

PRESS RELEASE

DATE 1 December 2025

Corbion earns Gold Medal rating for 2025 and receives Carbon-Management 'Leader' distinction from Ecovadis

Corbion, the sustainable food-ingredients company dedicated to preserving what matters, has scored gold or better every year since 2018 in assessments conducted by EcoVadis, the world's leading provider of business sustainability ratings. Corbion ranks within the top 2% of all companies in its global manufacturing industry segment, marking another milestone in the company's nine-year engagement with EcoVadis assessments.

Corbion's 2025 EcoVadis Sustainability Scorecard reflects both strong performance and meaningful progress in several areas compared with last year.

- Labor & Human Rights: increased from 70 to 84
- Ethics: increased from 80 to 84
- Sustainable Procurement: increased from 80 to 88
- Overall score: increased from 77 to 82

These results demonstrate Corbion's continued focus on strengthening responsible business practices, transparency, and its global supply chain.

Carbon management: "Leader" level recognition

In addition to the Gold Medal, EcoVadis recognized Corbion with its highest designation in climate maturity, naming the company a Carbon Management Level: Leader. This distinction is reserved for companies with advanced greenhouse-gas (GHG) management systems and best-in-class commitments, actions, and reporting capabilities within their respective industries.

The Leader rating acknowledges Corbion's:

- Science-based emissions reduction targets validated through the Science Based Targets initiative (SBTi)
- Company-wide action plans to reduce emissions across Scopes 1, 2, and 3
- Integration of climate considerations into business planning and decision-making

PRESS RELEASE

Driving responsible growth

"Every year, we see increases in regulatory demands and expectations, so our challenges steepen, even as we progress on our journey," said Olivier Rigaud, CEO of Corbion. "In 2025, Corbion again earned the gold medal from EcoVadis. This is evidence that we do more than keep pace. We help drive positive change, which takes discipline, collaboration, and a strong sense of purpose."

The EcoVadis assessment evaluates thousands of companies globally across four key areas: environment, labor and human rights, ethics, and sustainable procurement. Corbion's 2025 scorecard provides customers, partners, and stakeholders with a transparent and independent confirmation of its sustainability performance.
