

## Scientific Beta Smart Beta Performance Report, June 2019

### Introduction

Scientific Beta offers smart factor indices that provide exposure to the six known rewarded factors (Mid Cap, Value, High Momentum, Low Volatility, High Profitability and Low Investment) which are also well-diversified to reduce specific risks. These indices are available in a variety of versions, notably enabling broad and narrow indices to be distinguished that correspond to a pronounced choice of factor exposure. Furthermore, these single smart factor indices can be used in multi-factor allocations by taking into account the interactions between the indices to ensure a very high factor intensity.

In this report, we have chosen to present the smart factors represented by the Scientific Beta High Factor Intensity Diversified Multi-Strategy (4-Strategy) indices. Performance for smart factor indices exposed to risk factors known to be well-rewarded over long periods remains strong, with annual performance in excess of the broad cap-weighted indices ranging from 2.89% to 3.37% since base date for the Developed universe. Over shorter periods of time, strategies are subject to fluctuations depending on variations in market conditions. **This quarter, ending June 30, 2019, the best performing index in the Developed universe among those smart factor indices is the SciBeta Developed High Factor Intensity Low Volatility Diversified Multi-Strategy (4-Strategy) index with a relative return of -0.07% compared to the broad cap-weighted index**, while the SciBeta Developed High Factor Intensity Mid Cap Diversified Multi-Strategy (4-Strategy) and SciBeta Developed High Factor Intensity Value Diversified Multi-Strategy (4-Strategy) indices post the lowest relative return (-1.44%).

Naturally, many investors choose to diversify their factor exposure so as not to be exposed to variations in the performance of a single factor. For this reason, Scientific Beta Multi-Beta Multi-Strategy (MBMS) indices provide an allocation to well-rewarded smart factor indices. Here again, Scientific Beta proposes a wide range of Multi-Beta Multi-Strategy indices based on its investment philosophy. This report presents those that enable the diversification of factor and specific risks to be reconciled. Among these indices, we have chosen to present some of the more popular ones, namely the strategy with the longest live track record – the SciBeta Multi-Beta Multi-Strategy 4-Factor Equal-Weight index, together with other strategies created more recently which take into account the interactions between single-factor indices in order to provide the highest factor intensity at a multi-factor level – represented by the SciBeta High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight index, together with its Sector Neutral version, Market Beta Adjusted (Overlay) version that corrects for market beta bias, and combined Sector Neutral/Market Beta Adjusted (Overlay) version.

Over the past ten years, the SciBeta Developed Multi-Beta Multi-Strategy 4-Factor Equal-Weight index, the SciBeta Developed High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight index, the SciBeta Developed High Factor Intensity Diversified Multi-Beta Multi-Strategy (Sector Neutral) 6-Factor 4-Strategy Equal-Weight index, the SciBeta Developed High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight Market Beta Adjusted (Overlay) index and the SciBeta Developed High Factor Intensity Diversified Multi-Beta Multi-Strategy (Sector Neutral) 6-Factor 4-Strategy Equal-Weight Market Beta Adjusted (Overlay) index post strong annual relative returns of 1.14%, 2.20%, 1.92%, 3.90% and 3.23% respectively compared to cap-weighted indices.

**This quarter, the SciBeta Developed Multi-Beta Multi-Strategy 4-Factor Equal-Weight index, the SciBeta Developed High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight index, the SciBeta Developed High Factor Intensity Diversified Multi-Beta Multi-Strategy (Sector Neutral) 6-Factor 4-Strategy Equal-Weight index, the SciBeta Developed High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight Market Beta Adjusted (Overlay) index and the SciBeta Developed High Factor Intensity Multi-Beta Multi-Strategy (Sector Neutral) 6-Factor 4-Strategy Equal-Weight Market Beta Adjusted (Overlay) index post relative returns of -0.76%, -0.96%, -0.90%, -0.58% and -0.66% respectively compared to cap-weighted indices.**

