Gothenburg, Sweden

Hexatronic's repurchase program is completed

Hexatronic Group AB (publ.) ("Hexatronic") has repurchased all 1,200,000 of its own common stock covered by the repurchase program approved by the board. The primary purpose of the share repurchase program is to limit dilution resulting from the company's outstanding share-based incentive programs. Additionally, the repurchased shares may be utilized as a means of payment in potential future corporate acquisitions.

The repurchase took place during the period from May 22 to June 9, 2023, and has amounted to between 30 282 and 139 037 shares repurchased per day, which is a total of less than 6% of the average trading volume during the period and at most 8% for an individual day. The repurchase has been made at prices within the currently applicable price range on the stock exchange, which is continuously published by the exchange. The program is hereby completed as the maximum number of shares has been repurchased. The total amount for the repurchase was 80.4 MSEK with an average stock price of 67.0 SEK.
