## **Nexstim Has Received Two New NBT® System Purchase Orders in the United States**

*Press release, Helsinki, 10 December 2020 at 12.30 pm (EET)*

Nexstim Plc (NXTMH:HEX, NXTMS:STO) ("Nexstim" or "Company") announces that it has received two new NBT® System orders in the United States.

One NBT® System is ordered by a new customer and the other one is ordered and delivered to a clinic that already has one NBT® System in use. Both clinics will use the system for depression therapy.

Nexstim's NBT® System with SmartFocus® nTMS is highly differentiated from other currently available TMS products due to its unique and highly sophisticated 3D navigation that uses its proprietary E-field algorithm to visualize the exact location, orientation, and magnitude of the stimulation.

**Mikko Karvinen**, CEO of Nexstim commented: *"These two system orders show again that there is clear demand for the novel, personalized TMS therapy that our NBT® system is able to deliver to patients with major depressive disorder. We are pleased to welcome new user clinic and very happy that our existing user has ordered a second system based on their frequent and successful usage of our SmartFocus® TMS Technology."*

### **About Nexstim Plc**

Nexstim is a Finnish, globally operating medical technology company. Our mission is to enable personalized and effective therapies and diagnostics for challenging brain diseases and disorders.

Nexstim has developed a world-leading non-invasive brain stimulation technology called SmartFocus®. It is a navigated transcranial magnetic stimulation (nTMS) technology with highly sophisticated 3D navigation providing accurate and personalized targeting of the TMS to the specific area of the brain.

SmartFocus® technology is used in Nexstim's proprietary Navigated Brain Therapy (NBT®) system, which is FDA cleared for marketing and commercial distribution for the treatment of major depressive disorder (MDD) in the United States. In Europe, the NBT® system is CE marked for the treatment of major depression and chronic neuropathic pain.

In addition, Nexstim is commercializing its SmartFocus® based Navigated Brain Stimulation (NBS) system for diagnostic applications. The NBS system is the only FDA cleared and CE marked navigated TMS system for pre-surgical mapping of the speech and motor cortices of the brain. Nexstim shares are listed on the Nasdaq First North Growth Market Finland and Nasdaq First North Growth Market Sweden.