## Smart Factor Indices

### Performance Overview

Tables 1a and 1b display the performance of Scientific Beta Developed High Factor Intensity Diversified Multi-Strategy (4-Strategy) indices. The six tilts selected – size, book-to-market, momentum, volatility, profitability and investment – are the common tilts documented in the literature as liable to produce outperformance compared to cap-weighted indices. The tables present performance statistics for the six rewarded factor tilts. All these indices serve to create a diversified portfolio of the relevant stocks. In particular, they draw on different smart beta weighting schemes<sup>1</sup>, which we refer to as a diversified multi-strategy index. In addition, these indices offer investable proxies for smart beta factor indices. These indices allow investors to be both exposed to a specific risk factor (beta) and to have good diversification of other risk factors, leading to an attractive Sharpe ratio associated with the factor tilt.

*Table 1a: Short-Term Performance Overview for Smart Factor Indices for the Scientific Beta Developed Universe*

High Factor Intensity Diversified Multi-Strategy (4-Strategy) Index	Past Quarter (as of 30/06/2019)			Year to Date (as of 30/06/2019)		
	Absolute Return	Relative Return		Absolute Return	Relative Return	
		To Tilted Cap-Weighted	To Broad Cap-Weighted		To Tilted Cap-Weighted	To Broad Cap-Weighted
Mid Cap	2.85%	-0.68%	-1.44%	15.23%	-0.92%	-2.22%
Value	2.84%	-0.79%	-1.44%	13.62%	-0.15%	-3.83%
High Momentum	3.76%	-1.46%	-0.53%	16.76%	-0.91%	-0.69%
Low Volatility	4.21%	-0.55%	-0.07%	16.40%	-0.04%	-1.05%
High Profitability	3.42%	-0.62%	-0.87%	15.53%	-0.85%	-1.92%
Low Investment	2.87%	-0.74%	-1.42%	15.05%	0.04%	-2.40%

The history of Scientific Beta indices considered here begins on 21/06/2002. The statistics are based on daily total return series (with dividends reinvested). The statistics reported in the table are not annualised. All results are in USD.

Looking at past quarter relative returns, the best performing index is the SciBeta Developed High Factor Intensity Low Volatility Diversified Multi-Strategy (4-Strategy) index with a relative return of -0.07% compared to the broad cap-weighted index, while the SciBeta Developed High Factor Intensity Mid Cap Diversified Multi-Strategy (4-Strategy) and the SciBeta Developed High Factor Intensity Value Diversified Multi-Strategy (4-Strategy) indices post the lowest relative return (-1.44%).

<sup>1</sup>Maximum Deconcentration, Diversified Risk Weighted, Maximum Decorrelation and Efficient Maximum Sharpe Ratio.

Table 1b: Long-Term Performance Overview for Smart Factor Indices for the Scientific Beta Developed Equity Universe

High Factor Intensity Diversified Multi-Strategy (4-Strategy) Index	Since Base Date: From 21/06/2002 to 30/06/2019							
	Absolute Return	Relative Return compared to Tilted Cap-Weighted	Relative Return compared to Broad Cap-Weighted	Volatility	Sharpe Ratio	Maximum Relative Drawdown	Outperformance Probability (1Y)	Outperformance Probability (3Y)
Mid Cap	11.25%	0.08%	3.06%	13.48%	0.74	7.79%	68.72%	89.07%
Value	11.57%	1.31%	3.37%	13.91%	0.74	6.70%	75.96%	93.17%
High Momentum	11.11%	1.61%	2.92%	13.76%	0.71	13.84%	74.26%	87.43%
Low Volatility	11.31%	1.61%	3.11%	12.00%	0.83	10.82%	67.02%	89.62%
High Profitability	11.43%	1.20%	3.23%	13.00%	0.78	7.09%	85.11%	94.54%
Low Investment	11.08%	1.23%	2.89%	13.05%	0.75	8.62%	74.26%	94.26%

The history of Scientific Beta indices' returns considered here begins on 21/06/2002. The statistics are based on daily total return series. All statistics are annualised and performance ratios that involve the average returns are based on the geometric average, which reliably reflects multiple holding period returns for investors. Scientific Beta uses the yield on Secondary Market US Treasury Bills (3M) as a proxy for the risk-free rate in US Dollars. We use the last 10 years of history in order to compute the outperformance probability. The tilted cap-weighted indices are obtained based on the same selection of assets as each of the smart factor indices. All results are in USD.

