Outlook for 2024

Suominen expects that its comparable EBITDA (earnings before interest, taxes, depreciation and amortization) in 2024 will increase from 2023. In 2023, Suominen's comparable EBITDA was EUR 15.8 million.

Tommi Björnman, President & CEO:

"During the second quarter of 2024, our net sales grew by 5% from the comparison period and were EUR 118.7 million (112.7). Sales volumes increased from comparison period, however, sales prices decreased driven by the lower raw material prices.

Our ability to innovate and meet market needs is reflected in the share of net sales from new products launched in the last three years, which continued on a very good level and exceeded 37% in the first half of the year.

We were able to improve our quarterly comparable EBITDA to EUR 5.0 million (2.7), supported by increased sales volumes, especially in Americas, and better sales margins.

We have been focusing on our commercial and operational excellence, especially on the production efficiency, and we have seen gradual improvements. We are expecting this progress to continue going forward.

As we announced in early May, we are investing to further improve our capabilities in sustainable products by enhancing and upgrading one of our production lines in Bethune, South Carolina, USA. With this investment we strengthen our position as the leader in sustainable nonwovens in the Americas market. The investment is proceeding as planned, targeting commercialization on H1/2025.

As part of our ongoing transformation journey, we initiated at the end of May a restructuring program to reposition Suominen towards profitable growth. We expect the program to generate annualized savings of EUR 1.5 million. This program is a continuation of the transformation we initiated last year with the new operating model, and it will support our ability to achieve necessary financial and process improvements as we move forward.

Generally, Suominen's target market is rather stable with some uncertainty related to the global economic sentiment. In the short term we do not see any major changes in the target market."

In the second quarter the change in working capital was EUR -1.2 million (9.0).

On March 28, Suominen agreed on extending the maturity of the EUR 100 million syndicated revolving credit facility million with an additional year to July 2026.

CAPITAL EXPENDITURE

In January–June, the gross capital expenditure totaled EUR 6.4 million (3.7), of which the largest single investment was related to the upgrade of one of the production lines at the Bethune plant in the US. Other investments were mainly normal maintenance investments.

Suominen announced in May that it strengthens its capabilities in sustainable products by enhancing and upgrading one of its production lines in Bethune, South Carolina, USA. The investment is made in line with Suominen's strategy and supports company's vision to be the frontrunner in nonwovens innovation and sustainability. The total value of the investment is approximately EUR 10 million and the investment project will be completed in the first half of 2025.

Depreciation, amortization and impairment losses for the review period amounted to EUR 9.1 million (9.5).

PROGRESS IN SUSTAINABILITY

We have strong focus on safety and accident prevention, and our long-term target is to have zero lost-time accidents. During the first half of the year there were 2 (3) LTAs at Suominen sites.

We systematically measure our employee engagement by conducting our engagement survey, Suominen Vibe, every year. During the first half of 2024, we continued our development actions based on the results from the survey conducted last year.

We are committed to continuously improving our production efficiency and the efficient utilization of natural resources. In the first half of the year, we continued our actions to reduce energy consumption, greenhouse gas emissions, water consumption and waste to landfill. Our target is to reduce these by 20% per ton of product by 2025 compared to the base year of 2019.

We offer a comprehensive portfolio of sustainable nonwovens to our customers and continuously develop innovative solutions with a reduced environmental impact. Our target is a 50% increase in sales of sustainable nonwovens by 2025 compared to 2019, and to have over 10 sustainable product launches per year.

Suominen reports progress in its key sustainability KPIs annually.

As part of our Annual Report 2023 published in March 2024 we reported on the progress of our sustainability performance. Our sustainability reporting in 2023 was done in accordance with the GRI Standards from the Global Reporting Initiative and it was assured by an external partner.

SHORT TERM RISKS AND UNCERTAINTIES

Regarding the war in Ukraine, the direct impact to Suominen's business is minor as we have no customers nor suppliers in Russia, Belarus or Ukraine. Suominen as a company is mostly affected by the indirect economic impacts of the war.

Suominen's other risks and uncertainties include but are not limited to: risks related to manufacturing, competition, raw material prices and availability and customer specific volumes and credits, changes in legislation, political environment or economic conditions and investments, and financial risks.

A more detailed description of risks is available in Suominen's Annual Report 2023 at suominen.fi/investors.

BUSINESS ENVIRONMENT

Suominen's nonwovens are, for the most part, used in daily consumer goods, such as wipes as well as in hygiene and medical products. In these target markets of Suominen, the general economic situation determines the development of consumer demand, even though the demand for consumer goods is not very cyclical in nature. North America and Europe are the largest market areas for Suominen. In addition, the company operates in the South American markets. The growth in the demand for nonwovens has typically exceeded the growth of gross domestic product by a couple of percentage points.

We follow closely market development and signals from our customers, but the overall global economic uncertainty and fierce competition continue to make the longer-term visibility challenging. It remains to be seen how the current economic climate impacts the end consumer demand and consumer preferences regarding wipes. Historically, the wipes market has been rather steady despite the general economic situation.

Instabilities in Israel and in the Red Sea area, and the war in Ukraine continue to generate uncertainty globally. Possible impacts to Suominen are expected to be mainly indirect and we continue to monitor the situations.

OUTLOOK FOR 2024

Suominen expects that its comparable EBITDA (earnings before interest, taxes, depreciation and amortization) in 2024 will increase from 2023. In 2023, Suominen's comparable EBITDA was EUR 15.8 million.

CORPORATE GOVERNANCE AND REMUNERATION REPORT

Suominen has prepared a separate Corporate Governance Statement and a Remuneration Report for 2023, which comply with the recommendations of the Finnish Corporate Governance Code for listed companies. The statements also cover other central areas of corporate governance. The statements

have been published on Suominen's website, separately from the Report of the Board of Directors, at www.suominen.fi

CALCULATION OF KEY RATIOS AND ALTERNATIVE PERFORMANCE MEASURES

Key ratios per share are either IFRS key ratios (earnings per share) or required by Ordinance of the Ministry of Finance in Finland or alternative performance measures (cash flow from operations per share).

Some of the other key ratios Suominen publishes are alternative performance measures. An alternative performance measure is a key ratio, which has not been defined in IFRS standards. Suominen believes that the use of alternative performance measures provides useful information for example to investors regarding the Group's financial and operating performance and makes it easier to make comparisons between the reporting periods.

The link between the components of the key ratios per share and the consolidated financial statements is presented in the consolidated financial statements of 2023. The link between the components of the alternative performance measures and the consolidated financial statements is presented in Suominen's Annual Report for 2023.

Calculation of key ratios and alternative performance measures

Operating profit and comparable operating profit

Operating profit (EBIT) = Profit before income taxes + net financial expenses

Comparable operating profit (EBIT) = Profit before income taxes + net financial expenses, adjusted with items affecting comparability

In order to improve the comparability of result between reporting periods, Suominen presents comparable operating profit as an alternative performance measure. Operating profit is adjusted with material items that are considered to affect comparability between reporting periods. These items include, among others, impairment losses or reversals of impairment losses, gains or losses from the sales of property, plant and equipment or intangible assets or other assets and restructuring costs.

It is the opinion of Suominen that presenting interest-bearing liabilities not only at amortized cost but also at nominal value gives relevant additional information to the investors.
