

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 20-F

(Mark One)

- REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934
- OR
- ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2024
- OR
- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
- OR
- SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Date of event requiring this shell company report _____

For the transition period from ____ to ____.

Commission file number

000-29106

Golden Ocean Group Limited

(Exact name of Registrant as specified in its charter)

(Translation of Registrant's name into English)

Bermuda

(Jurisdiction of incorporation or organization)

Par-la-Ville Place, 14 Par-la-Ville Road, Hamilton, Bermuda, HM 08

(Address of principal executive offices)

James Ayers, Telephone: (1) 441 2956935, Facsimile: (1) 441 295 3494,
Par-la-Ville Place, 14 Par-la-Ville Road, Hamilton, HM 08, Bermuda

(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act

Title of each class	Trading Symbol	Name of each exchange on which registered
Common Shares, Par Value \$0.05 Per Share	GOGL	NASDAQ Global Select Market

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

199,403,293 Common Shares, Par Value \$0.05 Per Share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes

No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes

No

Note – Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes

No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes

No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See definition of "large accelerated filer", "accelerated filer", and "emerging growth company" in Rule 12b-2 of the Exchange Act.:

Large accelerated filer

Accelerated filer

Non-accelerated filer

Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 13(a) of the Exchange Act.

† The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued by the
International Accounting Standards Board

Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17

Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes

No

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Matters discussed in this annual report and the documents incorporated by reference may constitute forward-looking statements. The Private Securities Litigation Reform Act of 1995 (the "PSLRA"), provides safe harbor protections for forward-looking statements in order to encourage companies to provide prospective information about their business. Forward-looking statements include, but are not limited to, statements concerning plans, objectives, goals, strategies, future events or performance, underlying assumptions and other statements, which are other than statements of historical facts.

We are taking advantage of the safe harbor provisions of the PSLRA and are including this cautionary statement in connection with this safe harbor legislation. This annual report and any other written or oral statements made by us or on our behalf may include forward-looking statements, which reflect our current views with respect to future events and financial performance. This annual report includes assumptions, expectations, projections, intentions and beliefs about future events. These statements are intended as "forward-looking statements." We caution that assumptions, expectations, projections, intentions and beliefs about future events may and often do vary from actual results and the differences can be material. When used in this document, the words "believe," "expect," "anticipate," "estimate," "intend," "plan," "targets," "projects," "likely," "will," "would," "could," "seeks," "potential," "continue," "contemplate," "possible," "might," "forecasts," "may," "should" and similar expressions or phrases may identify forward-looking statements.

The forward-looking statements in this annual report are based upon various assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections. As a result, you are cautioned not to rely on any forward-looking statements.

In addition to these important factors and matters discussed elsewhere herein, and in the documents incorporated by reference herein, important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include among other things:

- general market trends in the dry bulk industry, which is cyclical and volatile, including fluctuations in charter hire rates and vessel values;
- a decrease in the market value of our vessels;
- changes in supply and demand in the dry bulk shipping industry, including the market for our vessels and the number of newbuildings under construction;
- delays or defaults in the construction of our newbuildings could increase our expenses and diminish our net income and cash flows;
- an oversupply of dry bulk vessels, which may depress charter rates and profitability;
- our future operating or financial results;
- our continued borrowing availability under our debt agreements and compliance with the covenants contained therein;
- our ability to procure or have access to financing, our liquidity and the adequacy of cash flows for our operations;
- the failure of our contract counterparties to meet their obligations, including changes in credit risk with respect to our counterparties on contracts;
- the loss of a large customer or significant business relationship;
- the strength of world economies;
- the volatility of prevailing spot market and charter-hire charter rates, which may negatively affect our earnings;
- our ability to successfully employ our dry bulk vessels and replace our operating leases on favorable terms, or at all;
- changes in our operating expenses and voyage costs, including bunker prices, fuel prices (including increased costs for low sulfur fuel), drydocking, crewing and insurance costs;
- the adequacy of our insurance to cover our losses, including in the case of a vessel collision;
- vessel breakdowns and instances of offhire;
- our ability to fund future capital expenditures and investments in the construction, acquisition and refurbishment of our vessels (including the amount and nature thereof and the timing of completion of vessels under construction, the delivery and commencement of operation dates, expected downtime and lost revenue);
- risks associated with any future vessel construction or the purchase of second-hand vessels;
- effects of new products and new technology in our industry, including the potential for technological innovation to reduce the value of our vessels and charter income derived therefrom;
- the impact of an interruption or failure of our information technology and communications systems, including the impact of cyber-attacks, upon our ability to operate;

- potential liability from safety, environmental, governmental and other requirements and potential significant additional expenditures (by us and our customers) related to complying with such regulations;
- changes in governmental rules and regulations or actions taken by regulatory authorities and the impact of government inquiries and investigations;
- the arrest of our vessels by maritime claimants;
- government requisition of our vessels during a period of war or emergency;
- our compliance with complex laws, regulations, including environmental laws and regulations and the U.S. Foreign Corrupt Practices Act of 1977;
- potential difference in interests between or among certain members of our board of directors ("Board"), executive officers, senior management and shareholders;
- our ability to attract, retain and motivate key employees;
- work stoppages or other labor disruptions by our employees or the employees of other companies in related industries;
- potential exposure or loss from investment in derivative instruments;
- stability of Europe and the Euro or the inability of countries to refinance their debts;
- inflationary pressures and central bank policies intended to combat overall inflation and rising interest rates and foreign exchange rates;
- fluctuations in currencies;
- acts of piracy on ocean-going vessels, public health threats, terrorist attacks and international hostilities and political instability;
- potential physical disruption of shipping routes due to accidents, climate-related (acute and chronic), political instability, terrorist attacks, piracy, international sanctions or international hostilities, including the ongoing conflict between Russia and Ukraine, the conflict between Israel and Hamas and related conflicts in the Middle East, and the Houthi attacks in the Red Sea and the Gulf of Aden, and supply chain disruptions and market volatility surround such events;
- general domestic and international political and geopolitical conditions or events, including any further changes in U.S. trade policy that could trigger retaliatory actions by affected countries;
- the impact of the U.S. congressional election results affecting the economy, future government laws and regulations, trade policy matters, such as the imposition of tariffs;
- the impact of adverse weather and natural disasters;
- the impact of increasing scrutiny and changing expectations from investors, lenders and other market participants with respect to our Environmental, Social and Governance ("ESG") policies;
- changes in seaborne and other transportation;
- the length and severity of epidemics and pandemics and governmental responses thereto and the impact on the demand for seaborne transportation in the dry bulk sector;
- fluctuations in the contributions of our joint ventures to our profits and losses;
- the potential for shareholders to not be able to bring a suit against us or enforce a judgement obtained against us in the United States;
- our treatment as a "passive foreign investment company" by U.S. tax authorities;
- being required to pay taxes on U.S. source income;
- our operations being subject to economic substance requirements;
- potentially becoming subject to corporate income tax in Bermuda in the future;
- the volatility of the stock price for our common shares, from which investors could incur substantial losses, and the future sale of our common shares, which could cause the market price of our common shares to decline; and
- other factors discussed in "Item 3. Key Information - D. Risk Factors." in this annual report.

We caution readers of this report not to place undue reliance on these forward-looking statements, which speak only as of their dates. Except to the extent required by applicable law or regulation, we undertake no obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date of this annual report or to reflect the occurrence of unanticipated events. These forward-looking statements are not guarantees of our future performance, and actual results and future developments may vary materially from those projected in the forward-looking statements.

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

On October 7, 2014, Knightsbridge Shipping Limited, ("Knightsbridge"), and Golden Ocean Group Limited, ("Former Golden Ocean"), entered into an agreement and plan of merger ("the Merger Agreement"), pursuant to which the two companies agreed to merge ("the Merger"), with Knightsbridge serving as the surviving legal entity. The Merger was completed on March 31, 2015, and the name of Knightsbridge was changed to Golden Ocean Group Limited. The Merger has been accounted for as a business combination using the acquisition method of accounting, with us selected as the accounting acquirer. See "Item 4. Information on the Company - A. History and Development of the Company" for more information.

Throughout this report, unless the context otherwise requires, "Golden Ocean," the "Company," "we," "us" and "our" refer to Golden Ocean Group Limited and its subsidiaries.

The term deadweight ton ("dwt"), is used in describing the capacity or size of vessels. Dwt, expressed in metric tons, each of which is equivalent to 1,000 kilograms, refers to the maximum weight of cargo and supplies that a vessel can carry.

We own and operate dry bulk vessels of the following sizes:

- *Newcastlemax, which are vessels with carrying capacities of between 200,000 dwt and 210,000 dwt;*
- *Capsize, which are vessels with carrying capacities of between 90,000 dwt and 200,000 dwt;*
- *Kamsarmax, which are vessels with carrying capacities of between 80,000 dwt and 90,000 dwt; and*
- *Panamax, which are vessels with carrying capacities of between 65,000 and 80,000 dwt.*

Unless otherwise indicated, all references to "USD", "US\$" and "\$" in this report are to, and amounts are presented in U.S. dollars.

A. [RESERVED]

B. CAPITALIZATION AND INDEBTEDNESS

Not applicable.

C. REASONS FOR THE OFFER AND USE OF PROCEEDS

Not applicable.

D. RISK FACTORS

Our assets are primarily engaged in international dry bulk shipping. The risk factors summarized in the Cautionary Statement Regarding Forward Looking Statements and Summary of Risk Factors and detailed below, summarize certain risks that may materially affect our business, financial condition or results of operations. Unless otherwise indicated in this annual report on Form 20-F, all information concerning our business and our assets is as of March 20, 2025.

Risk Factors Summary

The principal risks that could adversely affect, or have adversely affected, our Company's business, operation results and financial conditions are categorized and detailed below.

- **Risk Related to Our Industry**

Our assets operate worldwide within the dry bulk shipping sector which is volatile and unpredictable. Several risk factors including but not limited to our global and local market presence will impact our widespread operations. We are exposed to regulatory, statutory, operational, technical, counterpart, environmental, and political risks, developments and regulations that may impact and or disrupt our business. Details of specific risks relating to our industry are described below.

- **Risks Related to our Business**

Our Company is subject to a significant number of external and internal risks. We are a company with operations in many different jurisdictions, markets and industries and with numerous employees, shareholders, customers and other stakeholders having varying interests, and this broad exposure subjects us to significant risks. We also engage in activities, operations and actions that could result in harm to our Company, and adversely affect our financial performance, position and our business. Details of specific risks relating to our Company are described below.

- **Risk Related to an Investment in Our Securities**

Our common shares are subject to a significant number of external and internal risks. The market price of our common shares has historically been unpredictable and volatile. As a holding company, we depend on the ability of our subsidiaries to distribute funds to satisfy our financial and other obligations. As we are a foreign corporation, our shareholders may not have the same rights as a shareholder in a U.S. corporation may have. In addition, our shareholders may not be able to bring suit against us or enforce a judgement obtained in the U.S. against us since our offices and the majority of our assets are located outside of the U.S. Furthermore, sales of our common shares or conversions of our convertible notes could cause the market price of our common shares to decline. Details of specific risks relating to our common shares are described below.

Some risks are static while other risks may change and will vary depending on global and corporate developments that may occur now or in the future. The risk factors below identify risks relating to our industry, Company and common shares. These risks may not cover all risk factors applicable to the Company.

Risks Related to Our Industry

Charter hire rates for dry bulk vessels are volatile, have fluctuated significantly the past years and may decrease below our break-even rates in the future, which may adversely affect our earnings, revenues and profitability and our ability to comply with our loan covenants.

Substantially all of our revenues are derived from a single market, the dry bulk segment, and therefore our financial results are subject to the cyclicity of the dry bulk shipping industry and any attendant volatility in charter hire rates and profitability. The degree of charter hire rate volatility among different types of dry bulk vessels has varied widely, and time charter and spot market rates for dry bulk vessels have in the recent past declined below operating costs of vessels.

The dry bulk market stayed healthy in 2024, supported by continued strong Chinese demand for coal, bauxite and iron ore as well as longer sailing distances. Especially larger vessel segments where the Company's fleet is focused, showed relative strength on the back of strong demand trade of iron ore and bauxite in the Atlantic basin. However, dry bulk freight rates began to decline in November 2024 as demand softened in some commodity groups.

Charter rate fluctuations result from changes in the supply and demand for vessel capacity for the major commodities carried on water internationally. Because the factors affecting the supply and demand for vessels are outside of our control and are unpredictable, the nature, timing, direction and degree of changes in charter rates are also unpredictable. Since we charter our vessels principally in the spot market, we are exposed to the cyclicity and volatility of the spot market. Please refer to risk factor *"We are dependent on spot charters and any decrease in spot charter rates in the future may adversely affect our earnings and ability to pay our dividends."*

Furthermore, a significant decrease in charter rates would cause asset values to decline which may require us to record an impairment charge in our consolidated financial statements, which in turn could adversely affect our financial results. In 2024,

2023 and 2022, we have not had any impairment losses on our owned or leased assets, except for \$11.8 million related to sale of vessels in 2023 mentioned below. Further, because the market value of our vessels may fluctuate significantly, we may also incur losses when we sell vessels, which may adversely affect our earnings. If we sell vessels at a time when vessel prices have fallen and before we have recorded an impairment adjustment to our financial statements, the sale may be at less than the vessel's carrying amount in our financial statements, resulting in a loss and a reduction in earnings. For instance, during the year ended December 31, 2023, we recorded impairment losses of \$11.8 million related to sales of vessels. No impairment loss was recorded related to sale of vessels during the year ended December 31, 2024 and December 31, 2022.

Factors that influence demand for vessel capacity include:

- Supply of and demand for and seaborne transportation of energy resources, commodities, and semi-finished and finished consumer and industrial products;
- changes in the exploration or production of energy resources, commodities, and semi-finished and finished consumer and industrial products;
- the location of regional and global exploration, production and manufacturing facilities;
- the location of consuming regions for energy resources, commodities, and semi-finished and finished consumer and industrial products;
- the globalization of production and manufacturing;
- global and regional economic and political conditions, armed conflicts and fluctuations in industrial and agricultural production;
- disruptions and developments in international trade;
- changes in seaborne and other transportation patterns, including the distance cargo is transported by sea;
- international sanctions, embargoes, import and export restrictions, nationalizations, piracy and terrorist attacks;
- legal and regulatory changes including regulations adopted by supranational authorities and/or industry bodies, such as safety and environmental regulations and requirements;
- weather and natural disasters;
- currency exchange rates, most importantly versus USD; and
- economic slowdowns caused by public health events.

Demand for our dry bulk oceangoing vessels is dependent upon economic growth in the world's economies, seasonal and regional changes in demand and changes to the capacity of the global dry bulk fleet and the sources and supply of dry bulk cargo transported by sea. Continued adverse economic, political or social conditions or other developments could further negatively impact charter rates and therefore have a material adverse effect on our business results, results of operations and ability to pay dividends.

Factors that influence the supply of vessel capacity include:

- the number of newbuilding orders and deliveries, including delays in vessel deliveries;
- the number of shipyards and ability of shipyards to deliver vessels;
- port or canal congestion;
- potential disruption, including supply chain disruptions, of shipping routes due to accidents or political events;
- scrapping of older vessels;
- speed of vessel operation;
- vessel casualties;
- technological advances in vessel design, capacity, propulsion technology and fuel consumption efficiency;
- the degree of scrapping or recycling of older vessels, depending, among other things, on scrapping or recycling rates and international scrapping or recycling regulations;
- the price of steel and vessel equipment;
- product imbalances (affecting the level of trading activity) and developments in international trade;
- number of vessels that are out of service, namely those that are laid-up, drydocked, awaiting repairs or otherwise not available for hire;
- availability of financing for new vessels and shipping activity;
- changes in national or international regulations that may effectively cause reductions in the carrying capacity of vessels or early obsolescence of tonnage; and
- changes in environmental and other regulations that may limit the useful lives of vessels.

In addition to the prevailing and anticipated freight rates, factors that affect the rate of newbuilding, scrapping and laying-up include newbuilding prices, secondhand vessel values in relation to scrap prices, costs of bunkers and other operating costs, costs associated with classification society surveys, normal maintenance costs, insurance coverage costs, the efficiency,

sophistication and age profile of the existing dry bulk fleet in the market, and government and industry regulation of maritime transportation practices, particularly environmental protection laws and regulations. These factors influencing the supply of and demand for shipping capacity are outside of our control, and we may not be able to correctly assess the nature, timing and degree of changes in industry conditions.

Our business is affected by macroeconomic conditions, including rising inflation, high interest rates, market volatility, economic uncertainty and supply chain constraints.

Various macroeconomic factors, including high inflation and interest rates, global supply chain constraints, and the effects of overall economic conditions and uncertainties such as those resulting from the current and future conditions in the global financial markets, could adversely affect our business, results of operations, financial condition and ability to pay dividends. Inflation and rising interest rates may negatively impact us by increasing our operating costs and our cost of borrowing. Interest rates, the liquidity of the credit markets and the volatility of the capital markets could also affect the operation of our business and our ability to raise capital on favorable terms, or at all.

The world economy continues to face a number of actual and potential challenges, including the war between Ukraine and Russia and between Israel and Hamas and related conflicts in the Middle East, the potential disruption of shipping routes including due to low water levels in the Panama Canal and ongoing attacks by Houthis on vessels in the Red Sea, current trade tension between the United States and China, political instability in the Middle East and the South China Sea region and other geographic countries and areas, tensions in and around the Red Sea or Russia and NATO tensions, China and Taiwan disputes, terrorist or other attacks, war (or threatened war) or international hostilities, such as those between the United States and China, North Korea or Iran, and epidemics or pandemics, banking crises or failures, such as the recent notable regional bank failures in the United States, and real estate crises, such as the crisis in China.

In addition, the continuing war in Ukraine led to increased economic uncertainty amidst fears of a more generalized military conflict or significant inflationary pressures, due to the increases in fuel and grain prices following the sanctions imposed on Russia. Furthermore, the intensity and duration of the war between Israel and Hamas or the Houthi rebel attacks on shipping in and around the Red Sea is difficult to predict and their impact on the world economy is uncertain. Whether the present dislocation in the markets and resultant inflationary pressures will transition to a long-term inflationary environment is uncertain, and the effects of such a development on charter rates, vessel demand and operating expenses in the sector in which we operate are uncertain.

An increase in trade protectionism, the unravelling of multilateral trade agreements and a decrease in the level of China's export of goods and import of raw materials could have a material adverse impact on our charterers' business and, in turn, could cause a material adverse impact on our results of operations, financial condition and cash flows.

Our operations expose us to the risk that increased trade protectionism may adversely affect our business. Recently, government leaders have declared that their countries may turn to trade barriers to protect or revive their domestic industries in the face of foreign imports, thereby depressing the demand for shipping.

The U.S. government has made statements and taken actions that may impact U.S. and international trade policies, including tariffs affecting certain Chinese industries. Additionally, new tariffs may be imposed by the Trump administration on imports from Canada, Mexico and China as well as on imports of steel and aluminum. It is unknown whether and to what extent new tariffs (or other new laws or regulations) will be adopted, or the effect that any such actions would have on us or our industry. If any new tariffs, legislation and/or regulations are implemented, or if existing trade agreements are renegotiated or, in particular, if the U.S. government takes retaliatory trade actions due to the ongoing U.S.-China trade tension, such changes could have an adverse effect on our business, results of operations and financial condition.

Additionally, the U.S. trade war with China may escalate beyond tariffs with a proposal by the Trump administration to impose significant fees on any vessel entering a U.S. port where that vessel is owned by a Chinese shipping company or by a vessel operator whose fleet includes one or more Chinese-built vessels or that has newbuilding orders at a Chinese shipyard. The proposal of the U.S. trade representative (USTR), if adopted as proposed, would require Chinese shipping companies to pay up to \$1 million per port call and those operating Chinese-built vessels to be charged up to \$1.5 million per U.S. port call, depending on the percentage of vessels in their fleet built at Chinese shipyard or newbuilding orders with Chinese shipyards. It is unknown whether and to what extent these new port fees on Chinese shipping companies and vessels will be adopted, or the effect that they would have on us or our industry generally. During 2024, we had less than 20 U.S. port calls made by Chinese-built vessels. The majority of those port calls were made by vessels on time charters where charterers bear the voyage related costs. Nonetheless, if adopted, it could have a material adverse effect on the Company's operations.

Furthermore, the government of China has implemented economic policies aimed at increasing domestic consumption of Chinese-made goods, which may reduce the supply of goods available for export. Many of the reforms, particularly some limited price reforms that result in the prices for certain commodities being principally determined by market forces, are unprecedented or experimental and may be subject to revision, change or abolition.

Restrictions on imports, including in the form of tariffs, could have a major impact on global trade and demand for shipping. Specifically, increasing trade protectionism in the markets that our charterers serve may cause an increase in (i) the cost of goods exported from exporting countries, (ii) the length of time required to deliver goods from exporting countries, (iii) the costs of such delivery and (iv) the risks associated with exporting goods. These factors may result in a decrease in the quantity of goods to be shipped. Protectionist developments, or the perception they may occur, may have a material adverse effect on global economic conditions, and may significantly reduce global trade, including trade between the United States and China. These developments would also have an adverse impact on our charterers' business, operating results and financial condition which could, in turn, affect our charterers' ability to make timely charter hire payments to us and impair our ability to renew charters and grow our business. Any of these developments could have a material adverse effect on our business, results of operations and financial condition, as well as our cash flows, including cash available for dividends to our stockholders.

An over-supply of dry bulk vessel capacity may lead to reductions in charter hire rates, vessel values and profitability.

Historically, over the past few years, the supply of dry bulk vessels has outpaced vessel demand growth, thereby causing downward pressure on charter rates. In such cases, if the supply of dry bulk vessels is not fully absorbed by the market, charter rates and value of the vessels may have a material adverse effect on our results of operations, our ability to pay dividends and our compliance with current or future covenants in any of our agreements.

Our operations outside the United States expose us to global risks, such as political instability, terrorist or other attacks, war, international hostilities, economic sanctions restrictions, and global public health concerns, which may affect the seaborne transportation industry and adversely affect our business.

We are an international shipping company and primarily conduct most of our operations outside the United States, and our business, results of operations, cash flows, financial condition and ability to pay dividends, if any, in the future may be adversely affected by changing economic, political and government conditions in the countries and regions where our vessels are employed or registered. Moreover, we operate in a sector of the economy that is likely to be adversely impacted by the effects of political conflicts.

Currently, the world economy continues to face a number of actual and potential challenges, including the war between Ukraine and Russia and between Israel and Hamas, current trade tension between the United States and China, among other countries, political instability in the Middle East and the South China Sea region and other geographic countries and areas, terrorist or other attacks, war (or threatened war) or international hostilities, such as those between the United States and China, North Korea or Iran, epidemics or pandemics.

In the past, political instability has also resulted in attacks on vessels, mining of waterways and other efforts to disrupt international shipping, particularly in the Arabian Gulf region, the Black Sea in connection with the conflict between Russia and Ukraine, and in the Red Sea in connection with the conflicts between Israel and Hamas. Acts of terrorism and piracy have also affected vessels trading in regions such as the South China Sea and the Gulf of Aden off the coast of Somalia, among others. Any of these occurrences could have a material adverse impact on our future performance, results of operation, cash flows and financial position.

Beginning in February of 2022, the United States, the United Kingdom, and the European Union, among other countries, announced various economic sanctions against Russia in connection with the aforementioned conflict in Ukraine, which may adversely impact our business. The ongoing conflict could result in the imposition of further economic sanctions or new categories of export restrictions against individuals or entities in or connected to Russia.

The United States has issued several Executive Orders that prohibit certain transactions related to Russia, including prohibitions on the importation of certain Russian energy products into the United States, (including crude oil, petroleum, petroleum fuels, oil, liquified natural gas and coal), and all new investments in Russia by U.S. persons, among other prohibitions and export controls, and has issued numerous determinations authorizing the imposition of sanctions on persons who operate or have operated in the energy, metals and mining, and marine sectors of the Russian Federation economy, among others. Increased restrictions on these sectors, or the expansion of sanctions to new sectors, may pose additional risks that could adversely affect our business and operations. While in general much uncertainty remains regarding the global impact of the conflict in Ukraine, it is possible that such tensions could adversely affect the Company's business, financial condition, results of operation and cash flows.

Our business could also be adversely impacted by trade tariffs, trade embargoes or other economic sanctions that limit trading activities between the United States or other countries and countries in the Middle East, Asia, or elsewhere as a result of terrorist attacks, hostilities or diplomatic or political pressures, including as a result of ongoing tensions involving Russia, Iran, and China and the current conflicts in the Middle East.

We conduct a substantial amount of business in China, which means the uncertainties in China's legal system could have a material adverse effect on our business, financial condition and results of operations.

Chinese administrative and court authorities have significant discretion in interpreting and implementing statutory and contractual terms. Accordingly, it may be more difficult to evaluate the outcome of administrative and court proceedings than in more developed legal systems and to ensure the level of legal protection we enjoy elsewhere. For example, we enter into charters with Chinese customers, which may be subject to new regulations in China. We may, therefore, be required to incur new or additional compliance or other administrative costs, and pay new taxes or other fees to the Chinese government. Although the charters we enter into with Chinese counterparties are not governed by Chinese law, we may have difficulties enforcing a judgment rendered by an arbitration tribunal or by an English or U.S. court (or other non-Chinese court) in China.

Changes in laws and regulations, including with regards to tax matters, and their implementation by local authorities could affect our vessels that are either chartered to Chinese customers or that call to Chinese ports and our vessels that undergo drydocking, or to which we install scrubbers, at Chinese shipyards, and the financial institutions with whom we have entered into financing agreements, could have a material adverse effect on our business, results of operations and financial condition.

For example, China imposes a tax for non-resident international transportation enterprises engaged in the provision of services of passengers or cargo, among other items, in and out of China using their own, chartered, or leased vessels. The regulation may subject international transportation companies to Chinese enterprise income tax on profits generated from international transportation services passing through Chinese ports. This tax or similar regulations, such as the recently promoted environmental taxes on coal, by China may result in an increase in the cost of raw materials imported to China and the risks associated with importing raw materials to China, as well as a decrease in any raw materials shipped from our charterers to China. This could have an adverse impact on our charterers' business, operating results, and financial condition and could thereby affect their ability to make timely charter hire payments to us and to renew and increase the number of their time charters with us. The level of imports to and exports from China may also be adversely affected by changes in political, economic, and social conditions (including a slowing of economic growth) or other relevant policies of the Chinese government, such as changes in laws, regulations or export and import restrictions, internal political instability, changes in currency policies, changes in trade policies, and territorial or trade disputes. In recent years, China and the United States have implemented certain increasingly protective trade measures with continuing trade tensions, including significant tariff increases, between these countries. A decrease in the level of imports to and exports from China could have a material adverse effect on our business, operating results, and financial condition.

If our vessels call at ports located in countries or territories that are the subject of sanctions or embargoes imposed by the U.S. government, the European Union, the United Nations or other governmental authorities, or engage in other transactions or dealings that would be violative of applicable sanctions laws, it could lead to monetary fines or penalties and adversely affect our reputation and the market for our shares of common stock and its trading price.

Although we intend to maintain compliance with all applicable sanctions and embargo laws, and we endeavor to take precautions reasonably designed to mitigate such risks, it is possible that in the future our vessels may call on ports located in sanctioned countries or territories, or engage in other such transactions or dealings that would be violative of applicable sanctions, on charterers' instructions and/or without our consent. If such activities result in a violation of sanctions or embargo laws, we could be subject to monetary fines, penalties, or other sanctions, and our reputation and the market for our common shares could be adversely affected.

The laws and regulations of these different jurisdictions vary in their application and do not all apply to the same covered persons or proscribe the same activities. In addition, the sanctions and embargo laws and regulations of each jurisdiction may be amended to increase or reduce the restrictions they impose over time, and the lists of persons and entities designated under these laws and regulations are amended frequently. Moreover, most sanctions regimes provide that entities owned or controlled by the persons or entities designated in such lists are also subject to sanctions. The U.S., U.K., and EU have enacted new sanctions programs in recent years. Additional countries or territories, as well as additional persons or entities within or affiliated with those countries or territories, have, and in the future will, become the target of sanctions. These require us to be diligent in ensuring our compliance with sanctions laws. Further, the U.S. has increased its focus on sanctions enforcement with

respect to the shipping sector. Current or future counterparties of ours may be affiliated with persons or entities that are or may in the future become the subject of sanctions imposed by the United States, the United Kingdom, and the European Union, and/or other international bodies. If we determine that such sanctions require us to terminate existing or future contracts to which we, or our subsidiaries, are party or if we are found to be in violation of such applicable sanctions, our results of operations may be adversely affected, or we may suffer reputational harm.

As a result of Russia's actions in Ukraine and the war between Israel and Hamas, the U.S., EU and United Kingdom, together with numerous other countries have imposed significant economic sanctions which may adversely affect our ability to operate in these regions and also restrict parties whose cargo we carry. Sanctions against Russia have also placed significant prohibitions on the maritime transportation of seaborne Russian oil, the importation of certain Russian energy products and other goods, and new investments in the Russian Federation. These sanctions further limit the scope of permissible operations including the maintenance of our vessels and the services provided to our vessels and crew while operating in these regions, and cargo we may carry. We may also encounter potential contractual disputes with charterers and insurers due to the various sanctions targeting Russian interests and Russian cargo.

Although we believe that we have been in compliance with all applicable sanctions and embargo laws and regulations in 2024, and intend to maintain such compliance, there can be no assurance that we will be in compliance in the future, particularly as the scope of certain laws may be unclear and may be subject to changing interpretations. Any such violation could result in fines, penalties or other sanctions that could severely impact our ability to access U.S. capital markets and conduct our business and could result in some investors deciding, or being required, to divest their interest, or not to invest, in us. In addition, certain institutional investors may have investment policies or restrictions that prevent them from holding securities of companies that have contracts with countries or territories identified by the U.S. government as state sponsors of terrorism. The determination by these investors not to invest in, or to divest from, our common shares may adversely affect the price at which our common shares trade. Moreover, our charterers may violate applicable sanctions and embargo laws and regulations as a result of actions that do not involve us or our vessels, and those violations could in turn negatively affect our reputation. Investor perception of the value of our common shares may be adversely affected by the consequences of war, the effects of terrorism, civil unrest and governmental actions in countries or territories that we operate in.

Compliance with safety and other vessel requirements imposed by classification societies may require additional investments and could reduce our net cash flows and net income.

A classification society authorized by the country of registry of a commercial vessel must certify such vessel as being "in class" and safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and the Safety of Life at Sea Convention. Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified "in class" by a classification society which is a member of the International Association of Classification Societies, the IACS. The IACS has adopted harmonized Common Structural Rules, or "the Rules", which apply to oil tankers and bulk carriers contracted for construction on or after July 1, 2015. The Rules attempt to create a level of consistency between IACS Societies. All of our vessels are certified as being "in class" by all the applicable Classification Societies (e.g., American Bureau of Shipping, Lloyd's Register of Shipping and Det Norske Veritas).

Additionally a vessel must undergo annual surveys, intermediate surveys, drydockings and special surveys. Alternatively, a vessel's machinery may be placed on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. We expect our vessels to be on special survey cycles for hull inspection and continuous survey cycles for machinery inspection. Our vessels also undergo inspections with a view towards compliance under the Ship Inspection Report Programme (SIRE) and the United States Coast Guard (USCG) requirements, as applicable.

Every vessel is also required to be drydocked every 30 to 36 months for inspection of the underwater parts of the vessel. If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, drydocking or special survey, the vessel will be unable to carry cargo between ports and will be unemployable and uninsurable which could cause us to be in violation of certain covenants in our loan agreements. Any such inability to carry cargo or be employed, or any such violation of covenants, could have a material adverse impact on our financial condition and results of operations.

Compliance with the above requirements may require significant additional investments by us, and we may incur significant additional costs in meeting any new inspection requirements or rules. If any vessel does not maintain its class or fails any annual, intermediate or special survey or drydocking, the vessel will be unable to trade between ports and will be unemployable and uninsurable, which could cause us to be in violation of certain covenants in our loan agreements. Any such inability to carry cargo or be employed, or any such violation of covenants, could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

Further, government regulation of vessels, particularly in the areas of safety and environmental requirements, can be expected to become stricter in the future and require us to incur significant capital expenditures on our vessels to keep them in compliance.

Climate change and related legislation or regulations may adversely impact our business, including potential financial, operational and physical impacts.

Growing concern about the sources and impacts of global climate change has led to the proposal or enactment of a number of domestic and foreign legislative and administrative measures, as well as international agreements and frameworks, to monitor, regulate and limit carbon dioxide and other greenhouse gases ("GHG") emissions. Although the Paris Agreement, which was adopted under the UN Framework Convention on Climate Change in 2015, does not specifically require controls on GHG emissions from ships, it is possible that countries seek to impose such controls as they implement the Paris Agreement or any new treaty that may be adopted in the future. In the European Union, emissions are regulated under the E.U. Emissions Trading System (the "EU ETS"). As of January 1, 2024, maritime shipping was phased into the EU ETS, which applies to cargo and passenger ships of 5,000 gross tonnage or above. All 100% of carbon emissions on voyages and port calls within the EU/EEA and 50% of carbon emissions on voyages into or out of the EU/EEA, are subject to the EU ETS. The person or organization responsible for the compliance with the EU ETS is the shipping company, defined as the shipowner or any other organization or person, such as the manager or the bareboat charterer, that has assumed the responsibility for the operation of the ship from the shipowner. This regulation has been applicable to our entire Fleet (as defined below) since January 1, 2024. While the legal obligation of purchasing and surrendering the emission allowances is with the Company, when the vessel is under a time charter contract, the Company is typically reimbursed for the purchase of emission allowances by the charterer. The Environmental Council and European Parliament agreed to include maritime shipping emissions within the scope of the EU ETS on a gradual introduction of obligations for shipping companies to surrender allowances: 40% for verified carbon emissions from 2024, 70% for 2025, and 100% for 2026. Compliance with the EU ETS has resulted in additional compliance and administration costs to properly incorporate the provisions of the Directive into our business routines. Additional EU regulations, which are part of the EU's Fit-for-55 package, could also affect our financial position in terms of compliance and administration costs as they take effect.

In addition, in June 2021, the IMO adopted amendments to MARPOL Annex VI that entered into force on November 1, 2022 and require ships to reduce GHG emissions using technological and operational approaches to improve energy efficiency and that provide important building blocks for future GHG reduction measures. FuelEU Maritime also entered into force from January 1, 2025, which sets requirements on the annual average GHG intensity of energy used by ships trading within the EU or European Economic Area (EEA) and will increase the share of renewable and low-carbon fuels in the fuel mix of international maritime transport in the European Union.

