I. GENERAL INFORMATION

1.1. Accounting period covered by the Report

Consolidated annual report was prepared for the nine months period ended 30 September 2020.

1.2. Key data on the issuer

Name of the company: AUGA group, AB (hereinafter – AUGA group, AB or the Company)

Share capital: EUR 65,950,713.08

Address of headoffice: Konstitucijos av. 21C, Quadrum North, LT-08130, Vilnius, Lithuania

 Telephone:
 +370 5 233 53 40

 Fax:
 +370 5 233 53 45

 E-mail address:
 info@auga.lt

 Website:
 www.auga.lt

Legal entity, joint stock company

Place and date of registration: 25 June 2003, Vilnius

Register code: 126264360

Registrant of the Register of Legal entities: VJ Registry centras

1.3. Main lines of business of the Group

Operations area: Organic agriculture

Main products manufactured: Grain growing and sale, milk production and sale, mushroom growing and sale, end-

consumer packaged goods production and sale.

1.4. The Structure of the Group-

As of 30 September 2020, the consolidated Group (hereinafter the Group) consists of the Company and one hundred thirty-seven subsidiaries (31 December 2019: one hundred thirty-six subsidiaries). Please refer to the financial statements note 3 for a detailed list of the Group companies.

1.5. Agreements with the mediators of securities public circulation

The Company and FMĮ Orion Securities UAB (A. Tumėno st. 4, B building, LT-01109 Vilnius) signed an agreement regarding handling of Shareholders accounts.

1.6. Data about securities traded on regulated markets

The securities of the Company are included in Main List of NASDAQ Vilnius stock exchange (symbol: AUG1L).

Type of shares	Number of shares	Share nominal value (in EUR)	Total share capital (in EUR)	Issue Code ISIN
Ordinary registered shares	227,416,252	0.29	65,950,713.08	LT0000127466

The securities of the Company are also traded in Warsaw stock exchange. Information about the Company's shares trading on the NASDAQ Vilnius.

The Company's shares are also traded on the Warsaw Stock Exchange.

1.7. Information on non-financial reporting

The Company does not prepare interim non-financial reporting information. Annual sustainability report of the Company for the year 2019 is provided as Annex No. 2 of the Company's consolidated annual report for the year ended 31 December 2019.

1.8. Significant post balance sheet events

Post balance sheet events are disclosed in the consolidated financial statements of the Group for the nine months period ended 30 September 2020. See financial statements' note 16 for more details.

II. MANAGEMENT REPORT

2.1. Overall results

During the first nine months of 2020, AUGA group, AB and its subsidiaries (hereinafter - the Group) sales revenue amounted to EUR 62.38 million, a 33% increase compared to the same period of 2019, when it was EUR 47.05 million. Revenue increased in all segments, with highest increases in crop-growing (sales increased by EUR 11.45 million) and mushrooms segments (sales increased by EUR 2.37 million).

The Group's gross profit for the first nine months of 2020 amounted to EUR 11.88 million and was EUR 3.88 million higher compared to the same period of 2019 (gross profit for the first nine months of 2019 - EUR 8.00 million).

Main financial results, million EUR	9 months of 2020	9 months of 2019	9 months of 2018
Revenues	62.38	47.05	42.16
Gross profit (loss)	11.88	8.00	1.76
Gross profit margin	19%	17%	4%
Profit (loss) before taxes	0.44	(1.28)	(4.88)
PBT margin	1%	(3%)	(12%)
EBITDA	15.94	12.43	1.74
EBITDA margin	26%	26%	4%

Variance 2020/2019, %	Variance 2019/2018, %
+33%	+12%
+48%	+355%
+12%	+425%
n/a	+74%
n/a	+75%
+28%	+614%
0%	+650%

2.2. Crop growing segment overview

Results of crop growing segment consist of crop harvest fair value, sales of the previous and current year harvest and agricultural subsidies.

Harvest in the season 2019/2020

The total cultivated land area by the Group amounts to around 39.6 thousand hectares in the season of 2019/2020 and is more than 1 thousand larger than in the season of 2018/2019. In the season of 2019/2020 30.3 thousand hectares have been seeded with cash crops (28.7 thousand in the season of 2018/2019) out of which 11.9 thousand ha are dedicated to wheat, 9.0 thousand ha to legumes and 9.3 thousand ha to other cash crops. The majority – 11.3 thousand ha out of 11.9 thousand ha – of wheat is winter wheat, in a similar proportion to the season of 2018/2019 since winter crops usually have higher yield potential compared to summer alternatives. Forage crops comprise 8.5 thousand ha in the season of 2019/2020 compared to 8.9 thousand ha in 2018/2019 season.