Since base date, all High Factor Intensity Diversified Multi-Strategy (4-Strategy) indices exhibit positive relative returns compared to cap-weighted indices, whether broad or tilted cap-weighted indices.

The best performance relative to the broad cap-weighted index is posted by the SciBeta Developed High Factor Intensity Value Diversified Multi-Strategy (4-Strategy) index (3.37%) while the SciBeta Developed High Factor Intensity Low Investment Diversified Multi-Strategy (4-Strategy) index posts the lowest relative return (2.89%).

Tilted cap-weighted indices are factor indices that use the same universe of assets as each smart factor index. The outperformance of smart factor indices compared to those indices is due to the difference in weighting scheme, which results in better diversification for smart factor indices compared to cap-weighted indices.

## Multi Smart Factor Indices

Multi-Beta Multi-Strategy Indices are Scientific Beta's flagship indices. These indices correspond to a multi-factor index allocation that uses Scientific Beta Diversified Multi-Strategy Factor Indices, with intensity to a particular factor, as building blocks. This approach minimises unintended specific risks and provides blended intensity to the desired risk factors. This double diversification – allocation across various factors (Multi-Beta allocation) along with a smart diversification of the specific risks (Diversified Multi-Strategy weighting scheme) – minimises the non-rewarded risks, hence the name Multi-Smart Factor Indices. Scientific Beta offers different types of Multi-Beta Multi-Strategy indices. This document presents the most popular ones, namely the strategy with the longest live track record – the SciBeta Multi-Beta Multi-Strategy 4-Factor Equal-Weight Index, together with more recently-created strategies that take into account the interactions between single-factor indices in order to provide greater factor intensity at a multi-factor level – represented by the SciBeta High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight Index, together with its Sector Neutral version, Market Beta Adjusted (Overlay) version that corrects for market beta bias, and combined Sector Neutral/Market Beta Adjusted (Overlay) version.

## Performance Overview

### Live Performance

Table 2a presents the live performance of the multi-beta multi-strategy indices in various regions. The live date of the first generation Multi-Beta Multi-Strategy 4-Factor EW indices, i.e. 20/12/2013, is used as the basis as all the multi-factor indices proposed by Scientific Beta are derived from the same strategy. Although the other indices were created more recently, the longest live period is used for comparison purposes.

Table 2a: Live Performance of Multi-Beta Multi-Strategy Indices as of 30/06/2019

Index	Multi-Beta Multi-Strategy	Nº of Constituents	Relative Return Compared to Broad Cap-Weighted	Absolute Return	Volatility	Sharpe Ratio
Developed	4-Factor EW	1718	0.36%	8.43%	9.93%	0.77
	HFI 6-Factor 4-Strategy EW	1168	1.33%	9.41%	9.74%	0.88
	HFI 6-Factor 4-Strategy EW Sector Neutral	1186	1.52%	9.60%	10.09%	0.87
	HFI 6-Factor 4-Strategy EW Market Beta Adjusted (CW Overlay)	1168	2.29%	10.37%	10.98%	0.87
	HFI 6-Factor 4-Strategy EW Sector Neutral Market Beta Adjusted (CW Overlay)	1186	2.21%	10.29%	11.12%	0.85

