Announcement no. 49/2024

12 July 2024

Page 1/1

**Ferry – freight:** Total volumes in June 2024 were 5.8% above 2023 and up 0.9% adjusted for the addition of Strait of Gibraltar routes in 2024 and closure of the Calais-Tilbury route in 2023.

North Sea volumes were below 2023 as higher volumes on the Swedish routes were offset by lower temperature controlled volumes, mainly food, between the Continent and the UK. Mediterranean volumes were also in June above 2023 driven by higher volumes on all routes.

Channel volumes continued in June to be above 2023 as did volumes on the Baltic Sea routes.

For the last twelve months 2024-23, the total transported freight lane metres increased 2.8% to 40.2m from 39.1m in 2023-22. The increase was 1.0% adjusted for the addition of Strait of Gibraltar routes and the Calais-Tilbury route closure.

**Ferry – passenger:** The number of passengers in June 2024 was 46.2% above 2023 and up 11.1% adjusted for the addition of the Strait of Gibraltar routes. The adjusted increase continued to be driven mainly by higher Channel volumes. The number of cars were 26.2% above 2023 and up 3.6% adjusted for Strait of Gibraltar.

For the last twelve months 2024-23, the total number of passengers increased 26.2% to 5.5m compared to 4.3m for 2023-22. The increase was 8.6% adjusted for Strait of Gibraltar.