As at 30 September 2020 the Group has finalized harvesting of wheat and legumes. Other cash crops at the reporting date is partly harvested - soya, vegetables and clover will be harvested by the end of October, while oats, rye, barley and sugar beets were harvested by 30 September. For cash crops already harvested as at 30 September 2020 gain (loss) on recognition at fair value of agricultural produce at point of harvest was calculated. Fair value for remaining cultures was estimated using the methodology provided below. It is important to note that at the issue date of this report harvesting of all cash crops except Soya, corn and clover were completed therefore preliminary data was already available for fair value estimation as at 30 September 2020.

ga

(All amounts are in EUR thousand, unless stated otherwise)

2.2. Crop growing segment overview (continued)

The Group estimated total fair value of not yet harvested cash crops as at 30 September 2020 using following formula and assumptions:

Fair value of the crop = Costs incurred + (Cultivated area in ha * forecasted average yield as tons per ha * forecasted grain price per ton – cultivated area in ha * forecasted total cost per ha) * T * (1 - x), where:

- Cost incurred is cost actually incurred for particular crop during the season of 2019/2020 as at 30 September 2020.
- Cultivated area in ha is an area of particular crop seeded and expected to be harvested.
- Forecasted average yield in tons per ha.
- Forecasted grain price per ton. Contracted average sales prices of 2020 were used for fair value estimation. At the issue date of this report, 93% of current year harvest is already contracted.
- Forecasted total cost per ha. Current level of accumulated costs adjusted by average historical cost levels of 2018 and 2019 were used for fair value estimation. It is expected that costs will remain in similar level as in historical periods.
- T is a time portion, spanning from the sowing date until the forecasted harvest date. It is estimated that the harvesting of all cash crops will be completed by the end of October, therefore completion percentage as at 30 September 2020 were around 84%. Completion percentage for the next season's clover was 38% as the lifespan of clover is 16 months and harvest date is set at 30 September 2021.
- X is an adjustment parameter for possible unexpected negative effects to the harvest. 10% was used in fair value estimations as at 30 September 2020. Adjustment parameter of 30% was used for the next season's clover.

The estimated fair value of cash crops as at 30 September 2020 is higher than the costs incurred by EUR 7.93 million. It should be noted that due to mild winter and significant biological transformation at the end of 2019, EUR 1.45 million gain from fair value of winter crops was already recognized as at 31 December 2019. Thus, the gain on changes in fair value of biological assets accounted for in the first nine months of 2020 amounts to EUR 6.48 million compared to EUR 3.87 million in the first nine months of 2019.

Despite the improved results in 2020, the Group believes that the potential of this year's harvest was higher. Weather conditions in the season 2019/2020 were rather favorable compared to previous season. However, in the season of 2019/2020 the quality of wheat harvest was lower than usual which led to decreased average price of wheat compared to previous seasons. In addition, prices of most organic grain decreased in the market and were lower than in previous year. Yields of most of the crops increased, however the yield potential was not realized for few of the crops – wheat and sugar beets.

It should be noted that the fair value of forage crop even at its point of harvest is measured at production cost incurred on forage crop. In other words, forage crop production cost is used as a measure of the fair value of that forage crop since there is no active market for forage crops and there is no reliable data to calculate market price of the forage crops. Due to this the net result on revaluation of forage crops is equal to zero.

Tables below present actual information on fully harvested cultures group by 30 September – wheat and legumes. Since the harvesting of other cash crops is not fully completed at the reporting date, actual information on other cash crops will be provided in annual results.

Table below provides harvested land plot of wheat and legumes in the current and past two seasons. Land plot of wheat and legumes slightly increased in the season of 2019/2020 compared to previous period and constituted 68% of all cash crops land plot.

Harvested land plot by culture group, HA	9 months of 2020	9 months of 2019	9 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	11,896	11,503	8,852	+3%	+30%
Legumes	9,035	8,039	10,682	+11%	-25%

Comparison of wheat and legumes average cost per hectare of land is provided in the table below.

Cost per 1 ha cultivated land, EUR/ha	9 months of 2020	9 months of 2019	9 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	824	925	881	-11%	+5%
Legumes	839	830	790	+1%	+5%

Cost of legumes remained at the similar level in the season of 2019/2020 compared to previous season, while the average cost of wheat has decreased by 11%. Cost of legumes remained at the same level as in previous year due to increased harvest transportation, cleaning and drying cost as the harvest amount in 2020 significantly increased compared to 2019. Cost of wheat growing have slightly decreased in 2020 due to reduced land tillage cost. As wheat constitute around third of all cash crops in Group's crops structure, decreasing wheat growing costs is another important milestone in improving crop growing segment results.

(All amounts are in EUR thousand, unless stated otherwise)

2.2. Crop growing segment overview (continued)

Table below depicts variance between expected yields and actual yields for wheat and legume in the season of 2019/2020. Wheat yield in 2020 was 4.1 t/ha which is similar to 4.2 t/ha in 2019. The Group has anticipated a higher yield this year. Legumes yield in 2020 increased compared to previous year from 1,7 t/ha to 2,7 t/ha. Increase in legumes yield was lower by 10% than expected for the season of 2019/2020.

Crop type	Yield used for revaluation of biological asset for season of 2019/2020	Actual result for the season of 2019/2020	Variance, %
Wheat	4,3	4,1	-4%
Legumes	3,0	2,7	-10%

As can be seen from the data presented, Group's average wheat and legumes yields are close to the average yields achieved by non-organic farms in Lithuania. For implementation of the Group's long-term strategic goals it is very important to achieve organic agriculture crop yields as close as possible to country's average conventional agriculture yields.

NOTE: The data of LT organic farms for 2020 has not yet been published, the data of conventional farms in the LT is preliminary. Reference: Lithuanian Statistics Department, data of the survey of the activities of Lithuanian agricultural producers included in the Farm Accountancy Data Network (FADN), the Group's data.

