

## News release from Vestas Mediterranean

Madrid, 26 September 2019

### Vestas wins 168 MW order in Mexico

Vestas has secured a 168 MW order for a wind park in Mexico. The order derives from a corporate power purchase agreement (PPA) and includes the supply and installation of 42 wind turbines of the 4 MW platform with V150 rotors. The order also includes an Active Output Management 5000 (AOM 5000) service agreement for the operation and maintenance of the wind park over the next five years.

The 73-metre long blades of the Vestas 150m rotors will be locally manufactured in the TPI Composites factory in Matamoros, which provides Vestas with blades for the increasing number of V136 and V150 orders that the company is receiving in Mexico and Latin America. The turbine towers will also be produced by local suppliers.

*“This order showcases how Vestas’ technology can meet the increasing demand of private Mexican companies for clean, reliable and competitive energy”,* says Agustín Sánchez-Tembleque, General Manager of Vestas México.

Vestas pioneered the Mexican wind energy market when it installed the first commercial wind turbine in 1994. Since then, Vestas has accumulated over 2,3 GW of installed capacity or under construction in the country.

#### About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with 105 GW of wind turbines in 80 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 86 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 24,500 employees are bringing the world sustainable energy solutions to power a bright future.