	HFI 6-Factor 4-Strategy EW Sector Neutral	318	0.54%	11.86%	12.36%	0.89
	HFI 6-Factor 4-Strategy EW Market Beta Adjusted (CW Overlay)	316	1.70%	13.02%	13.26%	0.92
	HFI 6-Factor 4-Strategy EW Sector Neutral Market Beta Adjusted (CW Overlay)	318	1.53%	12.85%	13.49%	0.89
Developed Europe	4-Factor EW	456	1.46%	4.99%	14.32%	0.29
	HFI 6-Factor 4-Strategy EW	306	2.81%	6.33%	14.24%	0.39
	HFI 6-Factor 4-Strategy EW Sector Neutral	310	3.54%	7.06%	14.07%	0.44
	HFI 6-Factor 4-Strategy EW Market Beta Adjusted (CW Overlay)	306	3.05%	6.57%	15.28%	0.38
	HFI 6-Factor 4-Strategy EW Sector Neutral Market Beta Adjusted (CW Overlay)	310	3.76%	7.28%	15.27%	0.42
Developed Asia-Pacific ex Japan	4-Factor EW	304	1.08%	6.04%	10.67%	0.49
	HFI 6-Factor 4-Strategy EW	198	1.46%	6.43%	11.08%	0.51
	HFI 6-Factor 4-Strategy EW Sector Neutral	202	0.73%	5.70%	11.08%	0.44
	HFI 6-Factor 4-Strategy EW Market Beta Adjusted (CW Overlay)	198	2.28%	7.25%	13.89%	0.46
	HFI 6-Factor 4-Strategy EW Sector Neutral Market Beta Adjusted (CW Overlay)	202	1.31%	6.28%	13.89%	0.39
Japan	4-Factor EW	401	1.63%	7.46%	16.92%	0.44
	HFI 6-Factor 4-Strategy EW	272	3.30%	9.13%	17.15%	0.54
	HFI 6-Factor 4-Strategy EW Sector Neutral	278	2.57%	8.40%	17.07%	0.50
	HFI 6-Factor 4-Strategy EW Market Beta Adjusted (CW Overlay)	272	4.09%	9.92%	19.29%	0.52
	HFI 6-Factor 4-Strategy EW Sector Neutral Market Beta Adjusted (CW Overlay)	278	3.38%	9.21%	19.21%	0.48

Based on daily total returns in USD for Developed, Developed ex US, United States, Developed Europe and Developed Asia-Pacific ex Japan, and in JPY for Japan. The live date of the first generation Multi-Beta Multi-Strategy 4-Factor EW indices, i.e. 20/12/2013, is used as the basis as all the multi-factor indices proposed by Scientific Beta are derived from the same strategy. Although the other indices were created more recently, the longest live period is used for comparison purposes. The average number of constituents included in each index, computed over the whole period of interest, is reported.

## Latest Performance

Table 2b displays an overview of the relative and absolute performance of Scientific Beta Multi-Beta Multi Strategy indices for various regions and different time periods.

Over the long term, all Scientific Beta Multi-Beta Multi-Strategy indices post positive excess returns compared to broad cap-weighted indices. Over the past ten years, the best performing index was the SciBeta Developed Europe High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight Market Beta Adjusted (Overlay) index with a relative return of 4.65% while the worst performing index was the SciBeta United States Multi-Beta Multi-Strategy 4-Factor Equal-Weight index with a relative return of 0.43%.

**In the past quarter, if we consider the cumulative excess returns, the best performing index is the SciBeta United States High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight Market Beta Adjusted (Overlay) index with a relative return of -0.09%**, while the worst performing index is the SciBeta Japan High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy Equal-Weight Market Beta Adjusted (Overlay) index with a relative return of -3.15%.

From table 2b, it also appears that the volatility of the Scientific Beta Multi-Beta Multi Strategy indices is significantly lower over the long term compared to the volatility of broad-cap weighted indices for all regions, with the highest differences being observed for the Developed Asia-Pacific ex-Japan indices, with volatilities of 16.70% for the broad cap-weighted index, and volatilities of 13.84% and 13.95% respectively for the Scientific Beta Multi-Beta Multi Strategy 4-Factor Equal-Weight and Scientific Beta High Factor Intensity Diversified Multi-Beta Multi Strategy 6-Factor 4-Strategy Equal-Weight allocation indices over the past ten years. As a result, we observe a considerable improvement in the Sharpe ratios for the Scientific Beta Multi-Beta Multi Strategy indices over the past ten years compared to the broad cap-weighted indices. Sharpe ratios range from 0.58 (Japan) to 1.14 (United States) for the Scientific Beta High Factor Intensity Diversified Multi-Beta Multi Strategy 6-Factor 4-Strategy Equal-Weight allocation indices, compared to 0.38 (Japan) and 0.94 (United States) for the broad cap-weighted indices.

