

## Atos to assist Federal Government Agencies to take full advantage of Artificial Intelligence

**Melbourne, Australia, August 5, 2021** – Atos has been appointed to the Australian Federal Government's Digital Transformation Agency Hardware Marketplace to support government agencies in tackling enterprise digital challenges and to enable them to take full advantage of Artificial Intelligence.

*"As digital transformation of public services is already happening, accelerated by Covid-19 pandemic, the amount of data generated is gigantic. To generate trust and to provide leadership in these times of profound challenges and disruptions, Governments need to ensure their citizen that their data is processed in a secure and intelligent way."* said **Mike Green, Managing Director of Atos in Australia**. *"We are really pleased to be part of the DTA Hardware Marketplace. We look forward to assist Federal Agencies in leveraging its use of digital technologies to better serve Australian community."*

In order to keep government agencies' infrastructure simple and enable them to easily adapt to dynamic requirements while maximizing Return on Investment (ROI) on application investments, Atos has provided its highly scalable and flexible server, the BullSequana S - the most agile, scalable and open platform to grow digital business. With its dynamic reconfiguration capabilities, it combines exceptional performance with unparalleled agility and generates efficiencies at every level to meet IT departments' existing and emerging demands.

The BullSequana S accelerates digital transformation through:

- **Enterprise AI:** By combining classical computing capacities with GPUs to adapt to AI/Machine Learning needs, the BullSequana S can boost existing applications and power disruptive tools like chatbots.
- **Data lake and analytics:** The BullSequana S speeds up data lake environments deployments, scales as needs arise and dramatically simplifies the lifecycle of news applications using the data.
- **In-memory computing:** Superior scalability, availability and service ability coupled with top notch performance make it the ideal scale-up platform for large in-memory databases.
- **Virtualisation & cloud:** BullSequana S is the go-to server for the private part of an hybrid cloud.