These requirements and any passage of additional climate control legislation or other regulatory initiatives by the IMO, the European Union, the United States or other countries where we operate, or any treaty adopted at the international level, that restrict emissions of GHGs could require us to make significant financial expenditures, including the installation of pollution controls and the purchase of emissions credits, as well as have other impacts on our business or operations, that we cannot predict with certainty at this time. While we have installed scrubbers on 41 vessels in our fleet pursuant to IMO sulfur cap regulations, we may be required in the future to expend more capital to modify, upgrade or replace vessels as a result of new climate GHG related rules and regulations. While IMO has set specific targets for 2030 and 2050 within the scope of its GHG strategy, currently only short-term measures have been adopted thus far, which we do not believe at this time will require material capital expenditures. Should additional medium-term measures be adopted and come into force, including market based measures to put a price on carbon, we may need to incur additional capital expenditures to comply with the relevant GHG emission regulations. Even in the absence of climate control legislation and regulations, our business and operations may be materially affected to the extent that climate change results in sea level changes or more intense weather events.

Increasing scrutiny and changing expectations from investors, lenders and other market participants with respect to our ESG policies may impose additional costs on us or expose us to additional risks.

Companies across all industries are facing increasing scrutiny relating to their ESG policies. Investor advocacy groups, certain institutional investors, investment funds, lenders and other market participants are increasingly focused on ESG practices and in recent years have placed increasing importance on the implications and social cost of their investments. The increased focus and activism related to ESG and similar matters may hinder access to capital, as investors and lenders may decide to reallocate capital or to not commit capital as a result of their assessment of a company's ESG practices. Additionally, we may face increasing pressures from investors, lenders and other market participants, who are increasingly focused on climate change, to prioritize sustainable energy practices, reduce our carbon footprint and promote sustainability. Certain investors and lenders may exclude transportation companies, such as us, from their investing portfolios altogether due to environmental, social and governance factors. Companies which fail to adapt to or comply with investor, lender or other industry shareholder expectations and standards, which are evolving, or which are perceived to have failed to respond appropriately to the growing concern for ESG issues, regardless of whether there is a legal requirement to do so, may suffer from reputational damage, costs related to

litigation, and the business, financial condition, and/or stock price of such a company could be materially and adversely affected.

Under local, national and foreign laws, as well as international treaties and conventions, we could incur material liabilities, including clean-up obligations and natural resource damages liability, in the event that there is a release of hazardous materials from our vessels or otherwise in connection with our operations. Environmental laws often impose strict liability for remediation of spills and releases of oil and hazardous substances, which could subject us to liability, without regard to whether we were negligent or at fault.

Many environmental requirements are designed to reduce the risk of pollution and our compliance with these requirements could be costly.

Please see "Item 4. Information on the Company - B. Business Overview - Environmental and Other Regulations in the Shipping Industry" for a discussion of the environmental and other regulations applicable to us.

If we fail to comply with international safety regulations, we may be subject to increased liability, which may adversely affect our insurance coverage and may result in a denial of access to, or detention in, certain ports.

The operation of our vessels is affected by the requirements set forth in the IMO's International Safety Management Code (the "ISM Code"). The ISM Code requires shipowners, ship managers and bareboat charterers to develop and maintain an extensive "Safety Management System" that includes the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe operation and describing procedures for dealing with emergencies. If we fail to comply with the ISM Code, we may be subject to increased liability, or may invalidate existing insurance or decrease available insurance coverage for our affected vessels, and such failure may result in a denial of access to, or detention in, certain ports. The U.S. Coast Guard and European Union authorities enforce compliance with the ISM and International Ship and Port Facility Security Code (the "ISPS Code"), and prohibit non-compliant vessels from trading in U.S. and European Union ports. This could have a material adverse effect on our future performance, results of operations, cash flows and financial position. Given that the IMO continues to review and introduce new regulations, it is impossible to predict what additional regulations, if any, may be passed by the IMO and what effect, if any, such regulations might have on our operations.

Because such conventions, laws, and regulations are often revised, we cannot predict the ultimate cost of complying with such conventions, laws and regulations or the impact thereof on the resale prices or useful lives of our vessels. Additional conventions, laws and regulations may be adopted which could limit our ability to do business or increase the cost of our doing business and which may materially adversely affect our operations. We are required by various governmental and quasi-governmental agencies to obtain certain permits, licenses, certificates, and financial assurances with respect to our operations.

Please see "Item 4. Information on the Company - B. Business Overview - Environmental and Other Regulations in the Shipping Industry" for a discussion of the environmental and other regulations applicable to us.

Maritime claimants could arrest or attach one or more of our vessels, which could interrupt our customers' or our cash flows.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against a vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lien holder may enforce its lien by "arresting" or "attaching" a vessel through judicial or foreclosure proceedings. The arrest or attachment of one or more of our vessels could interrupt the cash flow of the charterer and/or our cash flow and require us to pay a significant amount of money to have the arrest lifted, which would have an adverse effect on our financial condition and results of operations. In addition, in jurisdictions where the "sister ship" theory of liability applies, such as South Africa, a claimant may arrest the vessel that is subject to the claimant's maritime lien and any "associated" vessel, which is any vessel owned or controlled by the same owner. In countries with "sister ship" liability laws, claims may be asserted against us or any of our vessels for liabilities of other vessels that we own. Under some of our present charters, if the vessel is arrested or detained as a result of a claim against us, we may be in default of our charter and the charterer may terminate the charter, which will negatively impact our revenues and cash flows.

Governments could requisition our vessels during a period of war or emergency resulting in a loss of earnings.

A government of a vessel's registry could requisition for title or seize one or more of our vessels. Requisition for title occurs when a government takes control of a vessel and becomes the owner. Such government could also requisition one or more of our vessels for hire. Requisition for hire occurs when a government takes control of a vessel and effectively becomes the charterer at dictated charter rates. Generally, requisitions occur during a period of war or emergency. Government requisition of

one or more of our vessels could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

Acts of piracy and attacks on ocean-going vessels could adversely affect our business.

Acts of piracy and attacks have historically affected ocean-going vessels trading in certain regions of the world, such as the South China Sea, the Arabian Sea, the Red Sea, the Gulf of Aden off the coast of Somalia, Sulu Sea, Celebes Sea, the Malacca and Singaporean Straits, the Indian Ocean, and, in particular, the Gulf of Guinea region off the coast of Nigeria, which has experienced a continuous high number of piracy incidents in recent years. We consider potential acts of piracy to be a material risk to the international shipping industry, and protection against this risk requires vigilance. Our vessels regularly travel through regions where pirates are active. We may not be adequately insured to cover losses from acts of terrorism, piracy, regional conflicts and other armed actions, which could have a material adverse effect on our results of operations, financial condition and ability to pay dividends. Crew costs could also increase in such circumstances.

Risks Related to Our Business

The market values of our vessels may decline, which could limit the amount of funds that we can borrow, cause us to breach certain financial covenants in our credit facilities, or result in an impairment charge, and cause us to incur a loss if we sell vessels following a decline in their market value.

The fair market values of dry bulk vessels, including our vessels, have generally experienced high volatility and may decline in the future. The fair market value of vessels may increase and decrease depending on but not limited to the following factors:

- general economic and market conditions affecting the shipping industry;
- the balance between the supply of and demand for ships of a certain type;
- competition from other shipping companies;
- the availability and cost of ships of the required size and design;
- the availability of other modes of transportations;
- the cost of newbuildings;
- shipyard capacity;
- changes in environmental, governmental or other regulations that may limit the useful life of vessels, require costly upgrades or limit their efficiency;
- distressed asset sales, including newbuilding contract sales below acquisition costs due to lack of financing;
- the types, sizes, sophistication and ages of vessels, including as compared to other vessels in the market;
- the prevailing level of charter rates;
- the need to upgrade secondhand and previously owned vessels as a result of environmental, safety, regulatory or charterer requirements; and
- technological advances in vessel design, capacity, propulsion technology and fuel consumption efficiency.

During the period a vessel is subject to a charter, we might not be permitted to sell it to take advantage of increases in vessel values without the charterer's consent. If we sell a vessel at a time when ship prices have fallen, the sale may be at less than the vessel's carrying amount in our financial statements, with the result that we could incur a loss and a reduction in earnings. During the year ended December 31, 2023 we recorded impairment losses of \$11.8 million related to the sales of vessels. There were no impairment losses recorded in 2024 and 2022 related to the sales of vessels. The carrying values of our owned and leased vessels are reviewed quarterly or whenever events or changes in circumstances indicate that the carrying amount of the vessel may no longer be recoverable. We assess recoverability of the carrying value by estimating the future net cash flows expected to result from the vessel, including eventual disposal for owned vessels. If the future net undiscounted cash flows and the estimated fair market value of the vessel are less than the carrying value, an impairment loss is recorded equal to the difference between the vessel's carrying value and fair value. Apart from the impairment loss related to sales of our vessels in 2023, there were no impairment losses recorded in 2024, 2023 or 2022 for owned and leased vessels. Any impairment charges incurred as a result of declines in charter rates and other market deterioration could negatively affect our business, financial condition or operating results or the trading price of our common shares.

Conversely, if vessel values are elevated at a time when we wish to acquire additional vessels, the cost of acquisition may increase and this could adversely affect our business, results of operations, cash flow and financial condition.

We are dependent on spot charters and any decrease in spot charter rates in the future may adversely affect our earnings and ability to pay dividends.

As of December 31, 2024, 83 of the 91 vessels, which are owned, leased or chartered-in by us, were employed in the spot market or on short-term or variable time rate charters, and we are therefore exposed to fluctuations in spot market charter rates. We may also employ any additional vessels that we acquire to take delivery of in the spot market.

Although the number of vessels in our fleet that participate in the spot market will vary from time to time, we anticipate that a significant portion of our fleet will participate in this market. As a result, our financial performance will be significantly affected by conditions in the dry bulk spot market and only our vessels that operate under fixed-rate time charters may, during the period such vessels operate under such time charters, provide a fixed source of revenue to us.

Historically, the dry bulk markets have been volatile as a result of the many conditions and factors that can affect the price, supply of and demand for dry bulk capacity. Weak global economic trends may further reduce demand for transportation of dry bulk cargoes over longer distances, which may materially affect our revenues, profitability and cash flows. The spot market may fluctuate significantly based upon supply of and demand for vessels and cargoes. The successful operation of our vessels in the competitive spot market depends upon, among other things, obtaining profitable spot charters and minimizing, to the extent possible, time spent waiting for charters and time spent traveling unladen to pick up cargo. The spot market is volatile and there have been periods when spot rates have declined below the operating cost of vessels. If future spot market rates decline, then we may be unable to operate our vessels trading in the spot market profitably, or meet our obligations, including payments on indebtedness, or to pay dividends in the future. Furthermore, as charter rates for spot charters are fixed for a single voyage, which may last up to several weeks during periods in which spot charter rates are rising, we will generally experience delays in realizing the benefits from such increases.

Our ability to renew the charters on our vessels on the expiration or termination of our current charters, or on vessels that we may acquire in the future, or the charter rates payable under any replacement charters and vessel values will depend upon, among other things, economic conditions in the sectors in which our vessels operate at that time, changes in the supply and demand for vessel capacity and changes in the supply and demand for the seaborne transportation of energy resources.

Our credit facilities impose operating and financial restrictions, which could significantly limit our ability to execute our business strategy and increase the risk of default under our debt obligations.

As of December 31, 2024, we had \$1,314.2 million of outstanding indebtedness under our credit facilities and debt securities, of which \$113.8 million was classified as current portion of long-term debt. We cannot assure you that we will be able to generate cash flow in amounts that is sufficient to satisfy these obligations. If we are not able to satisfy these obligations, we may have to undertake alternative financing plans or sell our assets. In addition, debt service payments under our credit facilities may limit funds otherwise available for working capital, capital expenditures, payment of cash distributions and other purposes. If we are unable to meet our debt obligations, or if we otherwise default under our credit facilities, our lenders could declare the debt, together with accrued interest and fees, to be immediately due and payable and foreclose on our fleet, which could result in the acceleration of other indebtedness that we may have at such time and the commencement of similar foreclosure proceedings by other lenders.

Our credit facilities impose operating and financial restrictions on us that limit our ability, or the ability of our subsidiaries party thereto, as applicable, to:

- pay dividends and make capital expenditures if there is an event of default under our credit facilities;
- incur additional indebtedness, including the issuance of guarantees, or refinance or prepay any indebtedness, unless certain conditions exist;
- create liens on our assets, unless otherwise permitted under our credit facilities;
- change the flag, class or management of our vessels or terminate or materially amend the management agreement relating to each vessel;
- merge or consolidate with, or transfer all or substantially all our assets to, another person; or
- enter into a new line of business.

In addition, our loan agreements, which are secured by liens on our vessels, contain various financial covenants. Among those covenants are requirements that relate to our financial position, operating performance and liquidity. For example, there are financial covenants that require us to maintain (i) an equity ratio fixing a minimum value of adjusted equity that is based, in part, upon the market value of the vessels securing the loans, (ii) minimum levels of free cash, (iii) positive working capital, and (iv) a minimum value, or loan-to-value, covenant, which could require us to post collateral or prepay a portion of the outstanding borrowings should the value of the vessels securing borrowings decrease below a required level.

Our ability to comply with the covenants and restrictions contained in our current or future credit facilities may be affected by events beyond our control, including prevailing economic, financial and industry conditions, interest rate developments, changes in the funding costs of our banks and changes in vessel earnings and asset valuations. If market or other economic conditions deteriorate, our ability to comply with these covenants may be impaired. For example, the market value of dry bulk vessels is likewise sensitive to, among other things, changes in the dry bulk market, with vessel values deteriorating in times when dry bulk rates are falling or anticipated to fall and improving when charter rates are rising or anticipated to rise. Such conditions may result in us not being in compliance with our loan covenants. In such a situation, unless our lenders are willing to provide further waivers of covenant compliance or modifications to our covenants, or would be willing to refinance our indebtedness, we may have to sell vessels in our fleet and/or seek to raise additional capital in the equity markets in order to comply with our loan covenants. Furthermore, if the value of our vessels deteriorates significantly, we may have to record an impairment adjustment in our financial statements, which would adversely affect our financial results and further hinder our ability to raise capital. The fair market values of our vessels may decline, which could limit the amount of funds that we can borrow, cause us to breach certain financial covenants in our credit facilities, or result in an impairment charge, and cause us to incur a loss if we sell vessels following a decline in their market value.

If we are not in compliance with our covenants and are not able to obtain covenant waivers or modifications, our lenders could require us to post additional collateral, enhance our equity and liquidity, increase our interest payments, pay down our indebtedness to a level where we are in compliance with our loan covenants, sell vessels in our fleet, or they could accelerate our indebtedness, any of which would impair our ability to continue to conduct our business. If our indebtedness is accelerated, we might not be able to refinance our debt or obtain additional financing and could lose our vessels if our lenders foreclose on their liens. In addition, if we find it necessary to sell our vessels at a time when vessel prices are low, we will recognize losses and a reduction in our earnings, which could affect our ability to raise additional capital necessary for us to comply with our loan agreements.

Furthermore, certain of our credit facilities contain a cross-default provision that may be triggered by a default under one of our other credit facilities. A cross-default provision means that a default on one loan would result in a default on certain of our other loans. Because of the presence of cross-default provisions in certain of our credit facilities, the refusal of any one lender under our credit facilities to grant or extend a waiver could result in certain of our indebtedness being accelerated, even if our other lenders under our credit facilities have waived covenant defaults under the respective credit facilities. If our secured indebtedness is accelerated in full or in part, it would be very difficult for us to refinance our debt or obtain additional financing and we could lose our vessels securing our credit facilities if our lenders foreclose their liens, which would adversely affect our ability to conduct our business.

Also, any contemplated vessel acquisitions will have to be at levels that do not impair the required ratios set out above. The global economic downturn that occurred within the past several years had an adverse effect on vessel values, which may occur again if an economic slowdown arises in the future. If the estimated asset values of the vessels in our fleet decrease, such decreases may limit the amounts we can draw down under our future credit facilities to purchase additional vessels and our ability to expand our fleet. In addition, we may be obligated to prepay part of our outstanding debt in order to remain in compliance with the relevant covenants in our current or future credit facilities. If funds under our current or future credit facilities become unavailable as a result of a breach of our covenants or otherwise, we may not be able to perform our business strategy, which could have a material adverse effect on our business, results of operations and financial condition and our ability to pay dividends.

We are in breach of certain compliance clauses contained in our loan agreements, and if we are not successful in obtaining amendments to our loan agreements or do not refinance the outstanding indebtedness under such agreements, the breach of the compliance clauses may cause our lenders to declare a default and accelerate the outstanding indebtedness under the relevant agreements, which may result in cross defaults under our other loan agreements and would impair our ability to continue to conduct our business.

All of our loan agreements contain a change of control compliance clause that prohibits any person, other than Hemen Holdings Limited (“Hemen”) and certain of its affiliates, without the lenders prior written approval from either acquiring (directly or indirectly): (i) more than 33.33% of the shares or the votes of the Company; or (ii) the right to control the appointment of a majority of the members of the Board of Directors of the Company.

On March 4, 2025, CMB.TECH NV (“CMB.TECH”), through its subsidiary CMB.TECH Bermuda Ltd., entered into a share purchase agreement with Hemen to purchase all of Hemen’s 81,363,730 of our common shares at a purchase price of \$14.49 per common share (the “Share Purchase”). Following the closing of the Share Purchase on March 12, 2025, Hemen ceased to hold any of our common shares, and CMB.TECH holds approximately 40.8% of our outstanding common shares. Accordingly, the Share Purchase has resulted in a breach of change of control compliance clause described above. Although we are not

currently in default, our lenders may declare a default if they serve a notice of non-compliance and we fail to rectify the issue within 14 days period. As of March 20, 2025, the Company has not received any request to rectify the non-compliance.

We are currently in discussions with our existing lenders to address the breach related to the change of control compliance clause discussed above. We have sent a request to the banks to amend the loan agreements to include a new change of control clause that would require the Company to prepay the outstanding borrowings in full if (i) two or more persons, other than CMB.TECH and its subsidiaries, acquire (directly or indirectly): (a) more than 33.33% of the shares or the votes of the Company; or (b) the right to control the affairs or composition of a majority of the members of the Board of Directors of the Company; or (ii) if any two or more persons, other than CMB NV, Saverco NV or Marc Saverys acquire (directly or indirectly): (a) more than 50.0 % of the shares or the votes of the CMB.TECH; or (b) the right to control the affairs or composition of a majority of the members of the Board of Directors of CMB.TECH.

CMB.TECH has identified syndicate banks to refinance all or part of our current outstanding debt and has entered into credit committee approved commitment letters with these banks as of March 4, 2025 for outstanding borrowings of up to \$2.0 billion, that are subject only to the execution of satisfactory documentation and customary covenants and closing conditions. If we are unable to reach agreements with our existing lenders, we plan on refinancing our existing debt with the committed financing described above, which may have, among others, the expected terms, as follows: Golden Ocean is the borrower, the guarantors are CMB.TECH, and the subsidiaries of Golden Ocean that own the vessels are serving as collateral under the loan. The financing is expected to have a 5-year tenor and a linear age adjusted amortization profile of 20 years. The facility is expected to be priced with an interest rate of SOFR plus a market-based margin.

Moreover, in connection with any amendments to or refinancing of our loan agreements, our lenders may impose additional operating and financial restrictions on us and/or modify the terms of our existing loan agreements, which may limit our ability to, among other things, pay dividends, make capital expenditures and/or incur additional indebtedness, including through the issuance of guarantees. In addition, our lenders may require the payment of additional fees, require prepayment of a portion of our indebtedness to them, accelerate the amortization schedule for our indebtedness and increase the interest rates they charge us on our outstanding indebtedness.

In accordance with our loan agreements, we have agreed to not make any financial distribution if an event of non-compliance has occurred, has been noticed by our lenders and is continuing. We are currently in discussions with our existing lenders to address the change in the Company's largest shareholder as a result of the Share Purchase, and the discussions have not resulted in any rejections as of March 20, 2025.

Because of the presence of cross default provisions in our loan agreements, the refusal of the relevant lender or lenders under any loan agreement to grant amendments could result in all of our indebtedness being accelerated even if our other lenders have amended covenant defaults under the respective loan agreements. A cross default provision means that if we default on one loan, we would then default on all of our other loans.

Technological innovation and quality and efficiency requirements from our customers could reduce our charter hire income and the value of our vessels.

Our customers have a high and increasing focus on quality and compliance standards with their suppliers across the entire supply chain, including the shipping and transportation segment. Our continued compliance with these standards and quality requirements is vital for our operations. The charter hire rates and the value and operational life of a vessel are determined by a number of factors including the vessel's efficiency, operational flexibility and physical life. Efficiency includes speed, fuel economy and the ability to load and discharge cargo quickly. Flexibility includes the ability to enter harbors, utilize related docking facilities and pass through canals and straits. The length of a vessel's physical life is related to its original design and construction, its maintenance and the impact of the stress of operations. We face competition from companies with more modern vessels having more fuel efficient designs than our vessels, or eco vessels, and if new dry bulk vessels are built that are more efficient or more flexible or have longer physical lives than the current eco vessels, competition from the current eco vessels and any more technologically advanced vessels could adversely affect the amount of charter hire payments we receive for our vessels and the resale value of our vessels could significantly decrease. Similarly, technologically advanced vessels are needed to comply with environmental laws the investment in which along with the foregoing could have a material adverse effect on our results of operations, charter hire payments and resale value of vessels. This could have an adverse effect on our results of operations, cash flows, financial condition and ability to pay dividends.

We may be unable to successfully compete with other vessel operators for charters, which could adversely affect our results of operations and financial position.

The operation of dry bulk vessels and international seaborne transportation of dry bulk cargoes is extremely competitive. Competition is intense and can depend on factors such as price, location, size, age, condition and the acceptability of the vessel

and its operators to the charterers. Through our operating subsidiaries, we compete with other vessel owners, and, to a lesser extent, owners of other size vessels.

The dry bulk market is also highly fragmented. Due in part to this, competitors with greater resources could enter the dry bulk shipping industry and operate larger fleets through consolidations or acquisitions and may be able to offer lower charter rates and higher quality vessels than we are able to offer. As a result, we cannot assure you that we will be successful in finding continued timely employment of our existing vessels, which could adversely affect our results of operations and financial position.

We are subject to certain risks with respect to our counterparties on contracts, and failure of such counterparties to meet their obligations could cause us to suffer losses or otherwise adversely affect our business.

We have entered, and may enter in the future, into various contracts that are material to the operation of our business, including charter parties with our customers, loan agreements with our lenders, and vessel management, pooling arrangements, newbuilding contracts and other agreements with other entities, all of which subject us to counterparty risks. The ability and willingness of each of the counterparties to perform its obligations under a contract with us or contracts entered into on our behalf will depend on a number of factors that are beyond our control and may include, among other things, general economic conditions, the condition of the shipping sector, the overall financial condition of the counterparty, charter rates received for our vessels and the supply and demand for commodities. Should a counterparty fail to honor its obligations under any such contract or attempt to negotiate our agreements, we could sustain significant losses which could have a material adverse effect on our business, financial condition, results of operations, cash flows, ability to pay dividends to holders of our common shares in the amounts anticipated or at all and compliance with covenants in our secured loan agreements. Charterers are sensitive to the commodity markets and may be impacted by market forces affecting commodities and/or uncertain industry conditions. In depressed market conditions, charterers may have incentive to renegotiate their charters or default on their obligations under charters. Should a charterer in the future fail to honor its obligations under agreements with us, it may be difficult to secure substitute employment for such vessel, and any new charter arrangements we secure on the spot market or on charters may be at lower rates, depending on the then existing charter rate levels, compared to the rates currently being charged for our vessels. In addition, if the charterer of a vessel in our fleet that is used as collateral under one or more of our loan agreements defaults on its charter obligations to us, such default may constitute an event of default under our loan agreements, which may allow the bank to exercise remedies under our loan agreements. Although we assess the creditworthiness of our counterparties, a prolonged period of difficult industry conditions could lead to changes in a counterparty's financial condition and increase our exposure to credit risk and bad debts. In addition, we may offer extended payment terms to our customers in order to secure contracts, which may lead to more frequent collection issues and adversely affect our financial results and liquidity.

Volatility of SOFR rates under our financing agreements could affect our profitability, earnings and cash flow.

As certain of our current financing agreements have, and our future financing arrangements may have, floating interest rates, typically based on the Secured Overnight Financing Rate (SOFR), movements in interest rates could negatively affect our financial performance.

In order to manage our exposure to interest rate fluctuations under SOFR or any other variable interest rate, we have and may from time to time use interest rate derivatives to effectively fix some of our floating rate debt obligations. No assurance can however be given that the use of these derivative instruments, if any, may effectively protect us from adverse interest rate movements. The use of interest rate derivatives may affect our results through mark to market valuation of these derivatives. Also, adverse movements in interest rate derivatives may require us to post cash as collateral, which may impact our free cash position. Volatility in applicable interest rates among our financing agreements presents a number of risks to our business, including potential increased borrowing costs for future financing agreements or unavailability of or difficulty in attaining financing, which could in turn have an adverse effect on our profitability, earnings and cash flow.

Certain of our directors, executive officers and major shareholders may have interests that are different from our interests.

On March 4, 2025, CMB.TECH, through its subsidiary CMB.TECH Bermuda Ltd., entered into a share purchase agreement with Hemen, our largest shareholder until March 12, 2025, to purchase all of Hemen's 81,363,730 of our common shares at a purchase price of \$14.49 per common share. Following the closing of the Share Purchase on March 12, 2025, Hemen ceased to hold any of our common shares.

Hemen is a principal shareholder of a number of other large publicly traded and private companies involved in various sectors of the shipping and oil services industries (the "Hemen Related Companies"). In addition, certain of our directors, including Mr. Lorentzon, Mr. Fredriksen, Mr. O'Shaughnessy and Mr. Stonex also serve on the boards of one or more of the Hemen Related

Companies, including but not limited to, Frontline plc (NYSE:FRO) ("Frontline"), SFL Corporation Ltd. (NYSE:SFL) ("SFL"), Archer Limited (OSE:ARCHER) ("Archer"), Avance Gas Holding Ltd. (OSE:AGAS) ("Avance") and Flex LNG Ltd. (OSE:FLNG) ("FLEX"). There may be real or apparent conflicts of interest with respect to matters affecting Hemen Related Companies whose interests in some circumstances may be adverse to our interests.

To the extent that we do business with or compete with other Hemen Related Companies for business opportunities, prospects or financial resources, or participate in ventures in which other Hemen Related Companies may participate, these directors and officers may face actual or apparent conflicts of interest in connection with decisions that could have different implications for us. These decisions may relate to corporate opportunities, corporate strategies, potential acquisitions of businesses, newbuilding acquisitions, inter-company agreements, the issuance or disposition of securities, the election of new or additional directors and other matters. Such potential conflicts may delay or limit the opportunities available to us, and it is possible that conflicts may be resolved in a manner adverse to us or result in agreements that are less favorable to us than terms that would be obtained in arm's-length negotiations with unaffiliated third parties.

For so long as CMB.TECH owns a significant percentage of our outstanding common shares, it may be able to exercise significant influence over us and will be able to strongly influence the outcome of all matters that are subject to a shareholder vote. For example, the amount and timing of the Company's dividends may change and certain corporate transactions may be approved or not approved. This concentration of ownership may also have the effect of accelerating or delaying, deferring or preventing a change in control, merger, amalgamations, consolidation, takeover or other business combination. This concentration of ownership could also discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us, which could in turn have an adverse effect on the market price of our common shares. CMB.TECH, may not necessarily act in accordance with the best interests of other shareholders. The interests of CMB.TECH may not coincide with the interests of other holders of our common shares. To the extent that conflicts of interests may arise, CMB.TECH may vote in a manner adverse to us or to you or other holders of our securities.

Please see "Item 7. Major Shareholders and Related Party Transactions."

In addition, the announcement of the Share Purchase and resulting changes in share ownership and management could cause disruptions in, and create uncertainty surrounding, our businesses, including affecting our relationships with our existing and future lenders, customers, suppliers and employees, which could have an adverse effect on our businesses, results of operations and financial condition. In particular, we could potentially lose customers or suppliers, and new customer or supplier contracts could be delayed or decreased. These uncertainties may impair our ability to attract, retain and motivate key personnel until the future of the company is certain.

The increased costs associated with operating and maintaining secondhand vessels could adversely affect our earnings.

In general, the costs to operate and maintain a vessel in good operating condition increase with the age of the vessel. As of the date of this annual report, the average age of our dry bulk vessel fleet is approximately 8.1 years. As our fleet ages, we will incur increased costs. Older vessels are typically less fuel efficient than more recently constructed vessels due to improvements in engine and hull technology. Governmental regulations, safety and other equipment standards related to the age of vessels may require expenditures for alterations or the addition of new equipment to some of our vessels and may restrict the type of activities in which these vessels may engage. We cannot assure you that, as our vessels age, market conditions will justify those expenditures or enable us to operate our vessels profitably during the remainder of their useful lives. As a result, regulations and standards could have a material adverse effect on our business, financial condition, results of operations, cash flows and ability to pay dividends.

Changes in the price of fuel, or bunkers, may adversely affect our profits.

Since we primarily employ our vessels in the spot market, we expect that fuel, or bunkers, will typically be the largest expense in our shipping operations for our vessels. The cost of fuel, including the fuel efficiency or capability to use lower priced fuel, can also be an important factor considered by charterers in negotiating charter rates. While we believe that we can transfer increased cost to the customer and will experience a competitive advantage as a result of increased bunker prices due to the greater fuel efficiency of our vessels compared to the average global fleet, changes in the price of fuel may adversely affect our profitability. The price and supply of fuel is unpredictable and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by the Organization of Petroleum Exporting Countries (the "OPEC"), and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns. Any future increase in the cost of fuel may reduce the profitability and competitiveness of our business versus other forms of transportation, such as truck or rail.

In addition, potential sharp increase in crude oil prices and widening of the spread between the prices of high sulfur fuel and low sulfur fuel, resulting from the conflicts between Russia and Ukraine and between Israel and Hamas, might lead to a decrease in the economic viability of older vessels that lack fuel efficiency and a reduction of useful lives of these vessels.

Risks involved with operating ocean-going vessels and operational risks and damage to our vessels could adversely impact our performance.

Our vessels and their cargoes are at risk of being damaged or lost because of events such as marine disasters, bad weather and other acts of God, business interruptions caused by mechanical failures, grounding, fire, explosions and collisions, human error, war, terrorism, piracy, labor strikes, boycotts and other circumstances or events. These hazards may result in death or injury to persons, loss of revenues or property, the payment of ransoms, environmental damage, higher insurance rates, damage to our customer relationships and market disruptions, delay or rerouting. Epidemics and other public health incidents may also lead to crew member illness, which can disrupt the operations of our vessels, or to public health measures, which may prevent our vessels from calling on ports or discharging cargo in the affected areas or in other locations after having visited the affected areas.

Any of these events may result in loss of revenues, increased costs and decreased cash flows to our customers, which could impair their ability to make payments to us under our charters. There is a material risk of increased premiums or loss of coverage as a result of the geopolitical conflict between Russia and Ukraine.

In the event of a vessel casualty or other catastrophic event, we will rely on the marine insurance policies to pay the insured value of the vessel or the damages incurred. Through the agreements with our vessel managers, we procure insurance for most of the vessels in our fleet employed under time and voyage charters against those risks that we believe the shipping industry commonly insures against. These include marine hull and machinery insurance, protection and indemnity insurance, which include pollution risks and crew insurances, and war risk insurance. Currently, the amount of coverage for liability for pollution, spillage and leakage available to us on commercially reasonable terms through protection and indemnity associations and providers of excess coverage is \$1 billion per vessel per occurrence, except for certain excluded areas at high risk including Russia, Ukraine and Belarus.

If our vessels suffer damage, they may need to be repaired at a drydocking facility. The costs of drydock repairs are unpredictable and may be substantial. We may have to pay drydocking costs that our insurance does not cover at all or in full. The loss of revenues while these vessels are being repaired and repositioned, as well as the actual cost of these repairs, may adversely affect our business and financial condition. In addition, space at drydocking facilities is sometimes limited and not all drydocking facilities are conveniently located. We may be unable to find space at a suitable drydocking facility or our vessels may be forced to travel to a drydocking facility that is not conveniently located relative to our vessels' positions. The loss of earnings while these vessels are forced to wait for space or to travel to more distant drydocking facilities may adversely affect our business and financial condition.

The operation of dry bulk vessels has certain unique operational risks. With a dry bulk vessel, the cargo itself and its interaction with the ship can be a risk factor. By their nature, dry bulk cargoes are often heavy, dense and easily shifted, and react badly to water exposure. In addition, dry bulk vessels are often subjected to battering treatment during unloading operations with grabs, jackhammers (to pry encrusted cargoes out of the hold), and small bulldozers. This treatment may cause damage to the dry bulk vessel. Dry bulk vessels damaged due to treatment during unloading procedures may be more susceptible to a breach at sea. Hull breaches in dry bulk vessels may lead to the flooding of their holds. If flooding occurs in the forward holds, the bulk cargo may become so waterlogged that the vessel's bulkheads may buckle under the resulting pressure leading to the loss of the dry bulk vessel. These risks may also impact the risk of loss of life or harm to our crew.

If we are unable to adequately maintain or safeguard our vessels, we may be unable to prevent these events. Any of these circumstances or events could negatively impact our business, financial condition or results of operations. In addition, the loss of any of our vessels could harm our crew and our reputation as a safe and reliable vessel owner and operator.

We rely on our and our ship managers' information security management system to conduct our business, and failure to protect this system against security breaches could adversely affect our business and results of operations, including on our vessels. Additionally, if this system fails or becomes unavailable for any significant period of time, our business could be harmed.

The safety and security of our vessels and efficient operation of our business, including processing, transmitting and storing electronic and financial information, depend on computer hardware and software systems, which are increasingly vulnerable to security breaches and other disruptions. Any significant interruption or failure of our information security management system or any significant breach of security could adversely affect our business and results of operations.

Our vessels rely on our information security management system for a significant part of their operations, including navigation, provision of services, propulsion, machinery management, power control, communications and cargo management. We have in place safety and security measures on our vessels and onshore operations to secure our vessels against cyber-security attacks and any disruption to their information security management system. However, these measures and technology may not adequately prevent security breaches despite our continuous efforts to upgrade and address the latest known threats, which are constantly evolving and have become increasingly sophisticated. If these threats are not recognized or detected until they have been launched, we may be unable to anticipate these threats and may not become aware in a timely manner of such a security breach, which could exacerbate any damage we experience. A disruption to the information security management system of any of our vessels could lead to, among other things, incorrect routing, collision, grounding and propulsion failure.

Beyond our vessels, we rely on industry accepted security measures and technology to securely maintain confidential and proprietary information maintained on our information security management system. However, these measures and technology may not adequately prevent security breaches. The technology and other controls and processes designed to secure our confidential and proprietary information, detect and remedy any unauthorized access to that information were designed to obtain reasonable, but not absolute, assurance that such information is secure and that any unauthorized access is identified and addressed appropriately. Such controls may in the future fail to prevent or detect unauthorized access to our confidential and proprietary information. In addition, the foregoing events could result in violations of applicable privacy and other laws. If confidential information is inappropriately accessed and used by a third party or an employee for illegal purposes, we may be responsible to the affected individuals for any losses they may have incurred as a result of misappropriation. In such an instance, we may also be subject to regulatory action, investigation or liable to a governmental authority for fines or penalties associated with a lapse in the integrity and security of our information security management system.

