

PRESS RELEASE

CNH's A Sustainable Year release spotlights sustainable practices

Basildon, November 19, 2025

This edition charts our continued progress in sustainably advancing agriculture and construction. Now available online at: <https://publications.cnhindustrial.com/a-sustainable-year-2024-2025/>

CNH's *A Sustainable Year* series returns to spotlight our commitment to a sustainable future. This digital magazine draws inspiration from two key moments for our Company: our Investor Day in May 2025, where we presented the Road to 2030 business strategy, and our most recent [Sustainability Report](#), which highlights our commitment to safer and more responsible operations. Together, they guide the initiatives featured in this edition.

The magazine showcases our progress and positive impact – from accelerating product development to advances in precision farming through to autonomous and robotic solutions. Learn how Case IH's SenseApply™ technology exemplifies the power of "sense and act" innovation, enabling farmers to apply exactly the right amount of nitrogen, herbicide or fungicide in real time and only when crops need it.

The publication includes news from India where mentoring and training initiatives are preparing the next generation of employees to thrive in our industries and thought leadership pieces from external experts who provide additional perspectives on the topics we explore, such as the use of artificial intelligence to accelerate innovation. We have also included the voices of our customers, who are testing groundbreaking machines powered by lower-emission fuels, such as New Holland's T6 and T7 Methane Power tractors and Case IH's Austoft 9000 sugarcane harvester prototype featuring an ethanol engine.
