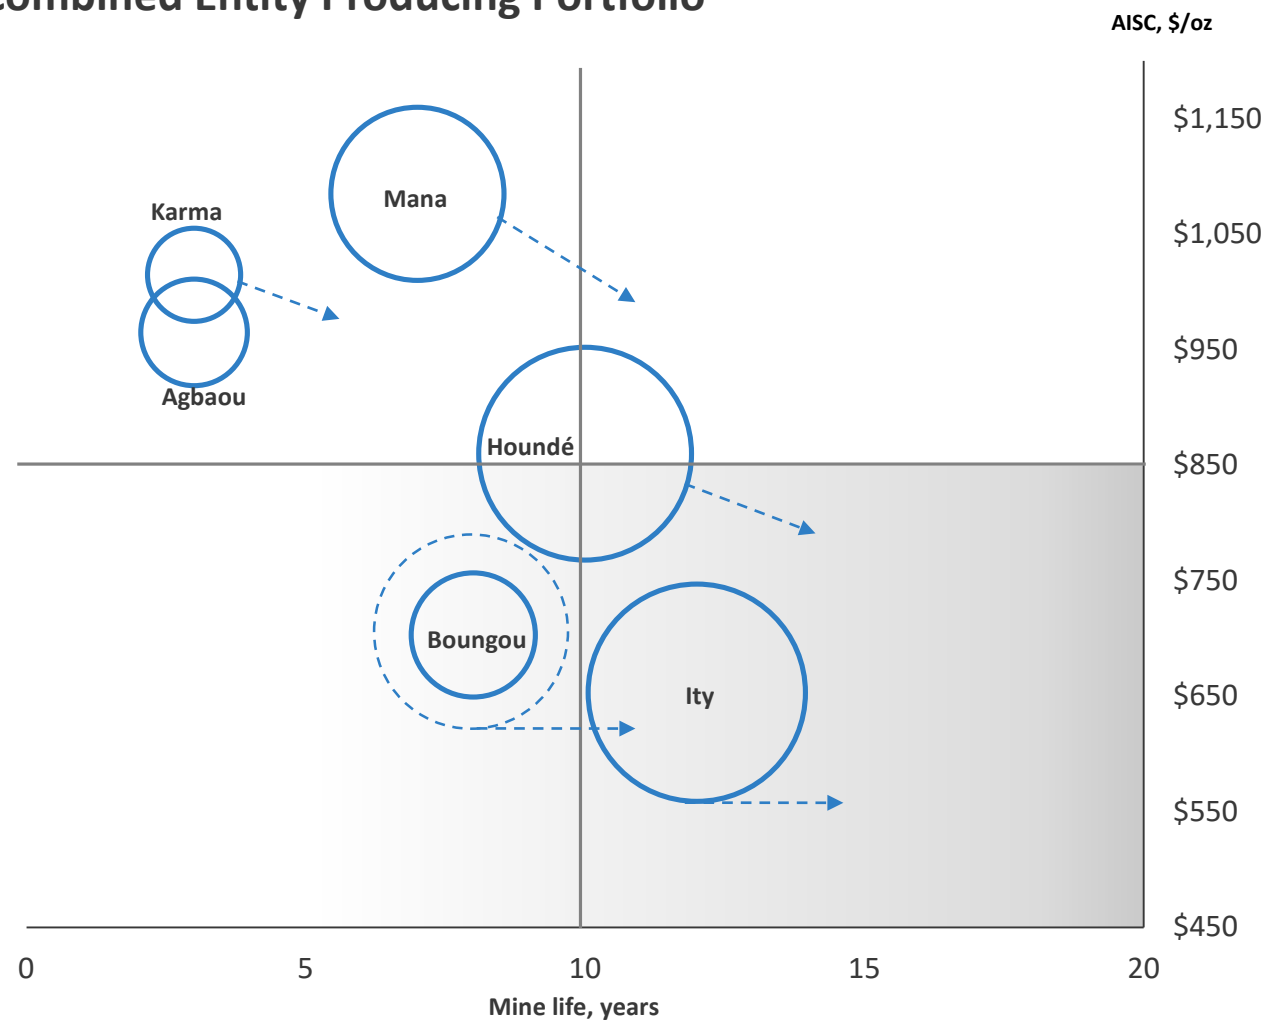

DIVERSIFIED PORTFOLIO WITH 4 CORNERSTONE MINES

Potential to continue to pursue our active portfolio management strategy

Key priorities at 4 cornerstone mines

- > **Bougou** - Restart mining operations by Q4 2020
- > **Mana** - Extend current mine-life through ambitious exploration program
- > **Ity** - Continue exploration program and bring Le Plaque into production
- > **Hounde** - Continue exploration program, bringing Kari Pump into 2019 production and bringing Kari West/Kari Centre into reserves