According to preliminary data, most of the cash crops yields in 2020 will be higher than in previous year. Final yields of all cash crops will be provided in annual financial statements.

Table below depicts comparison of wheat and legumes prices at which the harvest was evaluated (at fair value) in the seasons of 2019/2020, 2018/2019 and 2017/2018. It should be noted that at the time of the publication of the financial statements for the nine months of 2020, significant part of the 2019/2020 season harvest has already been sold or contracted at fixed prices, therefore fair value of the majority of crops was estimated based on average contract prices.

Average price of 1 tonne of crop, eliminating sales costs, EUR/t	9 months of 2020	9 months of 2019	9 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Wheat	208	262	268	-21%	-2%
Legumes	354	359	354	-2%	+1%

As can be seen from the data above, the price of 1 tonne of wheat in the season of 2019/2020 decreased by 21% compared to previous season. Decrease in wheat prices was caused by 2 reasons: price decrease in the market and unusual large amount of feed quality wheat in the mix. In the season of 2019/2020 the quality of harvested wheat was worse compared to previous seasons: in the season of 2019/2020 wheat for feed (lower quality and price) proportion in the whole harvest reached 75% compared to the season of 2018/2019 it was – 35%. As the company had much more feed wheat than expected, more wheat had to be sold on the spot – which decreased the average wheat price even more.

The prices of legumes slightly decreased in the season of 2019/2020, however it remained stable over the past few years.

Variance

2.2. Crop growing segment overview (continued)

Table below provide information on gain (loss) per hectare for wheat and legumes.

Gain (loss) on revaluation of agricultural produce at point of harvest, EUR/ha	9 months of 2020	9 months of 2019	9 months of 2018	1	Variance 2020/2019
Wheat	29	177	-154		-8
Legumes	130	-224	-266		+15

-83% n/a +158% +16%
+158% +16%

Average gain per 1 hectare from wheat significantly decreased in the season of 2019/2020 compared to previous season due to decreased market prices and lower quality of the harvest. However, the Group succeeded in cutting wheat growing costs, which helped to diminish negative impact of price and quality decrease of wheat. Legumes result in the season of 2019/2020 were significantly better compared to previous seasons. Better results were achieved due to increased yield. However, the Group believes that the yield potential were around 10% higher for legumes and expects even better results in the future.

Crop growing segment sales results

Crop growing segment's sales revenue for the first nine months of 2020 amounted to EUR 27.89 million compared to EUR 16.45 million for the same period in 2019 (70% increase). By the end of first nine months of 2020 all harvest from the 2018/219 season was sold. In addition, the Group has sold around 43% of its current year harvest. Due to earlier harvesting of sugar beets, sales of sugar beets were recognized in September and not in October as in previous year. If sales of sugar beets were eliminated, sales in 2020 increased by 30% compared to previous year. Group's sales in the first nine months of 2020 increased due to larger quantities sold as the harvest quantities are increasing year-over-year.

	9 months of 2020	9 months of 2019	9 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Sales revenue, EUR million	27.89	16.45	15.59	+70%	+5%
Cost of sales, EUR million	28.81	17.73	16.14	+63%	+10%
Inventory write-offs, EUR million	0.97	0.73	0.75	+33%	-2%
Result of sales of agricultural produce, EUR million	(1.89)	(2.01)	(1.29)	+6%	-56%

Crop growing segment's cost of sales for the first nine months of 2020 amounted to EUR 28.81 million versus EUR 17.73 million in 2019. Cost of sales increase was 7% lower compared to revenue increase percentage. Total agricultural produce inventory write-offs and impairment during first nine months of 2020 amounted to EUR 0.97 million compared to EUR 0.73 million during the nine months of 2019. The increase in write-offs in 2020 was related with one-off events. Even though crops sales quantities increased, prices of commodities were dropping down in the first nine months of 2020, therefore total sales result of agricultural produce was EUR 1.89 million loss for the first nine months of 2020 and EUR 2.01 million loss for the same period in 2019.

Agricultural subsidies and gross profit of the crop growing segment

As at 30 September 2020 the Group has reclassified the subsidies related to grasslands and pastures from agricultural to dairy segment to have a better representation of the segments' results. The reclassification was performed in comparable period as well. The performed reclassification does not affect any other disclosures or results in general.

Total amount of agricultural subsidies accrued during the first nine months of 2020 was EUR 5.57 million compared to EUR 5.27 million during the same period in 2019. The increase is related to a higher number of hectares seeded and declared for season 2020. The accrual amount is based on the preliminary calculation for subsidies, based on the most recent information on the government subsidies programmes available. The Group does not expect to be sanctioned in 2020, as organic farming requirements, for which Group was sanctioned in 2019, have been removed for 2020.

Gross profit of crop growing segment including result of sales of agricultural produce, gain (loss) on changes in fair value of biological assets and agricultural subsidies, amounted to EUR 10.16 million in the first nine months of 2020 compared to EUR 7.13 million the year earlier. It should be noted that EUR 1.45 million of fair value change of 2019/2020 season's winter crops was recognized in 2019 due to a significant biological transformation unusual for the winter season. If fair value change of winter crops was recognized in 2020, gross profit of agriculture segment as at 30 September 2020 would amount to EUR 11.61 million.

