I. GENERAL INFORMATION

Accounting period covered by the Report

The report covers 3 months period ended 31 March 2020.

Key data on the issuer

Name of the company: AUGA group, AB (hereinafter – AUGA group, AB or the Company)

Share capital: EUR 65,950,713.08

Address of headquarters: Konstitucijos av. 21C, Quadrum North, LT-08130, Vilnius, Lithuania

Telephone: +370 5 233 53 40 Fax: +370 5 233 53 45

E-mail address: info@auga.lt Website: www.auga.lt

Legal entity form: Legal entity, joint stock company

Place and date of registration: 25 June 2003, Vilnius

Register code: 126264360

Registrant of the Register of Legal entities: VĮ Registrų centras

(All amounts are in EUR thousand, unless stated otherwise)

II. MANAGEMENT REPORT

During the first three months of 2020, AUGA group, AB and its subsidiaries (hereinafter - the Group) sales revenue amounted to EUR 17.04 million, a 14% increase compared to the same period of 2019, when it was EUR 14.89 million. Revenue increased in all segments, but the highest impact was made by the crop-growing segment which sales increased by EUR 0.95 million.

The Group's gross profit for the first quarter of 2020 amounted to EUR 3.74 million and was EUR 0.79 million higher compared to the same period of 2019 (gross profit for the first quarter of 2019 - EUR 2.95 million).

| Main financial results, million EUR | 3 months of 2020 | 3 months of 2019 | Change, % |
|-------------------------------------|---------------------|------------------|-----------|
| Revenues | 17.04 | 14.89 | 14% |
| Gross profit (loss) | 3.74 | 2.95 | 27% |
| Net profit (loss) | 0.18 | 0.17 | 6% |
| EBITDA (with IFRS16 effect) | 4.95 | 4.58 | 8% |

During the first three months period of 2020, the Group earned EUR 0.18 million net profit compared to EUR 0.17 million a year earlier.

Group's EBITDA increased by 8% and was equal to EUR 4.95 million in the first quarter of 2020 (EUR 4.58 million during the same period last year).

Since the application of new IFRS16 requirements had significant impact to the Group's EBITDA¹, for comparison purposes the Group will publish two EBITDA calculations throughout the year of 2020 (a) without elimination of IFRS16 effect and (b) eliminating IFRS16 effect to EBITDA. The impact of implementation of IFRS 16 to the calculation of EBITDA of first quarter of 2020 is presented below:

| | 31 March 2020 before IFRS16 | IFRS 16 | 31 March 2020 as presented in FS |
|--|-----------------------------------|---------|---|
| Net profit (loss) before income tax and non-controlling interest | 356 | (179) | 176 |
| Adjustments for non-cash expenses (income) items and other adjustments | | (- 7 | |
| Depreciation | 1,829 | 1,444 | 3,273 |
| Amortization | 117 | (113) | 4 |
| Share-based payments expenses | 62 | ` - | 62 |
| Write-offs and impairments of inventory | 223 | - | 223 |
| Profit (loss) on sale of PPE | (12) | - | (12) |
| Net finance cost | 790 | 564 | 1,354 |
| Grants related to assets, recognized as income | (132) | | (132) |
| EBITDA: | 3,232 | 1,716 | 4,948 |

Crop growing segment overview

Crop growing segment sales results

Crop growing segment sales revenue for the first quarter of 2020 amounted to EUR 6.07 million compared to EUR 5.13 million for the same period in 2019 (18% increase). Sales increase were mostly affected by EUR 0.71 million of rapeseed sales in the first quarter of 2020 (during the same period of 2019 there were no rapeseed sales).

Crop growing segment cost of sales for the first quarter of 2020 was EUR 6.02 million versus EUR 5.13 million in 2019. Cost of sales increased in-line with the revenue increase. Total agricultural produce inventory write-offs and impairment during the 3 months of 2020 amounted to EUR 0.24 million compared to EUR 0.25 million during the 3 months of 2019. As there were no major changes in the prices of sold commodities the total result of sales of agricultural produce was EUR 0.19 million loss for the first three months of 2020 (EUR 0.25 million loss for the same period in 2019).