Combined Entity Producing Portfolio¹

KEY STRATEGIC PRIORITIES POST INTEGRATION

Anchored around 4 strategic pillars

- › Restart Boungou mining operations by Q4 2020 with an enhanced security and operations plan
- › Focus on achieving supply chain synergies

- › Accelerate exploration on the highly promising Fetekro and Bantou projects
- › Complete PEA on Fetekro
- › Complete updated Kalana feasibility study

- › Continue successful exploration program at Ity and Hounde with focus on Le Plaque and Kari area
- › Extend mine-life at Mana and Boungou
- › Ramp-up greenfield exploration

- › Accelerate deleveraging
- › Continue active portfolio management
- › Focus on shareholder returns

CREATION OF A LEADING WEST AFRICAN GOLD PRODUCER

Strong benefits for both sets of shareholders

KEY BENEFITS FOR ALL SHAREHOLDERS

- › Creates top 15 global gold producer with +1 million ounces of gold production per year
- › Creates a leading West African gold producer with six operations and an attractive growth pipeline
- › Strengthens strategic positioning, enhances ability to manage risks, and offers significant synergies
- › Enhances capital market profile with greater ability to fund growth and strong re-rating potential
- › Combined management team leverages the strong skillset of both companies

TIMELINE

2008	2014	2015	2016	2017
First resources published for Karma Project	Mining permit issued	Construction work began	First gold pour in April Endeavour purchased Karma in March	Mine life extended from 8.5 to +10 years Front-end optimization project completed

KALANA PROJECT, MALI

Overview

QUICK FACTS (ON 100% BASIS – Based on Avnel's DFS)

Ownership	80% EDV; 20% Mali government
Status	EDV updating the Avnel FS
M&I Resources (inclusive of reserves)	3.0Moz @ 4.14g/t (as per Avnel)
Reserves	1.96Moz @ 2.80g/t (as per Avnel)
Mining Type	Open Pit
Processing Rate	1.2Mtpa for fresh ore 1.5Mtpa for soft saprolite ore
Strip ratio, w:o	9.9
Tonnes of ore processed, Mt	21.7
Grade processed, Au g/t	2.80
Gold content processed, Koz	1,964
Gold recovery	93%
Production	1,821Moz
Mine life, years	18
Average gold production, koz pa	101 koz
AISC, \$/oz	US\$730/oz
Upfront capital cost, \$m	US\$171m
Sustaining capital cost, \$m	US\$122m
After-tax Project NPV 5%, \$m	US\$321m
After-tax Project IRR, %	50%
Payback, years (undiscounted)	1.1

TIMELINE

MANA, BURKINA FASO

Overview

QUICK FACTS (ON 100% BASIS)

Ownership 90% (10% owned by Republic of Burkina Faso)

Resources (incl. of Reserves)¹ M&I: 58.7Mt @ 2.17 g/t for 4.1Moz
Inferred: 8.9Mt @ 2.66 g/t for 0.8Moz

P&P Reserves¹ 15.0t @ 2.91g/t for 1.4Moz

Processing rate 7,200tpd

Gold Recovery 90% (2019A)

Mine Life +8 years

Mining Type Open pit and Underground

Production ²	2017A	2018A	2019A	2020E
	206koz	181koz	136koz	195koz

AISC ²	2017A	2018A	2019A	2020E
	-\$942/oz	-\$1,056/oz	-\$1,095/oz	-\$1,085/oz

BOUNGOU, BURKINA FASO

Overview

QUICK FACTS (ON 100% BASIS)

Ownership 90% (10% owned by Republic of Burkina Faso)

Resources
(incl. of Reserves)¹ M&I: 16.1Mt @ 3.55g/t for 1.8Moz
Inferred: 1.3Mt @ 2.98g/t for 0.1Moz

P&P Reserves¹ 10.3t @ 3.72g/t for 1.2Moz

Processing rate 4,000tpd - CIP

Gold Recovery 96% (2019A)

Mine life +7 years

Mining Type Open pit

Production²

2018A	64oz
2019A	205koz
2020E	140koz

AISC²

2018A	-\$596/oz
2019A	-\$497/oz
2020E	-\$703/oz