We may be required to expend significant capital and other resources to protect against and remedy any potential or existing security breaches and their consequences. A cyber-attack could also lead to litigation, fines, other remedial action, heightened regulatory scrutiny and diminished customer confidence. In addition, our remediation efforts may not be successful and we may not have adequate insurance to cover these losses.

The unavailability of the information security management system or the failure of this system to perform as anticipated for any reason could disrupt our business and could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Furthermore, cybersecurity continues to be a key priority for regulators around the world, and some jurisdictions have enacted laws requiring companies to notify individuals or the general investing public of data security breaches involving certain types of personal data, including the SEC, which, on July 26, 2023, adopted amendments requiring the prompt public disclosure of certain cybersecurity breaches. If we fail to comply with the relevant laws and regulations, we could suffer financial losses, a disruption of our businesses, liability to investors, regulatory intervention or reputational damage. As of the date of this annual report, we have not experienced any material cybersecurity incident which would be disclosable under SEC guidelines.

For more information on our cybersecurity risk management and strategy, please see "Item 16K. Cybersecurity."

Increased inspection procedures, tighter import and export controls and new security regulations could increase costs and cause disruption of our business.

International shipping is subject to security and customs inspection and related procedures in countries of origin, destination and trans-shipment points. Under the U.S. Maritime Transportation Security Act of 2002 ("MTSA"), the U.S. Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States and at certain ports and facilities. These security procedures can result in delays in the loading, offloading or trans-shipment and the levying of customs duties, fines or other penalties against exporters or importers and, in some cases, carriers. Future changes to the existing security procedures may be implemented that could affect the dry bulk sector. These changes have the potential to impose additional financial and legal obligations on carriers and, in certain cases, to render the shipment of certain types of goods uneconomical or impractical. These additional costs could reduce the volume of goods shipped, resulting in a decreased demand for vessels and have a negative effect on our business, revenues and customer relations.

Failure to comply with the U.S. Foreign Corrupt Practices Act could result in fines, criminal penalties and an adverse effect on our business.

We may operate in a number of countries throughout the world, including countries known to have a reputation for corruption. We are committed to doing business in accordance with applicable anti-corruption laws and have adopted a code of business conduct and ethics which is consistent and in full compliance with the U.S. Foreign Corrupt Practices Act of 1977 (the "FCPA"), and other anti-bribery legislation. We are subject, however, to the risk that we, our affiliated entities or our or their respective officers, directors, employees and agents may take actions determined to be in violation of such anti-corruption laws, including FCPA. Any such violation could result in substantial fines, sanctions, civil and/or criminal penalties, curtailment of operations in certain jurisdictions, and might adversely affect our business, results of operations or financial condition. In addition, actual or alleged violations could damage our reputation and ability to do business. Furthermore, detecting, investigating, and resolving actual or alleged violations is expensive and can consume significant time and attention of our senior management. Though we have implemented monitoring procedures and required policies, guidelines, contractual terms and audits, these measures may not prevent or detect failures by our agents or intermediaries regarding compliance.

We may be subject to litigation that, if not resolved in our favor and not sufficiently insured against, could have a material adverse effect on us.

We may be, from time to time, involved in various litigation matters. These matters may include, among other things, contract disputes, shareholder litigation, personal injury claims, environmental claims or proceedings, asbestos and other toxic tort claims, employment matters, governmental claims for taxes or duties, and other litigation that arises in the ordinary course of our business. Although we intend to defend these matters vigorously, we cannot predict with certainty the outcome or effect of any claim or other litigation matter, and the ultimate outcome of any litigation or the potential costs to resolve them may have a material adverse effect on us. Insurance may not be applicable or sufficient in all cases and/or insurers may not remain solvent which may have a material adverse effect on our financial condition.

We may not have adequate insurance to compensate us if our vessels are damaged or lost.

In the event of a casualty to a vessel or other catastrophic event, we rely on our insurance to pay the insured value of the vessel or the damages incurred. We procure insurance for our fleet against those risks that we believe companies in the shipping industry commonly insure. These include hull and machinery insurance, protection and indemnity insurance, including environmental damage and pollution insurance coverage, freight, demurrage and defense insurance and war risk insurance. We can give no assurance that we will be adequately insured against all risks and we cannot guarantee that any particular claim will be paid, even if we have previously recorded a receivable or revenue in respect of such claim. Our insurance policies may contain deductibles for which we will be responsible and limitations and exclusions, which may increase our costs or lower our revenues.

We cannot assure you that we will be able to obtain adequate insurance coverage for our vessels in the future or renew our existing policies on the same or commercially reasonable terms, or at all. For example, more stringent environmental regulations have in the past led to increased costs for, and in the future may result in the lack of availability of, protection and indemnity insurance against risks of environmental damage or pollution. Any uninsured or underinsured loss could harm our business, results of operations, cash flows, financial condition and ability to pay dividends. In addition, our insurance may be voidable by the insurers as a result of certain of our actions, such as our vessels failing to maintain certification with applicable maritime self-regulatory organizations. Further, we cannot assure you that our insurance policies will cover all losses that we incur, or that disputes over insurance claims will not arise with our insurance carriers. Any claims covered by insurance would be subject to deductibles, and since it is possible that a large number of claims may be brought, the aggregate amount of these deductibles could be material. In addition, our insurance policies may be subject to limitations and exclusions, which may increase our costs or lower our revenues, thereby possibly having a material adverse effect on our business, results of operations, cash flows and financial condition and ability to pay dividends.

We may be subject to calls because we obtain some of our insurance through protection and indemnity associations.

We may be subject to increased premium payments, or calls, if the value of our claim records, the claim records of our fleet managers, and/or the claim records of other members of the protection and indemnity associations through which we receive insurance coverage for tort liability (including pollution-related liability) significantly exceed projected claims. In addition, our protection and indemnity associations may not have enough resources to cover claims made against them. Our payment of these calls could result in significant expense to us, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to pay dividends.

United States tax authorities could treat us as a "passive foreign investment company", which could have adverse United States federal income tax consequences to United States shareholders.

A foreign corporation will be treated as a "passive foreign investment company" ("PFIC"), for United States federal income tax purposes if either (1) at least 75% of its gross income for any taxable year consists of certain types of "passive income" or (2) at least 50% of the average value of the corporation's assets produce or are held for the production of those types of "passive income". For purposes of these tests, "passive income" includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties other than rents and royalties which are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services does not constitute "passive income". United States shareholders of a PFIC are subject to a disadvantageous United States federal income tax regime with respect to the distributions they receive from the PFIC and the gain, if any, they derive from the sale or other disposition of their shares in the PFIC.

Based on our current and proposed method of operation, we do not believe that we are or that we have been since our 2004 taxable year or will be a PFIC with respect to any taxable year. In this regard, we intend to treat the gross income we derive or are deemed to derive from our time chartering and voyage chartering activities as services income, rather than rental income. Accordingly, we believe that our income from these activities does not constitute "passive income", and the assets that we own and operate in connection with the production of that income do not constitute assets that produce, or are held for the production of, "passive income".

Although there is no direct legal authority under the PFIC rules addressing our method of operation there is substantial legal authority supporting our position consisting of case law and the United States Internal Revenue Service (the "IRS"), pronouncements concerning the characterization of income derived from time charters and voyage charters as services income for other tax purposes. However, it should be noted that there is also authority that characterizes time charter income as rental income rather than services income for other tax purposes. Accordingly, no assurance can be given that the IRS or a court of law will accept our position, and there is a risk that the IRS or a court of law could determine that we are a PFIC. Moreover, no assurance can be given that we would not constitute a PFIC for any future taxable year if there were to be changes in the nature and extent of our operations.

If the IRS were to find that we are or have been a PFIC for any taxable year, other than the taxable years ending prior to its 2004 taxable year, our United States shareholders will face adverse United States federal income tax consequences. Under the PFIC rules, unless those shareholders make an election available under United States Internal Revenue Code of 1986, as amended (the "Code") (which election could itself have adverse consequences for such shareholders, as discussed below under "Taxation-United States Federal Income Tax Considerations"), such shareholders would be liable to pay United States federal income tax at the then prevailing income tax rates on ordinary income plus interest upon excess distributions and upon any gain from the disposition of our common shares, as if the excess distribution or gain had been recognized ratably over the shareholder's holding period of our common shares.

We may not qualify for an exemption under Section 883 of the Code, and may therefore have to pay tax on United States source income, which would reduce our earnings.

Under the Code, 50% of the gross shipping income of a vessel owning or chartering corporation, such as ourselves and our subsidiaries, that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States, may be subject to a 4% United States federal income tax without allowance for deduction, unless that corporation qualifies for exemption from tax under Section 883 of the Code and the applicable Treasury Regulations promulgated thereunder.

We believe that we and each of our subsidiaries qualified for this statutory tax exemption for our taxable year ending on December 31, 2024 and we will take this position for United States federal income tax return reporting purposes. However, there are factual circumstances beyond our control that could cause us to lose the benefit of this tax exemption for future taxable years and thereby become subject to United States federal income tax on our United States source shipping income. For example, we would no longer qualify for exemption under Section 883 of the Code for a particular taxable year if certain non-qualified shareholders with a 5% or greater interest in our common shares owned, in the aggregate, 50% or more of our outstanding common shares for more than half the days during the taxable year. It is possible that we could be subject to this rule for our taxable year ending on or after December 31, 2025. Due to the factual nature of the issues involved, there can be no assurances on our tax-exempt status or that of any of our subsidiaries.

If we or our subsidiaries are not entitled to exemption under Section 883 of the Code for any taxable year, we, or our subsidiaries, could be subject during those years to an effective 2% United States federal income tax on gross shipping income derived during such a year that is attributable to the transport of cargoes to or from the United States. The imposition of this tax

would have a negative effect on our business. However, the amount of our shipping income that would be subject to this tax has historically not been material.

Changes in tax laws and unanticipated tax liabilities could materially and adversely affect the taxes we pay, results of operations and financial results.

We are subject to income and other taxes in various jurisdictions, and our results of operations and financial results may be affected by tax and other initiatives around the world. For instance, there is a high level of uncertainty in today's tax environment stemming from global initiatives put forth by the Organisation for Economic Co-operation and Development's ("OECD") two-pillar base erosion and profit shifting project. In October 2021, members of the OECD put forth two proposals: (i) Pillar One reallocates profit to the market jurisdictions where sales arise versus physical presence; and (ii) Pillar Two compels multinational corporations with €750 million or more in annual revenue to pay a global minimum tax of 15% on income received in each country in which they operate. The reforms aim to level the playing field between countries by discouraging them from reducing their corporate income taxes to attract foreign business investment. Over 140 countries agreed to enact the two-pillar solution to address the challenges arising from the digitalization of the economy and, in 2024, these guidelines were declared effective and must now be enacted by those OECD member countries.

Further, on December 27, 2023 the Bermuda Corporate Income Tax Act of 2023 (the "Corporate Income Tax Act") became law in response to the OECD's Pillar Two global minimum tax initiative to impose a 15% corporate income tax. The tax is effective beginning on or after January 1, 2025. The Bermuda corporate income tax regime will supersede the previously granted tax assurances which provided an exemption from corporate income taxes until March 31, 2035. Subject to certain exceptions, Bermuda entities that are part of a multinational group will be in scope of the provisions of the Corporate Income Tax Act if, with respect a fiscal year, such group has annual revenue of €750 million or more in the consolidated financial statements of the ultimate parent entity for at least two of the four fiscal years immediately prior to such fiscal year ("Bermuda Constituent Entity Group"). Further, Bermuda Constituent Entity's international shipping income and qualified ancillary international shipping income shall be excluded from the computation of its taxable income or loss. In order for a Bermuda Constituent Entity's international shipping income and ancillary international shipping income to qualify for the exclusion from its net taxable income or loss under this section, the Bermuda Constituent Entity must demonstrate that the strategic or commercial management of all ships concerned is effectively carried on from or within Bermuda.

Even though we believe that we will qualify for international shipping income exclusion, it is possible that these guidelines, including the global minimum corporate tax rate measure of 15%, could increase the burden and costs of our tax compliance, the amount of taxes we incur in those jurisdictions and our global effective tax rate, which could have a material adverse impact on our results of operations and financial results.

Because our offices and most of our assets are outside the United States, you may not be able to bring suit against us, or enforce a judgment obtained against us in the United States.

Our executive offices, administrative activities and the majority of our assets are located outside the United States. In addition, most of our directors and officers are not United States residents. As a result, it may be more difficult for investors to effect service of process within the United States upon us, or to enforce both in the United States and outside the United States judgments against us in any action, including actions predicated upon the civil liability provisions of the United States federal securities laws.

As an exempted company incorporated under Bermuda law, our operations may be subject to economic substance requirements.

The Economic Substance Act 2018 and the Economic Substance Regulations 2018 of Bermuda (the "Economic Substance Act" and the "Economic Substance Regulations" respectively) became operative on December 31, 2018. The Economic Substance Act applies to every registered entity in Bermuda that engages in a relevant activity and requires that every such entity shall maintain a substantial economic presence in Bermuda. Relevant activities for the purposes of the Economic Substance Act are banking business, insurance business, fund management business, financing and leasing business, headquarters business, shipping business, distribution and service center business, intellectual property holding business and conducting business as a holding entity.

The Bermuda Economic Substance Act provides that a registered entity that carries on a relevant activity complies with economic substance requirements if (a) it is directed and managed in Bermuda, (b) its core income-generating activities (as may be prescribed) are undertaken in Bermuda with respect to the relevant activity, (c) it maintains adequate physical presence in Bermuda, (d) it has adequate full time employees in Bermuda with suitable qualifications and (e) it incurs adequate operating expenditure in Bermuda in relation to the relevant activity.

A registered entity that carries on a relevant activity is obliged under the Bermuda Economic Substance Act to file a declaration in the prescribed form (the "Declaration") with the Registrar of Companies (the "Registrar") on an annual basis.

If we fail to comply with our obligations under the Bermuda Economic Substance Act or any similar law applicable to us in any other jurisdictions, we could be subject to financial penalties and spontaneous disclosure of information to foreign tax officials in related jurisdictions and may be struck from the register of companies in Bermuda or such other jurisdiction. Any of these actions could have a material adverse effect on our business, financial condition and results of operations.

Risks Related to an Investment in Our Securities

Our share price may be highly volatile and future sales of our common shares could cause the market price of our common shares to decline.

Our common shares commenced trading on the NASDAQ Global Select Market (the "NASDAQ") in February 1997 and currently trade under the symbol "GOGL". Beginning on April 7, 2015, our shares have traded on the Oslo Stock Exchange (the "OSE"), under the ticker code "GOGL". We cannot assure you that an active and liquid public market for our common shares will continue. The market price of our common shares has historically fluctuated over a wide range and may continue to fluctuate significantly in response to many factors, such as actual or anticipated fluctuations in our operating results, changes in financial estimates by securities analysts, economic and regulatory trends, general market conditions, rumors and other factors, many of which are beyond our control. If the volatility in the broad stock market worsens, it could have an adverse effect on the market price of our common shares and impact a potential sale price if holders of our common shares decide to sell their shares.

The dry bulk shipping industry has been highly unpredictable and volatile, and this is often reflected in the market for common shares of companies in this industry. Further, we believe volatility in the market for our common shares could result from market and trading dynamics unrelated to our operating business or prospects and outside of our control. Investors may purchase our common shares to hedge existing exposure in our common shares or to speculate on the price of our common shares. Speculation on the price of our common shares may lead to volatile price movements in our shares that are not directly correlated to the performance or prospects of our company and could cause purchasers of our common shares to incur substantial losses.

In addition, some companies that have experienced volatility in the market price of their common shares have been subject to securities class-action litigation. If instituted against us, such litigation could result in substantial costs and diversion of management's attention and resources, which could materially and adversely affect our business, financial condition, operating results and growth prospects. There can be no guarantee that the price of our common shares will remain at or rise above its post-distribution level or that future sales of our common shares will not be at prices lower than those initially distributed or sold to investors.

We are thus unable to predict when such instances of trading volatility will occur or how long such dynamics may last. Therefore, we cannot assure you that you will be able to sell any of our common shares you may have purchased at a price greater than or equal to its original purchase price, or that you will be able to sell our common shares at all.

Future issuance of shares or other securities may dilute the holdings of shareholders and could materially affect the price of our common shares.

In the future we may offer additional shares or other securities to finance new projects, in connection with unanticipated liabilities or expenses or for any other purposes. Any such additional offering could reduce the proportionate ownership and voting interests of holders of our common shares, as well as our earnings per share and our net asset value per share, which could have a material adverse effect on the market price of our common shares. These issuances and sales could also impair our ability to raise additional capital through the sale of our equity securities in the future.

We cannot assure you that our Board will declare dividend payments in the future.

The declaration and payment of dividends, if any, will always be subject to our board of director's discretion. The timing and amount of any dividends declared will depend on, among other things, our earnings, financial condition and cash requirements and availability, our ability to obtain debt and equity financing on acceptable terms as contemplated by our growth strategy. In addition, other external factors, such as our lenders imposing restrictions on our ability to pay dividends under the terms of future loan facilities we may enter into, may limit our ability to pay dividends.

With reference to risk factor “*We are in breach of certain compliance clauses contained in our loan agreements, and if we are not successful in obtaining amendments to our loan agreements or do not refinance the outstanding indebtedness under such agreements, the breach of the compliance clauses may cause our lenders to declare a default and accelerate the outstanding indebtedness under the relevant agreements, which may result in cross defaults under our other loan agreements and would impair our ability to continue to conduct our business*”, the Share Purchase has resulted in a breach of change of control compliance clause described above and, while we are not currently in default, our lenders may declare a default if they serve a notice of non-compliance and we fail to rectify the issue within 14 days period. As of March 20, 2025, the Company has not received any request to rectify the non-compliance. In accordance with our loan agreements, we have agreed to not make any financial distribution if an event of non-compliance has occurred, has been noticed by our lenders and is continuing. We are currently in discussions with our existing lenders to address the change in the Company’s largest shareholder as a result of the Share Purchase, and the discussions have not resulted in any rejections as of March 20, 2025.

Our growth strategy contemplates that we will finance the acquisition of additional vessels through a combination of debt and equity financing on terms acceptable to us. If financing is not available to us on acceptable terms, our Board may determine to finance or refinance acquisitions with cash from operations, which could also reduce or even eliminate the amount of cash available for the payment of dividends. Further, the recent change of the Company’s largest shareholder, as a result of Share Purchase, could potentially affect our dividend policies.

ITEM 4. INFORMATION ON THE COMPANY

A. HISTORY AND DEVELOPMENT OF THE COMPANY

History

On September 18, 1996, we were incorporated in Bermuda under the name Knightsbridge Tankers Limited as an exempted company pursuant to the Bermuda Companies Act of 1981. Following the completion of the Merger with the Former Golden Ocean, a dry bulk shipping company based in Bermuda and listed on the Oslo Stock Exchange ("OSE"), we changed our name to Golden Ocean Group Limited.

Our common shares currently trade on the NASDAQ and the OSE under the ticker code "GOGL".

We are engaged primarily in the ownership and operation of dry bulk vessels. Throughout 2024, we operated through subsidiaries in Bermuda, Liberia, the Marshall Islands, Norway, Singapore and the UK. During 2024, we re-domiciled certain subsidiaries to Bermuda, and as of December 31, 2024, we had subsidiaries located in Bermuda, Norway and Singapore, and we closed the UK subsidiary in June 2024. We are also involved in the charter, purchase and sale of vessels.

Historical business purpose and the Merger

We were originally established for the purpose of owning and operating five very large crude oil carriers ("VLCCs"). However, we expanded our business to the dry bulk segment from 2009 and onwards by acquiring secondhand vessels and by entering into newbuilding contracts. Between 2007 and 2013, we sold our five VLCCs and subsequently discontinued our crude oil tanker operations. In 2014, we made significant expansion in the dry bulk segment by acquiring 29 special purpose companies, from Frontline 2012 Ltd ("Frontline 2012"), each owning a dry bulk newbuilding, all of which were delivered to us between 2014 and 2018.

On October 7, 2014, we entered into a certain agreement and plan of merger with Former Golden Ocean. The Merger was approved by our shareholders and the shareholders of the Former Golden Ocean at separate special general meetings held on March 26, 2015. In addition, our shareholders approved the adoption of the Amended and Restated Bye-laws. As of March 31, 2015, and following completion of the Merger, we owned 47 vessels and had 25 vessels under construction.

Our registered and principal executive offices are located at Par-la-Ville Place, 14 Par-la-Ville Road, Hamilton, HM 08, Bermuda, and our telephone number at this location is +1 (441) 295-6935. Our corporate website is <http://www.goldenocean.bm>. The Commission maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The address of the SEC’s internet site is www.sec.gov. The information on our website is not incorporated by reference into this annual report.

Our Acquisitions, Disposals and Newbuildings

We entered into the following acquisitions and disposals in 2022, 2023, 2024 and 2025 (to date):

In February 2022, we entered into an agreement to sell en-bloc three older Kamsarmax vessels, *Golden Empress*, *Golden Enterprise* and *Golden Endeavour* to an unrelated third party for a total gross amount of \$52.0 million. The vessels were delivered to their new owner in 2022. We recorded a gain of \$9.5 million from the sale in 2022.

In June 2022, we entered into agreements to construct a total of three Kamsarmax vessels. All three vessels were delivered to us during 2024.

In June 2022, we entered into an agreement to sell en-bloc two Ultramax vessels¹, *Golden Cecilie* and *Golden Cathrine* to an unrelated third party for a total gross amount of \$63.0 million. The vessels were delivered to their new owner in the third quarter of 2022 and the total net cash flows from the transaction after repayment of debt was approximately \$42.8 million. We recorded a gain of \$21.9 million from the sale in 2022.

In November 2022, we entered into an agreement to sell two Panamax vessels, *Golden Ice* and *Golden Strength*, to an unrelated third party for a total gross amount of \$30.3 million. In December 2022, the Panamax vessel, *Golden Ice*, was delivered to its new owner, at which time we recorded a gain of approximately \$2.8 million. In January 2023, the Panamax vessel, *Golden Strength* was delivered to its new owner and we recorded a gain of approximately \$2.6 million.

In February 2023, we signed agreements for the acquisition of six scrubber fitted Newcastlemax vessels *Golden Aquamarine*, *Golden Duke*, *Golden Earl*, *Golden Walcott*, *Golden Emerald* and *Golden Sapphire* from H-Line, an unrelated third party for a total consideration of \$291.0 million. The newly acquired vessels are chartered back to their former owner, an unrelated third party, for approximately 36 months at an average net TCE rate of just above \$21,000 per day. All vessels were delivered to us by July 2023.

In March 2023, we entered into an agreement to sell two Capesize vessels, *Golden Feng* and *Golden Shui*, to an unrelated third party for a total gross amount of \$44.0 million. We recorded an impairment loss of \$11.8 million in connection with the sale.

In September 2023, we entered into and completed the sale of one Panamax vessel, *Golden Suek*, to an unrelated third party for a total gross amount of \$15.0 million, recognizing a gain from sale of \$0.8 million.

In September 2023, for the Supramax vessel *Golden Hawk*² chartered-in to the Company from an unrelated third party, the Company declared an option under the current time charter contract to acquire the vessel in the amount of \$15.3 million. Subsequent to entering into the purchase agreement, the Company entered into an agreement to sell the Supramax vessel to an unrelated third party, for total consideration of \$21.6 million. The Company recognized a gain from the sale and net cash proceeds of approximately \$5.8 million upon delivery of the vessel to new owners in November 2023.

In 2023, we took delivery of six Kamsarmax newbuildings, *Golden Star*, *Golden Soul*, *Golden Hope*, *Golden Lion*, *Golden Grace* and *Golden John* relating to the ten contracts that we entered into in 2021 and 2022.

In December 2023, we entered into an agreement to sell one Panamax vessel, *Golden Bull*, to an unrelated third party for a total gross amount of \$16.0 million. The vessel was delivered to its new owner in February 2024 and a net gain from sale of approximately \$1.1 million was recorded upon delivery.

In June 2024, we entered into an agreement to sell one Panamax vessel, *Golden Ruby*, to an unrelated third party for a total gross amount of \$21.0 million. The vessel was delivered to its new owner in August 2024 and a net gain from sale of approximately \$4.2 million was recorded upon delivery.

In September 2024, we entered into agreements to sell one Newcastlemax vessel, *Golden Gayle*, and one Panamax vessel, *Golden Diamond* for a total gross amount of \$57.5 million. The vessels were delivered to their new owners in October and November, respectively, and a net gain from the sales of approximately \$16.1 million was recorded upon delivery.

In 2024, we took delivery of four Kamsarmax newbuildings, *Golden Erling*, *Golden Wave*, *Golden Tide* and *Golden Faith* and as of December 31, 2024, all vessels relating to the ten contracts that we entered into in 2021 and 2022 have been delivered.

The Company had the option to purchase the eight vessels from SFL en-bloc for an aggregate price of \$112 million on the 10-year anniversary of the commencement of the leases of such vessels. In January 2025, the Company sent a notice to SFL declaring the purchase option for the eight vessels. The purchase will be finalized during the third quarter of 2025.

¹ Defined as vessels carrying capacities of between 55,000 and 65,000 dwt. As per December 31, 2024 and as of the date of this report, we do not own or operate any Ultramax vessels.

² Defined, together with Ultramax vessels, as vessels carrying capacities of between 55,000 and 65,000 dwt. As per December 31, 2024 and as of the date of this report, we do not own or operate any Supramax vessels.

B. BUSINESS OVERVIEW

We are an international shipping company that owns and operates a fleet of dry bulk vessels, consisting of Newcastlemax, Capesize, Kamsarmax and Panamax vessels. Our vessels transport a broad range of major and minor bulk commodities, including ores, coal, grains and fertilizers, along worldwide shipping routes. Our vessels operate in the spot and time charter markets.

As of March 20, 2025, we owned 83 dry bulk vessels. Each vessel is owned and operated by one of our subsidiaries and is flagged either in the Marshall Islands or Hong Kong. In addition, we had eight vessels chartered-in from SFL (of which seven are chartered in on finance leases and one is chartered in on an operating lease). The Company had the option to purchase the eight vessels from SFL en-bloc for an aggregate price of \$112 million on the 10-year anniversary of the commencement of the leases of such vessels. In January 2025, the Company sent a notice to SFL declaring the purchase option for the eight vessels. The purchase will be finalized during the third quarter of 2025. Of the 91 vessels that we own and operate, 8 of our vessels are chartered-out on fixed rate time charters, 28 of our vessels are chartered out on index linked rate time charters and the remaining 55 vessels operate in the spot market.

We own various vessel owning and operating subsidiaries. Our operations take place substantially outside of the United States. Our subsidiaries, therefore, own and operate vessels that may be affected by changes in foreign governments and other economic and political conditions. Our vessels operate worldwide and as a result, our management does not, and did not, evaluate performance by geographical region because this information is not meaningful.

The dry bulk shipping industry is highly cyclical, experiencing volatility in profitability, vessel values and freight rates. Freight rates are strongly influenced by the supply of dry bulk vessels and the demand for dry bulk seaborne transportation.

Our Business Strategy

Our business strategy centers around the largest sizes of dry bulk carriers (Newcastlemax and Capesize). Another element of our strategy is to maintain a low average fleet age, ensuring low operational costs and a low carbon footprint.

Shipowners essentially have two options: (i) fix the vessels on long-period charters at fixed-paying rates, or, (ii) be exposed to the daily spot market rates.

We decide our fixed-paying versus spot market ratio depending on market expectations, charter rates, newbuilding costs, vessels' resale and scrap values, and vessel operating expenses.

We adjust our market exposure through time charters, voyage charters, bareboat charters, sale and leasebacks, sales and purchases of vessels, and acquisitions. Our intention is to create shareholder value through sustainable growth and prudent employment of our fleet.

Our business strategy includes three main pillars (Simplification, Risk Management, and Decarbonization) on which we are focusing our efforts: (1) Simplification relates to the increased focus on our core business and our capabilities as a shipowner in large-size dry bulk shipping, (2) Risk Management relates to our decision making on fixed-paying income versus spot exposure, as well as on enhancing transparency and accountability through clearly defined risk parameters and (3) Decarbonization and digitalization refers to our focus on positioning the Company for a low-carbon future by exploring new technologies and optimization tools.

Our Environmental, Social and Governance Efforts

Environment

Environmental risk management is an integrated part of our daily operations and management processes. We review all identified risks to the environment, which allows us to establish appropriate management tools and safeguards in place. Our Management System is ISO-compliant and in accordance with the ISM Code. Our Ship Energy Efficiency Management Plans ("SEEMP") allows for a granular risk assessment for each individual vessel's performance as well as providing a thorough system for reporting.

Social

Our policy promotes safety at sea, health and prevention of injury, illness, and loss of life. Our managers employ and train qualified seafarers in accordance with the requirements of the flag state and established by the Standards of Training, Certification & Watchkeeping Convention ("STCW").

In addition to securing our workers' health and safety, we seek to ensure that our employees, on-shore and off-shore, are working under conditions that meet the requirements set out in the International Labour Conventions and the Maritime Labour Convention. As part of safeguarding seafarers' labor rights, these conventions include the right to collective bargaining agreements and that no employee is discriminated based on nationality, race or any other basis. The PSC and the OCIMF Ship Inspection Report Programme (SIRE) have been implemented, ensuring that we comply with applicable labor rights.

Governance

We have a risk-based approach to compliance and have established policies and procedures which clearly set out how we manage ESG issues. Implementing these policies and procedures mitigates our risks and any negative ESG impacts. All policies and procedures were updated in 2024.

The Board is ultimately responsible for ESG at Golden Ocean. The Board oversees the Company's strategy, including our decarbonization strategy, and ensures that appropriate and effective ESG-related risk management and internal control systems are in place. The Board also reviews Golden Ocean's corporate governance framework on an annual basis. As an example, the Board has reviewed the Company's GHG accounting and emission targets. The Board's Audit Committee ensures oversight of key ESG risks and external reporting and receives regular updates on ESG reporting processes. The Committee also monitors reports and complaints received by the Company relating to internal controls and compliance.

The executive management team, led by the principal executive officer, oversees the daily implementation of ESG at Golden Ocean, ensuring our commitment to environmental, social and governance principles. The Chief Financial Officer is responsible for establishing monitoring and reporting processes pertaining to ESG-related risks and performance.

Our Decarbonization Strategy

In 2020, we initiated our "Decarbonization journey towards 2030-2050" to ensure that our fleet is in compliance with the constantly evolving regulations. The purpose of this decarbonization strategy is to provide us with a solid understanding of how to further optimize and modernize our fleet and operations in a cost-efficient and sustainable way. The decarbonization strategy also ensures that we maintain momentum and allocate the correct resources to our environmental performance. Our strategy puts us in an optimal position to make operational and strategic decisions based on verified data, and we are already experiencing compelling benefits, such as:

- lower overall costs
- being better positioned towards our charter market, cargo owners and end-consumers
- a more efficient fleet with lower emissions
- future-proofing compliance with upcoming regulations

ESG Report

Our comprehensive and stand-alone annual ESG report, in respect of the calendar year ended December 31, 2023, was published in August 2024 (the "2023 ESG Report") and can be found on the Company's website. The information in the ESG report and on the Company's website is not incorporated by reference into this document.

We have considered and assessed if detailed information in our 2023 ESG Report or similar information for year 2024 should be included in this annual report for the year ended December 31, 2024. Decarbonization is of strategic importance to us and we believe that, going forward, ESG can have a material effect on our financial position and results of operations. While climate change and environmental regulations have not had a material impact on our business, financial position or results of operations in 2023 or 2024, our investors and shareholders are provided with a sufficient material level of details regarding climate risks and environmental expenditures in this annual report, specifically described above in "Item 3. D. Risk Factors." While we expect that the ESG report for 2024 will further enhance this information, we do not believe it will contain additional material information.

As described above, in previous years we set targets for scope 1 emission reduction and aim to reduce our AER by 15% by 2026 and 30% by 2030, compared to 2019 levels. We also targeted net-zero emissions by 2050. In 2024, we continued to implement measures to achieve the targets above. As of the date of this annual report, these measures have not resulted in a material increase of our ESG related expenditures. The longer-term perspective creates a vast array of implications for our business and dry bulk industry in general and involves more uncertainty. As of the date of this annual report, we have one of the most modern and fuel-efficient fleets in the industry, and we continue to modernize our fleet by selling older tonnage. In the long-term, we are looking for zero emission propulsion technology with the ultimate aim of net zero emissions.

During the year ended December 31, 2024, we have incurred operating costs of \$4.7 million for various energy saving devices and digitalization (2023: \$1.8 million). In addition, in 2024 we increased drydock costs for cargo hold maintenance and hull/cargo sand blasting and painting by approximately \$10.0 million to improve the efficiency of our vessels. Further, in 2024, we incurred \$2.8 million for Mewis Duct installations, which were capitalized.

In 2025, we are planning to incur various other decarbonization costs up to approximately \$10.6 million in total.

While decarbonization is of strategic importance to us, it is not material to our business when comparing our total revenues and result of operations to the total cost of our environmental initiatives.

Russian-Ukrainian War

The ongoing conflict between Russia and Ukraine has disrupted supply chains and caused instability in the global economy, and the United States and the European Union, among other countries, announced sanctions against the Russian government and its supporters.

The United States has issued several Executive Orders that prohibit certain transactions related to Russia, including prohibitions on the importation of certain Russian energy products into the United States, (including crude oil, petroleum, petroleum fuels, oil, liquified natural gas and coal), and all new investments in Russia by U.S. persons, among other prohibitions and export controls, and has issued numerous determinations authorizing the imposition of sanctions on persons who operate or have operated in the energy, metals and mining, and marine sectors of the Russian Federation economy, among others. Increased restrictions on these sectors, or the expansion of sanctions to new sectors, may pose additional risks that could adversely affect our business and operations. While in general much uncertainty remains regarding the global impact of the conflict in Ukraine, it is possible that such tensions could adversely affect the Company's business, financial condition, results of operation and cash flows.

Prior to the war, Russia and Ukraine combined accounted for approximately 10% of global steel trade and supply approximately 30% of Europe's steel imports. Following the onset of the conflict, steel buyers had to find alternative supplies to substitute for steel and semi-finished products sourced from Russia and Ukraine, which stimulated seaborne trade routes. The impact of decreased demand for certain commodities was offset by increased demand for others, elevated port congestion and new trade routes that emerged after Russia's incursion into Ukraine.

The direct impact of the conflict on our business has been limited to time charter cancellations and suspensions under time charter agreements made prior to the onset of the conflict. In March 2022, we cancelled a time charter agreement with respect to *Golden Pearl* in consequence of our counterparty's failure to pay charter hire following the imposition of sanctions by the European Union on charterers' beneficial owner. In addition, in April 2022, we suspended time charter agreements with respect to two vessels (*Admiral Schmidt* and *Vitus Bering*), and in May 2022 redelivered those vessels to their disponent owners, where we understand that those vessels were financed by disponent owners as part of a sale-leaseback arrangement with a Russian-state owned entity. We did not conduct any business with sanctioned counterparties in 2024.