2.2. Crop growing segment overview (continued)

	9 months of 2020	9 months of 2019	9 months of 2018	Variance 2020/2019 %	Variance 2019/2018, %
Gain (loss) on revaluation of biological assets (crops) and agricultural produce at point of harvest recognized in reporting period, EUR million	6.48	3.87	(3.79)	+67%	n/a
Total fair value gain (loss) on revaluation of biological assets, EUR million	7.93	3.87	(3.79)	+105%	n/a
Result of sales of agricultural produce, EUR million	(1.89)	(2.01)	(1.29)	-2%	+56%
Subsidies, EUR million	5.57	5.27	5.43	+6%	-3%
Gross profit, EUR million	10.16	7.13	0.35	+42%	+1,957%

2.3. Dairy segment overview

Dairy segment sales revenue for the first nine months of 2020 reached EUR 8.17 million and was around 7% higher than in the same period a year earlier. Increased total tonnage of milk sold and increased share of organic milk sales both contributed to sales revenue increase. Total amount of milk sold increased by 4% - from 18.59 thousand tons (or 20.03 kg per cow per day) in the first nine months of 2019 to 19.31 thousand tons (or 21.38 kg per cow per day) in the first nine months of 2020. Milk yields dynamics for the past three years are provided in the graph below.

Decrease in milk yields in the third quarter of 2020 is seasonal drop directly related to the change feed regime from farms to pasture and other conditions that affect the productivity of milking cows. Despite the seasonal decrease the milk yields are still better than in previous years.

Group's organic milk price decreased by 1.3 % in the first nine months of 2020 and was EUR 400 per ton (in the first nine months of 2019 price of organic milk was EUR 406 per ton). In first nine months of 2020 average price of milk sold was around EUR 395 per ton or 4% higher comparing to the same period last year when it was EUR 380 per ton. Average milk price increased due to larger share of organic milk sold.

2.3. Dairy segment overview (overview)

	9 months of 2020	9 months of 2019	9 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Total quantity of products sold, t	19.82	19.14	17.54	+4%	+9%
Milk, t	19.82	18.59	16.93	+4%	+10%
Cattle, t	0.52	0.54	0.61	-5%	-10%
Revenue, EUR million	8.17	7.63	6.53	+7%	+17%
Milk, EUR million	7.62	7.06	5.88	+8%	+20%
Cattle, EUR million	0.55	0.56	0.65	-3%	-13%
Cost of sales, EUR million	7.79	7.64	7.33	+2%	+4%
Milk, EUR million	7.24	7.07	6.68	+2%	+6%
Cattle, EUR million	0.55	0.56	0.65	-3%	-13%
Revaluation of biological assets, EUR million	(2.30)	(2.31)	(1.54)	0%	-50%
Subsidies, EUR million	1.96	1.66	1.862	+18%	-10%
Gross profit, EUR million	0.04	(0.65)	(0.48)	n/a	+36%

Share of milk sold at organic production prices reached 93% in first nine months of 2020 which is significantly higher compared to 69% during same period in 2019. As it can be seen from the graph below, the share of milk sold at organic prices has been steadily growing from the beginning of 2019 and there have been no significant fluctuations in the share of organic milk sold.

Dairy segment's cost of sales amounted to EUR 7.79 million during the first nine months of 2020 compared to EUR 7.64 million during the same period last year (2% increase). Milk cost increased due to increased feeds cost as the yields of forage crops were adversely impacted by draught in the season of 2018/2019. However, cost increase was slower than sales increase as milk yields continued to grow. The Group is constantly improving its feed quality and structure which allows the group to gain better yields at a similar cost level.

During the first nine months of 2020 the loss of EUR 2.30 million was incurred on revaluation of biological assets (animal herd). In comparison EUR 2.31 million loss was incurred during the same period a year earlier. The Group is seeking to increase milk yields per cow, which would result in increased production quantities and reduced costs. In order to achieve higher milk yields, and the quality of cow herd in general, aged and not productive cows are substituted with younger heifers. Write-offs of aged cows are represented in the revaluation of biological assets.

As at 30 September 2020 the Group has reclassified the subsidies related to grasslands and pastures from agricultural to dairy segment to have a better representation of the segments' results. The reclassification was performed in both periods, therefore, the results between periods are comparable and respective reclassification does not affect any other disclosures or results at large.

As the milk yields and gross result from milk sales increase, while costs remain at a similar level, gross result of dairy segment continues to improve compared to the previous year. The gross profit of dairy segment amounted to EUR 0.04 million in the first nine months of 2020 (gross loss of EUR 0.65 million was reported in the first nine months of 2019).

2.4. Mushroom segment overview

The revenue of mushroom growing segment was EUR 22.93 million in the first nine months of 2020, around EUR 1.79 million or 8% higher compared to the same period in 2019 when revenue was EUR 21.14 million. Revenue from mushroom sales increased by EUR 2.26 million while revenue from mushroom seedbed sales decreased by EUR 0.46 million.

Mushroom sales revenue increased due to higher volume of sales – 9.65 thousand tonnes of mushrooms were sold during first nine months of 2020 compared to 9,01 thousand tonnes a year earlier (7% increase). The increase was mostly related to better mushroom yields compared to previous period

During the first nine months of 2020, share of organic mushrooms sold was around 7.6% of total volume of mushrooms sold comparing to 7.3 % during the same period in 2019.

