

Eolus to start construction of wind farm Timmele

Hässleholm, Sweden, March 25th, 2021

Eolus has signed an agreement with an investor regarding the delivery of a turnkey wind power facility in Timmele, Ulricehamn municipality in Sweden. The project comprises two wind turbines with a total installed capacity of 8.4 MW. Construction of the wind farm will start during 2021 and is expected to be completed during the summer of 2022.

Eolus has also signed a turbine supply agreement with Enercon for the delivery of two wind turbines of the model E-138 with an installed capacity of 4.2 MW each.

Eolus will be responsible for the construction of the wind farm and will deliver a turnkey facility to the investor. The wind farm will be covered by a long term full service agreement with Enercon and Eolus has been entrusted to deliver technical and administrative service during the operational phase to the investor.