¹ EBITDA = net cash flow from operating activities before changes in working capital and net interest paid, as it is disclosed in cash flow statement, including gain (loss) on changes in fair value of biological assets.

(All amounts are in EUR thousand, unless stated otherwise)

Crop growing segment overview (continued)

Progress in the season of 2019/2020

The total cultivated land area by the Group amounts to around 39.7 thousand hectares in the season of 2019/2020 and is more than 1 thousand higher than in the season of 2018/2019. As at the date of the issue of this report the seeding of all the crops is completed. In the season of 2019/2020 29.7 thousand hectares were seeded with cash crops (28.7 thousand in the season of 2018/2019) out of which 11.7 thousand ha are dedicated to wheat, 8.7 thousand ha to legumes and 9.3 thousand ha to other cash crops. The majority – 11.3 thousand ha out of 11.7 thousand ha – of wheat is winter wheat, similar as in the season of 2018/2019 as winter crops usually have higher yield potential compared to summer alternatives. Forage crops comprise 8.6 thousand ha in the season of 2019/2020 compared to 8.9 thousand ha in 2018/2019 season.

At the reporting date the condition of the crops was good as the winter was mild and there were no effects which could affect the value of the winter crops. The Group estimated the total fair value of winter crops (winter wheat, rapeseed, barley and rye) as at 31 March 2020 using following formula and assumptions:

Fair value of the crop = Costs inquired + (Cultivated area in ha * forecasted average yield as tons per ha * forecasted grain price per ton – cultivated area in ha * forecasted total cost per ha) * T * (1 - x), where:

- Cost inquired is cost actually inquired for particular crop during the season of 2019/2020 as at 31 March 2020.
- Cultivated area in ha is area of particular crop seeded and expected to be harvested.
- Forecasted average yield tons per ha: 4.70 ton/ha for winter wheat, 1.75 ton/ha for winter rapeseed, 3.65 ton/ha for winter rye and 4.50 for winter barley.
- Forecasted grain price per ton. contracted average sales prices of 2020 were used for fair value estimation.
- Forecasted total cost per ha. Average historical cost levels of 2018 and 2019 were used for fair value estimation as till 31 march 2020 there is no significant cost variances noticed in comparison to the previous period.
- T is time portion already passed from sowing date until the forecasted harvest date (in case of winter crops fair value estimation as at 31 March 2020 portion was 50-65% depending on the particular winter crop. All winter crops were seeded by the end of September 2019 and preliminary harvest dates are from mid of July till the end of September.
- X is adjustment parameter for possible unexpected negative effects to the harvest. 10% was used in fair value estimations as at 31 March 2020.

The estimated fair value of the winter crops as at 31 March 2020 is higher than the costs inquired by EUR 2.72 million. It should be noted that due to mild winter and significant biological transformation at the end of 2019, EUR 1.45 million gain from fair value of winter crops was already recognized as at 31 December 2019. Thus, the gain on changes in fair value of biological assets accounted in the first quarter of 2020 amounts to EUR 1.27 million. As at 31 March 2020 only winter cash crops fair value was estimated (total area of 14.5 thousand hectares) using aforementioned method.

As at 31 March 2020 summer cash crops' (total area of 15.2 thousand hectares) seeding was still in process and no significant biological transformation was present as at 31 March 2020. Therefore, production costs of these crops were used as a fair value indicator instead.

The formula discussed above will be used to estimate fair value of cash crops (winter and summer crops) for coming quarters as well until the actual harvest will be completed. In each quarterly estimation forecasted parameters will be adjusted if needed or actual data if already available will be used.

It should be noted that the fair value of forage crop even at its point of harvest is measured at production cost incurred on forage crop. In other words, forage crop production cost is used as a measure of the fair value of that forage crop since there is no active market for forage crops and there is no reliable data to calculate market price of the forage crops. Due to this the net result on revaluation of forage crops is equal to zero.

