- Number of customers increased by 65,000; customer activity at good level
- Loan portfolio increased by 236 EURm. Portfolio quality remains strong and improved during the quarter, despite increased specific impairments for selected customers
- Deposits from customers increased by 86 EURm, while financial intermediaries' deposits remained broadly unchanged.
   Due to interest rate dynamics, balance sheet contains higher share of term deposits than planned
- Quarterly cost/income ratio 53.3% and ROE 14.3%
- Quarterly net profit amounted to 26.3 EURm. While interest income grew, deposit dynamics and the timing of higher deposit rates drove an increase in interest expenses

<sup>3 \*</sup> ROE is based on net profit and equity attributable to the owners of AS LHV Group

- Declining interest rates reduced interest income, as asset-side yields are decreasing faster than liabilities-side costs. By the end of quarter, yields on interest-bearing assets aligned with market rates
- Share of term deposits remains above plan. At the same time, strong competition in the loan market is putting downward pressure on margins
- Expenses are slightly above plan, driven by personnel and marketing costs
- Loans and deposits according to plan.
   Focus remains on deposits and customer activation
- 9-month profit amounted to 79.4 EURm, falling 2.8 EURm short of financial plan

### LHV Bank

## Loan-to-deposit ratio significantly more optimal level

- Main focus is on improving loan-todeposit ratio through loan growth and deposit reduction
- Loan portfolio increased by 91 EURm. Loans approved by Credit Committee but not yet disbursed amount over 200 EURm, providing the basis for continued strong loan growth in next quarter
- Deposits decreased by 20 EURm.
   Over 1,600 customers in retail banking and more than 27,000 depositors via platforms
- In financial intermediaries' segment, focus remains on both new and existing major customers. First customer has started using direct euro payment service

# LHV Group YTD 2025 vs YE 2024

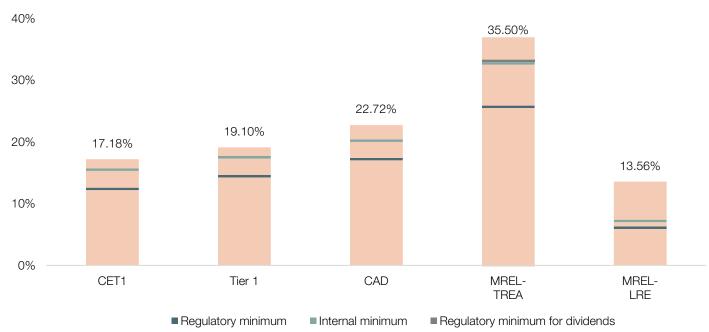

# Risks and capitalisation

# Capitalisation

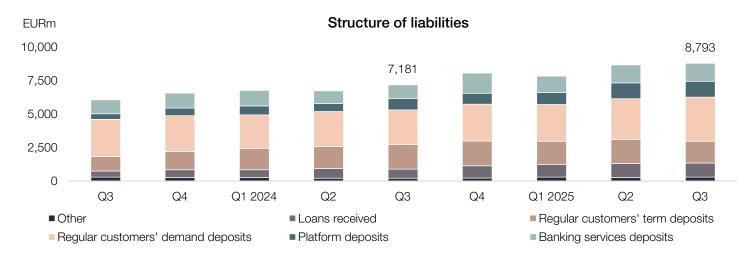

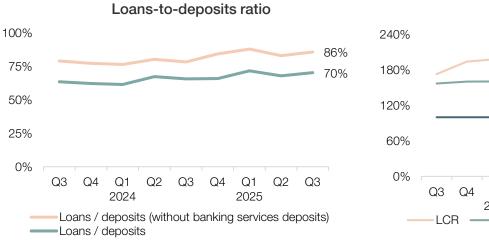

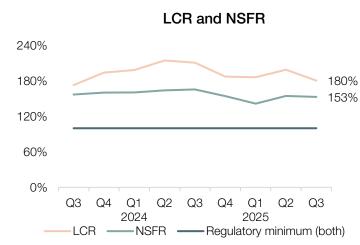

- LHV Group well-capitalised and all capital targets have been met with solid buffer. An on-site ECB audit is currently underway, focusing on capital adequacy
- Largest capital buffer is at Tier 1 level, exceeding regulatory requirement by 2.8 percentage points, while remaining the lowest among three capital layers
- Q3 net profit is not included in own funds
- No capital transactions are planned for Q4

# Liquidity and funding

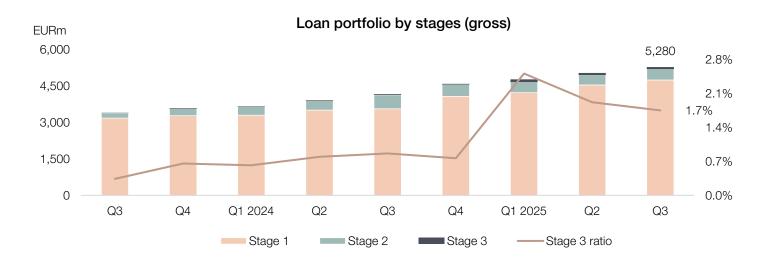

- Liquidity remains strong, with a loans-to-deposits ratio of 70%
- Liquidity coverage ratio (LCR) 180%
- Net Stable Funding Ratio (NSFR) remains very high - at 153%. Both ratios declined slightly due to falling interest rates and the shift of customer deposits from term deposits to current accounts
- LHV Pank is primarily funded by local deposits, while other sources are kept available as a buffer for risk or project financing
- LHV Bank is funded via platform deposits and has been actively raising direct deposits since May

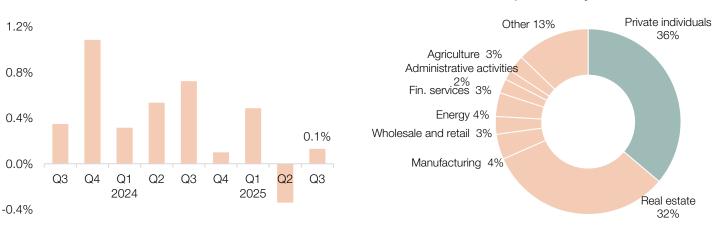

# Loan portfolio quality

Cost of risk ratio

#### Loan portfolio by sectors

- Loan portfolio is well diversified across sectors
- Overall portfolio quality remains strong, although the cost of risk and the share of Stage 3 loans remains high. Loans have prescribed waiting period before they exit Stage 3
- Specific impairments were made for a few individual customers, while model-based provisions continue to decline