In the first nine months of 2020, average non-organic and organic mushrooms sales price increased by around 4% compared to the same period in 2019. The average price of 1 tonne of mushrooms sold was 2,160 EUR/tonne in the first nine months of 2020 (2,071 EUR/tonne in the first nine months of 2019). The average mushroom price increased due to larger sales of packaged mushrooms and resale of forest mushrooms. However due unusual high yields of wild forest mushrooms in local forests, the demand for fresh mushrooms decreased and the group had to sell bigger part of mushrooms for processing (with lower price).

	9 months of 2020	9 months of 2019	9 months of 2018	Variance 2020/2019, %	Variance 2019/2018, %
Sold mushrooms, t	9,652	9,013	9,105	+7%	-1%
Average price (Eur/t)	2,231	2,107	2,147	+6%	-2%
Total revenue, EUR million	22.93	21.14	19.03	+8%	+11%
Mushroom sales revenue, EUR million	21.53	19.27	17.27	+12%	+12%
Compost sales revenue, EUR million	1.39	1.86	1.75	-25%	+6%
Cost of sale, EUR million	21.55	19.63	17.21	+10%	+14%
Cost of mushrooms sold, EUR million	20.30	17.86	15.62	+14%	+14%
Cost of compost sold, EUR million	1.25	1.76	1.59	-29%	+11%
Gross profit, EUR million	1.37	1.50	1.82	-9%	-17%

The total cost of sales of the mushroom growing segment amounted to EUR 21.55 million in the first nine months of 2020 and was EUR 1.92 million higher compared to the same period in 2019 when it was EUR 19.63 million. Average cost of 1 tonne of mushrooms sold increased from 1,982 EUR/tonne to 2,103 EUR/tonne. Cost of mushrooms mainly increased due to higher sales of packaged mushrooms.

Gross profit of mushroom growing segment in the first nine months of 2020 decreased by 9% to EUR 1.37 million compared to EUR 1.50 million in the first nine months of 2019. The decrease in gross profit is mainly related with market changes and fluctuations in current environment caused by global pandemic.

2.5. End-consumer packaged goods segment

Total revenue of end-consumer packaged goods segment amounted to EUR 3.36 million during the first nine months of 2020 compared to EUR 1.83 million a year earlier. Significant increase in end-consumer segment sales has been impacted by higher demand in both local and foreign markets. While COVID-19 pandemic has slowed the launch of new products, the demand for long shelf-life products compensated the deceleration. Moreover, the Group expanded its exports markets, which positively affected sales.

	9 months of 2020	9 months of 2019	9 months of 2018
Revenue, EUR million	3.36	1.83	1.00
Cost of goods sold, EUR million	3.07	1.82	0.94
Gross profit, EUR million	0.29	0.01	0.06

+84%	+83%
+60%	+94%
+2,900%	-83%

ga

(All amounts are in EUR thousand, unless stated otherwise)

2.5. End-consumer packaged goods segment (continued)

As at 28 May 2020 the Group has acquired full control of Grybai LT, KB which produces and sells end-consumer goods. Grybai LT, KB is included in the Group's consolidated financial statements as of 01 June 2020. Acquisition of Grybai LT, KB should improve the results of the end-consumer goods segment and a more material effect should be visible in the upcoming periods. Grybai LT, KB contribution to consolidated sales revenue in the first nine months of 2020 amounted to EUR 0.24 million.

Table below provide information on end-consumer goods sales share for main countries and increase in sales in respective country,

	S	hare of total sales, '	Increase in sales, %		
Country	9 months of 2020	9 months of 2019	9 months of 2018	2020/2019	2019/2018
Lithuania	32%	52%	64%	+12%	+71%
USA	27%	12%	0%	+320%	n/a
Sweden	9%	3%	0%	+361%	n/a
Japan	5%	4%	0%	129%	n/a
Latvia	5%	5%	3%	+89%	+281%
Other	22%	24%	33%	125%	n/a

During the first nine months of 2020 the Group have expanded its exports markets and currently distributes its goods to 28 countries compared to 21 country in the same period in 2019. Sales increased in both local and foreign markets, however, due to expanded export markets share of local sales in total sales decreased. Increased sales to the USA by 75% had the highest impact to increased sales in the FMCG segment.

Preserved products, especially ready-to-eat organic soups, remain to be the main products in the segment. Revenues structure from the sale of the end consumer goods as at 30 September 2020 is depicted in the chart below.

Cost of sales were EUR 3,07 million for the first nine months of 2020 compared to EUR 1.82 million for the same period in 2019. In the first nine months of 2020, gross profit of the segment amounted to EUR 0.29 million (gross profit of EUR 0.01 million reported for the same period in 2019).

2.6. Operating expenses

The Group's operating expenses for the first nine months of 2020 amounted to EUR 7.26 million, while in 2019 operating expenses were around EUR 6.83 million. The increase is mostly related to the implementation of employee health insurance in the Group. Also, in the first nine months of 2020 the office administration expenses have increased.