Agricultural subsidies and gross profit of the crop growing segment

As at 31 March 2020 the Group has reclassified the subsidies related to grasslands and pastures from agricultural to dairy segment to have a better representation of the segments' results. The reclassification was performed in both periods so the results would be comparable and does not affect any other disclosures or results in total.

The total amount of agricultural subsidies accrued during the first quarter of 2020 was EUR 1.89 million compared to EUR 1,76 million during the same period in 2019. The increase is related to a higher number of hectares seeded and declared for season 2020. Accrual is based on the average historical amount of subsidies per hectare calculated for the previous periods as crop declaration for the season 2019/2020 is still in the process and the actual amount of subsidies for the year 2020 is not yet known.

(All amounts are in EUR thousand, unless stated otherwise)

Crop growing segment overview (continued)

Gross profit of crop growing segment including result of sales of agricultural produce, gain (loss) on changes in fair value of biological assets and agricultural subsidies, amounted to EUR 2.98 million in the first three months of 2020 compared to EUR 2.85 million the year earlier.

Mushroom segment overview

The revenue of the mushroom growing segment was EUR 7.28 million for the three months of 2020, around EUR 0.64 million or 10% higher compared to the same period in 2019 when revenue was EUR 6.64 million. Revenue from mushroom sales increased by EUR 0.75 million while revenue from mushroom seedbed sales decreased by EUR 0.10 million.

Mushroom sales revenue increased due to higher volume of sales – 3.28 thousand tonnes of mushrooms were sold during first quarter of 2020 compared to 2.88 thousand tonnes a year earlier (14% increase). The increase was mostly related to better mushroom yields compared to previous period.

During the first three months of 2020, the share of sold organic mushrooms was about 8.6 % of total volume of mushrooms sold comparing to 7.9 % during the same period in 2019. The share of organic mushrooms sold slightly increased in the first quarter of 2020 compared to the same period a year earlier.

In the first quarter of 2020 average non-organic mushrooms sales price remained almost the same but organic mushrooms price decreased by 6% compared to the same period in 2019. The average price of 1 tonne of mushrooms sold was 2,043 EUR/tonne in the first quarter of 2020 (2,075 EUR/tonne in the first quarter of 2019).

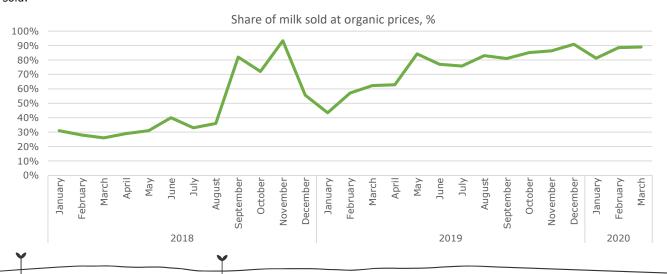

The total cost of sales of the mushroom growing segment was EUR 6.66 million in the first quarter of 2020 and was EUR 0.31 million higher compared to the same period in 2019 when it was EUR 6.35 million. Average cost of 1 tonne of mushrooms sold decreased from 1,987 EUR/tonne to 1,876 EUR/tonne. Cost decrease is mostly related to a higher mushroom yields from the same capacity.

Gross profit of mushroom growing segment in the first quarter of 2020 increased by 117% to EUR 0.62 million compared to EUR 0.29 million in the first quarter of 2019.

Dairy segment overview

Dairy segment sales revenue for the first quarter of 2020 reached EUR 2.78 million and was around 6% higher than in the same period a year earlier. Increased total tonnage of milk sold and increased organic milk sales share both contributed to sales revenue increase. Total amount of milk sold increased from 6.22 thousand tons (or 20.76 kg per cow per day) in the first quarter of 2019 to 6.55 thousand tons (or 21.77 kg per cow per day) in the first quarter of 2020 (5% increase). Average price of milk sold was around EUR 397 per ton in first quarter of 2020 or 2% higher comparing to the same period last year when it was EUR 388 per ton.

