II. OVERVIEW

Boussard & Gavaudan Holding Limited ("BGHL") is a Guernsey closed-ended investment company and is registered with the Dutch Authority for the Financial Markets as a collective investment scheme under article 1:107 of the Dutch Financial Markets Supervision Act. BGHL invests its assets in order to provide exposure to multiple alternative investment strategies managed by the Investment Manager. The investment objective is to produce long-term appreciation of its assets. BGHL seeks to achieve this by investing in BG Fund ("the Fund"). In addition, a proportion of the net assets of BGHL may, at the discretion of the Investment Manager, be invested in other hedge funds and financial assets selected by the Investment Manager. BGHL aims to generate a target NAV annualized return of Eonia capitalized + 400/600 bps over the business cycle, net of all fees.

A. BG FUND

February 2023 HIGHLIGHTS

Global equity markets diverged in February with the Euro Stoxx 50[®] Total Return up +1.90% in Europe while the S&P500[®] Total Return was down -2.44% in the US on the month. Despite the risk-on sentiment in Europe, the market implied volatility measure VStoxx[®] slightly increased from 18.6% to 19.5% while credit markets were relatively stable with the iTraxx Crossover[®] (S38) remaining at 414bps from January to February.

Against this market backdrop, BG Fund (USD A) returned +22bps in February driven by gains in volatility, credit and trading strategies. Overall returns were held back by positions within equity strategies.

February 2023 COMMENTARY

Volatility strategies

Mandatory convertible bond arbitrage

Mandatory convertible bonds contributed +6bps this month with performance driven by a general repricing in the market. No new issues were seen this month albeit we remain confident that supply is coming given the general pivot towards hybrid securities that we are seeing from issuers looking to reduce borrowing costs.

Convertible bond arbitrage

Convertible bonds contributed -2bp to the performance of the fund in February.

Despite the slight rise in index vol in February, European convertible bond pricing was generally skewed to the downside in a context of lower implied volatility in the single stock option market. This fed through to convertible bonds which were on average down 1.5 vol points.

Our European portfolio was well supported by a number of positive idiosyncratic factors from individual catalysts, improving credit spreads and new primary issuance, albeit this was offset by lower implied volatility across the book as a whole. New convertible bond issuance totalled EUR2.0bn in February and in which we actively participated as they came at attractive levels of implied vol.

The US convertible bond market felt soft throughout the month with 5-year interest rates rising from 3.62% to 4.18%, and credit spreads moving from 430bps to 463bps. Both effects contributed to the negative sentiment, with the emergent higher-for-longer rates theme having a pronounced effect. Our hedges did a great job of protecting the portfolio and the net result was only a marginal negative. The implied vs realised vol gap means positions should continue to carry well.

Volatility Trading

Despite a continued gap between realised and implied, volatility trading posted +3bps to the performance of the fund in February.

Realised volatility vs implied forwards at the end of January *:

	30d Implied vol level on 31/01/23	Realized vol over the month	Difference	
US (VIX [®])	19.40	15.47	-3.93	
EUROPE (Vstoxx [®])	18.57	15.16	-3.41	

Variation of implied volatilities during February *:

	Mar. Vol Index Fut as of 31/01/23	Mar. Vol Index Fut as of 28/02/23	Vol move	
US (VIX®)	20.48	20.78	0.30	
EUROPE (Vstoxx [®])	19.20	19.45	0.25	

The long gamma strategy struggled again to generate net profit in a standalone format as realised volatility continued to move lower. Implied volatility also drifted lower as a risk-on sentiment grew.

Despite this challenging context we actively traded our positions and continued to build exposure where we saw value. New dispersion positions in particular were a big contributor to the performance of the strategy as both carry and remark were favourable.

Warrant arbitrage & SPACs

Warrant arbitrage & SPACs was flat in February.

Equity strategies

February was a difficult month for the equity portfolio, with an overall loss of -77bps.

The portfolio was impacted in particular by our position in Entain where MGM, who had been widely expected to take over the company in order to rationalise the ownership of their mutual joint venture BetMGM, announced that they would not be pursuing the acquisition in the near term. This came as a major surprise to the market and consequently the stock significantly underperformed. This notwithstanding MGM have tried in the past to acquire Entain and have hinted regularly that they are interested in Entain. The JV is of significant strategic importance to MGM and we believe this story has got further to run.

In terms of general backdrop, we have been experiencing a period of very low corporate M&A activity, temporarily driven by the shift in rates and availability of finance which market participants are still adjusting to. This has meant that the early part of the year has been disappointingly quiet, however we have started to see a number of green shoots suggesting the situation could soon change. To mention a few specific examples in the market which are relevant: an offer from the founding family to buyout minority shareholders of Rothschild & Co, a bid by Teddy Sagi for Kape Technologies, confirmed interest from Euronext for Allfunds (albeit which has not yet led to a firm offer) and an ongoing heated fight between two private equity firms to takeover Caverion Oyj.

Credit strategies

Capital Structure Arbitrage

Capital structure arbitrage was flat in February.

