

## Eurobio Scientific and NG Biotech enter into a marketing agreement for COVID-19 serology rapid tests

Paris, May 5, 2020 –6:30 pm

**Eurobio Scientific** (FR0013240934, ALERS, eligible PEA-PME), a leading French group in the field of specialty *in vitro* medical diagnostics, and **NG Biotech**, a French biotechnology company specializing in the development, production and marketing of rapid health diagnostic solutions, announce today that they have entered into an agreement for the distribution in France of the COVID-19 NG-Test® IgG-IgM tests to health professionals and nursing homes.

This ultra-rapid 15-minute serological test developed, manufactured and clinically validated in France by NG Biotech, allows to detect, and simultaneously differentiate, the possible presence of isotypes IgM (immunoglobulins M) and IgG (immunoglobulins G) antibodies produced by the body during infection with the SARS-CoV-2 virus. For Eurobio Scientific, these new *in vitro* diagnostic tests are supplementing its range of products for localized biology. Its marketing, as a unitary "all-in-one" device, is dedicated to the monitoring of medical personnel and patients potentially at risk.

This new product offer complements other Covid-19 serology tests marketed by Eurobio Scientific, which are intended for biology laboratories and require suitable equipment to perform serial analyzes.

Finally, these different ranges of serology products are in addition to the molecular biology tests to detect the specific presence of the virus, that are already on the market, .

For Jean-Michel CARLE, President and CEO of Eurobio Scientific, *"After the launch of our molecular biology offers and our automated serology offer, this marketing agreement with NG Biotech perfectly complements the diagnostic arsenal that we can make available to our customers to deal with the COVID-19 crisis. Eurobio Scientific is proud to enable the rapid commercialization of a solution developed in France."*

For Milovan Stankov-Pugès, Chairman and CEO of NG Biotech: *"This marketing agreement is part of the relationship of trust that we have developed for many years with our partner Eurobio Scientific, distributor of our products for the rapid detection of antibiotics resistant bacteria (also one of the major global health challenges of the coming years) in biology laboratories and hospitals."*

## About Eurobio Scientific

Eurobio Scientific (ex Diaxonhit) is a key player in the field of specialty *in vitro* diagnostics. It is involved from research to manufacturing and commercialization of diagnostic tests in the fields of transplantation, immunology and infectious diseases, and sells instruments and products for research laboratories, including biotechnology and pharmaceutical companies. Through many partnerships and a strong presence in hospitals, Eurobio Scientific has established its own distribution network and a portfolio of proprietary products in the molecular biology field. The Group has approximately 120 employees and two production units based in the Paris region and in the United States, and an affiliate based in Dorking UK.
