

Sequana Medical announces Annual General Meeting of Shareholders on 25 May 2023

Publication of Annual Report 2022

Ghent, Belgium – 25 April 2023 – Sequana Medical NV (Euronext Brussels: SEQUA) (the "Company" or "Sequana Medical"), a pioneer in the treatment of fluid overload in liver disease, heart failure and cancer, today invites the holders of securities issued by the Company to attend the Annual General Meeting of Shareholders on Thursday, 25 May 2023. Furthermore, the annual report for the financial year 2022 has been published on Sequana Medical's website and can be accessed [here](#).

The items on the agendas of the meeting include (amongst other things) the proposed approval of a number of resolutions relating to the financial year ended on 31 December 2022 and the application of Article 7:228 of the Belgian Companies and Associations Code.

The Annual Meeting of Shareholders will take place at the Company's registered offices in Ghent and will start at 09:00 am CEST. The full convening notice with the agenda and proposed resolutions can be accessed on the Sequana Medical website: www.sequanamedical.com/investors/shareholder-information.

The Company recommends the holders of its securities to use e-mail for all communications with the Company regarding the Annual General Meeting of Shareholders. The Company's e-mail address for such communications is: IR@sequanamedical.com.

About Sequana Medical

Sequana Medical NV is a pioneer in treating fluid overload, a serious and frequent clinical complication in patients with liver disease, heart failure and cancer. These patients can have up to 15 liters of extra fluid in their bodies, causing major medical issues including increased mortality, repeated hospitalizations, severe pain, difficulty breathing and restricted mobility that severely impacts daily life. Although diuretics are standard of care, the problem is that in many patients they are no longer effective and / or tolerable. There are limited

effective treatment options for these patients, resulting in poor clinical outcomes, high costs and a major impact on their quality of life. Sequana Medical is seeking to provide innovative treatment options for this large and growing “diuretic-resistant” patient population.

alfapump[®] and **DSR**[®] are Sequana Medical's proprietary platforms that work with the body to treat diuretic-resistant fluid overload, delivering major clinical and quality of life benefits for patients and reducing costs for healthcare systems. The Company has reported positive primary endpoint data from the North American pivotal POSEIDON trial of the **alfapump** in recurrent or refractory ascites due to liver cirrhosis, enabling the filing of a Pre-Market Approval (PMA) application with the FDA, planned for H2 2023. Having delivered clinical proof-of-concept for **DSR** as a disease-modifying drug program for the treatment of heart failure, the Company is planning to commence MOJAVE, a US randomized controlled multi-center Phase 1/2a clinical trial of **DSR 2.0**, in Q2 2023.

Sequana Medical is listed on Euronext Brussels (Ticker: SEQUA.BR) and headquartered in Ghent, Belgium. For further information, please visit www.sequanamedical.com.

Important Regulatory Disclaimers

*The **alfapump**[®] system is currently not approved in the United States or Canada. In the United States and Canada, the **alfapump** system is currently under clinical investigation (POSEIDON Trial) and is being studied in adult patients with refractory or recurrent ascites due to cirrhosis. For more information regarding the POSEIDON clinical trial see www.poseidonstudy.com. **DSR**[®] therapy is still in development and it should be noted that any statements regarding safety and efficacy arise from ongoing pre-clinical and clinical investigations which have yet to be completed. **DSR** therapy is currently not approved for clinical research in the United States or Canada. There is no link between **DSR** therapy and ongoing investigations with the **alfapump** system in Europe, the United States or Canada.*
