

KOL Call on Positive Topline Results from Phase 2 Trial: *Tesomet for the Treatment of Hypothalamic Obesity*

Hosted by Saniona (STO: SANION)

The event will feature a presentation by Key Opinion Leader and Principal Investigator on the Phase 2 Trial of Tesomet in Hypothalamic Obesity **Professor Ulla Feldt-Rasmussen, M.D. DMSc (Department of medical Endocrinology and Metabolism, Rigshospitalet Copenhagen University Hospital)** who will discuss the current treatment landscape and unmet medical need for patients with Hypothalamic Obesity (HO). Dr. Feldt-Rasmussen will also review the topline results from Saniona's recently announced Phase 2 trial for Tesomet for the treatment of patients with HO and how these results may lead to a potential new treatment option for these patients. Dr. Feldt-Rasmussen will be available to answer questions at the conclusion of the call.

Saniona's management team will also provide an overview of the rationale and strategy for the development of Tesomet for patients with HO. The Company's recently announced positive Phase 2 results showed that Tesomet was safe and well tolerated in HO patients and that treatment led to statistically significant improvements in key efficacy endpoints including changes in body weight, waist circumference and glycemic control compared to placebo.