Share of milk sold at organic production prices volume was around 86 % in first quarter of 2020 which is significantly higher compared to 54% during same period in 2019. As it can be seen from the graph provided the share of milk sold at organic prices is steadily growing from the beginning of 2019 and there are no significant fluctuations in the share of organic milk sold.

(All amounts are in EUR thousand, unless stated otherwise)

Dairy segment overview (continued)

Dairy segment cost of sales was EUR 2.49 million during first three months of 2020 compared to EUR 2.64 million during the same period last year (6% decrease). The cost of the dairy segment surpassed compared to previous period mainly due to higher milk yields from cows. The Group is constantly improving its feeds quality and feeds structure which lets the group to gain better yields in the same costs.

During the first quarter of 2020 the loss of EUR 0.70 million was incurred on revaluation of biological assets (animal herd). In comparison EUR 0.76 million loss was inquired during the same period a year earlier.

Due to improved gross result from milk sales, gross result of dairy segment significantly improved comparing to previous year. The gross profit of diary segment amounted to EUR 0.08 million for three months period ended 31 March 2020 (gross loss of EUR 0.23 million was reported for three months period ended 31 March 2019).

As at 31 March 2020 the Group has reclassified the subsidies related to grasslands and pastures from agricultural to dairy segment to have a better representation of the segments' results. The reclassification was performed in both periods so the results would be comparable and does not affect any other disclosures or results in total.

End-consumer packaged goods segment

Total revenues of end-consumer packaged goods segment amounted to EUR 0.91 million during the first three months of 2020 compared to EUR 0.51 million a year earlier.

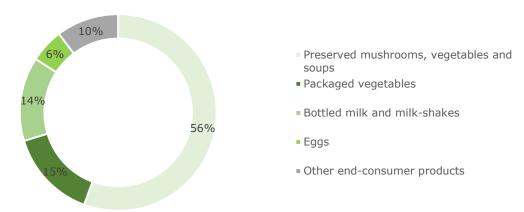

Preserved products, especially ready-to-eat organic soups, remain the main export product in the segment.

Cost of sales were EUR 0.85 million for the three months of 2020 compared to EUR 0.47 million for the same period in 2019.

For the first quarter of 2020, gross profit of EUR 0.06 million was recorded (gross profit of EUR 0.04 million reported for the same period in 2019).

Revenues structure from the sale of the end consumer goods as at 31 March 2020 is depicted in the chart below.

Revenues structure from end-consumer goods 2020 3M,%

Operating expenses

The Group's operating expenses for the first three months of 2020 amounted to EUR 2.25 million, while in 2019 operating expenses were around EUR 2.00 million. The increase is mostly related to payroll expenses which increased by EUR 0.09 million and Group's implemented employees share option plan. In April of 2019 the Group approved share option program and since then started to accumulate and recognize share-based payments as operating expenses. In the first quarter of 2020 the Group recognized EUR 62 thousand expenses related with share-based payments. These expenses are equity settled only.

(All amounts are in EUR thousand, unless stated otherwise)

Capital expenses

Total investments (additions) into property, plant and equipment amounted EUR 0.81 in the first quarter of 2020 (EUR 0,52 million in the first quarter of 2019). Investments (additions) into property, plant and equipment split is provided in the table below.

Investments (additions) into property, plant and equipment, EUR'000

| | Land | Buildings | Constructions and machinery | Vehicles, equipment and other property, plant and equipment | Construction in progress | Total |
|---------|------|-----------|--------------------------------|--|-----------------------------|-------|
| 2019 Q1 | 100 | 22 | 229 | 167 | 0 | 518 |
| 2020 Q1 | 231 | 87 | 180 | 144 | 166 | 808 |

Total amount of capital expenditures (additions) for the first quarter of 2019 were highly impacted by the capital expenditures limits set by major creditors (banks). Due to significant deterioration in the Group's financial results during 2018, major creditors (banks) set limit to EUR 3,5 million on Group's capital expenditures for the year 2019. In 2020 capital expenditure limit was set at EUR 6 million. The Group's key capital expenditure projects for the year 2020 are oriented in securing its own organic combined feedstock production capacity, improving animal welfare and agricultural operations, allocating available resources to strategic development projects in order to follow newly released five year strategy that focuses on improving efficiency in existing business units, designing a sustainable organic food architecture and reducing greenhouse gas emissions.