2.7. COVID-19 pandemic effect

In light of the COVID-19 pandemic's effects on the business environment, measures have been taken to evaluate the most significant coronavirus-related risks throughout the Group's key business units, namely crop growing, dairy production, mushroom growing and fast-moving consumer goods (FMCG).

AUGA GROUP, AB Konstitucijos av. 21C, Quadrum North, LT-08130, Vilnius, Lithuania CONSOLIDATED FINANCIAL STATEMENTS FOR 9 MONTHS PERIOD ENDED 30 SEPTEMBER 2020 (All amounts are in EUR thousand, unless stated otherwise)

2.7. COVID-19 pandemic effect (continued)

Additional measures have been taken to ensure the safety of the Group's employees and the continuation of its daily activities. With additional measures applied, all Group companies are operating at required capacities.

At the market level, agricultural production companies stand out as some of the least affected at this point of the crisis, given the nature of their produce and increasing demand from households. However, the management is considering all the possible threats to the Group's key business areas and is working to alleviate their effects.

Crop growing

The Company's management is not seeing any significant changes in the crop market, especially since all obligations are executed according to existing agreements. However, the Group could face a labour shortage if the numbers of infected or quarantined persons were to rise dramatically. Nevertheless, the management is ready to mitigate this risk with options provided by temporary employment, given that interest on the labour side is growing.

Dairy

Milk production is running at regular capacity and there are no problems with product demand. It is delivered to the local market (the Baltic States and Poland) and mainly used for fresh consumer products. The management is not seeing at present nor does it forecast a decrease of demand in this segment.

Mushroom growing

The biggest threat in the mushroom growing segment is related to production, given the labour intensity of the production operations. Therefore, the Company is implementing various measures to ensure the safety of employees and to minimize contact between them. As with crop growing, the Group could face a shortage of labour if the number of infected or quarantined persons were to increase dramatically. Nevertheless, the management is ready to address this matter through temporary employment.

Several business areas of the segment are at least partly negatively affected by the pandemic:

- sales to wholesalers working with HoReCa had decreased
- sales of mushroom seedbeds to Russia had decreased
- demand for packaged mushrooms is growing
- market volatility had increased which makes it challenging to sell the mushrooms at fresh mushroom price (higher part of the mushrooms are sold for processing with lower price)

Though the effect is not significant, the management is working to increase customer/market base and sell mushrooms in fresh market. In terms of the status of mushroom operations, production is working at regular capacity.

Under the current circumstances, the long-term goal of the business unit to increase the proportion of organic product sales could be delayed due to uncertainties in the Group's main markets.

FMCG

The management is observing growing demand for long shelf-life packaged products (dairy products, soups, etc.) across all markets. In terms of the associated risks in this segment, these are mainly related to possible interruptions in the supply chain of raw materials that the Group cannot produce in-house.

^{*} ROU assets – Right-of-use assets

AUGA GROUP, AB
Konstitucijos av. 21C, Quadrum North, LT-08130, Vilnius, Lithuania
CONSOLIDATED FINANCIAL STATEMENTS
FOR 9 MONTHS PERIOD ENDED 30 SEPTEMBER 2020
(All amounts are in EUR thousand, unless stated otherwise)

VI. EXPLANATORY NOTES

1. Basis of the preparation

The accompanying interim financial information for the 9-month period ended 30 September 2020, has been prepared in accordance with IAS 34, 'Interim financial reporting'. The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 December 2019, as described in those annual financial statements. This financial information should be read in conjunction with the interim financial information for 9-month period ended 30 September 2019 and the balance sheet as of 31 December 2019 which have been prepared in accordance with IFRS as adopted by the EU.

The presentation currency is euro (EUR). The financial statements are presented in thousands of euro, unless indicated otherwise. Financial statements for the 9-month period ended 30 September 2020 and 30 September 2019 are not audited. Financial statements for the year ended 31 December 2019 are audited by the external auditor UAB PriceWaterhouseCoopers.

Critical accounting estimates and assumptions

The preparation of financial information in conformity with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial information, are disclosed below. Critical accounting estimates and assumptions remain the same as disclosed in the audited annual financial statements for period ended 31 December 2019.

IFRS 16, Leases

Based on IFRS 16, the group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities as at 1 January 2019 was 6%. The incremental borrowing remained unchanged throughout 2019 and 2020.

In applying IFRS 16, the group has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- reliance on previous assessments on whether leases are onerous;
- the accounting for operating leases with a remaining lease term of less than 12 months as short-term leases (which were recognized as expense on a straight-line basis);
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application;
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

Revaluation of biological assets (crops)

The Group estimates the total fair value of crops using following formula and assumptions:

Fair value of the crop = Costs incurred + (Cultivated area in ha * forecasted average yield as tons per ha * forecasted grain price per ton – cultivated area in ha * forecasted total cost per ha) * T * (1 - x), where:

- Cost incurred is cost actually incurred for particular crop during the season till the reporting date.
- Cultivated area in ha is an area of particular crop seeded and expected to be harvested.
- Forecasted average yield tons per ha.
- Forecasted grain price per ton. contracted average sales prices are used for fair value estimation.
- Forecasted total cost per ha. Average historical cost levels are used for fair value estimation
- T is a time portion, spanning from the sowing date to the forecasted harvest date
- X is an adjustment parameter for possible unexpected negative effects to the harvest.