Conflict between Israel and Hamas

We believe that there is a limited effect of the conflict on our results and operations, since historically we did not have many port calls to Israel. Recent Houthi attacks in the Red Sea led to a short-term immaterial positive effect on our operations due to an increase in tonne-miles as a result of vessels rerouting to bypass the Suez Canal. There is still significant uncertainty relating to the conflict and we cannot guarantee that impact on our operations will remain limited in the long term.

Management Structure

Overall responsibility for the oversight of the management of our company and its subsidiaries rests with our Board. We operate management services through Golden Ocean Group Management (Bermuda) Ltd, our subsidiary incorporated in Bermuda, which in turn subcontracts services to Golden Ocean Management AS and Golden Ocean Shipping Co. Pte. Ltd., our subsidiaries incorporated in Norway and Singapore, respectively. Our principal executive officer and principal financial officer are employed by Golden Ocean Management AS. The Board defines the scope and terms of the services to be provided, including day-to-day operations by the aforementioned subsidiaries, and requires that it be consulted on all matters of material importance and/or of an unusual nature and, for such matters, provides specific authorization to personnel to act on our behalf.

Technical Supervision Services

Technical operations and crewing of all owned vessels are outsourced to several leading ship management companies. Up until January 1, 2024, we received technical supervision services from Frontline Management (Bermuda) Limited ("Frontline Management") which included supervision of ship management companies. Pursuant to the terms of the agreement, Frontline Management received a management fee per vessel per year, which was subject to annual review. Beginning January 1, 2024, technical supervision of ship management companies is performed by Golden Ocean's technical team.

In 2024 Frontline Management continued to handle contracting and procurement services and newbuilding supervision on our behalf and charged us for costs incurred in relation to the supervision.

Information Security Management System Services

Our chief information security officer (CISO), who is employed by Front Ocean Management AS ("Front Ocean"), a related party, is responsible for assessing and managing cybersecurity threats, reporting cybersecurity updates and reporting to the Board material cybersecurity incidents. For more information on our cybersecurity risk management and strategy, please see "Item 16K. Cybersecurity."

Seasonality

The dry bulk trade has a history of tracking seasonal demand fluctuations. As China is the most significant market for dry bulk shipping, the public holidays in relation to the Chinese New Year during the first quarter usually results in a decrease in market activity during this period. Also, in the last few years, adverse weather conditions in the Southern Hemisphere, which often occur during the first quarter, have had a negative impact on iron ore and coal exports from Australia and iron ore exports from Brazil.

Grain has traditionally had the greatest impact on the seasonality in the dry bulk market, particularly during the peak demand seasons, which occurs during the second quarter in the Southern Hemisphere and at the end of the third quarter and throughout the fourth quarter in the Northern Hemisphere. The growth of iron ore and coal transportation over the last decade, however, has diminished the relative importance of grain to the dry bulk transportation industry. Since iron ore, like most other commodities, has moved from fixed price agreements between shippers and receivers to spot pricing, short-term price fluctuations have had an impact on iron ore trading by reducing normal seasonal patterns. Other factors, however, such as weather and port congestion still impact market volatility. The last three years have seen an increase in the significance of the bauxite trade from West Africa to Asia. The trade represents long sailing distances and is predominantly done by Capesize vessels. Further, the trade is inversely seasonal with the iron ore trade, meaning that the highest volumes are exported during the winter, when iron ore exports normally are lower.

Customers

For the year ended December 31, 2024, two customers accounted for 10% or more of our consolidated revenues in the amounts of \$123.1 million and \$105.3 million. The accounts receivable from these two customers as of December 31, 2024, were \$0.8 million and \$4.1 million, respectively. For the years ended December 31, 2023 and December 31, 2022, no customer accounted for 10% or more of our consolidated revenues.

Competition

The market for international seaborne dry bulk transportation services is highly fragmented and competitive. Seaborne dry bulk transportation services are generally provided by independent ship-owners. In addition, many owners and operators in the dry bulk sector pool their vessels together on an ongoing basis, and such pools are available to customers to the same extent as independently owned and operated fleets. Competition for charters in the dry bulk market is intense and is based upon price, location, size, age, condition and acceptability of the vessel and its manager. Competition is also affected by the availability of other size vessels to compete in the trades in which we engage. Charters are to a large extent brokered through international independent brokerage houses that specialize in finding the optimal ship for any particular cargo based on the aforementioned criteria. Brokers may be appointed by the cargo shipper or the ship owner.

Environmental and Other Regulations in the Shipping Industry

Government regulation and laws significantly affect the ownership and operation of our fleet. We are subject to international conventions and treaties, national, state and local laws and regulations in force in the countries in which our vessels may operate or are registered relating to safety and health and environmental protection including the storage, handling, emission, transportation and discharge of hazardous and non-hazardous materials, and the remediation of contamination and liability for damage to natural resources. Compliance with such laws, regulations and other requirements entails significant expense, including vessel modifications and implementation of certain operating procedures.

A variety of government and private entities subject our vessels to both scheduled and unscheduled inspections. These entities include the local port authorities (applicable national authorities such as the USCG, harbor master or equivalent), classification societies, flag state administrations (countries of registry) and charterers, particularly terminal operators. Certain of these entities require us to obtain permits, licenses, certificates and other authorizations for the safe operation of our vessels. Failure to comply could require us to incur substantial costs or result in the temporary suspension of the operation of one or more of our vessels.

Increasing environmental concerns have created a demand for vessels that conform to stricter environmental standards. We are required to maintain robust operating standards for all of our vessels that emphasize operational safety, quality maintenance, continuous training of our officers and crews and compliance with international and port regulations. We believe that the operation of our vessels is in substantial compliance with applicable environmental laws and regulations and that our vessels have all material permits, licenses, certificates or other authorizations necessary for the safe conduct of our operations. However, because such laws and regulations frequently change and may impose increasingly stricter requirements, we cannot predict the ultimate cost of complying with these requirements, or the impact of these requirements on the resale value or useful lives of our vessels. In addition, a future serious marine incident that causes significant adverse environmental impact could result in additional legislation or regulation that could negatively affect our profitability and reputation.

International Maritime Organization

The IMO, the United Nations agency for maritime safety and the prevention of pollution by vessels (the "IMO"), has adopted the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto, collectively referred to as MARPOL 73/78 and herein as "MARPOL," the International Convention for the Safety of Life at Sea of 1974 ("SOLAS Convention"), and the International Convention on Load Lines of 1966 (the "LL Convention"). MARPOL establishes environmental standards relating to oil leakage or spilling, garbage management, sewage, air emissions, handling and disposal of noxious liquids and the handling of harmful substances in packaged forms. MARPOL is applicable to dry bulk, tanker and LNG carriers, among other vessels, and is broken into six Annexes, each of which regulates a different source of pollution. Annex I relates to oil leakage or spilling; Annexes II and III relate to harmful substances carried in bulk in liquid or in packaged form, respectively; Annexes IV and V relate to sewage and garbage management, respectively; and Annex VI, lastly, relates to air emissions. Annex VI was separately adopted by the IMO in September of 1997; new emission standards, titled IMO-2020, took effect on January 1, 2020.

In 2013, the IMO's Marine Environmental Protection Committee (the "MEPC") adopted a resolution amending MARPOL Annex I Condition Assessment Scheme ("CAS"). These amendments became effective on October 1, 2014, and require compliance with the 2011 International Code on the Enhanced Programme of Inspections during Surveys of Bulk Carriers and Oil Tankers ("ESP Code"), which provides for enhanced inspection programs. We may need to make certain financial expenditures to comply with these amendments following close-up surveys and thickness measurements during Special Survey dry docking repairs.

Air Emissions

In September of 1997, the IMO adopted Annex VI to MARPOL to address air pollution from vessels. Effective May 2005, Annex VI sets limits on sulfur oxide and nitrogen oxide emissions from all commercial vessel exhausts and prohibits "deliberate emissions" of ozone depleting substances (such as halons and chlorofluorocarbons), emissions of volatile compounds from cargo tanks, and the shipboard incineration of specific substances. Annex VI also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions, as explained below. Emissions of "volatile organic compounds" from certain vessels, and the shipboard incineration (from incinerators installed after January 1, 2000) of certain substances (such as polychlorinated biphenyls ("PCBs")) are also prohibited. We believe that all our vessels are currently compliant in all material respects with these regulations.

The Marine Environment Protection Committee ("MEPC"), adopted amendments to Annex VI regarding emissions of sulfur oxide, nitrogen oxide, particulate matter and ozone depleting substances, which entered into force on July 1, 2010. The amended Annex VI seeks to further reduce air pollution by, among other things, implementing a progressive reduction of the amount of sulfur contained in any fuel oil used on board ships. On October 27, 2016, MEPC 70 agreed to implement a global 0.5% m/m sulfur oxide emissions limit (reduced from 3.50%) starting from January 1, 2020. This limitation can be met by using low-sulfur compliant fuel oil, alternative fuels, or certain exhaust gas cleaning systems. Ships are now required to obtain bunker delivery notes and International Air Pollution Prevention ("IAPP") Certificates from their flag states that specify sulfur content. Additionally, at MEPC 73, amendments to Annex VI to prohibit the carriage of bunkers above 0.5% sulfur on ships were adopted and took effect on March 1, 2020, with the exception of vessels fitted with exhaust gas cleaning equipment

("scrubbers"), which can carry fuel of higher sulfur content. These regulations subject ocean-going vessels to stringent emissions controls, and have caused us to incur additional costs.

Sulfur content standards are even stricter within certain "Emission Control Areas" ("ECAs"). As of January 1, 2015, ships operating within an ECA were not permitted to use fuel with sulfur content in excess of 0.1% m/m. Amended Annex VI establishes procedures for designating new ECAs. Currently, the IMO has designated five ECAs, including specified portions of the Baltic Sea area, Mediterranean Sea area, North Sea area, North American area and United States Caribbean area. The Mediterranean Sea became an ECA on May 1, 2024, and compliance obligations will begin May 1, 2025. Ocean-going vessels in these areas will be subject to stringent emission controls and may cause us to incur additional costs. Other areas in China, ocean-going vessels are subject to local regulations that impose stricter emission controls. In July 2023, MEPC 80 announced three new ECA proposals, including the Canadian Arctic waters and the North-East Atlantic Ocean, which were adopted in draft amendments to Annex IV that will enter into force in March 2026. If other ECAs are approved by the IMO, or other new or more stringent requirements relating to emissions from marine diesel engines or port operations by vessels are adopted by the U.S. Environmental Protection Agency ("EPA") or the states where we operate, compliance with these regulations could entail significant capital expenditures or otherwise increase the costs of our operations.

The amended Annex VI also established new tiers of stringent nitrogen oxide emissions standards for marine diesel engines, depending on their date of installation. Tier III NOx standards were designed for the control of NOx produced by vessels and apply to ships that operate in the North American and U.S. Caribbean Sea ECAs with marine diesel engines installed and constructed on or after January 1, 2016. Tier III requirements could apply to additional areas designated for Tier III NOx in the future. At MEPC 70 and MEPC 71, the MEPC approved the North Sea and Baltic Sea as ECAs for nitrogen oxide for ships built on or after January 1, 2021. The EPA promulgated equivalent (and in some senses stricter) emissions standards in 2010. As a result of these designations or similar future designations, we may be required to incur additional operating or other costs.

At MEPC 70, Regulation 22A of MARPOL Annex VI became effective as of March 1, 2018 and requires ships above 5,000 gross tonnage to collect and report annual data on fuel oil consumption to an IMO database, with the first year of data collection having commenced on January 1, 2019. The IMO used such data as part of its initial roadmap (through 2023) for developing its strategy to reduce greenhouse gas emissions from ships, as discussed further below.

As of January 1, 2013, MARPOL made mandatory certain measures relating to energy efficiency for ships. All ships are now required to develop and implement Ship Energy Efficiency Management Plans ("SEEMP"), and new ships must be designed in compliance with minimum energy efficiency levels per capacity mile as defined by the Energy Efficiency Design Index ("EEDI"). Under these measures, by 2025, all new ships built will be 30% more energy efficient than those built in 2014. MEPC 75 adopted amendments to MARPOL Annex VI which brought forward the effective date of the EEDI's "phase 3" requirements from January 1, 2025 to April 1, 2022 for several ship types, including general cargo ships.

Additionally, in 2022, MEPC amended Annex VI to impose new regulations to reduce greenhouse gas emissions from ships. These amendments introduce requirements to assess and measure the energy efficiency of all ships and set the required attainment values, with the goal of reducing the carbon intensity of international shipping. The requirements include (1) a technical requirement to reduce carbon intensity based on a new Energy Efficiency Existing Ship Index ("EEXI"), and (2) operational carbon intensity reduction requirements, based on a new operational carbon intensity indicator ("CII"). The attained EEXI is required to be calculated for ships of 400 gross tonnage and above, in accordance with different values set for ship types and categories. With respect to the CII, the draft amendments would require ships of 5,000 gross tonnage to document and verify their actual annual operational CII achieved against a determined required annual operational CII. All ships above 400 gross tonnage must also have an approved SEEMP on board. For ships above 5,000 gross tonnage, the SEEMP needs to include certain mandatory content. That same year, MEPC amended MARPOL Annex I to prohibit the use and carriage for use as fuel of heavy fuel oil ("HFO") by ships in Arctic waters on and after July 1, 2024.

MEPC 77 adopted a non-binding resolution which urges Member States and ship operators to voluntarily use distillate or other cleaner alternative fuels or methods of propulsion that are safe for ships and could contribute to the reduction of Black Carbon emissions from ships when operating in or near the Arctic.

MEPC 79 adopted amendments to MARPOL Annex VI, Appendix IX to include the attained and required CII values, the CII rating and attained EEXI for existing ships in the required information to be submitted to the IMO Ship Fuel Oil Consumption Database. MEPC 79 also revised the EEDI calculation guidelines to include a CO2 conversion factor for ethane, a reference to the updated ITCC guidelines, and a clarification that in case of a ship with multiple load line certificates, the maximum certified summer draft should be used when determining the deadweight. These amendments entered into force on May 1, 2024.

In July 2023, MEPC 80 approved the plan for reviewing CII regulations and guidelines, which must be completed at the latest by January 1, 2026. This review commenced at MEPC 82 in Fall 2024, and there will be no immediate changes to the CII framework, including correction factors and voyage adjustments, before the review is completed.

MEPC 81, held in 2024, introduced amendments to the 2021 guidelines on the shaft/engine power limitation system to comply with the EEXI requirements and use of a power reserve.

We may incur costs to comply with these revised standards, however we do not expect these costs to be material. Additional or new conventions, laws and regulations, including those effective in 2024, may be adopted that could require the installation of expensive emission control systems and could adversely affect our business, results of operations, cash flows and financial condition. We continuously assess the impact on our costs for 2025 and onwards to determine if they remain immaterial.

Safety Management System Requirements

The SOLAS Convention was amended to address the safe manning of vessels and emergency training drills. The Convention of Limitation of Liability for Maritime Claims (the "LLMC") sets limitations of liability for a loss of life or personal injury claim or a property claim against ship owners. We believe that our vessels are in substantial compliance with SOLAS and LLMC standards.

Under Chapter IX of the SOLAS Convention, or the International Safety Management Code for the Safe Operation of Ships and for Pollution Prevention (the "ISM Code"), our operations are also subject to environmental standards and requirements. The ISM Code requires the party with operational control of a vessel to develop an extensive safety management system that includes, among other things, the adoption of a safety and environmental protection policy setting forth instructions and procedures for operating its vessels safely for responding to emergencies. We rely upon the safety management system that our managers have developed for compliance with the ISM Code. The failure of a vessel owner or person such as the manager or bareboat charterer, who has assumed the responsibility for operation of the ship from the owner of the ship and who on assuming such responsibility has agreed to take over all the duties and responsibilities imposed by the ISM Code, may subject such party to increased liability, may decrease available insurance coverage for the affected vessels and may result in a denial of access to, or detention in, certain ports. The ISM Code requires that vessel operators obtain a safety management certificate for each vessel they operate. This certificate evidences compliance by a vessel's management with the ISM Code requirements for a safety management system. No vessel can obtain a safety management certificate unless its manager has been awarded a document of compliance, issued by either flag state or an organization recognized by the flag state, under the ISM Code. Our managers have obtained applicable documents of compliance for their offices and safety management certificates for all of our vessels for which the certificates are required by the ISM. The document of compliance and safety management certificate are renewed as required.

The SOLAS Convention regulation II-1/3-10 on goal-based ship construction standards for bulk carriers and oil tankers, which entered into force on January 1, 2012, requires that all oil tankers and bulk carriers of 150 meters in length and above, for which the building contract is placed on or after July 1, 2016, satisfy applicable structural requirements conforming to the functional requirements of the International Goal-based Ship Construction Standards for Bulk Carriers and Oil Tankers (GBS Standards).

Amendments to the SOLAS Convention Chapter VII apply to vessels transporting dangerous goods and require those vessels be in compliance with the International Maritime Dangerous Goods Code ("IMDG Code"). Effective January 1, 2018, the IMDG Code includes (1) provisions for radioactive material, reflecting the latest provisions from the International Atomic Energy Agency, (2) marking, packing and classification requirements for dangerous goods, and (3) mandatory training requirements. Amendments which took effect on January 1, 2020 also reflect the latest material from the UN Recommendations on the Transport of Dangerous Goods, including (1) provisions regarding IMO type 9 tank, (2) abbreviations for segregation groups, and (3) special provisions for carriage of lithium batteries and of vehicles powered by flammable liquid or gas. Additional amendments, which came into force on June 1, 2022, include (1) addition of a definition of dosage rate, (2) additions to the list of high consequence dangerous goods, (3) new provisions for medical/clinical waste, (4) addition of various ISO standards for gas cylinders, (5) a new handling code, and (6) changes to stowage and segregation provisions. The newest edition of the IMDG Code took effect on January 1, 2024, although the changes are largely incremental.

The IMO has also adopted the International Convention on STCW. As of February 2017, all seafarers are required to meet the STCW standards and be in possession of a valid STCW certificate. Flag states that have ratified SOLAS and STCW generally employ the classification societies, which have incorporated SOLAS and STCW requirements into their class rules, to undertake surveys to confirm compliance.

The IMO's Maritime Safety Committee and MEPC, respectively, each adopted relevant parts of the International Code for Ships Operating in Polar Water (the "Polar Code"). The Polar Code, which entered into force on January 1, 2017, covers design, construction, equipment, operational, training, search and rescue as well as environmental protection matters relevant to ships operating in the waters surrounding the two poles. It also includes mandatory measures regarding safety and pollution prevention as well as recommendatory provisions. The Polar Code applies to new ships constructed after January 1, 2017, and after January 1, 2018, ships constructed before January 1, 2017 are required to meet the relevant requirements by the earlier of their first intermediate or renewal survey.

Furthermore, recent action by the IMO's Maritime Safety Committee and United States agencies indicates that cybersecurity regulations for the maritime industry are likely to be further developed in the near future in an attempt to combat cybersecurity threats. By IMO resolution, administrations are encouraged to ensure that cyber-risk management systems are incorporated by ship-owners and managers by their first annual Document of Compliance audit after January 1, 2021. In February 2021, the U.S. Coast Guard published guidance on addressing cyber risks in a vessel's safety management system. This might cause companies to create additional procedures for monitoring cybersecurity, which could require additional expenses and/or capital expenditures. The impact of such regulations is difficult to predict at this time.

In June 2022, SOLAS also set out new amendments that took effect on January 1, 2024, which include new requirements for: (1) the design for safe mooring operations, (2) the Global Maritime Distress and Safety System ("GMDSS"), (3) watertight integrity, (4) watertight doors on cargo ships, (5) fault-isolation of fire detection systems, and (6) life-saving appliances. These new requirements may impact the cost of our operations.

Pollution Control and Liability Requirements

The IMO has negotiated international conventions that impose liability for pollution in international waters and the territorial waters of the signatories to such conventions. For example, the IMO adopted an International Convention for the Control and BWM Convention in 2004. The BWM Convention entered into force on September 8, 2017. The BWM Convention requires ships to manage their ballast water to remove, render harmless, or avoid the uptake or discharge of new or invasive aquatic organisms and pathogens within ballast water and sediments. The BWM Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits, and require all ships to implement a ballast water management plan including carrying a ballast water record book and be certified with an international ballast water management certificate.

On December 4, 2013, the IMO Assembly passed a resolution revising the application dates of the BWM Convention so that the dates are triggered by the entry into force date and not the dates originally in the BWM Convention. This, in effect, makes all vessels delivered before the entry into force date "existing vessels" and allows for the installation of ballast water management systems on such vessels at the first International Oil Pollution Prevention ("IOPP") renewal survey following entry into force of the convention.

The MEPC maintains guidelines for approval of ballast water management systems (G8). At MEPC 72, amendments were adopted to extend the date existing vessels are subject to certain ballast water standards. Ships over 400 gross tons generally must comply with a "D-1 standard," requiring the exchange of ballast water only in open seas and away from coastal waters. The "D-2 standard" specifies the maximum amount of viable organisms allowed to be discharged, and compliance dates vary depending on the IOPP renewal dates. The standards have been in force since 2019, and for most ships, compliance with the D-2 standard involved installing on-board systems to treat ballast water and eliminate unwanted organisms. Ballast water management systems, which include systems that make use of chemical, biocides, organisms or biological mechanisms, or which alter the chemical or physical characteristics of the ballast water, must be approved in accordance with IMO Guidelines (Regulation D-3). Since September 8, 2024, all ships have been required to meet the D-2 standard. We are compliant with these regulations as of the date of this report. Additionally, in November 2020, MEPC 75 adopted amendments to the BWM Convention which would require a commissioning test of the ballast water management system for the initial survey or when performing an additional survey for retrofits. This analysis will not apply to ships that already have an installed BWM system certified under the BWM Convention. These amendments have entered into force on June 1, 2022. In December 2022, MEPC 79 agreed that it should be permitted to use ballast tanks for temporary storage of treated sewage and grey water. MEPC 79 also established that ships are expected to return to D-2 compliance after experiencing challenging uptake water and bypassing a BWM system should only be used as a last resort.

In July 2023, MEPC 80 approved a plan for a comprehensive review of the BWM Convention over the next three years and the corresponding development of a package of amendments to the Convention. MEPC 80 also adopted further amendments relating to Appendix II of the BWM Convention concerning the form of the Ballast Water Record Book, which are expected to enter into force in February 2025. A protocol for ballast water compliance monitoring devices and unified interpretation of the form of the BWM Convention certificate were also adopted. In March 2024, MEPC 81 adopted amendments to the BWM Convention concerning the use of Ballast Water Record Books in electronic form, which are expected to enter into force in

October 2025. Pursuant to the ongoing review, in Fall 2024, MEPC 82 approved the 2024 Guidance on ballast water record keeping and reporting and the 2024 Guidance for Administrations on the type of approval process for ballast water management systems to support harmonized evaluation by Administrations.

Once mid-ocean exchange or ballast water treatment requirements become mandatory under the BWM Convention, the cost of compliance could increase for ocean carriers and may have a material effect on our operations. However, many countries already regulate the discharge of ballast water carried by vessels from country to country to prevent the introduction of invasive and harmful species via such discharges. The U.S., for example, requires vessels entering its waters from another country to conduct mid-ocean ballast exchange, or undertake some alternate measure, and to comply with certain reporting requirements.

The IMO also adopted the International Convention on Civil Liability for Bunker Oil Pollution Damage (the "Bunker Convention") to impose strict liability on ship owners (including the registered owner, bareboat charterer, manager or operator) for pollution damage in jurisdictional waters of ratifying states caused by discharges of bunker fuel. The Bunker Convention requires registered owners of ships over 1,000 gross tons to maintain insurance for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime (but not exceeding the amount calculated in accordance with the LLMC). With respect to non-ratifying states, liability for spills or releases of oil carried as fuel in ship's bunkers typically is determined by the national or other domestic laws in the jurisdiction where the events or damages occur.

Ships are required to maintain a certificate attesting that they maintain adequate insurance to cover an incident. In jurisdictions, such as the United States where the International Convention on Civil Liability for Oil Pollution Damage of 1969, as from time to time amended and replaced by the 1992 protocol, or the Bunker Convention has not been adopted, various legislative schemes or common law govern, and liability is imposed either on the basis of fault or on a strict-liability basis.

Anti-Fouling Requirements

In 2001, the IMO adopted the International Convention on the Control of Harmful Anti-fouling Systems on Ships (the "Anti-fouling Convention"). The Anti-fouling Convention, which entered into force on September 17, 2008, prohibits the use of organotin compound coatings to prevent the attachment of mollusks and other sea life to the hulls of vessels. Vessels of over 400 gross tons engaged in international voyages will also be required to undergo an initial survey before the vessel is put into service or before an International Anti-fouling System Certificate is issued for the first time; and subsequent surveys when the Anti-fouling systems are altered or replaced.

We have obtained Anti-fouling System Certificates for all our vessels that are subject to the Anti-fouling Convention.

Compliance Enforcement

Noncompliance with the ISM Code or other IMO regulations may subject the ship owner, ship manager or bareboat charterer to increased liability, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to, or detention in, some ports. The USCG and European Union authorities prohibit vessels not in compliance with the ISM Code by applicable deadlines from trading in U.S. and European Union ports, respectively. As of the date of this report, all our vessels have a valid Safety Management Certificate as applicable under the ISM Code. The IMO continues to review and introduce new regulations. It is impossible to predict what additional regulations, if any, may be adopted by the IMO and what effect, if any, such regulations might have on our operations.

United States Regulations

The U.S. Oil Pollution Act of 1990 and the Comprehensive Environmental Response, Compensation and Liability Act

The U.S. Oil Pollution Act of 1990 ("OPA") established an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills. OPA affects all "owners and operators" whose vessels trade or operate within the U.S., its territories and possessions or whose vessels operate in U.S. waters, which includes the U.S.'s territorial sea and its 200 nautical mile exclusive economic zone around the U.S. The U.S. has also enacted the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), which applies to the discharge of hazardous substances other than oil, except in limited circumstances, whether on land or at sea. OPA and CERCLA both define "owner and operator" in the case of a vessel as any person owning, operating or chartering by demise, the vessel. Both OPA and CERCLA impact our operations.

Under OPA, vessel owners and operators are "responsible parties" and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs

and other damages arising from discharges or threatened discharges of oil from their vessels, including bunkers (fuel). OPA defines these other damages broadly to include:

- i. injury to, destruction or loss of, or loss of use of, natural resources and related assessment costs;
- ii. injury to, or economic losses resulting from, the destruction of real and personal property;
- iii. loss of subsistence use of natural resources that are injured, destroyed or lost;
- iv. net loss of taxes, royalties, rents, fees or net profit revenues resulting from injury, destruction or loss of real or personal property, or natural resources;
- v. lost profits or impairment of earning capacity due to injury, destruction or loss of real or personal property or natural resources; and
- vi. net cost of increased or additional public services necessitated by removal activities following a discharge of oil, such as protection from fire, safety or health hazards, and loss of subsistence use of natural resources.

OPA contains statutory caps on liability and damages; such caps do not apply to direct cleanup costs. On December 23, 2022, the USCG issued a final rule to adjust the limitation of liability under the OPA. Effective March 23, 2023, the new adjusted limits of OPA liability for non-tank vessels, edible oil tank vessels, and any oil spill response vessels, to the greater of \$1,300 per gross ton or \$1,076,000 (previous limit was \$1,200 per gross ton or \$997,100).

These limits of liability do not apply if an incident was proximately caused by the violation of an applicable U.S. federal safety, construction or operating regulation by a responsible party (or its agent, employee or a person acting pursuant to a contractual relationship), or a responsible party's gross negligence or willful misconduct. The limitation on liability similarly does not apply if the responsible party fails or refuses to (i) report the incident as required by law where the responsible party knows or has reason to know of the incident; (ii) reasonably cooperate and assist as requested in connection with oil removal activities; or (iii) without sufficient cause, comply with an order issued under the Federal Water Pollution Act (Section 311 (c), (e)) or the Intervention on the High Seas Act.

CERCLA contains a similar liability regime whereby owners and operators of vessels are liable for cleanup, removal and remedial costs, as well as damages for injury to, or destruction or loss of, natural resources, including the reasonable costs associated with assessing the same, and health assessments or health effects studies. There is no liability if the discharge of a hazardous substance results solely from the act or omission of a third party, an act of God or an act of war. Liability under CERCLA is limited to the greater of \$300 per gross ton or \$5.0 million for vessels carrying a hazardous substance as cargo and the greater of \$300 per gross ton or \$500,000 for any other vessel. These limits do not apply (rendering the responsible person liable for the total cost of response and damages) if the release or threat of release of a hazardous substance resulted from willful misconduct or negligence, or the primary cause of the release was a violation of applicable safety, construction or operating standards or regulations. The limitation on liability also does not apply if the responsible person fails or refuses to provide all reasonable cooperation and assistance as requested in connection with response activities where the vessel is subject to OPA.

OPA and CERCLA each preserve the right to recover damages under existing law, including maritime tort law. OPA and CERCLA both require owners and operators of vessels to establish and maintain with the USCG evidence of financial responsibility sufficient to meet the maximum amount of liability to which the particular responsible person may be subject. Vessel owners and operators may satisfy their financial responsibility obligations by providing a proof of insurance, a surety bond, qualification as a self-insurer or a guarantee. We comply and plan to comply going forward with the USCG's financial responsibility regulations by providing applicable certificates of financial responsibility.

The 2010 Deepwater Horizon oil spill in the Gulf of Mexico resulted in additional regulatory initiatives or statutes, including higher liability caps under OPA, new regulations regarding offshore oil and gas drilling, and a pilot inspection program for offshore facilities. However, several of these initiatives and regulations have been or may be revised as a result of political changes. For example, the U.S. Bureau of Safety and Environmental Enforcement's ("BSEE") revised Production Safety Systems Rule ("PSSR"), effective December 27, 2018, modified and relaxed certain environmental and safety protections under the 2016 PSSR. However, in August 2023, the BSEE released a final Well Control Rule, which strengthens testing and performance requirements, and may affect offshore drilling operations.

In January 2021, the Biden administration issued an executive order temporarily blocking new leases for oil and gas drilling in federal waters, but ultimately, the order was rendered ineffective by a permanent injunction by a Louisiana court. against the Biden Administration's moratorium on oil and gas leasing on federal public lands and offshore waters. After being blocked by the courts, in September 2023, the Biden administration announced a scaled back offshore oil drilling plan, including just three oil lease sales in the Gulf of Mexico. On January 6, 2025, the Biden administration announced a ban on new offshore oil and gas drilling in more than 625 million acres of U.S. waters on the Atlantic and Pacific coasts and in Alaska, but Louisiana-led

states and fossil fuel groups are challenging the ban. On January 20, 2025, President Trump issued an executive order revoking this ban but will also likely face legal challenge over this revocation. The Trump administration has also proposed leasing new sections of U.S. waters to oil and gas companies for offshore drilling. With these rapid changes, compliance with any new requirements of OPA and future legislation or regulations applicable to the operation of our vessels could impact the cost of our operations and adversely affect our business.

OPA specifically permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, provided they accept, at a minimum, the levels of liability established under OPA. Some states have enacted legislation providing for unlimited liability for oil spills, and many U.S. states that border a navigable waterway have enacted environmental pollution laws that impose strict liability on a person for removal costs and damages resulting from a discharge of oil or a release of a hazardous substance. Moreover, some states have enacted legislation providing for unlimited liability for discharge of pollutants within their waters, although in some cases, states which have enacted this type of legislation have not yet issued implementing regulations defining vessel owners' responsibilities under these laws. These laws may be more stringent than U.S. federal law. The Company intends to comply with all applicable state regulations in the ports where the Company's vessels call.

We currently maintain pollution liability coverage insurance in the amount of \$2.1 billion per incident for each of our vessels. If the damages from a catastrophic spill were to exceed our insurance coverage, it could have an adverse effect on our business and results of operation.

Other United States Environmental Initiatives

The U.S. Clean Air Act of 1970 (including its amendments of 1977 and 1990) ("CAA") requires the EPA to promulgate standards applicable to emissions of volatile organic compounds and other air contaminants. The CAA requires states to adopt State Implementation Plans ("SIPs"), some of which regulate emissions resulting from vessel loading and unloading operations which may affect our vessels.

The U.S. Clean Water Act ("CWA") prohibits the discharge of oil, hazardous substances and ballast water in U.S. navigable waters unless authorized by a duly-issued permit or exemption, and imposes strict liability in the form of penalties for any unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA and CERCLA. In 2015, the EPA expanded the definition of "waters of the United States" ("WOTUS"), thereby expanding federal authority under the CWA. Following litigation on the revised WOTUS rule, in December 2018, the EPA and Department of the Army proposed a revised, limited definition of WOTUS. In 2019 and 2020, the agencies repealed the prior WOTUS Rule and promulgated the Navigable Waters Protection Rule ("NWPR") which significantly reduced the scope and oversight of EPA and the Department of the Army in traditionally non-navigable waterways. On August 30, 2021, a federal district court in Arizona vacated the NWPR and directed the agencies to replace the rule with the pre-2015 definition. In January 2023, the revised WOTUS rule was codified in place of the vacated NWPR. On May 25, 2023, the United States Supreme Court ruled in the case *Sackett v. EPA* that only wetlands and permanent bodies of water with a "continuous surface connection" to "traditional interstate navigable waters" are covered by the CWA, further narrowing the application of the WOTUS rule. In August 2023, the EPA and the Department of the Army issued the final WOTUS rule, effective on September 8, 2023, that largely reinstated the pre-2015 definition and applied the *Sackett* ruling.

The EPA and the USCG have also enacted rules relating to ballast water discharge, compliance with which requires the installation of equipment on our vessels to treat ballast water before it is discharged or the implementation of other port facility disposal arrangements or procedures at potentially substantial costs, and/or otherwise restrict our vessels from entering U.S. Waters. The EPA will regulate these ballast water discharges and other discharges incidental to the normal operation of certain vessels within United States waters pursuant to the Vessel Incidental Discharge Act ("VIDA"), which was signed into law on December 4, 2018 and replaces the 2013 Vessel General Permit ("VGP") program (which authorizes discharges incidental to operations of commercial vessels and contains numeric ballast water discharge limits for most vessels to reduce the risk of invasive species in U.S. waters, stringent requirements for exhaust gas scrubbers, and requirements for the use of environmentally acceptable lubricants) and current Coast Guard ballast water management regulations adopted under the U.S. National Invasive Species Act ("NISA"), such as mid-ocean ballast exchange programs and installation of approved USCG technology for all vessels equipped with ballast water tanks bound for U.S. ports or entering U.S. waters. VIDA establishes a new framework for the regulation of vessel incidental discharges under Clean Water Act ("CWA"), requires the EPA to develop performance standards for those discharges within two years of enactment, and requires the U.S. Coast Guard to develop implementation, compliance, and enforcement regulations within two years of EPA's promulgation of standards. On September 24, 2024, the EPA finalized its rule on Vessel Incidental Discharge Standards of Performance, which means that the USCG must now develop corresponding regulations regarding ballast water within two years of that date. Under VIDA, all provisions of the 2013 VGP and USCG regulations regarding ballast water treatment remain in force and effect until the EPA and U.S. Coast Guard regulations are finalized. Non-military, non-recreational vessels greater than 79 feet in length must continue to

comply with the requirements of the VGP, including submission of a Notice of Intent ("NOI") or retention of a PARI form and submission of annual reports. We have submitted NOIs for our vessels where required. Compliance with the EPA, U.S. Coast Guard and state regulations would require the installation of ballast water treatment equipment on our vessels or the implementation of other port facility disposal procedures at potentially substantial cost or may otherwise restrict our vessels from entering U.S. waters.