Table 2b: Relative and Absolute Performance of Scientific Beta Multi-Beta Multi-Strategy Indices across Regions as of 30/06/2019

Index	Multi-Beta Multi-Strategy	Nº of Constituents	Relative Return compared to Cap-Weighted				Information Ratio		Absolute Return		Volatility		Sharpe Ratio

Based on daily total returns in USD for Developed, Developed ex US, United States, Developed Europe, Developed Asia-Pacific ex Japan, and in JPY for Japan. Base date is 21/06/2002 for Scientific Beta Multi-Beta Multi-Strategy 4-Factor EW indices and Scientific Beta High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy EW indices and their Sector Neutral version, 18/06/2004 for Scientific Beta High Factor Intensity Diversified Multi-Beta Multi-Strategy 6-Factor 4-Strategy EW Market Beta Adjusted (Overlay) indices and their Sector Neutral version and 19/12/2003 for Scientific Beta Multi-Beta Multi-Strategy CW indices. The statistics other than for 1Q and YTD are annualised and performance ratios that involve the average returns are based on the geometric average, which reliably reflects multiple holding period returns for investors. The risk-free rates used are defined according to the regional universe of the index. The number of index constituents is the average over the 10-year period.

## Long-Term Track Records

Table 2c displays the performance of long-term US data series, the initial reference universe being the 500 largest market-cap US stocks.

*Table 2c: Performance Overview of Multi-Beta Multi-Strategy Indices for US Long-Term Data Series*

<b>Long-Term US Track Records since 31/12/1977 (as of 31/12/2017): 40 years</b>			
<b>United States</b>	<b>Relative Return compared to Cap-Weighted</b>	<b>Volatility</b>	<b>Sharpe Ratio</b>
HFI 4-Factor 4-Strategy EW	2.84%	14.35%	0.68
HFI 6-Factor 4-Strategy EW	2.88%	14.38%	0.68
HFI 6-Factor 4-Strategy EW Sector Neutral	2.56%	15.27%	0.62
HFI 6-Factor 4-Strategy EW Market Beta Adjusted (CW Overlay)	3.84%	17.73%	0.61
HFI 6-Factor 4-Strategy EW Sector Neutral Market Beta Adjusted (CW Overlay)	3.29%	18.30%	0.56

Long-Term US data series are style factor data series constructed from the 500 largest market-cap US stocks. The statistics are based on daily total return series (with dividends reinvested). All statistics are annualised and performance ratios that involve the average returns are based on the geometric average, which reliably reflects multiple holding period returns for investors. The yield on Secondary Market US Treasury Bills (3M) is used as a proxy for the risk-free rate in US Dollars. All results are in USD.

## About Scientific Beta

Scientific Beta aims to be the first provider of a smart beta indices platform to help investors understand and invest in advanced beta equity strategies.

Established by EDHEC-Risk Institute, one of the very top academic institutions in the field of fundamental and applied research for the investment industry, Scientific Beta shares the same concern for scientific rigour and veracity, which it applies to all the services that it offers investors and asset managers.

The Scientific Beta offering covers three major services:

- **Scientific Beta Indices** are smart beta indices that aim to be the reference for the investment and analysis of alternative beta strategies. Scientific Beta Indices reflect the state-of-the-art in the construction of different alternative beta strategies and allow for a flexible choice among a wide range of options at each stage of their construction process. This choice enables users of the platform to construct their own benchmark, thus controlling the risks of investing in this new type of beta (Smart Beta 2.0).

Within the framework of Smart Beta 2.0 offerings, Scientific Beta provides access to smart factor indices, which give exposure to risk factors that are well rewarded over the long-term while at the same time diversifying away unrewarded specific risks. By combining these smart factor indices, one can design very high performance passive investment solutions.

