

## Atos introduces BullSequana Agility, a new hyperconverged solution to leverage the power of multi-cloud

**Paris, France, September 30 2020** – [Atos](#), a global leader in digital transformation, unveils BullSequana Agility, a hyperconverged solution powered by VMware that brings Cloud-like flexibility to on-premises datacenters, providing a fast and reliable path to the Hybrid Cloud.

Migrating mission-critical applications to multi-cloud environments creates challenges ranging from spiralling costs to managing complexity and unpredictability or lack of skilled staff. BullSequana Agility easily consolidates computing, storage and virtualization into one single platform which is managed through a single management interface. It operates as an elastic pool of resources offering multiple benefits:

- Easy to manage, deploy and scale, compared to traditional SAN-based infrastructures. Each node supports many fully protected VMs, with all the nodes managed as a single entity from a unique management interface, vCenter®, removing the need to log on to multiple interfaces.
- Ready for Hybrid Cloud: combined with additional Cloud management, automation and orchestration software, BullSequana Agility can simplify the path to Hybrid Cloud by delivering a common platform to private and public Clouds.
- Predictable performance with high performance storage and reduced latencies.
- Optimized costs with lower CAPEX, no over-provisioning, lower operational expenses and the ability to have a pay-as-you-grow approach.

With the support of GPUs, BullSequana Agility also enables graphic-intensive VDI environments. Businesses work from anywhere thanks to the quick and easy deployment of an efficient virtual desktop environment, and its ability to scale transparently according to their needs.

*"Our long-standing partnership with Atos has successfully delivered 1 million workloads and 500 global cloud projects together. Now with availability of BullSequana Agility powered by VMware, we are positioned to build hyperconverged, multi-cloud-ready datacenters with next-generation virtualization,"* said **Susan Nash, SVP, Strategic Corporate Alliances at VMware.**

*"BullSequana Agility complements Atos' BullSequana S high End server with storage-optimized solutions designed specifically to support our clients on their virtualization journey, addressing their growing need for extreme agility and efficiency at a lower cost,"* said **Emmanuel Le Roux, SVP, Global Business Line Big Data.** *"Benefiting from our deep industry expertise in Cloud migration with VMware's leading*

*virtualization software, BullSequana Agility is a powerful tool for successful Hybrid Cloud adoption.”*

BullSequana Agility provides a balanced hyperconverged infrastructure (HCI) optimized for VMware hyperconverged software (VMware vSphere® and vSAN™) giving enterprises the agility to deploy their infrastructure in a variety of ways and avoid “vendor lock-in”. It combines new entry-level BullSequana SA servers based on the 2nd generation AMD EPYC™ processors, Hybrid or all-flash storage and optional graphics processing units (GPUs) – and virtualizes all, consolidating them into a single manageable portal. BullSequana SA completes the BullSequana S series portfolio.

## **Proven Cloud expertise**

Atos brings significant experience and capability in the development of cloud infrastructure and services. As a VMware Principal Partner, Atos, with more than 3700 certified experts, demonstrates architectural and deployment mastery of data center virtualization and hyperconverged infrastructures. Atos is also positioned as a [Leader in Gartner’s Magic Quadrant](#) for Data Center Outsourcing and Hybrid Infrastructure Managed Services for both Europe (9th consecutive year) and North America (4th consecutive year).

###

## **About Atos**

Atos is a global leader in digital transformation with 110,000 employees in 73 countries and annual revenue of € 12 billion. European number one in Cloud, Cybersecurity and High-Performance Computing, the Group provides end-to-end Orchestrated Hybrid Cloud, Big Data, Business Applications and Digital Workplace solutions. The Group is the Worldwide Information Technology Partner for the Olympic & Paralympic Games and operates under the brands Atos, Atos|Syntel, and Unify. Atos is a SE (Societas Europaea), listed on the CAC40 Paris stock index.

The purpose of Atos is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.