European Union Regulations

In October 2009, the European Union amended a directive to impose criminal sanctions for illicit ship-source discharges of polluting substances, including minor discharges, if committed with intent, recklessly or with serious negligence and the discharges individually or in the aggregate result in deterioration of the quality of water. Aiding and abetting the discharge of a polluting substance may also lead to criminal penalties. The directive applies to all types of vessels, irrespective of their flag, but certain exceptions apply to warships or where human safety or that of the ship is in danger. Criminal liability for pollution may result in substantial penalties or fines and increased civil liability claims. Regulation (EU) 2015/757 of the European Parliament and of the Council of 29 April 2015 (amending EU Directive 2009/16/EC) governs the monitoring, reporting and verification of carbon dioxide emissions from maritime transport, and, subject to some exclusions, requires companies with ships over 5,000 gross tonnage to monitor and report carbon dioxide emissions annually, which may cause us to incur additional expenses.

The European Union has adopted several regulations and directives requiring, among other things, more frequent inspections of high-risk ships, as determined by type, age, and flag as well as the number of times the ship has been detained. The European Union also adopted and extended a ban on substandard ships and enacted a minimum ban period and a definitive ban for repeated offenses. The regulation also provided the European Union with greater authority and control over classification societies, by imposing more requirements on classification societies and providing for fines or penalty payments for organizations that failed to comply. Furthermore, the EU has implemented regulations requiring vessels to use reduced sulfur content fuel for their main and auxiliary engines including boiler. The EU Directive 2005/33/EC (amending Directive 1999/32/EC) introduced requirements parallel to those in Annex VI relating to the sulfur content of marine fuels. In addition, the EU imposed a 0.1% maximum sulfur requirement for fuel used by ships at berth in the Baltic, the North Sea and the English Channel (the so called "SOx-Emission Control Area"). As of January 2020, EU member states must also ensure that ships in all EU waters, except the SOx-Emission Control Area, use fuels with a 0.5% maximum sulfur content.

On September 15, 2020, the European Parliament voted to include greenhouse gas emissions from the maritime sector in the European Union's carbon market, the EU Emissions Trading System ("EU ETS") as part of its "Fit-for-55" legislation to reduce net greenhouse gas emissions by at least 55% by 2030. This will require shipowners to buy permits to cover these emissions. On December 18, 2022, the Environmental Council and European Parliament agreed on a gradual introduction of obligations for shipping companies to surrender allowances equivalent to a portion of their carbon emissions: 40% for verified emissions from 2024, 70% for 2025 and 100% for 2026. Most large vessels will be included in the scope of the EU ETS from the start. Big offshore vessels of 5,000 gross tonnage and above will be included in the 'MRV' on the monitoring, reporting and verification of CO2 emissions from maritime transport regulation from 2025 and in the EU ETS from 2027. General cargo vessels and off-shore vessels between 400-5,000 gross tonnage will be included in the MRV regulation from 2025 and their inclusion in EU ETS will be reviewed in 2026. Furthermore, starting from January 1, 2026, the ETS regulations will expand to include emissions of two additional greenhouse gases: nitrous oxide and methane.

The EU also adopted the FuelEU Maritime regulation, a proposal included in the "Fit-for-55" legislation. From 2025, FuelEU Maritime sets requirements on the annual average GHG intensity of energy used by ships trading within the EU or European Economic Area (EEA). This intensity is measured as GHG emissions per energy unit (gCO₂e/MJ), and in turn, GHG emissions are calculated in a well-to-wake perspective. The calculation considers emissions related to the extraction, cultivation, production and transportation of fuel, in addition to emissions from energy used on board the ship. The baseline for the calculation is the average well-to-wake GHG intensity of the fleet in 2020: 91.16 gCO₂e/MJ. This will start at a 2% reduction in 2025, increasing to 6% in 2030, and accelerating from 2035 to reach an 80% reduction by 2050.

Compliance with the EU ETS and FuelEU Maritime regulations will result in additional compliance and administration costs to properly incorporate the provisions of the Directive into our business routines. Additional EU regulations which are part of the EU's "Fit-for-55," could also affect our financial position in terms of compliance and administration costs when they take effect.

International Labour Organization

The International Labour Organization (the "ILO") is a specialized agency of the UN that has adopted the Maritime Labor Convention 2006 ("MLC 2006"). A Maritime Labor Certificate and a Declaration of Maritime Labor Compliance is required to

ensure compliance with the MLC 2006 for all ships that are 500 gross tonnage or over and are either engaged in international voyages or flying the flag of a Member and operating from a port, or between ports, in another country. We believe that all our vessels are in substantial compliance with and are certified to meet MLC 2006.

Greenhouse Gas Regulation

Currently, the emissions of greenhouse gases from international shipping are not subject to the Kyoto Protocol to the United Nations Framework Convention on Climate Change, which entered into force in 2005 and pursuant to which adopting countries have been required to implement national programs to reduce greenhouse gas emissions. International negotiations are continuing with respect to a successor to the Kyoto Protocol, and restrictions on shipping emissions may be included in any new treaty. In December 2009, more than 27 nations, including the U.S. and China, signed the Copenhagen Accord, which includes a non-binding commitment to reduce greenhouse gas emissions. The 2015 United Nations Climate Change Conference in Paris resulted in the Paris Agreement, which entered into force on November 4, 2016 and does not directly limit greenhouse gas emissions from ships. The U.S. initially entered into the agreement, but on June 1, 2017, the Trump administration announced that the United States intends to withdraw from the Paris Agreement, and the withdrawal became effective on November 4, 2020. On January 20, 2021, the Biden administration issued an executive order to rejoin the Paris Agreement, which the U.S. officially rejoined on February 19, 2021. In January 2025, President Trump signed an executive order to begin the withdrawal of the United States from the Paris Agreement.

At MEPC 70 and MEPC 71, a draft outline of the structure of the initial strategy for developing a comprehensive IMO strategy on reduction of greenhouse gas emissions from ships was approved. In accordance with this roadmap, in April 2018, nations at the MEPC 72 adopted an initial strategy to reduce greenhouse gas emissions from ships. The initial strategy identifies "levels of ambition" to reduce greenhouse gas ("GHG") emissions and notes that technological innovation, alternative fuels and/or energy sources for international shipping will be integral to achieve the ambitions. At MEPC 77, the Member States agreed to initiate the revision of the Initial IMO Strategy on Reduction of GHG emissions from ships, recognizing the need to strengthen the "levels of ambition." In July 2023, MEPC 80 adopted the 2023 IMO Strategy on Reduction of GHG Emissions from Ships, which builds upon the initial strategy's levels of ambition. The revised levels of ambition include (1) further decreasing the carbon intensity from ships through improvement of energy efficiency; (2) reducing carbon intensity of international shipping; (3) increasing adoption of zero or near-zero emissions technologies, fuels, and energy sources; and (4) achieving net zero GHG emissions from international shipping. Furthermore, the following indicative checkpoints were adopted in order to reach net zero GHG emissions from international shipping: i). reduce the total annual greenhouse gas emissions from international shipping by at least 20%, striving for 30%, by 2030, compared to 2008 levels; and ii). reduce the total annual GHG emissions from international shipping by at least 70%, striving for 80%, by 2040, compared to 2008 levels. In March 2024, MEPC 81 further developed the goal-based marine fuel standard regulating the phased reduction of marine fuel's GHG intensity as part of its mid-term measures. In Fall 2024, MEPC 82 made further progress on the development of these mid-term measures, and the Committee is expected to approve amendments at MEPC 83 (Spring 2025) for adoption in October 2025.

The EU made a unilateral commitment to reduce overall greenhouse gas emissions from its member states from 20% of 1990 levels by 2020. The EU also committed to reduce its emissions by 20% under the Kyoto Protocol's second period from 2013 to 2020. Starting in January 2018, large ships over 5,000 gross tonnage calling at EU ports are required to collect and publish data on carbon dioxide emissions and other information. Under the European Climate Law, the EU committed to reduce its net greenhouse gas emissions by at least 55% by 2030 through its "Fit-for-55" legislation package. As part of this initiative, regulations relating to the inclusion of greenhouse gas emissions from the maritime sector in the European Union's carbon market, EU ETS were phased in from January 1, 2024.

Any passage of climate control legislation or other regulatory initiatives by the IMO, the EU, the U.S. or other countries where we operate, or any treaty adopted at the international level to succeed the Kyoto Protocol or Paris Agreement, that restricts emissions of greenhouse gases could require us to make significant financial expenditures which we cannot predict with certainty at this time. Even in the absence of climate control legislation, our business may be indirectly affected to the extent that climate change may result in sea level changes or certain weather events.

Vessel Security Regulations

Since the terrorist attacks of September 11, 2001 in the United States, there have been a variety of initiatives intended to enhance vessel security such as the MTSA. To implement certain portions of the MTSA, the USCG issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States and at certain ports and facilities, some of which are regulated by the EPA.

Similarly, Chapter XI-2 of the SOLAS Convention imposes detailed security obligations on vessels and port authorities and mandates compliance with the ISPS Code. The ISPS Code is designed to enhance the security of ports and ships against security threats including terrorism. To trade internationally, a vessel must attain an International Ship Security Certificate ("ISSC") from a recognized security organization approved by the vessel's flag state. Ships operating without a valid certificate may be detained, expelled from, or refused entry at port until they obtain an ISSC. The various requirements, some of which are found in the SOLAS Convention, include, for example, on-board installation of automatic identification systems to provide a means for the automatic transmission of safety-related information from among similarly equipped ships and shore stations, including information on a ship's identity, position, course, speed and navigational status; on-board installation of ship security alert systems, which do not sound on the vessel but only alert the authorities on shore; the development of vessel security plans; ship identification number to be permanently marked on a vessel's hull; a continuous synopsis record kept onboard showing a vessel's history including the name of the ship, the state whose flag the ship is entitled to fly, the date on which the ship was registered with that state, the ship's identification number, the port at which the ship is registered and the name of the registered owner(s) and their registered address; and compliance with flag state security certification requirements.

The USCG regulations, intended to align with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures, provided such vessels have on board a valid ISSC that attests to the vessel's compliance with the SOLAS Convention security requirements and the ISPS Code. Future security measures could have a significant financial impact on us. We intend to comply with the various security measures addressed by MTSA, the SOLAS Convention and the ISPS Code.

The cost of vessel security measures has also been affected by the escalation in the frequency of acts of piracy against ships, notably off the coast of Somalia, including the Gulf of Aden and Arabian Sea area. Substantial loss of revenue and other costs may be incurred as a result of unauthorized detention of a vessel or additional security measures, and the risk of uninsured losses could significantly affect our business. Costs are incurred in taking additional security measures in accordance with Best Management Practices to Deter Piracy, notably those contained in the BMP4 industry standard.

Inspection by Classification Societies

The hull and machinery of every commercial vessel must be classed by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel which is a party to the relevant conventions. Most insurance underwriters make it a condition for insurance coverage and lending that a vessel be certified "in class" by a classification society which is a member of the International Association of Classification Societies, the IACS. The IACS has adopted harmonized Common Structural Rules (the "Rules"), which apply to oil tankers and bulk carriers contracted for construction on or after July 1, 2015. The Rules attempt to create a level of consistency between IACS Societies. All of our vessels are certified as being "in class" by all the applicable Classification Societies (e.g., American Bureau of Shipping, Lloyd's Register of Shipping).

A vessel must undergo annual surveys, intermediate surveys, drydockings and special surveys. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Every vessel is also required to be drydocked every 30 to 36 months for inspection of the underwater parts of the vessel. Our vessels that are less than 15 years old have UWILD or IWS Class notation where underwater inspection in lieu of drydocking can be performed. If any vessel does not maintain its class and/or fails any annual survey, intermediate survey, drydocking or special survey, the vessel will not be issued with the appropriate statutory certificates, resulting in our vessel being unable to trade and will be unemployable and uninsurable which could cause us to be in violation of certain covenants in our loan agreements. Any such inability to carry cargo or be employed, or any such violation of covenants, could have a material adverse impact on our financial condition and results of operations.

Risk of Loss and Liability Insurance

General

The operation of any cargo vessel includes risks such as mechanical failure, physical damage, collision, property loss, cargo loss or damage and business interruption due to political circumstances in foreign countries, piracy incidents, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. OPA, which imposes virtually unlimited liability upon shipowners, operators and bareboat charterers of any vessel trading in the exclusive economic zone of the United States for certain oil pollution accidents in the United States, has made liability insurance more expensive for shipowners and operators trading in the United States market. We carry insurance coverage as customary in the shipping

industry. However, not all risks can be insured, specific claims may be rejected, and we might not be always able to obtain adequate insurance coverage at reasonable rates.

Hull and Machinery Insurance

We procure hull and machinery insurance, protection and indemnity insurance, which includes environmental damage and pollution insurance and war risk insurance and freight, demurrage and defense insurance for our fleet.

Protection and Indemnity Insurance

Protection and indemnity insurance is provided by mutual protection and indemnity associations ("P&I Associations"), and covers our third-party liabilities in connection with our shipping activities. This includes third-party liability and other related expenses of injury or death of crew, passengers and other third parties, loss or damage to cargo, claims arising from collisions with other vessels, damage to other third-party property, pollution arising from oil or other substances, and salvage, towing and other related costs, including wreck removal. Protection and indemnity insurance is a form of mutual indemnity insurance, extended by protection and indemnity mutual associations (such associations, "clubs").

Our current protection and indemnity insurance coverage for pollution is \$2.1 billion per vessel per incident. The 12 P&I Associations that comprise the International Group insure approximately 90% of the world's commercial tonnage and have entered into a pooling agreement to reinsure each association's liabilities. The International Group's website states that the Pool provides a mechanism for sharing all claims in excess of \$10.0 million up to, currently, approximately \$8.9 billion. As a member of a P&I Association, which is a member of the International Group, we are subject to calls payable to the associations based on our claim records as well as the claim records of all other members of the individual associations and members of the shipping pool of P&I Associations comprising the International Group.

C. ORGANIZATIONAL STRUCTURE

See Exhibit 8.1 for a list of our significant subsidiaries.

D. PROPERTY, PLANT AND EQUIPMENT

The following table summarizes key information about our fleet as of March 20, 2025:

Time charter equivalent income ⁽⁴⁾	769,906	633,913	833,230
Time charter equivalent rate ⁽⁵⁾	22,680	17,905	24,262

(1) Equity to assets ratio is calculated as total equity divided by total assets.

(2) Debt to equity ratio is calculated as total interest bearing current and long-term liabilities divided by total equity.

(3) Price earnings ratio is calculated using the year end share price divided by basic (loss) earnings per share.

(4) A reconciliation of time charter equivalent income ("TCE income"), to total operating revenues as reflected in the consolidated statements of operation is as follows:

<i>(in thousands of \$)</i>	2024	2023	2022
Total operating revenues	968,420	885,767	1,113,456
Add: Amortization of charter party-out contracts	(1,699)	(1,419)	—
Add: Other operating income / (expenses)	—	—	(413)
Less: Other revenues	3,925	4,274	1,263
Net time and voyage charter revenues	962,796	880,074	1,111,780
Less: Voyage expenses & commission	192,890	246,161	278,550
Time charter equivalent income	769,906	633,913	833,230

Consistent with general practice in the shipping industry, we use TCE income as a measure to compare revenue generated from a voyage charter to revenue generated from a time charter. We define TCE income as operating revenues less voyage expenses and commission plus amortization of time charter party out contracts. Under time charter agreements, voyage costs, such as bunker fuel, canal and port charges and commissions, are borne and paid by the charterer whereas under voyage charter agreements, voyage costs are borne and paid by the owner. TCE income is a common shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance despite changes in the mix of charter types (i.e., spot charters and time charters) under which the vessels may be employed between the periods. TCE income, a non-U.S. GAAP measure, provides additional meaningful information in conjunction with operating revenues, the most directly comparable U.S. GAAP measure, because it assists management in making decisions regarding the deployment and use of our vessels and in evaluating their financial performance, regardless of whether a vessel has been employed on a time charter or a voyage charter.

(5) TCE rate, represents the weighted average daily TCE income of our entire operating fleet.

<i>(in thousands of \$, except for TCE Rate and days)</i>	2024	2023	2022
Time charter equivalent income	769,906	633,913	833,230
Fleet available days	34,853	35,990	35,217
Fleet offhire days	(907)	(585)	(874)
Fleet onhire days	33,946	35,405	34,343
Time charter equivalent rate	22,680	17,905	24,262

TCE rate is a measure of the average daily income performance, following alignment of the revenue streams resulting from operation of the vessels under voyage or spot charters and time charters, as detailed in footnote 5 above. Our method of calculating TCE rate is determined by dividing TCE income by onhire days during a reporting period. Onhire days are calculated on a vessel by vessel basis and represent the net of available days and offhire days for each vessel (owned or chartered in) in our possession during a reporting period. Available days for a vessel during a reporting period is the number of days the vessel (owned or chartered in) is in our possession during the period. By definition, available days for an owned vessel equal the calendar days during a reporting period, unless the vessel is delivered by the yard during the relevant period whereas; available days for a chartered-in vessel equal the tenure in days of the underlying time charter agreement, pro-rated to the relevant reporting period if such tenure overlaps more than one reporting periods. Offhire days for a vessel during a reporting period is the number of days the vessel is in our possession during the period but is not operational as a result of unscheduled repairs, scheduled drydocking or special or intermediate surveys and lay-ups, if any.

Overview of fleet

The following discussion should be read in conjunction with "Item 4. Information on the Company" and the audited Consolidated Financial Statements and Notes thereto included herein.

As of December 31, 2024, we owned 83 dry bulk vessels. In addition, we had eight vessels chartered-in from SFL (of which seven are chartered in on finance leases and one is chartered in on an operating lease). Our owned vessels are owned and operated by one of our subsidiaries and are flagged either in the Marshall Islands or Hong Kong. As of December 31, 2024, 8 of our vessels were chartered-out on fixed rate time charters, 27 of our vessels were chartered out on index linked rate time charters, 56 vessels operated in the spot market.

Fleet Changes

Refer to "Item 4. Information on the Company - A. History and Development of the Company" for a discussion on acquisitions and disposals of vessels during the years ended December 31, 2024, 2023, and 2022. A summary of the changes in the vessels that we own and chartered in under long-term operating and finance leases for the years ended December 31, 2024, 2023 and 2022 is summarized below.

- a. Disposal of one vessel (*Golden Gayle*) to an unrelated third party.
- b. Delivery of four newbuildings (*Golden Erling*, *Golden Wave*, *Golden Tide* and *Golden Faith*).
- c. Disposal of three vessels (*Golden Bull*, *Golden Ruby* and *Golden Diamond*) to unrelated third parties.
- d. Delivery of six vessels (*Golden Aquamarine*, *Golden Duke*, *Golden Earl*, *Golden Walcott*, *Golden Emerald* and *Golden Sapphire*) acquired from an unrelated third party.
- e. Disposal of two vessels (*Golden Feng* and *Golden Shui*) to unrelated third parties.
- f. Delivery of six newbuildings (*Golden Star*, *Golden Soul*, *Golden Hope*, *Golden Lion*, *Golden Grace* and *Golden John*).
- g. Disposal of two vessels (*Golden Strength* and *Golden Suek*) to unrelated third parties.
- h. Disposal of one vessel (*Golden Hawk*) to an unrelated third party.

- i. (i) Disposal of three vessels (*Golden Empress*, *Golden Endeavour* and *Golden Enterprise*) to an unrelated third party and (ii) disposal of one vessel (*Golden Ice*) to an unrelated third party.
- j. Redelivery of two vessels (*Admiral Schmidt* and *Vitus Bering*) to their owner in May 2022 and as such are not included in our fleet.
- k. Disposal of two vessels (*Golden Cathrine* and *Golden Cecilie*) to an unrelated third party.

Summary of Fleet Employment

As discussed below, as of December 31, 2024, our vessels operated under time charters or voyage charters.

A time charter agreement is a contract entered into by an owner and a charterer whereby the charterer is entitled to the use of a vessel for a specific period of time for a specified daily fixed or index-linked rate of hire. Under a time charter agreement, voyage costs, such as bunker fuel and port charges, are borne and paid by the charterer. In the time charter market, rates vary depending on the length of the charter period and vessel specific factors such as age, speed and fuel consumption. An index-linked rate usually refers to freight rate indices issued by the Baltic Exchange, such as the Baltic Capesize Index and the Baltic Panamax Index. These rates are based on actual charter hire rates under charter entered into by market participants, as well as daily assessments provided to the Baltic Exchange by a panel of major shipbrokers.

A voyage or spot charter agreement is a contract entered into by an owner and a charterer whereby a charterer is entitled to the use of a vessel to transport commodities between specified geographical locations at a specified freight rate per ton. Under voyage charter agreements, voyage costs are borne and paid by the owner. In the voyage charter market, rates are also influenced by cargo size, commodity, port dues and canal transit fees, as well as delivery and redelivery regions. In general, a larger cargo size is quoted at a lower rate per ton than a smaller cargo size. Routes with costly ports or canals generally command higher rates than routes with low port dues and no canals to transit. Voyages with a load port within a region that includes ports where vessels usually discharge cargo or a discharge port within a region with ports where vessels load cargo are generally quoted at lower rates, because such voyages generally increase vessel utilization by reducing the unloaded portion (or ballast leg) that is included in the calculation of the return charter to a loading area.

As of December 31,

	2024		2023		2022	
	Number of vessels	Percentage of fleet	Number of vessels	Percentage of fleet	Number of vessels	Percentage of fleet

Below is an overview, as of December 31, 2024, of our vessels on time charter contracts that had a minimum initial contract duration of more than 11 months:

Vessel Type	Vessel Name	Dwt	Expiry (min period)
Newcastlemax	Golden Aquamarine	207,999	December 2025
Newcastlemax	Golden Walcott	207,999	December 2025
Newcastlemax	Golden Earl	207,999	October 2025
Newcastlemax	Golden Duke	207,999	September 2025
Newcastlemax	Golden Emerald	207,999	September 2025
Newcastlemax	Golden Sapphire	207,999	October 2025
Kamsarmax	Golden Sue	84,943	May 2025
Kamsarmax	Golden Deb	84,970	October 2025

Refer to "Item 4. Information on the Company - D. Property Plant and Equipment" for a summary of key information of our fleet as of the date of this annual report. In addition, from time to time we may also enter into Forward Freight Agreements ("FFAs"), to hedge our exposure to the charter market for a specified route and period of time. Refer to Note 27, "Financial Assets and Liabilities", to our Consolidated Financial Statements included herein for additional information on our financial instruments.

Our Fleet – Comparison of Possible Excess of Carrying Value Over Estimated Charter-Free Market Value of Certain Vessels

In "Critical Accounting Policies – Impairment", we discuss our policy for impairing the carrying values of our vessels and newbuildings. During the past few years, the market values of vessels have experienced particular volatility, with valuations reaching peak in the first half of 2022 following subsequent declines in the second half of 2022 for many vessel classes. In 2023, in light of strengthened market conditions, most vessel classes experienced increased vessel values throughout the year. Further, in 2024, vessel values reached their highest point mid-year but subsequently declined in the second half of the year due to weaker market conditions. The charter-free market value, or basic market value, of certain of our vessels may be below those vessels' carrying value, even though we would not impair those vessels' carrying value under the accounting impairment policy, as the future undiscounted cash flows expected to be earned by such vessels over their operating lives would exceed such vessels' carrying amounts.

Our estimates of basic market value assume that our vessels are all in good and seaworthy condition without need for repair and if inspected would be certified in class without notations of any kind. Our estimates are based on the values achieved for the sale/purchase of similar vessels and appraised valuations and are inherently uncertain. In addition, vessel values are highly volatile; as such, our estimates may not be indicative of the current or future basic market value of the vessels or prices that we could achieve if we were to sell them.

The table set forth below indicates the carrying value of our owned vessels by type and year of construction as of December 31, 2024 and 2023:

Vessel Type	Built	Aggregate dwt 2024	2024 (\$ millions)	2023 (\$ millions)
Newcastlemax	2011	—	—	25.6
Newcastlemax	2016	422,257	99.0	103.8 *
Newcastlemax	2017	207,999	40.3	41.5
Newcastlemax	2019	833,587	181.0	186.9
Newcastlemax	2020	1,673,677	376.3	389.8
Newcastlemax	2021	626,665	145.0	149.8
Total Newcastlemax		3,764,185	841.6	897.4
Capesize	2011	177,979	20.3	21.3
Capesize	2014	1,989,148	451.8 *	474.7 *
Capesize	2015	1,450,894	344.6	362.2 *
Capesize	2016	904,198	180.1	188.3
Capesize	2017	542,593	132.9 *	139.0 *
Capesize	2018	902,497	203.0	211.5
Total Capesize		5,967,309	1,332.7	1,397.0
Kamsarmax	2011	246,203	40.1	42.4
Kamsarmax	2012	326,165	59.1	62.0
Kamsarmax	2013	169,913	36.2	38.0
Kamsarmax	2015	84,978	18.6	19.5
Kamsarmax	2020	242,903	73.8	76.7
Kamsarmax	2021	404,082	132.9	138.0
Kamsarmax	2023	508,942	207.9	215.5 *
Kamsarmax	2024	339,487	151.3 *	—
Total Kamsarmax		2,322,673	719.9	592.1
Panamax	2013	148,800	30.1	47.8
Panamax	2014	—	—	16.8
Panamax	2017	148,986	34.4	35.8
Total Panamax		297,786	64.5	100.4
Total fleet		12,351,953	2,958.7	2,986.9

*Indicates vessel groups categorized by type and year of construction for which we believe, as of December 31, 2024 and/or 2023, the basic charter-free market value is lower than the vessel's carrying value. We believe that the aggregate carrying value of these vessels exceeds their December 31, 2024 and 2023 aggregate basic charter-free market value by approximately \$76.5 million and \$186.7 million, respectively. We believe that the estimated future undiscounted cash flows expected to be earned by each of these vessels over its remaining estimated useful life, exceed each of these vessel's carrying value as of December 31, 2024 and 2023, respectively, and accordingly, we have not recorded an impairment charge. The aggregate carrying value of our total fleet is below the aggregate basic charter-free market value by approximately \$498.4 million as of December 31, 2024. The aggregate carrying value of our total fleet was below the aggregate basic charter-free market value by approximately \$151.1 million as of December 31, 2023.

We refer you to "Item 3. Key Information – D. Risk Factors – *"The market values of our vessels may decline, which could limit the amount of funds that we can borrow, cause us to breach certain financial covenants in our credit facilities, or result in an impairment charge, and cause us to incur a loss if we sell vessels following a decline in their market value"*.

Factors Affecting Our Results

The principal factors which affect our results of operations and financial position include:

- the earnings from our vessels;
- gains (losses) from the sale of assets;
- other operating income (expenses), net;
- ship operating expenses;
- impairment losses on vessels and newbuildings;
- administrative expenses;
- depreciation;
- interest expense;
- share of results of associated companies; and
- changes in fair value of our financial instruments.

We derive our earnings from time charters and voyage charters. As of December 31, 2024, 83 of our 91 vessels, which are owned or leased in by us, were employed in the voyage charter market or on short-term time charters of less than eleven months. The dry bulk industry has historically been highly cyclical, experiencing volatility in profitability, vessel values and freight rates.

Gains and losses on the sale of vessels are recognized when the vessel has been delivered and all risks have been transferred and are determined by comparing the net proceeds received with the carrying value of the vessel.

Ship operating costs are the direct costs associated with running a vessel and include crew costs, vessel supplies, repairs and maintenance, drydockings, lubricating oils, insurance and management fees.

An impairment loss on vessels and newbuildings is recognized when the carrying value exceeds the estimated future net undiscounted cash flows expected to be earned over the remaining estimated useful life of the vessel, or exceeds the estimated net sales proceeds when a vessel is classified as held for sale.

Administrative expenses consist of general corporate overhead expenses, including personnel costs, property costs, audit fees, legal and professional fees, stock option expenses and other general administrative expenses. Personnel costs include, among other things, salaries, pension costs, fringe benefits, travel costs and health insurance.

Depreciation, or the periodic costs charged to our income for the reduction in usefulness and long-term value of our vessels, is also related to the number of vessels we own or lease. We depreciate the cost of vessels we own, less their estimated residual value, over their estimated useful life on a straight-line basis. We depreciate the cost of vessels held under finance lease over the term of the lease. No charge is made for depreciation of vessels under construction until they are delivered.

Interest expense relates to vessel specific debt facilities and finance leases. Interest expense depends on our overall borrowing levels and may significantly increase when we acquire vessels or on the delivery of newbuildings. Interest expense may also change with prevailing interest rates, although the effect of these changes may be reduced by interest rate swaps or other derivative instruments.

Our marketable equity securities are investments in equity securities with readily determinable fair values. These investments are measured at fair value and any resulting unrealized gains and losses are recorded in the Consolidated Statements of Operations.

None of our derivatives qualify for hedge accounting and changes in fair values are recognized in the Consolidated Statements of Operations.

Share of results from associated companies is accounted for under equity method of accounting.

Inflation

Inflation has only had a moderate effect on our expenses given current economic conditions. Significant global inflationary pressures (such as triggered by various economic stimuli and war between Russia and Ukraine) increase operating, voyage, general and administrative, and financing costs. However, in the event of a shipping downturn, costs subject to inflation can

usually be controlled as shipping companies typically monitor costs to preserve liquidity and encourage suppliers and service providers to lower rates and prices.

Inflationary effects were immaterial for the period ended December 31, 2024. In particular, we have observed inflation affecting ship operating expenses, such as crew expenses, insurance costs and spares freight, however, these effects were not material in comparison to our total ship operating expenses. Please refer to "Item 5. Operating and Financial Review and Prospects – A. Operating Results – Factors Affecting Our Results" for more details.

The extent of inflation impact on our future financial and operational results, which could be material, will depend, among other things, on the overall macroeconomic environment and duration and severity of the Russian-Ukrainian War. Going forward, we expect an increase in crew expenses of approximately 2.5% due to, among other things, increased wage pressures and Russian seafarers no longer being present in the global pool, which decreases overall number of seafarers in the world. Therefore, there will be an increased demand for qualified crew, and this has and will continue to put inflationary pressure on crew costs. Additionally, we expect an annual increase of up to 4.5% for spares and services due to factors such as global supply chain pressures, regulatory compliance, tight labor markets and growing wages.

Year ended December 31, 2024 compared with year ended December 31, 2023

Operating revenues

We currently operate most of our vessels in the spot market, or on floating rate index-linked time charters, exposing us to fluctuations in spot market charter rates. As a result, our shipping revenues and financial performance are significantly affected by conditions in the dry bulk spot market, and any decrease in spot charter rates may adversely affect our earnings. In addition, the mix of charters between spot or voyage charters and time charters also affects our revenues and voyage expenses. In 2024, market conditions strengthened compared to those in 2023, which is illustrated by an increase in the Baltic Dry Index, or BDI, from an average of 1,378 points in 2023 to an average of 1,755 in 2024. This is also evidenced through an increase in our achieved TCE rate for the full fleet from \$17,905 per day in 2023 to \$22,680 per day in 2024. Our achieved TCE rates are a combination of many factors, including, but not limited to, timing of entering into contracts, earnings on our scrubber fitted vessels due to the level of price spread between high sulfur and low sulfur fuel, as well as the mix of charters between spot or voyage charters and time charters.

<i>(in thousands of \$)</i>	2024	2023	Change
Time charter revenues	622,569	434,827	187,742
Voyage charter revenues	341,926	446,666	(104,740)
Other revenues	3,925	4,274	(349)
Total operating revenues	968,420	885,767	82,653

Time charter revenues increased by \$187.7 million in 2024 compared with 2023, primarily due to:

- an increase of \$117.6 million reflecting higher rates under index-linked and short-term time charters for vessels that were in our fleet through the duration of both these periods;
- an increase of \$33.7 million attributable to an increase in the number of time charter days for own vessels attributable to contract type mix between time charter and voyage charter for vessels that were in our fleet through the duration of both of these periods;
- an increase of \$23.6 million attributable to all ten newbuildings being delivered as of December 31, 2024, where ten of the newbuildings contributed with time charter revenues as of December 31, 2024, compared to six newbuildings contributing as of December 31, 2023;
- an increase of \$17.9 million attributable to six Newcastlemax vessels acquired from H-Line, where all six vessels were in our fleet for the entire duration of 2024, whereas for 2023, the vessels were in our fleet for part of the entire duration of the period;
- an increase of \$3.2 million attributable to chartered-in vessels that traded on time charters during the period;
- an increase of \$0.9 million reflecting the increase in bunker prices for bunkers on board delivered to charterers; and
- an increase of \$0.3 million attributable to increase in amortization of unfavorable charter party contracts during the period.

The increase in time charter revenues described above was partially offset by:

- a decrease of \$9.5 million due to the sale of four vessels that were delivered to new owners during 2024 and the sale of five vessels that were delivered to new owners during 2023, and in 2023, the vessels were in our fleet for part of the entire duration of the period.

Voyage charter revenues decreased by \$104.7 million in 2024 compared with 2023, primarily due to:

- a decrease of \$106.5 million relating to decreased voyage charter activity of chartered-in vessels;
- a decrease of \$68.5 million attributable to a decrease in the number of voyage charter days for own vessels attributable to contract type mix between time charter and voyage charter for vessels that were in our fleet through the duration of both of these periods; and
- a decrease of \$11.8 million due to sale of vessels.

The decrease in voyage charter revenues described above was partially offset by:

- an increase of \$66.0 million attributable to increase in dry bulk freight rates; and
- an increase of \$16.1 million attributable to all ten newbuildings delivered as of December 31, 2024, where ten of the newbuildings contributed with voyage charter revenues as of December 31, 2024, compared to six as of December 31, 2023.

Other revenues decreased by \$0.3 million in 2024 compared with 2023 primarily attributable to a decrease in insurance income and commercial management services.

The average TCE rate increased from \$17,905 for the year ended December 31, 2023 to \$22,680 for the year ended December 31, 2024.

Gain on sale of assets

<i>(in thousands of \$)</i>	2024	2023	Change
Gain on sale of assets	21,427	9,188	12,239

Gain on sale of assets increased by \$12.2 million in 2024 compared with 2023. In 2024, we recorded a gain of \$21.4 million related to the sales of *Golden Bull*, *Golden Ruby*, *Golden Diamond* and *Golden Gayle*. In 2023, we recorded a gain of \$9.2 million related to the sales of *Golden Strength*, *Golden Suek* and *Golden Hawk*.