(All amounts are in EUR thousand, unless stated otherwise)

(All amounts are in EUR thousand, unless stated otherwise)

IV. EXPLANATORY NOTES

1. Basis of preparation

The accompanying interim financial information for the 3-month period ended 31 March 2020, has been prepared in accordance with IAS 34, 'Interim financial reporting'. The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 December 2019, as described in those annual financial statements. This financial information should be read in conjunction with the interim financial information for 3-month period ended 31 March 2019 and the balance sheet as of 31 December 2019 which have been prepared in accordance with IFRS as adopted by the EU.

The presentation currency is euro (EUR). The financial statements are presented in thousands of euro, unless indicated otherwise. Financial statements for the 3 months period ended 31 March 2020 and 31 March 2019 are not audited. Financial statements for the year ended 31 December 2019 are audited by the external auditor UAB PriceWaterhouseCoopers.

Critical accounting estimates and assumptions

The preparation of financial information in conformity with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial information, are disclosed below.

IFRS 16, Leases

Based on IFRS 16, the group recognised lease liabilities in relation to leases which had previously been classified as operating leases' under the principles of IAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities as at 1 January 2019 was 6%. The incremental borrowing remained unchanged throughout 2019 and 2020.

In applying IFRS 16, the group has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- reliance on previous assessments on whether leases are onerous;
- the accounting for operating leases with a remaining lease term of less than 12 months as short-term leases (which were recognized as expense on a straight-line basis);
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application;
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

Revaluation of biological assets (crops)

The Group estimates the total fair value of crops using following formula and assumptions:

Fair value of the crop = Costs inquired + (Cultivated area in ha * forecasted average yield as tons per ha * forecasted grain price per ton – cultivated area in ha * forecasted total cost per ha) * T * (1 - x), where:

- Cost inquired is cost actually inquired for particular crop during the season till the reporting date.
- Cultivated area in ha is area of particular crop seeded and expected to be harvested.
- Forecasted average yield tons per ha.
- Forecasted grain price per ton, contracted average sales prices are used for fair value estimation.
- Forecasted total cost per ha. Average historical cost levels are used for fair value estimation
- T is time portion already passed from sowing date until the forecasted harvest date
- X is adjustment parameter for possible unexpected negative effects to the harvest.

Revaluation of biological assets (livestock)

The Group values cows using the discounted cash flow method. The model uses projected revenues from milk sales over the remaining useful life of each animal using a forecasted milk price. Milk price forecast is the average milk price assumption of the following 3 years was. Current cow herd has an estimated working life of 1 to 3 years. At the end of the working period the cow is estimated to be sold for meat. The forecasted revenues are reduced with costs directly related to herd growing (feeds, medicines, employee salaries and other). The free cash-flow is discounted with post tax WACC.

For valuation of other livestock the Group calculates the fair value by taking the average price of meat per kilo. For young bulls and heifers, the value of livestock is determined by using the market values of meat (different for different groups of animals) and multiplying the price of 1 kg by the total weight of specific group of animals.

The applicable accounting estimates are consistent with those of the annual financial statements for the year ended 31 December 2019, as described in those annual financial statements.

(All amounts are in EUR thousand, unless stated otherwise)

2. Share capital

The share capital of AUGA group, AB as at 31 March 2020 was EUR 65,950,713.08 (65,950,713.08 as at 31 December 2019). The share capital was divided into 227,416,252 ordinary shares (227,416,252 ordinary shares as at 31 December 2019). Each issued share has a EUR 0.29 nominal value and fully paid. Each share had usual material and proprietary and non-proprietary rights as per Law on Companies of the Republic of Lithuania and the Company's Articles of Association.