Revaluation of biological assets (livestock)

Due to the specifics of the agricultural market, fair value of milking cows cannot be determined by using comparable market prices method, as such biological assets in areas where the Group operates are not traded on active markets which could enable the use of market value. The Group values cows using the discounted cash flow method. The model uses projected revenues from milk sales over the remaining useful life of each animal using a forecasted milk price. Milk price forecast is the average milk price assumption of the following 3 years was. Current cow herd has an estimated working life of 1 to 3 years. At the end of the working period the cow is estimated to be sold for meat. The forecasted revenues are reduced with costs directly related to herd growing (feeds, medicines, employee salaries and other). The free cash-flow is discounted with post tax WACC.

AUGA GROUP, AB
Konstitucijos av. 21C, Quadrum North, LT-08130, Vilnius, Lithuania
CONSOLIDATED FINANCIAL STATEMENTS
FOR 9 MONTHS PERIOD ENDED 30 SEPTEMBER 2020

(All amounts are in EUR thousand, unless stated otherwise)

Revaluation of biological assets (livestock) (continued)

For valuation of other livestock the Group calculates the fair value by taking the average price of meat per kilo. For young bulls and heifers, the value of livestock is determined by using the market values of meat (different for different groups of animals) and multiplying the price of 1 kg by the total weight of specific group of animals.

Share-based payments

Total cumulative expenses of share-based payments are calculated based on the formula described below. The expenses are accrued in the profit (loss) statement and equity based on the days lapsed since the grant date till the reporting date. Each year the entity will revise the expense to reflect the best available estimate of the number of equity instruments expected to vest.

The total expenses of share-based payments are calculated based on the formula:

Share price @ grant date x Granted shares x (1-annual staff turnover)^(vesting period)

Where:

The share price of options is based on the closing price at grant date at which the company's shares are traded on the Nasdaq Stock Exchange.

The grant date of the Option is set to be the date of the share-based payment agreement between the Company and the receiver as all the terms and conditions are set in this agreement and there are no other arrangements which would need to be confirmed at a later date.

Granted shares – shares to be granted to employee based on the Option agreement.

Staff turnover – chance that the option will be exercised is adjusted by the forecasted staff turnover percent during the vesting period. The ratio is calculated based on historical staff turnover data of 2 years. The historical staff turnover data includes turnover only of the positions which are set to receive the share-based payments. The turnover of other positions are excluded from the ratio.

There are option agreements which are signed with a special condition – that the receivers do not need to fulfill the service condition, but they will still need to wait 3 years vesting period before being able to exercise the option. Due to this staff turnover adjustment is excluded in the calculation of the expenses of these options as it does not affect their chances to receive the option.

2. Share capital and reserves

Share capital and premium of the Company

The share capital of AUGA group AB as at 30 September 2020 was EUR 65,951 thousand (as at 31 December 2019: EUR 65,951 thousand). The share capital is divided into 227,416,252 ordinary shares (2019: 227,416,252 ordinary shares). Each issued share has a EUR 0.29 nominal value and fully paid. Each share had usual material and intangible rights as per Law on Companies of the Republic of Lithuania and the Company's statutes.

On 23 August 2018 AUGA group AB successfully completed secondary public offering by issuing 40,000,000 share units. The shares were sold for the total amount of EUR 18 million at EUR 0.45 price per share. Share premium represent the price premium paid by the shareholders, deducting the expenses related to the whole offering process. Share premium at the end of 30 September 2020 amounted to EUR 6,707 thousand (31 December 2019: EUR 6,707 thousand).

Shareholders

Total number of shareholders on 30 September 2020 was 1,727 (one thousand seven hundred twenty seventy) and on 31 December 2019 it was 1,330 (one thousand three hundred thirty).

(All amounts are in EUR thousand, unless stated otherwise)

2. Share capital and reserves (continued)

The shareholders owning more than 5% of shares in the Company are the following:

Tomas Krakauskas**	Member of the Board	119,000	0.052%
Mindaugas Ambrasas	CFO	6,881	0.003%

^{*} Kęstutis Juščius, CEO, is the ultimate owner of Baltic Champs Group UAB, controlling 55.04% of the Company's shares.

Reserves of the Company

A legal reserve is a compulsory reserve under Lithuanian legislation. Annual transfer of at least 5% of net profit, calculated in accordance with Lithuanian regulatory legislation on accounting, is compulsory until the reserve including share premium reaches 10% of the share capital. The legal reserve can be used to cover the accumulated losses. The legal reserve of the Company equalled to EUR 1,834 thousand as at 30 September 2020 (EUR 1,834 thousand as at 31 December 2019).

Revaluation reserve comprises revaluation of land portfolio owned by the Group. Land portfolio valuation is performed by independent valuator. The valuation for reporting period was performed in 2019. Revaluation reserve as at 30 September 2020 amounted to EUR 8,488 thousand (EUR 8,488 thousand as at 31 December 2019).

In 2018 the Company formed a reserve to grant shares for employees. The value of the reserve increased by EUR 885 thousand in 2020 due to implementation of employee share option plan (in 2019 reserve increased by EUR 667 thousand). Reserve to grant shares for employees as at 30 September 2020 amounted to EUR 2,509 thousand (EUR 1,624 thousand as at 31 December 2019).