Voyage expenses and commission

<i>(in thousands of \$)</i>	2024	2023	Change
Voyage expenses and commission	192,890	246,161	(53,271)

Voyage expenses and commission decreased by \$53.3 million in 2024 compared with 2023 primarily due to:

- a decrease of \$51.3 million relating to less vessels being chartered in;
- a decrease of \$43.2 million attributable to contract type mix between time charter and voyage charter for vessels that were in our fleet through the duration of both of these periods; and
- a decrease of \$7.3 million relating to vessels sold in 2024 and 2023.

The decrease in voyage expenses and commission was partially offset by:

- an increase of \$37.0 million attributable an increase in fuel prices and commissions; and
- an increase of \$11.5 million relating to all ten newbuildings delivered as of December 31, 2024, whereas six newbuildings were delivered as of December 31, 2023.

Ship operating expenses

<i>(in thousands of \$)</i>	2024	2023	Change
Ship operating expenses	293,971	251,950	42,021

Ship operating expenses increased by \$42.0 million in 2024 compared with 2023 primarily due to:

- an increase of \$31.0 million in drydocking expenses, where \$25.3 million of the increase relates to increased number of drydocking days compared to 2023 by 349 days and \$5.7 million relates to increased drydocking scope to improve vessel efficiencies and covering increased hull and cargo blasting area and additional paint;
- an increase of \$15.6 million related to running ship operating expenses, primarily as a result of inflation (\$8.0 million), higher crew costs related to different trade patterns (\$2.3 million), higher spares, repairs & maintenance and insurance (\$10.8 million), where the increase in spares, repairs & maintenance and insurance relates to unscheduled repairs and ballast water treatment systems maintenance, offset by a decrease of \$5.5 million in costs associated with change of technical managers for 33 of our vessels in 2023;
- an increase of \$9.4 million attributable to all ten newbuildings being delivered as of December 31, 2024, whereas six newbuildings were delivered as of December 31, 2023;
- an increase of \$4.1 million attributable to six Newcastlemax vessels acquired from H-Line, where all six vessels were in our fleet for the entire duration of 2024, whereas for 2023, the vessels were in our fleet for part of the entire duration of the period; and
- an increase of \$4.0 million relating to our decarbonization efforts.

This was partially offset by:

- a decrease of \$14.1 million attributable to the non-lease component, or service element, reclassified from charter hire expenses to ship operating expenses for vessels chartered in on time charters during the period; and
- a decrease of \$8.0 million relating to vessels sold.

As a result, daily operating costs per vessel (excluding drydocking costs) increased by \$453 per day, from \$6,442 per day during the year ended December 31, 2023 to \$6,895 per day during the year ended December 31, 2024. Of the increase of \$453 per day, \$571 per day relates to an increase in crew costs, spares, repairs & maintenance and increased inflation and \$116 per day relates to an increase in expensed upgrades, offset by a decrease of \$234 mainly related to change of technical managers in 2023.

Charter hire expenses

<i>(in thousands of \$)</i>	2024	2023	Change
Charter hire expenses	22,715	42,225	(19,510)

Charter hire expenses decreased by \$19.5 million in 2024 compared with 2023 primarily due to:

- a decrease of \$38.4 million related to a decrease in trading activity for short-term charter-in activity from third parties; offset by
- an increase of \$18.9 million related to an increase in chartered in rates.

Administrative expenses

<i>(in thousands of \$)</i>	2024	2023	Change
Administrative expenses	24,303	18,679	5,624

Administrative expenses increased by \$5.6 million in 2024 compared with 2023 primarily due to higher personnel costs as a result of having more technical personnel following setting up an in-house technical department and increased legal fees in connection with the re-domiciliation of certain subsidiaries from Liberia and the Marshall Islands to Bermuda.

Impairment loss on vessels

<i>(in thousands of \$)</i>	2024	2023	Change
Impairment loss on vessels	—	11,780	(11,780)

No impairments were recorded in 2024. In March 2023, the Company entered into an agreement to sell two Capesize vessels, *Golden Feng* and *Golden Shui*, to an unrelated third party for a total gross amount of \$44.0 million, and the Company recorded an impairment loss of \$11.8 million in connection to the sale.

Depreciation

<i>(in thousands of \$)</i>	2024	2023	Change
Depreciation	141,627	135,548	6,079

Depreciation expenses increased by \$6.1 million in 2024 compared with 2023, primarily due to:

- an increase of \$6.0 million attributable to all ten newbuildings being delivered as of December 31, 2024, whereas six newbuildings were delivered as of December 31, 2023;
- an increase of \$3.4 million attributable to six Newcastlemax vessels acquired from H-Line, where all six vessels were in our fleet for the entire duration of 2024, whereas for 2023, the vessels were in our fleet for part of the entire duration of the period; and
- an increase of \$0.2 million attributable to vessels that were in our fleet during both periods.

The increase was partially offset by:

- a decrease of \$3.5 million due to sale of vessels in 2024 and 2023.

Interest income

<i>(in thousands of \$)</i>	2024	2023	Change
Interest income	6,872	4,717	2,155

Interest income increased by \$2.2 million in 2024 compared with 2023 primarily due to higher interest rates earned on our deposits.

Interest expense

<i>(in thousands of \$)</i>	2024	2023	Change
Interest on floating rate debt	96,643	94,702	1,941
Finance lease interest expense	7,082	8,314	(1,232)
Commitment fees	1,079	1,076	3
Interest capitalized on newbuildings	(2,183)	(5,194)	3,011
Amortization of debt issuance cost	5,594	4,766	828
Interest expense	108,215	103,664	4,551

Interest expense increased by \$4.6 million in 2024 compared with 2023, primarily due to:

- an increase of \$3.0 million due to decreased capitalized interest on newbuildings as four newbuildings were due for delivery in 2024 compared to six in 2023;
- an increase of \$1.9 million attributable to higher interest on our floating debt primarily due to an increase in the SOFR rates, with the average 3-month SOFR rate being 5.01% in 2023 and 5.15% in 2024; and
- an increase of \$0.8 million of amortization of debt issuance cost charges.

These factors were partially offset by:

- a decrease of \$1.2 million in finance lease interest expenses.

Equity results of associated companies

<i>(in thousands of \$)</i>	2024	2023	Change
Equity results of associated companies	(4,070)	12,316	(16,386)

Equity results of associated companies decreased by \$16.4 million in 2024 compared to 2023. This was primarily due to recognizing an equity loss from our investment in SwissMarine Pte. Ltd. ("SwissMarine") which amounted to \$3.9 million in 2024 compared to equity earnings of \$5.0 million in 2023. We also recognized a total equity loss of \$0.2 million from our investment in TFG Marine Pte Ltd ("TFG Marine") and United Freight Carriers LLC ("UFC") in 2024 compared to equity earnings of \$7.3 million in 2023. The equity loss for SwissMarine, TFG Marine and UFC was due to a combination of factors,

among others, a decrease in trading activity for one of associated companies. While trading activity can be volatile, we believe that the recent decrease in activity is unlikely to persist in the foreseeable future.

Gain (loss) on derivatives

<i>(in thousands of \$)</i>	2024	2023	Change
Gain (loss) on derivatives	15,212	11,371	3,841

The gain on derivatives increased by \$3.8 million in 2024 compared with 2023 primarily due to a positive development in the change of fair value of our USD denominated interest rate swaps of \$4.0 million and forward freight derivatives of \$1.4 million. This was partly offset by a negative development for bunkers derivatives of \$1.3 million and foreign currency swaps of \$0.3 million.

Gain (loss) on marketable equity securities

<i>(in thousands of \$)</i>	2024	2023	Change
Gain (loss) on marketable equity securities	—	287	(287)

The gain on marketable equity securities in 2023 was related to our investment in Eneti Inc., which was sold in 2023.

Other financial items

<i>(in thousands of \$)</i>	2024	2023	Change
Other financial items	(378)	(830)	452

Other financial items increased by \$0.5 million in 2024 compared with 2023 due to an increase of \$0.4 million in other financial charges and an increase of \$0.1 million in bank charges.

For the discussion of our operating results in 2023 compared with 2022, we refer to "Item 5. Operating and Financial Review and Prospects" included in our annual report on Form 20-F for the year ended December 31, 2023, which was filed with the U.S. Securities and Exchange Commission on March 20, 2024.

Recently Issued Accounting Standards

Refer to Note 3, "Recent Accounting Pronouncements", of "Item 18. Financial Statements".

B. LIQUIDITY AND CAPITAL RESOURCES

We operate in a capital-intensive industry and have historically financed our purchase of vessels through a combination of equity capital and borrowings from commercial banks, as well as issuance of convertible bonds. Our ability to generate adequate cash flows on a short and medium term basis depends substantially on the trading performance of our vessels in the market. Periodic adjustments to the supply of and demand for dry bulk vessels cause the industry to be cyclical in nature.

We expect continued volatility in market rates for our vessels in the foreseeable future with a consequent effect on our short and medium term liquidity.

Our funding and treasury activities are conducted within corporate policies to increase investment returns while maintaining appropriate liquidity for our requirements. Cash and cash equivalents are held primarily in U.S. dollars with some balances held in Norwegian Kroner, Euro and Singapore dollars.

Our short-term liquidity requirements relate to payment of operating costs (including drydocking), activities relating to decarbonization, funding working capital requirements, repayment of bank loans, lease payments for our chartered in fleet and maintaining cash reserves against fluctuations in operating cash flows and payment of cash distributions. Sources of short-term liquidity include cash balances, restricted cash balances, short-term investments and receipts from customers, \$50 million undrawn revolving credit tranche under the \$360 million facility, \$50 million undrawn revolving credit tranche under the \$275 million facility and \$50 million undrawn revolving credit tranche under the \$150 million facility. Restricted cash consists of cash, which may only be used for certain purposes under the Company's contractual arrangements and primarily comprises collateral deposits for derivative trading. Please refer to Note 11, "Cash, Cash equivalents and Restricted cash", for a description of our covenant requirements.

As of December 31, 2024 and 2023, we had cash and cash equivalents of \$129.1 million and \$116.4 million, respectively. In addition, as of December 31, 2024 and 2023, we had total restricted cash balances of \$2.6 million and \$2.3 million, respectively, primarily comprising of collateral deposits for derivative trading. As of December 31, 2024, cash and cash equivalents included cash balances of \$68.5 million (December 31, 2023: \$72.9 million), which are required to be maintained by the financial covenants in our loan facilities.

Other significant transactions subsequent to December 31, 2024, impacting our cash flows include the following:

- The Company had the option to purchase the eight vessels from SFL en-bloc for an aggregate price of \$112 million on the 10-year anniversary of the commencement of the leases of such vessels. In January 2025, the Company sent a notice to SFL declaring the purchase option for the eight vessels. The purchase will be finalized during third quarter of 2025 and will be partly financed by a \$90 million credit facility, which is approved by the lender but subject to the negotiation and execution of customary documentation including updating change of control clauses as a result of Share Purchase described above. The two-year facility is non-amortizing and revolving, with an interest rate margin of 1.45% over SOFR.
- On March 4, 2025, CMB.TECH, through its subsidiary CMB.TECH Bermuda Ltd., entered into a share purchase agreement with Hemen, to purchase all of Hemen's 81,363,730 of our common shares at a purchase price of \$14.49 per common share. Following the closing of the Share Purchase on March 12, 2025, Hemen ceased to hold any of our common shares of the Company and CMB.TECH holds 40.8% of the Company's outstanding shares.
- On February 26, 2025, the Company announced a cash dividend of \$0.15 per share in respect of the fourth quarter of 2024, which is payable on or about March 21, 2025, to shareholders of record on March 11, 2025. Shareholders holding the Company's shares through Euronext VPS may receive this cash dividend on or about March 24, 2025.

With reference to risk factor *"We are in breach of certain compliance clauses contained in our loan agreements, and if we are not successful in obtaining amendments to our loan agreements or do not refinance the outstanding indebtedness under such agreements, the breach of the compliance clauses may cause our lenders to declare a default and accelerate the outstanding indebtedness under the relevant agreements, which may result in cross defaults under our other loan agreements and would impair our ability to continue to conduct our business"*, the Share Purchase has resulted in a breach of change of control compliance clause described above and, while we are not currently in default, our lenders may declare a default for the debt totaling \$1,314.2 million. We are currently in discussions with our existing lenders to address the change in the Company's largest shareholder as a result of the Share Purchase, and the discussions have not resulted in any rejections as of March 20, 2025.

CMB.TECH has identified syndicate banks to refinance all or part of our current outstanding debt and has entered into credit committee approved commitment letters with these banks as of March 4, 2025 for outstanding borrowings of up to \$2.0 billion, that are subject only to the execution of satisfactory documentation and customary covenants and closing conditions. If we are unable to reach agreements with our existing lenders, we plan on refinancing our existing debt with the committed financing described above, which may have, among others, the expected terms, as follows: Golden Ocean is the borrower, the guarantors are CMB.TECH, and the subsidiaries of Golden Ocean that own the vessels are serving as collateral under the loan. The financing is expected to have a 5-year tenor and a linear age adjusted amortization profile of 20 years. The facility is expected to be priced with an interest rate of SOFR plus a market-based margin.

We believe that our working capital, cash on hand and borrowings under our current facilities and credit approved commitments will be sufficient to fund our requirements for, at least, the 12 months from the date of this annual report.

Medium to Long-term Liquidity and Cash Requirements

Our medium and long-term liquidity requirements include funding drydockings, investments relating to environmental requirements and the debt and equity portion of potential investments in new or replacement vessels and repayment of bank and related party loans. Potential additional sources of funding for our medium and long-term liquidity requirements include new loans, refinancing of existing arrangements, equity issues, public and private debt offerings, sales of vessels or other assets and sale and leaseback arrangements.

Summary of contractual obligations

As of December 31, 2024, we had the following contractual obligations:

<i>(in thousands of \$)</i>	Payment due by period				
	Total	Less than one year	1-3 years	3-5 years	More than 5 years
Floating rate debt ¹	1,314,193	113,848	331,071	724,987	144,287
Operating lease obligations ^{2,7}	9,332	2,414	5,014	1,904	—
Finance lease obligations ^{3,7}	67,987	18,829	37,143	12,015	—
Drydocking commitments ⁴	7,800	7,800	—	—	—
Newbuilding commitments ⁵	—	—	—	—	—
Interest on floating rate debt ⁶	324,467	88,259	139,004	75,997	21,207
Interest on operating lease obligations ²	1,207	547	604	56	—
Interest on finance lease obligations ³	8,117	3,721	4,091	305	—
Total contractual cash obligations	1,733,103	235,418	516,927	815,264	165,494

1. See "Item 5. B Liquidity and capital resources" section above for description of CMB.TECH transaction. Table above reflects the maturities as of December 31, 2024 but does not reflect any updates as a result of the breach of certain compliance clauses as a result of the CMB.TECH transaction as described above.
2. As of December 31, 2024, we had one vessel under operating lease from SFL. See also Note 10, "Operating Leases", and Note 26, "Related Party Transactions", to our audited Consolidated Financial Statements included herein.
3. As of December 31, 2024, we held seven vessels under finance leases from SFL. See also Note 17, "Finance Leases", and Note 26, "Related Party Transactions", to our audited Consolidated Financial Statements included herein.
4. As of December 31, 2024, we had firm commitments totaling \$7.8 million related to estimated yard bills for the drydocking of our vessels.
5. As of December 31, 2024, we had no commitments related to newbuildings.
6. Interest on floating rate debt was calculated using the three-month USD SOFR plus the agreed margin applicable for each of our credit facilities and the respective outstanding principal as of December 31, 2024.
7. The lease obligations excludes the purchase options exercisable at the end of the ten-year minimum term to buy back the eight vessels (one vessel under operating lease and seven vessels under finance lease) en-bloc for an aggregate \$112.0 million and excludes the additional three years of hire that are at SFL's option. It is also net of the \$7,000 per day that SFL pays to us for operating costs. The table does not reflect the contingent profit sharing arrangement with SFL. With reference to Note 29, "Subsequent Events", in January 2025, we sent a notice to SFL declaring the purchase option for the eight vessels. The purchase will be finalized during the third quarter of 2025 and will be partly financed by a \$90 million credit facility, which is approved by the lender but subject to the negotiation and execution of customary documentation.

Cash Flows

The following table summarizes our cash flows from operating, investing and financing activities for the periods indicated.

<i>(in thousands of \$)</i>	2024	2023	2022
Net cash provided by operating activities	365,298	266,337	503,387
Net cash provided by (used in) investing activities	(8,201)	(381,771)	72,816
Net cash provided by (used in) financing activities	(344,004)	95,997	(648,147)
Net change in cash, cash equivalents and restricted cash	13,093	(19,437)	(71,944)
Cash, cash equivalents and restricted cash at beginning of period	118,636	138,073	210,017
Cash, cash equivalents and restricted cash at end of period	131,729	118,636	138,073

Net cash provided by operating activities

We have significant exposure to the spot market as on average only 11 of our 91 owned and leased vessels traded on long-term fixed rate time charter contracts during 2024. As of the date of this annual report, we have eight vessels currently on a fixed rate time charters with longer duration of more than 11 months. From time to time we may also enter into FFAs, to hedge our exposure to the charter market for a specified route and period of time. See "Item 5. Operating and Financial Review and Prospects" for further information of our FFA positions as of December 31, 2024. As a substantial part of our fleet trade on

either voyage charters or index linked time charter contracts, we are significantly exposed to the spot market. Therefore, our reliance on the spot market contributes to fluctuations in cash flows from operating activities as a result of its exposure to highly cyclical dry bulk charter rates. TCE represents operating revenues less other income and voyage expenses. TCE is therefore impacted by both movements in operating revenues, as determined by market freight rates, and voyage expenses, which are primarily comprised of bunker expenses, port charges and canal tolls. Any increase or decrease in the average TCE rates earned by our vessels will have a positive or negative comparative impact, respectively, on the amount of cash provided by operating activities, and as a result any increase or decrease in the average rates earned by our vessels in periods subsequent to December 31, 2024, compared with the actual rates achieved during 2024, will as a consequence have a positive or negative comparative impact on the amount of cash provided by operating activities.

Net cash provided by operating activities in the year ended December 31, 2024 was \$365.3 million compared with \$266.3 million and \$503.4 million in the year ended December 31, 2023 and December 31, 2022, respectively. Net cash provided by operating activities was primarily impacted by: (i) overall market conditions as reflected by TCE income of our fleet, (ii) the size and composition of our fleet that we own, lease and charter-in, (iii) changes in operating assets and liabilities including impact of whether our vessels are operated under time charters or voyage charters as revenues from time charters are generally received monthly or bi-weekly in advance while revenues from voyage charters are received on negotiated terms for each voyage, normally 90/95% after completed loading and the remaining after completed discharge, (iv) changes in net cash interest expense as a result of outstanding debt and changes in LIBOR/SOFR, (v) the number of vessels drydocking in a period and (vi) change in other operating items include, among other things, dividends from associated companies.

The increase in net cash provided by operating activities of \$99.0 million in the year ended December 31, 2024 compared with the year ended December 31, 2023 was primarily driven by (i) impact by overall market conditions as reflected by increased TCE income of \$159.1 million attributable to vessels that were in our fleet through the duration of both periods, (ii) \$10.5 million positive result related to our fleet; sale of vessels and change in short-term trading activity, (iii) net positive effect of \$7.2 million from change in operating assets and liabilities, (iv) negative effect of \$1.8 million as a result of increased net interest costs, (v) negative effect of \$31.0 million related to higher drydock costs in 2024 and (vi) a negative change of \$44.4 million in other operating items.

Based on the current level of operating expenses, debt repayments, interest expenses and general and administrative costs, the average cash break-even rates on a TCE basis are (i) approximately \$14,600 per day for our Newcastlemax/Capesize vessels and (ii) approximately \$12,300 per day for our Kamsarmax/Panamax vessels. These are the daily rates our vessels must earn to cover current level operating expenses including dry dock expenses, estimated interest expenses, scheduled loan principal repayments, time charter hire and net general and administrative expenses. These rates do not take into account capital expenditures and contingent rental expense. As of March 20, 2025, average market spot rates year to date were as follows: Non-scrubber fitted Capesize vessels approximately \$11,800 per day and non-scrubber fitted Panamax vessels approximately \$7,800 per day.

Net cash used in investing activities

Net cash used in investing activities was \$8.2 million in 2024 and comprised primarily of:

- payment of \$98.7 million in installments and supervision fees relating to our Kamsarmax newbuilding contracts; and
- other investing cash outflows of approximately \$2.8 million mainly related to payments for the installation of Mewis Duct on the existing fleet.

This was partially offset by the following:

- proceeds from the sale of *Golden Gayle* and *Golden Diamond* of \$56.8 million;
- proceeds from the sale of *Golden Ruby* of \$20.8 million; and
- proceeds from the sale of *Golden Hawk* of \$15.7 million.

Net cash provided by financing activities

Net cash used in financing activities in 2024 was \$344.0 million and were comprised of:

- \$529.8 million repayment of outstanding debt in connection with refinancing of the \$120.0 million facility, the \$304.0 million facility, the \$175.0 million facility and the \$233.0 million facility;
- ordinary repayment of long-term debt of \$101.8 million;
- \$75.0 million repayment of our revolving credit facility;

- \$28.3 million debt repayment on the \$250.0 million debt facility as a result of the sale of *Golden Bull*, *Golden Ruby* and *Golden Gayle* previously securing the facility;
- \$6.6 million debt repayment on the \$360.0 million debt facility as a result of the sale of *Golden Diamond* previously securing the facility;
- repayments of \$24.6 million in finance lease obligations;
- \$7.8 million in debt fees paid in connection with the new \$150.0 million, \$180.0 million, \$360.0 million and \$85.0 million credit facilities;
- distributions of \$239.9 million in cash dividends to our shareholders; and
- \$5.7 million in share repurchase payments.

This was partially offset by:

- a full draw down on the \$85.0 million credit facility for the last four Kamsarmax newbuildings delivered during 2024;
- a partial draw down of \$50.0 million on the \$150.0 million revolving credit facility entered into in October 2024 to refinance an older facility;
- a full draw down on the \$180.0 million facility entered into in April 2024 to refinance an older facility;
- a partial draw down of \$310.0 million on the \$360.0 million revolving credit facility entered into in February 2024 to refinance two older facilities; and
- \$50.0 million drawdown on our revolving credit facilities.

Cash Flows for the Years ended December 31, 2023 and 2022

See "Item 5. Operating and Financial Review and Prospects – Liquidity and Capital Resources – Cash Flows – Cash Flows for the Years Ended December 31, 2023" in our annual report on Form 20-F for the year ended December 31, 2023 for a discussion of our cash flows for 2023. For a discussion of our cash flows for 2022 please see "Item 5. Operating and Financial Review and Prospects – Liquidity and Capital Resources – Cash Flows – Cash Flows for the Years Ended December 31, 2022" in our annual report on Form 20-F for the year ended December 31, 2022.

Borrowing Activities

A summary of our interest bearing loans and borrowings, including lease financing, as of December 31, 2024 is as follows:

\$150.0 million term loan facility

In October 2024, we entered into a \$150.0 million sustainability linked term loan facility with a group of first tier European shipping banks to refinance our obligations under the \$175.0 million loan facility described below. The loan facility is secured by six Newcastlemax vessels, and has a five-year tenor and an age adjusted amortization profile of 20 years. The facility is priced with an interest rate of SOFR plus a margin of 165 basis points per annum, and includes a sustainability linked pricing element with an additional 5 basis points pricing adjustment dependent on emission reduction performance. Repayments are made on a quarterly basis from first quarter of 2025 onward, with a balloon payment of \$0.9 million at maturity, in addition to all undrawn amounts of the revolving credit facility. During 2024, we drew \$100.0 million under the facility and there was an available undrawn amount of \$50.0 million.

\$180.0 million term loan facility

In April 2024, we signed a \$180.0 million sustainability linked term loan facility to refinance six Newcastlemax vessels under the \$233.0 million facility described below. The financing has a five-year tenor and a linear age adjusted amortization profile of 20 years. The facility is priced with an interest rate of SOFR plus a margin of 160 basis points per annum, and includes a sustainability linked pricing element with an additional 5 basis points pricing adjustment dependent on emission reduction performance. Repayments are made on a quarterly basis from third quarter of 2024 onward, with a balloon payment of \$126.6 million at maturity. During 2024, \$5.6 million was repaid.

\$360.0 million term loan facility

In February 2024, we signed a \$360.0 million sustainability linked credit facility to refinance our obligations under the \$120.0 million and \$304.0 million loan facilities described below. The loan facility is secured by 19 vessels, and has a five-year tenor and an age adjusted amortization profile of 20 years. The facility is priced with an interest rate of SOFR plus a margin of 175 basis points per annum, and includes a sustainability linked pricing element with an additional 5 basis points pricing adjustment dependent on emission reduction performance. Repayments are made on a quarterly basis from second quarter of 2024 onward, with a balloon payment of \$164.4 million at maturity, in addition to all undrawn amounts of the revolving credit facility. During 2024, \$27.8 million was repaid, which included repayment of debt in connection to the sale of *Golden Diamond* of \$6.6 million. There was an available undrawn amount of \$50.0 million.

\$85.0 million lease financing

In December 2023, we signed a sale and leaseback agreement for an amount of \$85.0 million to partially finance the four Kamsarmax newbuildings to be delivered during 2024. The lease financing has a ten-year tenor and an interest rate of SOFR plus a margin of 185 basis points per annum. The lease is repaid over a straight-line amortization profile of 21 years and with purchase options throughout the term and at maturity, with the purchase options being the "Net Purchase Option Price" equivalent to the amount of the outstanding capital element at the purchase option exercise date. As of December 31, 2024, all four newbuildings were delivered and we drew \$85.0 million under the facility. During 2024, \$2.0 million was repaid.

\$40.0 million term loan facility

In July 2023, we entered into a \$40.0 million credit facility to partially finance the two Kamsarmax newbuildings delivered during the third quarter of 2023. The facility has a seven-year tenor and an interest rate of SOFR plus a margin of 175 basis points per annum. Repayments are made on a quarterly basis from fourth quarter of 2023 onward, with a balloon payment of \$26.5 million at maturity. During 2024, \$2.0 million was repaid and there was no available undrawn amount.

\$80.0 million term loan facility

In April 2023, we signed an agreement for a \$80.0 million facility to partially finance the four Kamsarmax newbuildings delivered during the second quarter of 2023. The facility has a seven-year tenor and an interest rate of SOFR plus a margin of 180 basis points per annum. Repayments are made on a quarterly basis from third quarter of 2023 onward, with a balloon payment of \$52.0 million at maturity. During 2024, \$4.0 million (2023: \$2.0 million) was repaid and there was no available undrawn amount.

\$250.0 million term loan facility

In January 2023, we signed a loan agreement for a \$250.0 million credit facility with a group of leading shipping banks. The facility has an interest rate of SOFR plus a margin of 180 basis points and matures in January 2028 and is secured by a fleet of 16 Capesize, Kamsarmax and Panamax vessels. Repayments are made on a quarterly basis from second quarter of 2023 onward, with a balloon payment of \$112.1 million at maturity. During 2024, \$50.4 million (2023: \$26.0 million) was repaid, which included repayment of debt in connection to the sale of *Golden Bull* (\$7.7 million), *Golden Ruby* (\$8.1 million) and *Golden Gayle* (\$12.4 million). There was no available undrawn amount.

\$275.0 million term loan facility

In May 2022, we signed a loan agreement for a \$275.0 million term loan and revolving facility. The facility bears an interest of SOFR plus a margin of 190 basis points. It also includes a \$50.0 million non-amortizing revolving credit tranche. All tranches under the \$275.0 million term loan facility and revolving credit tranche mature in May 2027. Repayments are made on a quarterly basis from third quarter of 2022 onward, with a balloon payment of \$114.4 million at maturity, in addition to all undrawn amounts of the revolving credit facility. During 2024, \$72.1 million (2023: \$22.1 million) was repaid, which included a \$50 million repayment of the revolving credit tranche, leaving an available undrawn amount of \$50.0 million.

\$260.0 million lease financing

In August 2021, we signed a sale and leaseback agreement for an amount of \$260.0 million, refinancing the remaining nine vessels and three newbuildings financed by the Sterna Facility. The lease financing has a seven-year tenor, bears an interest of SOFR plus a margin of 200 basis points, has a straight line amortization profile of 21 years and has purchase options throughout the term, with a purchase obligation at maturity. Repayments are made on a quarterly basis from fourth quarter of 2021 onward. During 2024, \$12.4 million (2023: \$12.4 million) was repaid and there was no available undrawn amount.

A summary of our interest bearing loans and borrowings, including lease financing, that has been refinanced during the year ended December 31, 2024 and 2023 is as follows:

\$175.0 million term loan facility (refinanced)

This facility had a five-year tenor and a 19-year age adjusted repayment profile. The facility carried interest of SOFR plus a margin of 216 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$175.0 million loan facility and drew down on the \$150.0 million loan facility described above. In total, during 2024, \$127.3 million (2023: \$35.1 million, including \$25.0 million on the revolving credit tranche) was repaid, including \$25.0 million on the revolving credit tranche, leaving an available undrawn amount of \$50.0 million before the loan facility was refinanced.

\$304.0 million term loan facility (refinanced)

This facility had a five-year tenor and a 20-year age adjusted repayment profile. The facility carried interest of SOFR plus a margin of 261 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$304.0 million loan

facility and drew down on the \$360.0 million loan facility described above. In total, during 2024, \$197.9 million (2023: \$18.7 million) was repaid.

\$120.0 million term loan facility (refinanced)

This facility had a seven-year tenor and a 20-year age adjusted amortization profile. The facility carried interest of SOFR plus a margin of 251 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$120.0 million loan facility and drew down on the \$360.0 million loan facility described above. In total, during 2024, \$58.6 million (2023: \$5.0 million) was repaid.

\$233.0 million term loan facility (refinanced)

This facility had a two-year tenor and a 20-year age adjusted amortization profile. The facility carried interest of SOFR plus a margin of 190 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$233.0 million loan facility and drew down on the \$180.0 million loan facility described above. In total, during 2024, \$181.4 million (2023: \$33.2 million) was repaid.

See Note 20, "Debt", to the audited Consolidated Financial Statements included herein for additional details of loan facilities.

Covenants

Our loan agreements contain loan-to-value clauses, which could require us to post additional collateral or prepay a portion of the outstanding borrowings should the value of the vessels securing borrowings under each of such agreements decrease below required levels. In addition, the loan agreements contain certain financial covenants, including the requirement to maintain a certain level of free cash, positive working capital as defined in the loan agreement and a value adjusted equity covenant. Under most of our debt facilities the aggregate value of the collateral vessels shall not fall below 130% of the loan outstanding, depending on the facility (for \$150 million loan facility, the value should not fall below 135%. For \$40 million loan facility, the value should not fall below 125%. For \$260 million and \$85 million lease financings, the value should not fall below 115%). We need to maintain free cash of at least \$20 million or 5% of total interest bearing debt, maintain positive working capital and maintain a value adjusted equity of at least 25% of value adjusted total assets.

With regards to free cash, we have covenanted to retain at least \$68.5 million of cash and cash equivalents as of December 31, 2024 (December 31, 2023: \$72.9 million) and in accordance with our accounting policy this is classified under cash and cash equivalents. In addition, none of our vessel owning subsidiaries may sell, transfer or otherwise dispose of their interests in the vessels they own without the prior written consent of the applicable lenders unless, in the case of a vessel sale, the outstanding borrowings under the credit facility applicable to that vessel are repaid in full. Failure to comply with any of the covenants in the loan agreements could result in a default, which would permit the lender to accelerate the maturity of the debt and to foreclose upon any collateral securing the debt. Under those circumstances, we might not have sufficient funds or other resources to satisfy our obligations.

As of December 31, 2024 and December 31, 2023, we were in compliance with our financial covenants.

With reference to risk factor *"We are in breach of certain compliance clauses contained in our loan agreements, and if we are not successful in obtaining amendments to our loan agreements or do not refinance the outstanding indebtedness under such agreements, the breach of the compliance clauses may cause our lenders to declare a default and accelerate the outstanding indebtedness under the relevant agreements, which may result in cross defaults under our other loan agreements and would impair our ability to continue to conduct our business"*, the Share Purchase has resulted in a breach of change of control compliance clause described above and, while we are not currently in default, our lenders may declare a default if they serve a notice of non-compliance and we fail to rectify the issue within 14 days period. As of March 20, 2025, the Company has not received any request to rectify the non-compliance. We are currently in discussions with our existing lenders to address the change in the Company's largest shareholder as a result of the Share Purchase, and the discussions have not resulted in any rejections as of March 20, 2025.

CMB.TECH has identified syndicate banks to refinance all or part of our current outstanding debt and has entered into credit committee approved commitment letters with these banks as of March 4, 2025 for outstanding borrowings of up to \$2.0 billion, that are subject only to the execution of satisfactory documentation and customary covenants and closing conditions. If we are unable to reach agreements with our existing lenders, we plan on refinancing our existing debt with the committed financing described above, which may have, among others, the expected terms, as follows: Golden Ocean is the borrower, the guarantors are CMB.TECH, and the subsidiaries of Golden Ocean that own the vessels are serving as collateral under the loan. The financing is expected to have a 5-year tenor and a linear age adjusted amortization profile of 20 years. The facility is expected to be priced with an interest rate of SOFR plus a market-based margin.

Please see "Item 10. Additional Information - A. Share Capital."

C. RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES, ETC.

We do not undertake any significant expenditure on research and development and have no significant interests in patents or licenses.

D. TREND INFORMATION

Dry bulk market freight rates were characterized by the absence of volatility and counter-seasonal trends throughout 2024. According to the Baltic Exchange, average earnings, on a TCE basis, for a Capesize vessel were \$22,593 per day for 2024 compared with \$16,389 per day for 2023. For a Panamax vessel, average earnings for 2024 were \$14,099 per day compared with \$12,854 per day in 2023. According to industry sources, global fleet utilization (calculated as total demand in tonne miles transported divided by total available fleet capacity) averaged 88.3% in 2024, an increase from 86.8% in 2023.

Entering 2024, the anticipated global commodity demand surge, initially expected to build on China's 2023 reopening, unfolded with more measured and regionally varied results. The global financial landscape, though not experiencing the dramatic banking failures of 2023, remained sensitive to inflationary pressures and the ongoing adjustments to interest rate policies. Throughout 2024, freight rate movements were influenced by a combination of factors, including the pace of economic activity in key importing regions, fluctuations in commodity prices, and the ongoing impact of geopolitical events on trade flows. While Chinese imports remained a significant factor, overall tonne-mile demand was impacted by a broader range of variables than in 2023.

Initial concerns of a widespread global recession did not materialize in 2024, but persistent inflation and elevated interest rates continued to exert pressure on industrial production across developed economies. Central banks maintained a cautious approach throughout 2024, continuing to adjust interest rates, although the pace of increases moderated compared to the more aggressive tightening seen in 2023. SOFR, which replaced LIBOR in 2023, continued its upward trajectory, starting at 5.3% at the beginning of the year and reaching 5.5% by year end, reflecting the ongoing efforts to manage inflation and the subsequent impact on borrowing costs.