Credit long / short

^{*} Source: Bloomberg

Credit long / short contributed +5bps this month. Investment grade & BB names were mostly unchanged in February and only single B bonds ended marginally tighter. The majority of activity in credit in February was in primary issuance, particularly in the investment grade space. Our portfolio in particular benefited from further improvement in CGG along with the continuing and steady recovery in oil & gas services.

Credit special situations

Credit special situations contributed +35bps in February mainly thanks to our holding in Orpea which saw the restructuration conciliation agreement progress, and which is to be finalised in March and executed in July. The portfolio also benefited from KCA which, as for CGG, along with its own specific improvements was also helped by the recovery in oil & gas services.

Trading

Trading contributed +52bps this month driven in the main by systematic trend following and equity quantitative strategies.

Systematic trend following in February saw positive returns from two main factors – short bonds profited from rates rising across the curve steadily throughout the month and secondly from a strong USD, especially against British pound and Japanese yen. While stock indices and commodities had little impact, our market-neutral portfolio contributed positively with the strength of the banking and energy sectors.

The equity quantitative strategy was also positive this month after a frustrating start to the year with significant de-grossing in the market in January and early February which hurt the strategy. Our analysis suggests that market conditions should be more favourable for the strategy going forward, as it demonstrated this month through being implicitly positioned to benefit from a harder stance from the Fed which surprised the market with stronger-than-expected economic data.

Macro trading was flat in February. We are preparing for a temporary rise in risk appetite with renewed disinflationary pressures, however we also expect the US economy to slow down materially during the summer and recession risks to increase and are positioning accordingly.

B. DIRECT INVESTMENTS OTHER THAN BG FUND

On top of its investment in BG Fund, BGHL has other investments. As of 28 February 2023, the net asset value of these investments represents less than 1.00% of the net asset value of BGHL.

Rasaland Investors ("RLI")

Rasaland Investors ("RLI") RLI is a holding company structured as a private equity fund in terms of fees and organisation and managed by BK Partners. BGHL holds the RLI shares through Campastros, S.L.U., a wholly-owned holding company in Spain. RLI is dedicated to investing in land, hotels and high-end resort developments in Mexico. RLI's main asset is a majority interest in ACTUR, a private company owning the land developing assets. ACTUR's other shareholders are Mexican public institutions.

In July 2020, RLI made a cash tender offer to buy back its own shares, for a price per share of US\$0.12270. The valuation of BGHL's investment in RLI shares was marked down on 31 August 2020, using the US\$0.12270 per share price as the estimated fair value of the RLI shares. This price represents a circa 80% discount to the latest published NAV per share.

Hedge Funds Liquidation Stress Tests

Stress tests' scenarios have been improved in order to take into account liquidity issues. This scenario aims at reflecting, to some extent, how the fund would react in distressed market environment (as was the case in late 2008). These stress tests combine the three following adjustments:

• Small, Mid and Large caps adjustment

In certain market conditions, beta may become much higher than its level in normal market conditions and thus the hedging of such positions may not be effective. To address this kind of circumstance we apply a corrective factor to the beta of small, mid and large caps respectively. Since April 2019, the corrective factors have been calibrated on the amplitude of the stresses by looking at worst historical scenario since 1987.

	-5%	-10%	-20%	-30%
Small (<1bn)	2.00	1.75	1.50	1.30
Mid (1bn-5bn)	1.50	1.50	1.25	1.20
Large (5bn-20bn)	1.20	1.15	1.10	1.05
Mega (>20bn)	1.00	1.00	1.00	1.00

Risk arbitrage adjustment

The risk of risk arbitrage positions is taken into account differently in case the market drops by more than 10%. We consider that one third of risk arbitrage positions will collapse.

• Liquidity adjustment

An average discount (realized in 2008) is applied to bond, convertible bond (including mandatory convertible bond) and loan prices in case credit spreads widen by more than 25%.

Mandatories:	Adj. price = Max(Shifted Price – 5% * Max(Credit spread shift – 25%, 0), Parity)
Others :	Adj. price = Max(Shifted Price – 5% * Max(Credit spread shift – 25%, 0), 0)

In compliance with AIFMD, BGIM will report in the newsletter the information hereafter:

• The percentage of assets which are subject to special arrangements arising from their illiquid nature:

Nothing to report

• Any new arrangements for managing the liquidity of the AIF:

Nothing to report

• The current risk profile of the AIF and a description of the risk management systems employed by BGIM to manage market risk, liquidity risk, counterparty risk and other risks, including operational risk:

Please refer to this newsletter for the current risk profile of the Fund.

The backbone of the portfolio and risk management systems at BGIM relies on several components all interfaced together to ensure a full Straight Through Processing. The main system is FusionInvest provided by Misys used for position keeping and risk management. FusionInvest is interfaced to a real time market data vendor for real time P&L and risk calculation. Another key system is Trade Smart, the Execution Management System provided by Trading Screen that is interfaced to an in-house implemented Order Management System, itself connected in real time to FusionInvest. All figures used for qualitative and quantitative risk management are produced out of FusionInvest.

• The gross investment exposure of the Company at any time may represent a maximum of 2 times the Net Asset Value at the time of investment.

	Maximum limit	Current usage
Commitment method	200%	99%
Gross method	200%	100%