7. Receivables and advance payments

As at the balance sheet date Group's receivables and advance payments consisted of the following:

| | As at 31 March 2020 | As at 31 December 2019 |
|--|------------------------|------------------------|
| Total trade accounts receivable | 8,332 | 7,247 |
| VAT receivable | 1,240 | 639 |
| Receivables from National Paying Agency | 4,025 | 1,385 |
| Accounts receivable from private individuals | 86 | 43 |
| Other receivables | 247 | 1,173 |
| Advance payments and deferred expenses | 3,955 | 2,982 |
| Less: loss allowance | (148) | (148) |
| Total trade accounts receivable, net | 17,736 | 13,322 |
| Non-current receivables, gross | 4,485 | 5,975 |
| Less: loss allowance | (299) | (299) |
| Total | 21,923 | 18,998 |

Receivables from the National Paying Agency are the direct subsidies receivable for crops and milk, which are due by 30 April of the following year.

ga

CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(All amounts are in EUR thousand, unless stated otherwise)

8. Financial liabilities

The Group's long-term borrowings consisted of the following:

| | As at 31 March 2020 | As at 31 December 2019 |
|--|------------------------|------------------------|
| Borrowings from banks | | |
| Mushroom growing companies | 1,476 | 1,970 |
| Agricultural entities | 5,990 | 6,435 |
| Other borrowings | | |
| Creditors | 3,513 | 3,489 |
| Investment fund for purchased land | 253 | 1,072 |
| Green Bonds | 18,596 | 18,523 |
| Total | 29,755 | 31,489 |
| Less: amounts, payable within one year (according to agreements) | (7,245) | (10,819) |
| Total long-term borrowings | 22,510 | 20,670 |

On 13 December 2019 the Group issued 20,000 units of Green Bonds (hereinafter – Bonds) with a nominal value of EUR 1,000 and an annual interest rate of 6%. The maturity date of Bonds is 17 December 2024. Interest payment dates are set at 17 December of each year until 2024. The Bonds were introduced to trading on regulated market in AB Nasdaq Vilnius Bond list.

The long-term borrowings and payables are repayable as follows:

| As at 31 March 2020 | As at 31 December 2019 |
|---------------------|------------------------|
| | |
| 2,836 | 997 |
| 571 | 571 |
| 19,176 | 19,102 |
| 22,583 | 20,670 |
| | 2,836 571 19,176 |

The Group's short-term borrowings were the following:

| | As at 31 March 2020 | As at 31 December 2019 |
|-----------------------------|---------------------|------------------------|
| Borrowings from banks | | |
| Mushroom growing companies | 2,400 | 2,400 |
| Parent company | 19,500 | 16,900 |
| Total short-term borrowings | 21,900 | 19,300 |

Short-term loans from banks include EUR 22,082 thousand (in 2019: EUR 19,300 thousand) credit-line facilities.

9. Leases

The Group's leases consisted of the following:

| | As at 31 March 2020 | As at 31 December 2019 |
|---|---------------------|------------------------|
| Lease liabilities | | |
| Lease liabilities related to right-of-use assets* | 35,251 | 34,960 |
| Lease liabilities related to other assets** | 8,678 | 8,245 |
| Total | 43,929 | 43,205 |
| Less: amounts payable within one year | | |
| Lease liabilities related to right-of-use assets* | 3,456 | 4,113 |
| Lease liabilities related to other assets** | 2,577 | 2,942 |
| Total | 6,033 | 7,054 |
| Total long-term leases | 37,896 | 36,150 |

^{*} Lease liabilities accounted as operational lease before adoption of IFRS 16.

^{**} Lease liabilities accounted as financial lease before adoption of IFRS 16.

(All amounts are in EUR thousand, unless stated otherwise)

10. Results of business segments

CROP GROWING SEGMENT

| a) Sales of agricultural produce | 3-month period ended 31 March 2020 | 3-month period ended 31 March 2019 |
|---|---------------------------------------|---------------------------------------|
| Total revenue of sold agricultural produce, EUR'000 | 6,074 | 5,128 |