The Chinese government's economic policies in 2024 were characterized by a sustained focus on stimulus, particularly as the year progressed. Following initial measures in late 2023 to bolster the real estate sector, including mortgage rate reductions and lower down payment requirements, the government further expanded its support. The issuance of one trillion yuan in local government bonds in late 2023 was followed by continued infrastructure investment in 2024. Furthermore, the announced large scale financing for urban renewal and affordable housing, which began in late 2023, was enacted throughout 2024. These actions were aimed at stimulating domestic construction activity, supporting demand for iron ore and other key commodities. While earlier stimulus efforts had focused on diversifying demand away from the struggling real estate sector, the continued focus on infrastructure and housing in 2024 demonstrated a more balanced and targeted approach to economic support.

Global steel production increased by 1.7% in 2024, following a 1.2% increase in 2023. The increase came despite a 1.9% decline in production in China, which remains the dominant global producer. India continued its upward trajectory, increasing production by 6.7% in 2024 compared with the prior year, demonstrating significant growth driven by its expanding infrastructure and domestic consumption. While steel production in Europe rebounded by 0.4%, production trends varied by region, and the increase was largely due to a 5.1% increase in production in Germany, Europe's largest steel producer. European economies continue to face challenges stemming from economic uncertainties and shifting market dynamics. Geopolitical factors also played a role, influencing trade flows and impacting production levels in certain regions. The steel industry's performance remained closely tied to broader economic trends, particularly in sectors like construction and manufacturing.

Seaborne iron ore volumes increased by 3.6% in 2024 compared with 2023. Chinese iron ore imports increased by 4.6% in 2024 compared to 2023. Notably, iron ore exports from Brazil to China increased by 8.1% during the same period while exports from Australia to China declined by 0.2%. This had a positive impact on tonne-mile demand. As iron ore is primarily transported on Capesize vessels, the impact of longer trade routes continued to positively impact freight rates in this segment in 2024.

Transported volumes of coal globally increased by 4.7% in 2024 compared with 2023, reaching new all-time highs. Volume growth was primarily driven by robust demand from Asia. Notably, Chinese coal imports surged to record levels, increasing by 11.7%, and grew sequentially each quarter of the year. While demand in Europe declined, growth in emerging economies, particularly in Southeast Asia, offset these reductions. However, increasing logistical challenges and geopolitical factors,

including the impact of sanctions on Russian coal, created some volatility in trade flows. Coking coal imports increased by 8.3% in 2024 compared to 2023, with India remaining a significant driver of demand. Transportation of agribulks increased by 4.8% year-over-year in 2024 despite fluctuating prices and shifting trade flows, driven by various factors, including record production in some regions and geopolitical and weather-related disruptions to trade.

According to industry sources, 3.8 million dwt in total was scrapped during 2024, which represents 0.4% of the fleet at the start of the year, a slight decrease from the level of scrapping in 2023. Scrapping activity has remained low since the 2021 as fleet utilization has remained high by historical standards. Freight rates have been sufficiently strong to maintain the profitability of older, less efficient vessels. Further the price spread between high sulfur fuel and low sulfur fuel declined over the course of the year, reducing the potential premium earnings by vessels with higher levels of fuel efficiency.

The global fleet of dry bulk vessels amounted to 1,034.6 million dwt at the end of 2024 compared with 1,003.0 million dwt at the end of 2023. Total deliveries of newbuildings amounted to 33.8 million dwt in 2024, which is equivalent to 3.4% of the fleet as of the start of the year. Vessels scheduled for delivery in 2025 are estimated to constitute 3.2% of the sailing fleet on a gross basis, assuming no vessels are scrapped. Fleet growth is expected to grow by 3.9% in 2026 on a gross basis, assuming no vessels are scrapped.

Newbuilding prices remained at historically high levels in 2024, with Capesize and Panamax newbuilding prices increasing by 13.4% and 5.6%, respectively, compared with 2023. Secondhand asset prices also stayed elevated, particularly for Capesize vessels, increasing for the second consecutive year. Despite elevated pricing, newbuilding ordering increased by 10.5% compared with the prior year. As a result, the dry bulk orderbook as a percent of the total fleet was approximately 10.9% at the end of 2024, slightly above the 10-year average of 10.8%.

E. CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires that management make estimates and assumptions affecting the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Management believes that the accounting policies relating to impairment of assets, revenue and expense recognition, vessels and depreciation are the most critical in fully understanding and evaluating our reported financial results as they require a higher degree of judgment in their application resulting from the need to make estimates about the effect of matters that are inherently uncertain. See Note 2, "Summary of Significant Accounting Policies", to the audited Consolidated Financial Statements included herein for detailed description of significant accounting policies.

Impairment

The carrying values of our vessels and right of use assets, if any, may not represent their fair market value at any point in time since the market prices of second-hand vessels tend to fluctuate with changes in charter rates. Historically, both charter rates and vessel values tend to be cyclical. The carrying amounts of vessels and right of use assets that are held and used by us are reviewed for potential impairment whenever events or changes in circumstances indicate that the carrying amount of a particular vessel or and right of use assets may not be fully recoverable. Indicators of impairment are identified based on a combination of factors which include amongst other, development of secondhand vessel values based on external appraisals of our ships, development of forward freight rates and spot rates. As of December 31, 2024, we have not identified any impairment indicators relating to our owned vessels and right of use assets. We consider the outlook for forward freight rates and external appraisals of our ships to be positive on both expectations of steady global demand for dry bulk commodities, and equally importantly, powerful supply-side dynamics that have not been present for many years.

If impairment indicators exist, we assess recoverability of the carrying value of each owned asset on an individual basis by estimating the future undiscounted cash flows expected to result from the asset and eventual disposal. Fair value for our owned vessels is estimated based on values achieved for the sale/purchase of similar vessels and external appraisals. In addition, vessels held for sale are reported at the lower of carrying amount and fair value less estimated costs to sell. Recoverability of right of use assets is assessed on an asset by asset basis by estimating the future undiscounted cash flows from the right of use assets earned over the remaining lease term of our operating and finance leases. For all owned assets and right of use assets, if the future net undiscounted cash flows are less than the carrying value of the asset, an impairment loss is recorded equal to the difference between the asset's carrying value and estimated fair value derived from cash flow based valuations.

In developing estimates of future cash flows for owned vessels, we must make assumptions about future performance, with significant assumptions being related to charter rates, additional earnings due to scrubber installations, ship operating expenses,

utilization, drydocking requirements, residual value and the estimated remaining useful lives of the vessels. In developing estimates of future cash flows for right of use assets, we must make significant assumptions related to future charter rates, additional earnings due to scrubber installations, ship operating expenses, utilization and drydocking requirements. For owned vessels and leased assets, these assumptions are based on historical trends as well as future expectations. Specifically, in estimating future charter rates, management takes into consideration rates currently in effect for existing time charters and estimated daily time charter equivalent rates for each vessel class for the unfixed days over the estimated remaining lives of each of the vessels. The estimated daily time charter equivalent rates used for unfixed days are based on a combination of (i) forward freight market rates and (ii) estimate of implied charter rates based on the broker values received from third-party brokers. The implied rate is a calculated rate for each vessel based on the charter rate the vessel would need to achieve, given our estimated future operating costs and discount factors that once discounted would equate to the average broker values. Benefits from scrubber installations are calculated based on expected bunker fuel cost savings and estimated consumption per year. We then use the resultant undiscounted cash flows in our model. Recognizing that the transportation of dry bulk cargoes is cyclical and subject to significant volatility based on factors beyond our control, management believes the use of estimates based on the combination of internally forecasted rates and calculated average rates as of the reporting date to be reasonable.

Estimated outflows for operating expenses and drydocking requirements are based on historical and budgeted costs and are adjusted for assumed inflation. Utilization is based on historical levels achieved and estimates of a residual value are consistent with the pattern of scrap rates used in management's evaluation of salvage value. Finally, additional investments to comply with environmental requirements are based on budgeted costs and even though currently not expected to be material, they could be material in the future.

The more significant factors that could impact management's assumptions regarding cash flows include (i) loss or reduction in business from significant customers, (ii) unanticipated changes in demand for transportation of dry bulk cargoes, (iii) greater than anticipated levels of newbuilding orders or lower than anticipated levels of vessel recycling, and (iv) changes in rules and regulations applicable to the dry bulk industry, including legislation adopted by international organizations such as the IMO and the European Union or by individual countries. Although management believes that the assumptions used to evaluate potential impairment are reasonable and appropriate at the time they were made, such assumptions are highly subjective and likely to change, possibly materially, in the future. There can be no assurance as to how long charter rates and vessel values will remain at their current levels or whether they will deteriorate or improve by a significant degree. If charter rates were to remain at depressed levels future assessments of vessel impairment would be adversely affected.

During the years ended December 31, 2024, 2023 and 2022, we recorded impairment losses of nil, \$11.8 million and nil, respectively, related to sales of vessels.

Vessels and depreciation

Upcoming environmental regulations might affect useful life of our vessels. Although management believes that useful lives of 25 years represent the best estimate as of today, there can be no assurance that useful lives will not decrease in the future due to innovation based on system fuel/efficiency and new environmental regulations.

Revenue and expense recognition

Estimates and judgments are required in ascertaining the most likely outcome of a particular voyage charter and allocation of voyage results between periods based on load to discharge methods. Actual outcomes may differ from estimates, however management believes that estimation uncertainty is low since estimates are made on a contract by contract basis.

The voyage charters generally have variable consideration in the form of demurrage or despatch, which is recognized as we satisfy the performance obligations under the contract. We estimate demurrage or despatch at contract inception using either the expected value or most likely amount approaches. Such estimate is reviewed and updated over the term of the voyage charter contract, as such management believes estimation uncertainty for demurrage revenue is low.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. DIRECTORS AND SENIOR MANAGEMENT

Set forth below are the names and positions of our directors and executive officers.

Name	Age	Position
Ola Lorentzon	75	Director, Chairman
John Fredriksen	80	Director
James O'Shaughnessy	61	Director and Audit Committee Chairman
Ben Mills	55	Director
Cato Stonex	61	Director
Tonesan Amissah	59	Director
Peder Simonsen	50	Interim Chief Executive Officer and Chief Financial Officer of Golden Ocean Management AS

Certain biographical information about each of our directors and executive officers is set forth below.

Ola Lorentzon is currently Chairman of the Board and has served as a director on the Board since September 18, 1996, Chairman since May 26, 2000 and Chief Executive Officer from May 2010 to March 2015. He is also Chairman of the Board and director of Frontline plc and a director of Flex LNG Ltd. Mr. Lorentzon was the Managing Director of Frontline Management AS, a subsidiary of Frontline, from April 2000 until September 2003.

John Fredriksen was a director of the Former Golden Ocean and has served as a director of the Board following the completion of the Merger. Mr. Fredriksen is also a Director of a related party Frontline plc., a Cyprus company listed on NYSE and the OSE whose principal shareholder is Hemen.

James O'Shaughnessy has served as a director of the Board since September 2018. Mr. O'Shaughnessy served as an Executive Vice President, Chief Accounting Officer and Corporate Controller of Axis Capital Holdings Limited up to March 26, 2019. Prior to that Mr. O'Shaughnessy has amongst others served as Chief Financial Officer of Flagstone Reinsurance Holdings and as Chief Accounting Officer and Senior Vice President of Scottish Re Group Ltd., and Chief Financial Officer of XL Re Ltd. at XL Group plc. Mr. O'Shaughnessy received a Bachelor of Commerce degree from University College, Cork, Ireland and is both a Fellow of the Institute of Chartered Accountants of Ireland, an Associate Member of the Chartered Insurance Institute of the UK and a Chartered Director. In addition to the Company, Mr. O'Shaughnessy serves as a director and a member of the audit committee of Frontline, SFL Corporation Ltd., Archer Limited, Avance Gas, CG Insurance Group and various insurance entities.

Ben Mills has served as a director of the Board since August 2021. Mr. Mills has extensive experience from the dry bulk market through tenures in Trafigura and the Baltic Exchange, particularly focusing on the Capesize segment. Mr. Mills is currently Head of Dry Cargo in Seatankers Management Ltd, a company related to Hemen, the Company's largest shareholder until March 12, 2025.

Cato Stonex has served as a director of the Board since January 2024. Mr. Stonex has had a long career in fund management, initially with J Rothschild Investment Management. He was then a founder and partner of Taube Hodson Stonex (THS) for 20 years, which managed institutional portfolios of global equity mandates. THS was sold to GAM in 2016, after which he established Partners Investment Company, which focused on stock picking in small and mid-cap equities, largely in Europe. In 2021, Partners Investment Company became Stonex Capital Partners Ltd and that same year Mr. Stonex also funded WMC Capital Ltd, an investment company focused on the recovery of the global shipping industry. Mr. Stonex has also been involved in a range of other business areas. He holds an undergraduate degree from the London School of Economics and Political Science, where he served for ten years as a Governor and is now an Emeritus Governor. He has chaired its Development Committee and is now an advisor to the Endowment Investment Committee. Mr. Stonex is closely involved with LSE Ideas, a leading academic think tank.

Tonesan Amissah has served as a director since February 2025. Ms. Amissah is a Barrister and Attorney-at-Law with over 30 years of experience in international corporate law. Ms. Amissah is currently a Client Director at Ocorian Services (Bermuda) Limited, a global fiduciary and corporate services company where she oversees all aspects of client service. Ms. Amissah is a former partner of Appleby (Bermuda) Limited, where she led the funds & investment services team and was a senior member of the firm's corporate department, having joined Appleby in 1989. She also serves as a director of companies in the insurance space. Ms. Amissah holds a law degree from the London School of Economics and Political Science, she qualified as a Barrister at the Honourable Society of Lincoln's Inn in London in 1988 and was later called to the Bermuda Bar in 1992. She is a member of the Institute of Directors and was appointed an accredited speaker for the Regulatory and Compliance Association in 2015. Ms. Amissah is a Bermuda citizen.

Peder Simonsen has served as Chief Financial Officer of Golden Ocean Management AS since September 2020 and as Interim Chief Executive Officer since May 2024. Mr. Simonsen was, prior to joining Golden Ocean, the Chief Financial Officer and Interim Chief Executive Officer of Avance Gas AS. Before that he was First Vice President at Nordea Bank Norge ASA, where

he worked with numerous large shipping and offshore companies. Mr. Simonsen holds a B.A. (Hons) in Business Administration from the University of Stirling and a Master of Business degree (Norwegian: Siviløkonom).

B. COMPENSATION

During the year ended December 31, 2024, we paid aggregate cash compensation of approximately \$1.9 million and an aggregate amount of approximately \$37 thousand for pension and retirement benefits to our directors and executive officers.

See Note 25, "Share Options", to our audited Consolidated Financial Statements included herein for information pertaining to the 2016 Plan, which permitted share options to be granted to directors, officers and employees of the Company and was applicable for the options granted in 2020.

C. BOARD PRACTICES

In accordance with our Second Amended and Restated Bye-laws, the number of directors shall be such number not less than two as our shareholders by Ordinary Resolution may from time to time determine. We currently have six directors.

As provided in the Second Amended and Restated Bye-Laws, each director shall hold office until the next annual general meeting following his or her election or until his or her successor is elected. Our officers are elected by the Board and shall hold office for such period and on such terms as the Board may determine.

We have established an audit committee consisting of Mr. O'Shaughnessy. The audit committee is responsible for assisting the Board with its oversight responsibilities regarding the integrity of our financial statements, our compliance with legal and regulatory requirements, our independent registered public accounting firm's qualifications and independence, and the performance of our internal audit functions. Mr. O'Shaughnessy is the Audit Committee Financial Expert. We have determined that a director may sit on the board of three or more audit committees and such simultaneous service would not impair the ability of such member to effectively serve on the Board or Audit Committee. For more information, please see "Item 6.A. Directors and Senior Management."

There are no service contracts between us and any of our directors providing for benefits upon termination of their employment.

Clawback Policy

In November 2023, we adopted a policy regarding the recovery of erroneously awarded compensation ("Clawback Policy") in accordance with the applicable rules of The Nasdaq Stock Market and Section 10D and Rule 10D-1 of the Securities Exchange Act of 1934, as amended. In the event we are required to prepare an accounting restatement due to material noncompliance with any financial reporting requirements under U.S. securities laws or otherwise erroneous data or if we determine there has been a significant misconduct that causes material financial, operational or reputational harm, we shall be entitled to recover a portion or all of any incentive-based compensation provided to certain executives who, during a three-year period preceding the date on which an accounting restatement is required, received incentive compensation based on the erroneous financial data that exceeds the amount of incentive-based compensation the executive would have received based on the restatement.

The Audit Committee administers our Clawback Policy and has discretion, in accordance with the applicable laws, rules and regulations, to determine how to seek recovery under the Clawback Policy and may forego recovery if it determines that recovery would be impracticable.

Board practices and exemptions from the NASDAQ corporate governance rules

As a foreign private issuer, we are exempt from certain requirements of the NASDAQ that are applicable to U.S. domestic companies because we follow our home country (Bermuda) practice, which is permitted under the NASDAQ corporate governance rules. For a listing and further discussion of how our corporate governance practices differ from those required of U.S. companies listed on the NASDAQ, please see "Item 16G. Corporate Governance" of this annual report.

D. EMPLOYEES

As of December 31, 2024, we employed 44 people in our offices in Oslo and Singapore. We contract with independent ship managers to technically manage and operate our vessels.

E. SHARE OWNERSHIP

As of March 20, 2025, the beneficial interests of our Directors and officers in our common shares were as follows:

Director or Officer	Common Shares of \$0.05 each	Percentage of Common Shares Outstanding
Ola Lorentzon	16,877	(1)
John Fredriksen	—	—
Ben Mills	—	—
James O'Shaughnessy	—	—
Cato Stonex	—	—
Peder Simonsen	—	—

(1) Less than 1%.

No options were held by our Directors and officers as of December 31, 2024 or the date of this annual report.

F. DISCLOSURE OF A REGISTRANT'S ACTION TO RECOVER ERRONEOUSLY AWARDED COMPENSATION

Not applicable.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. MAJOR SHAREHOLDERS

The following table presents certain information as of March 20, 2025 regarding the ownership of our common shares with respect to each shareholder whom we know to beneficially own more than 5% of our outstanding common shares.

Owner	Number of shares owned	Percentage owned ⁽¹⁾
CMB.TECH NV ⁽²⁾	81,363,730	40.8%

(1) Calculated based on 199,403,293 common shares issued and outstanding as of March 20, 2025.

(2) According to the Schedule 13D filed with the SEC on March 11, 2025, CMB.TECH NV holds 81,363,730 of our common shares after the Share Purchase.

Our major shareholders have the same voting rights as our other shareholders. No corporation or foreign government owns more than 50% of our outstanding common shares. We are not aware of any arrangements, known by the Company, the operation of which may at a subsequent date result in a change in control of the Company.

As of March 17, 2025, 201,177,692 of our issued common shares were held in the United States by 34 holders of record, including Cede & Co., the nominee for the Depository Trust Company, which held 201,170,463 of those shares.

B. RELATED PARTY TRANSACTIONS

Our chief information security officer (CISO), who is employed by Front Ocean Management AS ("Front Ocean"), a related party, is responsible for assessing and managing cybersecurity threats, reporting cybersecurity updates and reporting to the Board material cybersecurity incidents. For more information on our cybersecurity risk management and strategy, please see "Item 16K. Cybersecurity".

On March 4, 2025, CMB.TECH, through its subsidiary CMB.TECH Bermuda Ltd., entered into a share purchase agreement with Hemen to purchase all of Hemen's 81,363,730 of our common shares at a purchase price of \$14.49 per common share. Following the closing of the Share Purchase on March 12, 2025, Hemen ceased to hold any of our common shares of the Company and therefore Hemen and related companies are no longer related parties of the Company.

See Note 26, "Related Party Transactions", to our audited Consolidated Financial Statements included herein, describing related party transactions as of December 31, 2024.

C. INTERESTS OF EXPERTS AND COUNSEL

Not applicable.

ITEM 8. FINANCIAL INFORMATION

A. CONSOLIDATED STATEMENTS AND OTHER FINANCIAL INFORMATION

See "Item 18. Financial Statements".

Legal Proceedings

We are a party, as plaintiff or defendant, to several lawsuits in various jurisdictions for demurrage, damages, offhire and other claims and commercial disputes arising from the operation of our vessels, in the ordinary course of business or in connection with our acquisition activities. We believe that the resolution of such claims will not have a material adverse effect on our operations or financial condition.

To the best of our knowledge, there are no other legal or arbitration proceedings existing or pending which have had or may have significant effects on our financial position or profitability and no such proceedings are pending or known to be contemplated.

Dividend Distribution Policy

The amount and timing of any dividend distributions in the future will depend, among other things, on our compliance with covenants in our credit facilities, earnings, financial condition, cash position, Bermuda law affecting the dividend distributions, restrictions in our financing agreements and other factors. In addition, the declaration and payment of dividend distributions is subject at all times to the discretion of our Board and may be increased, decreased or eliminated at any time and without notice.

In accordance with our loan agreements, we have agreed to not make any financial distribution if an event of non-compliance has occurred, has been noticed by our lenders and is continuing. We are currently in discussions with our existing lenders to address the change in the Company's largest shareholder as a result of the Share Purchase, and the discussions have not resulted in any rejections as of March 20, 2025.

B. SIGNIFICANT CHANGES

None.

ITEM 9. THE OFFER AND LISTING

As of the date of this annual report, the Company had 201,190,621 common shares issued, which includes 199,403,293 common shares outstanding, and 1,787,328 treasury shares. Our common trade on NASDAQ and the OSE under the ticker symbol "GOGL".

ITEM 10. ADDITIONAL INFORMATION

A. SHARE CAPITAL

Authorized Capitalization

Under our amended Memorandum of Association, our authorized share capital consists of 300,000,000 shares, \$0.05 per share, of which 199,403,293 common shares were issued and outstanding and 1,787,328 were treasury shares as of the date of this annual report.

Our common shares are listed on NASDAQ under the symbol "GOGL" and on the OSE under the ticker code "GOGL".

For information on Issued and Authorized Share Capital, including Treasury Shares, see information disclosed in Note 24, "Share Capital, Treasury Shares and Dividends".

Our Share History

In May 2022, several holders of share options granted in 2020 (the "2020 Share Option Grant") exercised options to acquire a total number of 450,000 shares in the Company in accordance with terms previously disclosed. The option exercised was settled with treasury shares.

In the year ended December 31, 2022, 400,000 common shares were repurchased under our 2022 share buy-back program.

In September 2023, 250,000 share options were exercised by an eligible holder of share options granted in 2020 and were settled by using treasury shares.

In the year ended December 31, 2023, 1,107,328 common shares were repurchased under our 2022 share buy-back program. For more information, please see "Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers" in our Form 20-F for the year-ended December 31, 2023 filed with the Commission on March 20, 2024.

In March 2024, 400,000 share options were exercised by an eligible holder of share options granted in 2020 and were settled by using treasury shares.

In the year ended December 31, 2024, 625,000 common shares were repurchased under our 2022 share buy-back program.

For overview of number of common shares outstanding, see information disclosed in 16E. "Purchases of Equity Securities by the Issuer and Affiliated Purchasers" and Note 24, "Share Capital, Treasury Shares and Dividends". There are no changes in the number of common shares outstanding from December 31, 2024 to the date of this annual report.

Reconciliation of the Number of Common Shares Outstanding as of the Date of this Annual Report

Shares outstanding at December 31, 2022	200,485,621
Number of common shares distributed in connection with the 2020 Share Option Grant	250,000
Number of common shares repurchased under the 2022 share buy-back program	(1,107,328)
Shares outstanding at December 31, 2023	199,628,293
Number of common shares distributed in connection with the 2020 Share Option Grant	400,000
Number of common shares repurchased under the 2022 share buy-back program	(625,000)
Shares outstanding at December 31, 2024	199,403,293
Shares outstanding at March 20, 2025	199,403,293

B. MEMORANDUM AND ARTICLES OF ASSOCIATION

Our Amended and Restated Bye-Laws were adopted at the Special General Meeting held on March 26, 2015.

To see the full text of our Memorandum of Association and Amended and Restated Bye-Laws, please see Exhibits 1.1 and 1.4 attached to this annual report and our annual report on Form 20-F for the year ended December 31, 2014 filed with the Commission on April 29, 2015, and is hereby incorporated by reference into this annual report.

At our 2022 annual general meeting, the shareholders voted to amend our Bye-Laws (the "Second Amended and Restated Bye-Laws").

To see the full text of our Second Amended and Restated Bye-Laws, please see Exhibit 1.5 attached to this annual report and our annual report on Form 20-F for the year ended December 31, 2022 filed with the Commission on March 16, 2023, and is hereby incorporated by reference into this annual report.

Purpose

The purposes and powers of the Company are set forth in Items 6 and 7(a) through (h) of our amended Memorandum of Association and by reference to the Second Schedule of the Companies Act. These purposes include exploring, drilling,

moving, transporting and refining petroleum and hydro-carbon products, including oil and oil products; acquiring, owning, chartering, selling, managing and operating ships and aircraft; the entering into of any guarantee, contract, indemnity or surety ship to assure, support, secure, with or without the consideration or benefit, the performance of any obligations of any person or persons; and the borrowing and raising of money in any currency or currencies to secure or discharge any debt or obligation in any manner.

There are no limitations on the right of non-Bermudians or non-residents of Bermuda to hold or vote our common shares.

Voting Rights

The holders of our common shares will be entitled to one vote per share on each matter requiring the approval of the holders of the common shares. At any annual or special general meeting of shareholders where there is a quorum, a simple majority vote will generally decide any matter, unless a different vote is required by express provision of the Second Amended and Restated Bye-Laws or Bermuda law.

The Companies Act and our Bye-Laws do not confer any conversion or sinking fund rights attached to our common shares.

Preemptive Rights

Bermuda law does not provide a shareholder with a preemptive right to subscribe for additional issues of a company's shares unless, and to the extent that, the right is expressly granted to the shareholder under the bye-laws of a company or under any contract between the shareholder and the company.

Holders of our common shares do not have any preemptive rights pursuant to the Second Amended and Restated Bye-Laws.

Repurchase of Shares

Subject to the Companies Act, the Memorandum of Association and the Second Amended and Restated Bye-Laws, our Board may from time to time repurchase any common shares for cancellation or to be held as treasury shares.

Holders of our common shares, however, do not have any right to require the Company to purchase their shares pursuant to the Second Amended and Restated Bye-Laws.

Redemption of Preference Shares

The Company may with the approval of the shareholders issue preference shares which are redeemable at the option of the Company or the holder, subject to the Companies Act, the Memorandum of Association and the Second Amended and Restated Bye-Laws.

Call on Shares

Pursuant to the Second Amended and Restated Bye-Laws, the Board may from time to time make calls upon our shareholders in respect of any moneys unpaid on their shares.

Reduction of Share Capital

Subject to the Companies Act, the Memorandum of Association and the Second Amended and Restated Bye-Laws, the shareholders may by resolution authorize the reduction of the Company's issued share capital or any capital redemption reserve fund or any share premium account in any manner.

Dividend and Other Distributions

Under the Companies Act, a company may, subject to its bye-laws and by resolution of the directors, declare and pay a dividend, or make a distribution out of contributed surplus, provided there are reasonable grounds for believing that after any such payment (a) the company will be solvent and (b) the realizable value of its assets will be greater than its liabilities.

The Second Amended and Restated Bye-Laws provide that the Board from time to time may declare cash dividends or distributions out of contributed surplus to be paid to the shareholders according to their rights and interests including such interim dividends as appear to be justified by the position of the Company.

Board of Directors

The Second Amended and Restated Bye-Laws provide that the Board shall consist of not less than two members and shall at all times comprise a majority of directors who are not residents in the United Kingdom. Our shareholders may change the number of directors by the vote of shareholders representing a simple majority of the total number of votes which may be cast at any annual or special general meeting, or by written resolution. Each director is elected at an annual general meeting of shareholders for a term commencing upon election and each director shall serve until re-elected or their successors are appointed on the date of the next scheduled annual general meeting of shareholders. The Second Amended and Restated Bye-Laws do not permit cumulative voting for directors.

Subject to the Companies Act, the Second Amended and Restated Bye-Laws permit our directors to engage in any transaction or arrangement with us or in which we may otherwise be interested. Additionally, as long as our director declares the nature of his or her interest at the first opportunity at a meeting of the Board, he or she shall not by reason of his office be accountable to us for any benefit which he or she derives from any transaction to which the Second Amended and Restated Bye-Laws permit him or her to be interested.

Our directors are not required to retire because of their age and are not required to be holders of our common shares.

Removal of Directors and Vacancies on the Board

Under the Companies Act, any director may be removed, with or without cause, by a vote of the majority of shareholders if the bye-laws so provide. A company may remove a director by specifically convening a special general meeting of the shareholders. The notice of any such special general meeting must be served on the director concerned no less than fourteen (14) days before the special general meeting. The affected director is entitled to be heard at that special general meeting.

The Second Amended and Restated Bye-Laws provide that directors may be removed, with or without cause, by a vote of the shareholders representing a majority of the votes present and entitled to vote at a special general meeting called for that purpose. The notice of any such special general meeting must be served on the director concerned no less than 14 days before the special general meeting and he or she shall be entitled to be heard at that special general meeting.

Any director vacancy created by the removal of a director from our Board at a special general meeting may be filled by the election of another director in his place by a majority vote of the shareholders entitled to vote at the special general meeting called for the purpose of removal of that director, or in the absence of such election, by the Board. The Board may fill casual vacancies so long as quorum of directors remains in office. Each director elected to the Board to fill a vacancy shall serve until the next annual general meeting of shareholders and until a successor is duly elected and qualified or until such director's resignation or removal.

Quorum and Action by the Board of Directors

The Second Amended and Restated Bye-Laws provide that at any meeting of the Board (which must be held outside of the United Kingdom or Norway), the presence of the majority of the Board, unless otherwise fixed, constitutes a quorum for the transaction of business and that when a quorum is present, the acts of a majority of the directors present at any meeting shall be the acts of the Board, except as may be otherwise specified by Bermuda law or the Second Amended and Restated Bye-Laws. A quorum shall not be present unless a majority of directors present are neither resident in Norway nor physically located or resident in the United Kingdom.

A resolution in writing signed by all directors for the time being entitled to receive notice of a meeting of the Board shall be as valid and effectual as a resolution passed at a meeting of the Board.

A meeting of the Board or committee appointed by the Board shall be deemed to take place at the place where the largest group of participating directors or committee members has assembled or, if no such group exists, at the place where the chairman of the meeting participates. In no event shall the place where the largest group of participating directors or committee members has assembled or, if no such group exists, the place where the chairman of the meeting participates, be located in the United Kingdom. The Board or relevant committee shall use its best endeavors to ensure that any such meeting is not deemed to have been held in Norway, and the fact that one or more directors may be present at such teleconference by virtue of his being physically in Norway shall not deem such meeting to have taken place in Norway.

Duties of Directors and Officers; Limitation of Liability

Under Bermuda law, directors and officers shall discharge their duties in good faith and with that degree of diligence, care and skill which reasonably prudent people would exercise under similar circumstances in like positions. In discharging their duties, directors and officers may rely upon financial statements of the company represented to them to be correct by the president or the officer having charge of its books or accounts or by independent accountants.

The Companies Act provides that a company's bye-laws may include a provision for the elimination or limitation of liability of a director to the company or its shareholders for any loss arising or liability attaching to him by virtue of any rule of law in respect to any negligence, default, breach of any duty or breach of trust of which the director may be guilty of; provided that such provision shall not eliminate or limit the liability of a director for any fraud or dishonesty he may be guilty of.

The Second Amended and Restated Bye-Laws limit the liability of our directors and officers to the fullest extent permitted by the Companies Act.

Director Indemnification

Bermuda law permits the bye-laws of a Bermuda company to contain a provision indemnifying the company's directors and officers for any loss arising or liability attaching to him or her by virtue of any rule of law in respect of any negligence, default, breach of duty or breach of trust of which the officer or person may be guilty, save with respect to fraud or dishonesty. Bermuda law also grants companies the power generally to indemnify directors and officers of a company, except in instances of fraud and dishonesty, if any such person was or is a party or threatened to be made a party to a threatened, pending or completed action, suit or proceeding by reason of the fact that he or she is or was a director and officer of such company or was serving in a similar capacity for another entity at such company's request.

The Second Amended and Restated Bye-Laws provide that each director, alternate director, officer, person or member of a board committee, if any, resident representative, and his or her heirs, executors or administrators, collectively, Indemnitees, will be indemnified and held harmless out of our assets to the fullest extent permitted by Bermuda law against all liabilities, loss, damage or expense (including but not limited to liabilities under contract, tort and statute or any applicable foreign law or regulation and all reasonable legal and other costs and expenses properly payable) incurred or suffered by him or her as such director, alternate director, officer, person or committee member or resident representative. The restrictions on liability, indemnities and waivers provided for in the Amended and Restated Bye-Laws do not extend to any matter that would render the same void under the Companies Act. In addition, each Indemnitee shall be indemnified out of our assets against all liabilities incurred in defending any proceedings, whether civil or criminal, in which judgment is given in such Indemnitee's favor, or in which he or she is acquitted.

Under the Second Amended and Restated Bye-Laws, shareholders have further agreed to waive any claim or right of action they may have at any time against any Indemnitee on account of any action taken by such Indemnitee or the failure of such Indemnitee to take any action in the performance of his or her duties with or for the Company with the exception of any claims or rights of action arising out of fraud or dishonesty.

Shareholder Meetings

Under the Companies Act, an annual general meeting of the shareholders shall be held for the election of directors on any date or time as designated by or in the manner provided for in the bye-laws and held at such place within or outside Bermuda as may be designated in the bye-laws. Any other proper business may be transacted at the annual general meeting.

Under the Companies Act, any meeting that is not the annual general meeting is called a special general meeting, and may be called by the Board or by such persons as authorized by the company's memorandum of association or bye-laws. Under the Companies Act, holders of one-tenth of a company's issued common shares may also call special general meetings. At such special general meeting, only business that is related to the purpose set forth in the required notice may be transacted. Additionally, under Bermuda law, a company may, by resolution at a special general meeting, elect to dispense with the holding of an annual general meeting for (a) the year in which it is made and any subsequent year or years; (b) for a specified number of years; or (c) indefinitely.

Under the Companies Act, notice of any general meeting must be given not less than five (5) days before the meeting and shall state the place, date and hour of the meeting and, in the case of a special general meeting, shall also state the purpose of such meeting and the that it is being called at the direction of whoever is calling the meeting. Under Bermuda law, accidental failure to give notice will not invalidate proceedings at a general meeting.

Annual General Meetings. The Second Amended and Restated Bye-Laws provide that the Board may fix the date, time and place of the annual general meeting within or without Bermuda (but never in the United Kingdom or Norway) for the election of directors and to transact any other business properly brought before the meeting.