Employee Option Plan was approved by shareholders at the annual general shareholders' meeting on 30 April, 2019. The service condition for the Option receiver is to complete a 3-year term of service to the Group. After the condition is met employee is eligible to exercise the option.

Reserve to grant shares for employees	Number of shares,	
	units	Value, EUR
Total reserve as at 31 December 2018	3,300,000	957
Shares allocated to employees based on option agreements as at 31 December 2019	2,548,860	739
Unallocated shares as at 31 December 2019	3,051,140	885
Total reserve as at 31 December 2019	5,600,000	1,624
Shares allocated to employees based on option agreements as at 30 September 2020	4,765,690	1,382
Unallocated shares as at 30 September 2020	3,886,034	1,127
Total reserve as at 30 September 2020	8,651,724	2,509

In 2020 the reserve to provide share for employees was increased by 3,051,724 shares with a nominal value of EUR 0.29 and in total of EUR 885 thousand. In 2020 the Group recognised employee benefit expenses of EUR 185 thousand related share options granted to employees.

^{**} Tomas Krakauskas is an employee of UAB ME Investicijos, which holds 8.39% of the Company's shares.

3. The Structure of the Group

As of 30 September 2020, the consolidated Group (hereinafter the Group) consisted of the Company and one hundred thirty-seven subsidiaries (31 December 2019: one hundred thirty-six subsidiaries). On 14 February 2020 Group companies Baltic Champs UAB and AUGA Luganta UAB together with other shareholders of Grybai LT KB, capitalised loans provided to Grybai LT KB which resulted in an increase in share capital of Grybai LT KB and a change in the Group's interest in the company. As a result, the Group's share in Grybai LT KB increased from 22% to 61%. On 28 May 2020 Group companies Agromilk, KB, Juodmargelis, KB and Šventosios pievos, KB bought-out the rest of minority shareholders and with this transaction the Group took over the full control of Grybai LT KB. Detailed list of all subsidiaries is provided below.

7. Receivables and advance payments

As at the balance sheet date Group's receivables and advance payments consisted of the following:

	As at 30 September 2020	As at 31 December 2019
Trade receivables	16,505	7,247
VAT receivable	777	639
Receivables from National Paying Agency	6,752	1,385
Accounts receivable from private individuals	72	43
Other receivables	368	1,173
Advance payments and deferred expenses	3,331	2,982
Less: loss allowance	(148)	(148)
Total trade accounts receivable, net	27,655	13,322
Non-current receivables, gross	1,945	5,975
Less: loss allowance	(299)	(299)
Total	29,301	18,998

Receivables from the National Paying Agency are the direct subsidies receivable for crops and milk, which are due by 30 April of the following year.

8. Financial liabilities

The Group's long-term borrowings consisted of the following:

	As at 30 September 2020	As at 31 December 2019
Borrowings from banks		
Mushroom growing companies	486	1,970
FMCG companies	1,132	-
Agricultural entities	5,334	6,435
Parent company	3,000	-
Other borrowings		
Creditors	755	3,489
Investment fund for purchased land	253	1,072
Green Bonds	18,744	18,523
Total	29,705	31,489
Less: amounts, payable within one year (according to agreements)	(5,044)	(10,819)
Total long-term borrowings	24,661	20,670

On 13 December 2019 the Group issued 20,000 units of Green Bonds (hereinafter – Bonds) with a nominal value of EUR 1,000 and an annual interest rate of 6%. The maturity date of Bonds falls on 17 December 2024. Interest payment dates are set at 17 December of each year until 2024. The Bonds were introduced to trading on regulated market in AB Nasdaq Vilnius Bond list. Balance sheet value of the bonds represent the value of the bonds after discounts and other related expenses. These expenses and discounts are accounted as interest expenses and capitalized to the value of the bonds over the 5-year period.

The long-term borrowings and payables are repayable as follows:

The long term borrowings and payables are repayable as rollows.		
	As at 30 September 2020	As at 31 December 2019
Financial liabilities to banks and bondholders	·	
Within second year	4,369	997
Within third and fourth year	968	571
After fifth year and later	19,324	19,102
Total	24,661	20,670
The Group's short-term borrowings were the following:		
	As at 30 September 2020	As at 31 December 2019
Borrowings from banks	·	
Mushroom growing companies	2,400	2,400
FMCG companies	139	-
Parent company	19,500	16,900
Total short-term borrowings	22,039	19,300

Short-term loans from banks include EUR 22,039 thousand (in 2019: EUR 19,300 thousand) credit-line facilities.

9. Leases

The Group's leases consisted of the following:

g.	As at 30 September 2020	As at 31 December 2019
Lease liabilities		2.2.2
Lease liabilities related to right-of-use assets*	35,426	34,960
Lease liabilities related to other assets**	7,708	8,245
Total	43,134	43,205
Less: amounts payable within one year		
Lease liabilities related to right-of-use assets*	1,152	4,113
Lease liabilities related to other assets**	1,087	2,942
Total	2,239	7,054
Total long-term leases	40,895	36,150

^{*} Lease liabilities accounted as operational lease before adoption of IFRS 16.

^{**} Lease liabilities accounted as financial lease before adoption of IFRS 16.

10. Results of business segments