- **Scientific Beta Analytics** are detailed analytics and exhaustive information on its smart beta indices to allow investors to evaluate the advanced beta strategies in terms of risk and performance. The analytics capabilities include risk and performance assessments, factor and sector attribution, and relative risk assessment. Scientific Beta Analytics also allow the liquidity, turnover and diversification quality of the indices offered to be analysed. In the same way, analytics provide an evaluation of the probability of out-of-sample outperformance of the various strategies present on the platform.
- **Scientific Beta Fully-Customised Benchmarks and Smart Beta Solutions** is a service proposed by Scientific Beta, and its partners, in the context of an advisory relationship for the construction and implementation of benchmarks specially designed to meet the specific objectives and constraints of investors and asset managers. This service notably offers the possibility of determining specific combinations of factors, considering optimal combinations of smart beta strategies, defining a stock universe specific to the investor, and taking account of specific risk constraints during the benchmark construction process.

With a concern to provide worldwide client servicing, Scientific Beta is present in Boston, London, Nice, Singapore and Tokyo. As of December 31, 2018, the Scientific Beta indices corresponded to USD 43bn in assets under replication. Scientific Beta has a dedicated team of 52 people who cover not only client support from Nice, Singapore and Boston, but also the development, production and promotion of its index offering. Scientific Beta signed the United Nations-supported Principles for Responsible Investment (PRI) on September 27, 2016.

All information provided by Scientific Beta Pte is impersonal and not tailored to the needs of any person, entity or group of persons. Past performance of an index is not a guarantee of future results.

This material, and all the information contained in it (the "information"), have been prepared by Scientific Beta Pte solely for informational purposes, are not a recommendation to participate in any particular trading strategy and should not be considered as an investment advice or an offer to sell or buy securities. The information shall not be used for any unlawful or unauthorised purposes. The information is provided on an "as is" basis. Although Scientific Beta Pte shall obtain information from sources which Scientific Beta Pte considers reliable, neither Scientific Beta Pte nor its information providers involved in, or related to, compiling, computing or creating the information (collectively, the "Scientific Beta Pte Parties") guarantees the accuracy and/or the completeness of any of this information. None of the Scientific Beta Pte Parties makes any representation or warranty, express or implied, as to the results to be obtained by any person or entity from any use of this information, and the user of this information assumes the entire risk of any use made of this information. None of the Scientific Beta Pte Parties makes any express or implied warranties, and the Scientific Beta Pte Parties hereby expressly disclaim all implied warranties (including, without limitation, any implied warranties of accuracy, completeness, timeliness, sequence, currentness, merchantability, quality or fitness for a particular purpose) with respect to any of this information. Without limiting any of the foregoing, in no event shall any of the Scientific Beta Pte Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. All Scientific Beta indices and data are the exclusive property of Scientific Beta Pte.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results. In many cases, hypothetical, back-tested results were achieved by means of the retroactive application of a simulation model and, as such, the corresponding results have inherent limitations. The index returns shown do not represent the results of actual trading of investable assets/securities. Scientific Beta Pte maintains the index and calculates the index levels and performance shown or discussed, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or investment funds that are intended to track the performance of the index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the index performance shown. Back-tested performance may not reflect the impact that any material market or economic factors might have had on the advisor's management of actual client assets. The information may be used to create works such as charts and reports. Limited extracts of information and/or data derived from the information may be distributed or redistributed provided this is done infrequently in a non-systematic manner.

The information may be used within the framework of investment activities provided that it is not done in connection with the marketing or promotion of any financial instrument or investment product that makes any explicit reference to the trademarks licensed to Scientific Beta Pte (SCIENTIFIC BETA, SCIBETA and any other trademarks licensed to Scientific Beta Pte) and that is based on, or seeks to match, the performance of the whole, or any part, of a Scientific Beta index. Such use requires that the Subscriber first enters into a separate license agreement with Scientific Beta Pte. The information may not be used to verify or correct other data or information from other sources.