Special General Meetings. The Second Amended and Restated Bye-Laws provide that special general meetings may be called by the Board and when required by the Companies Act (i.e. by holders of one-tenth of a company's issued common shares through a written request to the Board).

Notice Requirements. The Second Amended and Restated Bye-Laws provide that we must give not less than five (5) days' notice before any annual or special general meeting.

Quorum of Shareholders

Under the Companies Act, where the bye-laws so provide, a general meeting of the shareholders of a company may be held with only one individual present if the requirement for a quorum is satisfied and, where a company has only one shareholder or only one holder of any class of shares, the shareholder present in person or by proxy constitutes a general meeting.

Under the Second Amended and Restated Bye-Laws, quorum at annual or special general meetings shall be constituted by two or more shareholders either present in person or by proxy throughout the meeting. If we only have one shareholder, then one shareholder present in person or proxy shall constitute the necessary quorum.

Shareholder Action without a Meeting

Under the Companies Act, unless the company's bye-laws provide otherwise, any action required to or that may be taken at an annual or general meeting can be taken without a meeting if a written consent to such action is signed by the necessary majority of the shareholders entitled to vote with respect thereto.

The Second Amended and Restated Bye-Laws provide that, except in the case of the removal of auditors and directors, anything which may be done by resolution may, without an annual or special general meeting be done by resolution in writing, signed by a simple majority of all the shareholders or their proxies (or such greater majority required by the Companies Act).

Shareholder's Rights to Examine Books and Records

Under the Companies Act, any shareholder, during the usual hours of business, may inspect, for a purpose reasonably related to his or her interest as a shareholder, and make copies of extracts from the share register, and minutes of all general meetings.

Amendments to Memorandum of Association

Under Bermuda law, a company may, by resolution passed at an annual or special general meeting of shareholders, alter the provisions of the memorandum of association. An application for alteration can only be made by (i) holders of not less in the aggregate than 20% in par value of a company's issued share capital, (ii) by holders of not less in the aggregate that 20% of the company's debentures entitled to object to alterations to the memorandum, or (iii) in the case a company that is limited by guarantee, by not less than 20% of the shareholders.

Variation in Shareholder Rights

Under Bermuda law, if at any time a company has more than one class of shares, the rights attaching to any class, unless otherwise provided for by the terms of issue of the relevant class, the rights attached to any class of share may be varied with (i) the consent in writing of the holders of 75% in nominal value of the issued shares of that class, or (ii) the sanction of a resolution passed at a separate general meeting of holders of the shares of the class at which a quorum consisting of at least two persons holding or representing of one-third of the issued shares of the relevant class is present.

The Second Amended and Restated Bye-Laws may be amended from time to time in the manner provided for in the Companies Act.

Vote on Amalgamations, Mergers, Consolidations and Sales of Assets

Under the Companies Act, any plan of merger or amalgamation must be authorized by the resolution of a company's shareholders and must be approved by a majority vote of three-fourths of those shareholders voting at such a general meeting of

the company. Also, it is required that a quorum of two or more persons holding or representing more than one-third (1/3) of the issued and outstanding common shares of the company on the Record Date are in attendance in person or by proxy at such special general meeting.

In our Second Amended and Restated Bye-Laws, any plan of merger or amalgamation must be authorized by the resolution of a company's shareholders approved by a simple majority of votes cast at a general meeting of the company at which a quorum of two or more shareholders are in attendance in person or by proxy throughout such meeting.

Appraisal and Dissenters Rights

Under Bermuda law, in the event of an amalgamation or a merger of a Bermuda company with another company or corporation, a shareholder of the Bermuda company who did not vote in favor of the amalgamation or merger and is not satisfied that fair value has been offered for such shareholder's shares may, within one month of notice of the special general meeting, apply to the Supreme Court of Bermuda to appraise the fair value of those shares.

Derivative Actions

Class actions and derivative actions are generally not available to shareholders under Bermuda law. Bermuda courts, however, would ordinarily be expected to permit a shareholder to commence an action in the name of a company to remedy a wrong to the company where the act complained of is alleged to be beyond the corporate power of the company, or illegal, or would result in the violation of the company's memorandum of association or bye-laws. Furthermore, consideration would be given by a Bermuda court to acts that are alleged to constitute a fraud against the minority shareholders or, for instance, where an act requires the approval of a greater percentage of the company's shareholders than that which actually approved it. However, generally a derivative action will not be permitted where there is an alternative action available that would provide an adequate remedy. Any property or damages recovered by derivative action go to the company, not to the plaintiff shareholders. When the affairs of a company are being conducted in a manner which is oppressive or prejudicial to the interests of some part of the shareholders, one or more shareholders may apply to the Supreme Court of Bermuda, which may make such order as it sees fit, including an order regulating the conduct of the company's affairs in the future or ordering the purchase of the shares of any shareholders by other shareholders or by the company or that the company be wound up.

A statutory right of action is conferred on subscribers to shares of a Bermuda company against persons (including directors and officers) responsible for the issue of a prospectus in respect of damage suffered by reason of an untrue statement contained in the prospectus, but this confers no right of action against the Bermuda company itself. In addition, subject to any limitations that may be contained in the company's bye-laws, a shareholder may bring a derivative action on behalf of the company to enforce a right of the company (as opposed to a right of its shareholders) against its officers (including directors) for breach of their statutory and fiduciary duty to act honestly and in good faith with a view to the best interests of the company.

The Second Amended and Restated Bye-Laws contain provisions whereby each shareholder (i) agrees that the liability of our officers shall be limited, (ii) agrees to waive any claim or right of action such shareholder might have, whether individually or in the right of the Company, against any director, alternate director, officer, person or member of a committee, resident representative or any of their respective heirs, executors or administrators for any action taken by any such person, or the failure of any such person to take any action, in the performance of his or her duties, or supposed duties, to the Company or otherwise, and (iii) agrees to allow us to indemnify and hold harmless our officers and directors in respect of any liability attaching to such officer and director incurred by him or her as an officer or director of the Company. The restrictions on liability, indemnity and waiver do not extend to any liability of an officer or director for fraud or dishonesty.

Liquidation

Under Bermuda Law, in the event of our liquidation, dissolution or winding up, the holders of common shares are entitled to share in our assets, if any, remaining after the payment of all of our debts and liabilities, subject to any liquidation preference on any outstanding preference shares.

C. MATERIAL CONTRACTS

Attached as exhibits to this annual report are the contracts we consider to be both material and not in the ordinary course of business. Descriptions of these contracts are included within "Item 5. Operating and Financial Review and Prospects - B. Liquidity and Capital Resources" and "Item 5. Operating and Financial Review and Prospects - B. Liquidity and Capital Resources - Equity Issuances." Other than these contracts, we have no material contracts other than those entered in the ordinary course of business. CMB.TECH has identified syndicate banks to refinance all or part of our current outstanding debt

and has entered into credit committee approved commitment letters with these banks as of March 4, 2025 for outstanding borrowings of up to \$2.0 billion, that are subject only to the execution of satisfactory documentation and customary covenants and closing conditions. If we are unable to reach agreements with our existing lenders, we plan on refinancing our existing debt with the committed financing described above, which may have, among others, the expected terms, as follows: Golden Ocean is the borrower, the guarantors are CMB.TECH, and the subsidiaries of Golden Ocean that own the vessels are serving as collateral under the loan. The financing is expected to have a 5-year tenor and a linear age adjusted amortization profile of 20 years. The facility is expected to be priced with an interest rate of SOFR plus a market-based margin.

D. EXCHANGE CONTROLS

The Bermuda Monetary Authority (the "BMA"), must give permission for all issuances and transfers of securities of a Bermuda exempted company like ours, unless the proposed transaction is exempted by the BMA's written general permissions. We have received general permission from the BMA to issue any unissued common shares and for the free transferability of our common shares as long as our common shares are listed on an "appointed stock exchange". Our common shares are listed on the NASDAQ, which is an "appointed stock exchange". Our common shares may therefore be freely transferred among persons who are residents and non-residents of Bermuda.

Although we are incorporated in Bermuda, we are classified as a non-resident of Bermuda for exchange control purposes by the BMA. Other than transferring Bermuda Dollars out of Bermuda, there are no restrictions on our ability to transfer funds into and out of Bermuda or to pay dividends to U.S. residents who are holders of common shares or other non-residents of Bermuda who are holders of our common shares in currency other than Bermuda Dollars.

In accordance with Bermuda law, share certificates may be issued only in the names of corporations, individuals or legal persons. In the case of an applicant acting in a special capacity (for example, as an executor or trustee), certificates may, at the request of the applicant, record the capacity in which the applicant is acting. Notwithstanding the recording of any such special capacity, we are not bound to investigate or incur any responsibility in respect of the proper administration of any such estate or trust.

We will take no notice of any trust applicable to any of our shares or other securities whether or not we had notice of such trust.

As an "exempted company", we are exempt from Bermuda laws which restrict the percentage of share capital that may be held by non-Bermudians, but as an exempted company, we may not participate in certain business transactions including, among other transactions: (i) the acquisition or holding of land in Bermuda (except that (a) required for its business and held by way of lease or tenancy for a term of not more than 50 years or (b) with the consent of the Minister of Finance of Bermuda, by way of lease or tenancy for a term not of not more than 21 years in order to provide accommodation or recreational facilities for our officers and employees) without the express authorization of the Bermuda legislature; (ii) the taking of mortgages on land in Bermuda to secure an amount in excess of \$50,000 without the consent of the Minister of Finance of Bermuda; (iii) the acquisition of any bonds or debentures secured on any land in Bermuda except bonds or debentures issued by the Government of Bermuda or by a public authority in Bermuda; or (iv) the carrying on of business of any kind in Bermuda, except in so far as may be necessary for the carrying on of its business outside Bermuda or under a license granted by the Minister of Finance of Bermuda.

The Bermuda government actively encourages foreign investment in "exempted" entities like us that are based in Bermuda but do not operate in competition with local business. In addition to having no restrictions on the degree of foreign ownership, we are subject neither to taxes on our dividends nor to any exchange controls in Bermuda. In addition, there is no capital gains tax in Bermuda, and profits can be accumulated by us, as required, without limitation.

E. TAXATION

The following discussion summarizes the material United States federal income tax, Bermuda tax and Liberian tax consequences to United States Holders, as defined below, of the purchase, ownership and disposition of common shares. This summary does not purport to deal with all aspects of United States federal income taxation and Bermuda taxation that may be relevant to an investor's decision to purchase our common shares, nor any tax consequences arising under the laws of any state, locality or other foreign jurisdiction.

United States Federal Income Tax Considerations

The following are the material United States federal income tax consequences to us of our activities and to United States Holders of our common shares. The following discussion of United States federal income tax matters is based on the Code,

judicial decisions, administrative pronouncements, and existing and proposed regulations issued by the U.S. Department of the Treasury, all of which are subject to change, possibly with retroactive effect. Except as otherwise noted, this discussion is based on the assumption that we will not maintain an office or other fixed place of business within the United States.

Taxation of Our Shipping Income: In General

We anticipate that we will derive substantially all of our gross income from the use and operation of vessels in international commerce and that this income will principally consist of freights from the transportation of cargoes, charter hire from time or voyage charters and the performance of services directly related thereto, which is referred to herein as "shipping income".

Shipping income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States will be considered to be 50% derived from sources within the United States. Shipping income attributable to transportation that both begins and ends in the United States will be considered to be 100% derived from sources within the United States. We are not permitted by law to engage in transportation that gives rise to 100% United States source income.

Shipping income attributable to transportation exclusively between non-United States ports will be considered to be 100% derived from sources outside the United States. Shipping income derived from sources outside the United States will not be subject to United States federal income tax.

Based upon our current and anticipated shipping operations, our vessels will operate in various parts of the world, including to or from United States ports. Unless exempt from United States federal income taxation under Section 883 of the Code ("Section 883"), we will be subject to United States federal income taxation, in the manner discussed below, to the extent our shipping income is considered derived from sources within the United States.

Application of Section 883

Under the relevant provisions of Section 883, we will be exempt from United States federal income taxation on its United States source shipping income if:

- a. We are organized in a "qualified foreign country", which is one that grants an equivalent exemption from taxation to corporations organized in the United States in respect of the shipping income for which exemption is being claimed under Section 883, and which is referred to herein as the "country of organization requirement"; and
- b. We can satisfy any one of the following two ownership requirements for more than half the days during the taxable year:
 - i. Our stock is "primarily and regularly" traded on an established securities market located in the United States or a qualified foreign country (such as NASDAQ, on which our common shares trade), which is referred to herein to as the "Publicly-Traded Test"; or
 - ii. more than 50% of our stock, in terms of value, is beneficially owned by one or more "qualified shareholders" which, as defined, includes individuals who are residents of a qualified foreign country or foreign corporations that satisfy the country of organization requirement and the Publicly-Traded Test.

The United States Treasury Department has recognized Bermuda, our country of incorporation, as a qualified foreign country. In addition, the United States Treasury Department has recognized each of Bermuda, Liberia and the Marshall Islands, the countries of incorporation of our vessel-owning subsidiaries in 2024, as a qualified foreign country. Accordingly, we and our vessel owning subsidiaries satisfy the country of organization requirement.

Therefore, our eligibility for exemption under Section 883 is wholly dependent upon being able to satisfy one of the stock ownership requirements.

For our 2024 taxable year, we believe that we satisfied the Publicly-Traded Test since our common shares were "primarily and regularly" traded on the NASDAQ, which is an "established securities market" in the United States within the meaning of the Treasury Regulation under Section 883 of the Code. We intend to take this position on our 2024 United States income tax returns. However, we can provide no assurance that we will continue to be able to satisfy these requirements for any future taxable years.

Under the Treasury Regulations, stock of a corporation will be considered to be "primarily traded" on an established securities market in a country (such as NASDAQ) if the number of shares of such class of stock that are traded during any taxable year on

all established securities markets in that country exceeds the number of shares of such class that are traded during that taxable year on established securities markets in any other single country. Currently, our common shares are primarily traded on the NASDAQ Global Select Market for purposes of the "primarily traded" test.

Under the Treasury Regulations, stock of a corporation will be considered to be "regularly traded" on an established securities market if one or more classes of stock of the corporation representing more than 50% of the total combined voting power of all classes of stock entitled to vote and of the total value of the stock of the corporation are listed on such market during the taxable year. Since our common shares, which constitute more than 50% of the total combined voting power and total value of our stock, are listed on the NASDAQ, we will satisfy the listing requirement.

It is further required that, with respect to each class of stock relied upon to meet the listing threshold, (i) such class of stock is traded on the market, other than in de minimis quantities, on at least 60 days during the taxable year or 1/6 of the days in a short taxable year; and (ii) the aggregate number of shares of such class of stock traded on such market is at least 10% of the average number of shares of such class of stock outstanding during such year or as appropriately adjusted in the case of a short taxable year. We believe we will satisfy the foregoing trading frequency and trading volume tests. Even if this were not the case, the Treasury Regulations provide that the foregoing trading frequency and trading volume tests will be deemed satisfied if, as we expect to be the case with our common shares, such class of stock is traded on an established securities market in the United States, such as the NASDAQ, and such stock is regularly quoted by dealers making a market in such stock.

Notwithstanding the foregoing, the Treasury Regulations provide, in pertinent part, that a class of our stock will not be considered to be "regularly traded" on an established securities market for any taxable year in which 50% or more of the vote and value of the outstanding shares of such class of stock are owned, actually or constructively, under specified stock attribution rules, on more than half the days during the taxable year by persons who each own 5% or more of the vote and value of the outstanding shares of such class of stock, which we refer to as the 5 Percent Override Rule.

For purposes of determining the persons that own 5% or more of our common shares ("5% Shareholders"), the Treasury Regulations permit us to rely on those persons that are identified on Schedule 13G and Schedule 13D filings with the SEC, as having a 5% or more beneficial interest in our common shares. The Treasury Regulations further provide that an investment company identified on an SEC Schedule 13G or Schedule 13D filing that is registered under the Investment Company Act of 1940, as amended, will not be treated as a 5% Shareholder for such purposes. We currently do not believe that 5% Shareholders controlled more than 50% of the voting power or value of our common shares for more than half of the days in the 2024 taxable year, and therefore, we should not run afoul of the 5 Percent Override Rule for our most recently taxable year. There can be no assurance that we will continue to satisfy the requirements of the Publicly-Traded Test, including not triggering the 5 Percent Override Rule, in future taxable years.

Taxation in Absence of Section 883 Exemption

To the extent the benefits of Section 883 are unavailable with respect to any item of United States source income, our United States source shipping income, would be subject to a 4% tax imposed by Section 887 of the Code on a gross basis, without the benefit of deductions, which is referred to herein as the "4% gross basis tax regime". Since under the sourcing rules described above, no more than 50% of our shipping income would be treated as being derived from United States sources, the maximum effective rate of United States federal income tax on our shipping income would never exceed 2% under the 4% gross basis tax regime. Historically, the amount of this tax would not have been material.

Gain on Sale of Vessels

Regardless of whether we qualify for exemption under Section 883, we will not be subject to United States federal income taxation with respect to gain realized on a sale of a vessel, provided the sale is considered to occur outside of the United States under United States federal income tax principles. In general, a sale of a vessel will be considered to occur outside of the United States for this purpose if title to the vessel, and risk of loss with respect to the vessel, pass to the buyer outside of the United States. It is expected that any sale of a vessel by us will be considered to occur outside of the United States.

Taxation of United States Holders

The following is a discussion of the material United States federal income tax considerations relevant to an investment decision by a United States Holder, as defined below, with respect to the common shares. This summary is not intended to be applicable to all categories of investors, such as dealers in securities, traders in securities that elect the mark-to-market method of accounting, banks, thrifts or other financial institutions, insurance companies, regulated investment companies, tax-exempt organizations, United States expatriates, persons that hold common shares as part of a straddle, conversion transaction or hedge,

persons who own, directly or constructively, 10% or more of our outstanding stock, persons deemed to sell common shares under the constructive sale provisions of the Code, United States Holders whose "functional currency" is other than the United States dollar, persons required to recognize income for U.S. federal income tax purposes no later than when such income is reported on an "applicable financial statement", persons subject to the "base erosion and anti-avoidance" tax, or holders subject to the alternative minimum tax, each of which may be subject to special rules. In addition, this discussion is limited to persons who hold common shares that are listed on the NASDAQ as "capital assets" (generally, property held for investment) within the meaning of Code Section 1221. This summary does not contain a detailed description of all the United States federal income tax consequences to United States Holders in light of their particular circumstances and does not address the Medicare tax on net investment income, or the effects of any state, local or non-United States tax laws. You are encouraged to consult your own tax advisor concerning the overall tax consequences arising in your own particular situation under United States federal, state, local or foreign law of the ownership of common shares.

As used herein, the term "United States Holder" means a beneficial owner of common shares that is a (i) United States individual citizen or resident, (ii) United States corporation or other United States entity taxable as a corporation, (iii) estate, the income of which is subject to United States federal income taxation regardless of its source, or (iv) trust if a court within the United States is able to exercise primary jurisdiction over the administration of the trust and one or more United States persons have the authority to control all substantial decisions of the trust or (b) the trust has in effect a valid election to be treated as a United States person for U.S. federal income tax purposes.

If a partnership holds common shares, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. If you are a partner in a partnership holding common shares, you are encouraged to consult your own tax advisor regarding the United States federal income tax consequences of owning an interest in a partnership that holds common shares.

Distributions

Subject to the discussion of passive foreign investment companies below, any distributions made by us with respect to common shares to a United States Holder will generally constitute dividends, which may be taxable as ordinary income or "qualified dividend income" as described in more detail below, to the extent of our current or accumulated earnings and profits, as determined under United States federal income tax principles. Distributions in excess of our earnings and profits will be treated first as a non-taxable return of capital to the extent of the United States Holder's tax basis in its common shares on a dollar-for-dollar basis and thereafter as capital gain. Because we are not a United States corporation, United States Holders that are corporations will not generally be entitled to claim a dividends-received deduction with respect to any distributions they receive from us.

Dividends paid on common shares to a United States Holder which is an individual, trust or estate (a "United States Non-Corporate Holder") will generally be treated as "qualified dividend income" that is taxable to such shareholder at preferential United States federal income tax rates provided that (1) common shares are readily tradable on an established securities market in the United States (such as the NASDAQ on which the common shares are listed); (2) we are not a passive foreign investment company for the taxable year during which the dividend is paid or the immediately preceding taxable year (which we do not believe we are, have been since the beginning of our 2004 taxable year, or will be); (3) the United States Non-Corporate Holder has owned common shares for more than 60 days in the 121-day period beginning 60 days before the date on which the common shares become ex-dividend; and (4) certain other requirements are met. Any dividends paid by us which are not eligible for these preferential rates will be taxed as ordinary income to a United States Holder.

If we pay an "extraordinary dividend" on our common shares (generally, a dividend in an amount which is equal to or in excess of 10% of a shareholder's adjusted tax basis (or fair market value in certain circumstances) in the common shares) that is treated as "qualified dividend income," then any loss derived by a United States Individual Holder from the sale or exchange of such common shares will be treated as long-term capital loss to the extent of such dividend.

Sale, Exchange or other Disposition of Our Common Shares

Assuming we do not constitute a passive foreign investment company for any taxable year, a United States Holder generally will recognize taxable gain or loss upon a sale, exchange or other disposition of our common shares in an amount equal to the difference between the amount realized by the United States Holder from such sale, exchange or other disposition and the United States Holder's tax basis in the common shares. Such gain or loss will be capital gain or loss and will be treated as long-term capital gain or loss if the United States Holder's holding period in the common shares is greater than one year at the time of the sale, exchange or other disposition. Long-term capital gains of a United States Non-Corporate Holder are taxable at

preferential United States federal income tax rates. A United States Holder's ability to deduct capital losses is subject to certain limitations.

Special rules may apply to a United States Holder who purchased shares before 2004 and did not make a timely QEF election or a mark-to-market election (as discussed below). Such United States Holders are encouraged to consult their tax advisors regarding the United States federal income tax consequences to them of the disposal of our common shares.

Passive Foreign Investment Company Status and Significant Tax Consequences

Special United States federal income tax rules apply to a United States Holder that holds stock in a foreign corporation classified as a PFIC, for United States federal income tax purposes. In general, we will be treated as a PFIC with respect to a United States Holder if, for any taxable year in which such holder held our common shares, either;

- at least 75% of our gross income for such taxable year consists of passive income (e.g., dividends, interest, capital gains and rents derived other than in the active conduct of a rental business); or
- at least 50% of the average value of the assets held by us during such taxable year produce, or are held for the production of, passive income.

For purposes of determining whether we are a PFIC, we will be treated as earning and owning its proportionate share of the income and assets, respectively, of any of its subsidiary corporations in which it owns at least 25% of the value of the subsidiary's stock. Income earned, or deemed earned, by us in connection with the performance of services would not constitute passive income. By contrast, rental income would generally constitute "passive income" unless we are treated under specific rules as deriving its rental income in the active conduct of a trade or business.

We were a PFIC for United States federal income tax purposes through our 2003 taxable year. United States Holders who held our common shares prior to the 2004 taxable year are encouraged to consult their tax advisors regarding the proper tax treatment of any dispositions of common shares and any distributions by us.

Based on our past and current operations and future projections, we do not believe that we were, are or will be a PFIC with respect to any taxable year, other than the taxable years ending prior to its 2004 taxable year. Our belief is based principally on the position that, for purposes of determining whether we are a PFIC, the gross income we derive or are deemed to derive from the time chartering and voyage chartering activities should constitute services income, rather than rental income. Correspondingly, we believe that such income does not constitute passive income, and the assets that we or our wholly-owned subsidiaries own and operate in connection with the production of such income, in particular, the vessels, do not constitute assets that produce, or are held for the production of, passive income for purposes of determining whether we are a PFIC.

Although there is no direct legal authority under the PFIC rules, we believe that there is substantial legal authority supporting our position consisting of case law and the IRS pronouncements concerning the characterization of income derived from time charters and voyage charters as services income for other tax purposes. However, there is also authority which characterizes time charter income as rental income rather than services income for other tax purposes. Accordingly, in the absence of any legal authority specifically relating to the Code provisions governing PFICs, the IRS or a court could disagree with our position. In addition, although we intend to conduct our affairs in such a manner as to avoid being classified as a PFIC with respect to any taxable year, there can be no assurance that the nature of our operations will not change in the future.

As discussed more fully below, if we were to be treated as a PFIC for any taxable year, a United States Holder would be subject to different taxation rules depending on whether the United States Holder makes an election to treat us as a "Qualified Electing Fund", which is referred to herein as a "QEF election". As an alternative to making a QEF election, a United States Holder should be able to elect to mark-to-market our common shares, which is referred to herein as a "Mark-to-Market election."

Taxation of United States Holders Making a Timely QEF Election

If a United States Holder makes a timely QEF election, which United States Holder is referred to herein as an "Electing United States Holder", the Electing United States Holder must report each year for United States federal income tax purposes its pro rata share of our ordinary earnings and our net capital gain, if any, for our taxable year that ends with or within the taxable year of the Electing United States Holder, regardless of whether or not distributions were received from us by the Electing United States Holder. The Electing United States Holder's adjusted tax basis in the common shares will be increased to reflect taxed but undistributed earnings and profits. Distributions of earnings and profits that had been previously taxed will result in a corresponding reduction in the adjusted tax basis in the common shares and will not be taxed again once distributed. An

Electing United States Holder would generally recognize capital gain or loss on the sale, exchange or other disposition of the common shares. A United States Holder will be eligible to make a QEF election with respect to its common shares only if we provide the United States Holder with annual tax information relating to us. There can be no assurance that we will provide such tax information on an annual basis.

Taxation of United States Holders Making a "Mark-to-Market" Election

Alternatively, if we were to be treated as a PFIC for any taxable year and, as anticipated, the common shares are treated as "marketable stock", a United States Holder would be allowed to make a Mark-to-Market election with respect to our common shares. If that election is made, the United States Holder generally would include as ordinary income in each taxable year that we are a PFIC the excess, if any, of the fair market value of the common shares at the end of the taxable year over such holder's adjusted tax basis in the common shares. The United States Holder would also be permitted an ordinary loss for each such tax year in respect of the excess, if any, of the United States Holder's adjusted tax basis in the common shares over its fair market value at the end of the taxable year, but only to the extent of the net amount previously included in income as a result of the Mark-to-Market election. A United States Holder's tax basis in its common shares would be adjusted to reflect any such income or loss amount. In any taxable year that we are a PFIC, gain realized on the sale, exchange or other disposition of the common shares would be treated as ordinary income, and any loss realized on the sale, exchange or other disposition of the common shares would be treated as ordinary loss to the extent that such loss does not exceed the net mark-to-market gains previously included by the United States Holder.

Taxation of United States Holders Not Making a Timely QEF or Mark-to-Market Election

Finally, if we were to be treated as a PFIC for any taxable year, a United States Holder who does not make either a QEF election or a Mark-to-Market election for that year, who is referred to herein as a "Non-Electing United States Holder", would be subject to special rules with respect to (1) any excess distribution (i.e., the portion of any distributions received by the Non-Electing United States Holder on the common shares in a taxable year in excess of 125% of the average annual distributions received by the Non-Electing United States Holder in the three preceding taxable years, or, if shorter, the Non-Electing United States Holder's holding period for the common shares), and (2) any gain realized on the sale, exchange or other disposition of the common shares. Under these special rules:

- the excess distribution or gain would be allocated ratably over the Non-Electing United States Holders' aggregate holding period for the common shares;
- the amount allocated to the current taxable year and any taxable years before we became a PFIC would be taxed as ordinary income; and
- the amount allocated to each of the other taxable years would be subject to tax at the highest rate of tax in effect for the applicable class of taxpayer for that year, and an interest charge for the deemed tax deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year.

These penalties would not apply to a pension or profit sharing trust or other tax-exempt organization that did not borrow funds or otherwise utilize leverage in connection with its acquisition of the common shares. If a Non-Electing United States Holder who is an individual dies while owning the common shares, the successor of such deceased Non-Electing United States Holder generally would not receive a step-up in tax basis with respect to such stock.

PFIC Annual Filing Requirements

If we were to be treated as a PFIC, a United States Holder will generally be required to file an information return on an IRS Form 8621 with respect to its ownership of our common stock.

United States Federal Income Taxation of "Non-U.S. Holders"

A beneficial owner of our common shares that is not a United States Holder (and not an entity treated as a partnership) is referred to herein as a "Non-U.S. Holder". If you are a partner in a partnership (or an entity or arrangement treated as a partnership for United States federal income tax purposes) holding common shares, you should consult your own tax advisor regarding the tax consequences to you of the partnership's ownership of common shares.

Distributions

Distributions we pay to a Non-U.S. Holder will not be subject to United States federal income tax or withholding tax if the Non-U.S. Holder is not engaged in a United States trade or business. If the Non-U.S. Holder is engaged in a United States trade

or business, our distributions will generally be subject to United States federal income tax, on a net income basis at the regular graduated rates, to the extent they constitute income effectively connected with the Non-U.S. Holder's United States trade or business. However, distributions paid to a Non-U.S. Holder that is engaged in a trade or business may be exempt from taxation under an income tax treaty if the income arising from the distribution is not attributable to a United States permanent establishment maintained by the Non-U.S. Holder. A Non-U.S. Holder that is a corporation also may be subject to a branch profits tax at a rate of 30% (or such lower rate specified by an applicable income tax treaty) on such effectively connected dividends, as adjusted for certain items.

Sale, Exchange or Other Disposition of Common Shares

Non-U.S. Holders will generally not be subject to U.S. federal income tax or withholding tax on any gain realized upon the sale, exchange or other disposition of our common shares unless: (i) the gain is "effectively connected" with the Non-U.S. Holder's conduct of a trade or business in the United States or, if the Non-U.S. Holder is entitled to the benefits of an applicable U.S. income tax treaty with respect to that gain, that gain is attributable to a permanent establishment maintained by the Non-U.S. Holder in the United States or (ii) the Non-U.S. Holder is an individual who is present in the United States for 183 days or more during the taxable year of disposition and other conditions are met.

If the Non-U.S. Holder is engaged in a U.S. trade or business for U.S. federal income tax purposes, the income from the common shares, including dividends on the underlying common shares and the gain from the sale, exchange or other disposition of the common shares that is "effectively connected" with the conduct of that U.S. trade or business, will generally be subject to U.S. federal income tax in the same manner as discussed in the previous section relating to the U.S. federal income taxation of United States Holders. In addition, in the case of a corporate Non-U.S. Holder, such Non-U.S. Holder's earnings and profits that are attributable to the "effectively connected" income, subject to certain adjustments, may be subject to an additional U.S. federal branch profits tax at a rate of 30% or at a lower rate as may be specified by an applicable U.S. income tax treaty.

Backup Withholding and Information Reporting

In general, dividend payments, or other taxable distributions, made within the United States to a holder of common shares will be subject to information reporting requirements. Such payments will also be subject to "backup withholding" if paid to a non-corporate United States Holder who:

- fails to provide an accurate taxpayer identification number;
- is notified by the IRS that he has failed to report all interest or dividends required to be shown on his United States federal income tax returns; or
- in certain circumstances, fails to comply with applicable certification requirements.

If a holder sells his common shares to or through a United States office of a broker, the payment of the proceeds is subject to both United States information reporting and backup withholding unless the holder establishes an exemption. If a holder sells his common shares through a non-United States office of a non-United States broker and the sales proceeds are paid to the holder outside the United States, then information reporting and backup withholding generally will not apply to that payment. However, United States information reporting requirements, but not backup withholding, will apply to a payment of sales proceeds, including a payment made to a holder outside the United States, if the holder sells his common shares through a non-United States office of a broker that is a United States person or has some other contacts with the United States, unless the broker has documentary evidence in its records that the holder is not a United States person and certain other conditions are met, or the holder otherwise establishes an exemption.

Non-U.S. Holders may be required to establish their exemption from information reporting and backup withholding by certifying their status on an applicable IRS Form W-8.

Backup withholding is not an additional tax. Rather, a taxpayer generally may obtain a refund of any amounts withheld under backup withholding rules that exceed the taxpayer's income tax liability by filing a refund claim with the IRS.

Other U.S. Information Reporting Obligations

Individuals who are United States Holders (and to the extent specified in applicable Treasury Regulations, certain United States entities) who hold "specified foreign financial assets" (as defined in Section 6038D of the Code) are required to file IRS Form 8938 with information relating to the asset for each taxable year in which the aggregate value of all such assets exceeds \$75,000 at any time during the taxable year or \$50,000 on the last day of the taxable year (or such higher dollar amount as prescribed by applicable Treasury Regulations). Specified foreign financial assets would include, among other assets, the common shares,

unless the common shares are held through an account maintained with a United States financial institution. Substantial penalties apply to any failure to timely file IRS Form 8938, unless the failure is shown to be due to reasonable cause and not due to willful neglect. Additionally, in the event an individual United States Holder (and to the extent specified in applicable Treasury Regulations a United States entity) that is required to file IRS Form 8938 does not file such form, the statute of limitations on the assessment and collection of United States federal income taxes of such holder for the related tax year may not close until three years after the date that the required information is filed. United States Holders (including United States entities) are encouraged to consult with their own tax advisors regarding their reporting obligations under this legislation.

Bermuda Taxation

During 2024, we were not subject to taxation under the laws of Bermuda. We are subject to Bermuda Corporate Income taxes from January 1, 2025.

As of the date of this annual report, distributions to us by our subsidiaries are not subject to any Bermuda tax. Further, currently, there are no withholding taxes payable in Bermuda on dividends distributed by us to our shareholders.

As of the date of this document, there is no Bermuda withholding tax, capital gains tax, capital transfer tax, estate duty or inheritance tax payable by non-residents of Bermuda in respect of capital gains realized on a disposition of the Company's common shares or in respect of distributions by us with respect to the Company's common shares. This does not, however, apply to the taxation of persons ordinarily resident in Bermuda. Bermuda holders should consult their own tax advisors regarding possible Bermuda taxes with respect to dispositions of, and distributions on, the Company's common shares.

The Minister of Finance in Bermuda under The Exempted Undertaking Tax Protection Act 1966, as amended (the "Tax Protection Act") has granted the Company a tax exempt status until March 31, 2035, under which no income taxes or other taxes (other than duty on goods imported into Bermuda and payroll tax in respect of any Bermuda-resident employees) are payable by us in Bermuda. If the Minister of Finance in Bermuda does not grant a new exemption or extend the current tax exemption, and if the Bermudian Parliament passes legislation imposing taxes on exempted companies, we may become subject to various taxation in Bermuda after March 31, 2035.

On December 27, 2023 the Bermuda Corporate Income Tax Act of 2023 (the "Corporate Income Tax Act") became law in response to the OECD's Pillar Two global minimum tax initiative to impose a 15% corporate income tax. The tax is effective beginning on or after January 1, 2025. The Bermuda corporate income tax regime will supersede the previously granted tax assurances which provided an exemption from corporate income taxes until March 31, 2035. Subject to certain exceptions, Bermuda entities that are part of a multinational group will be in scope of the provisions of the Corporate Income Tax Act if, with respect a fiscal year, such group has annual revenue of €750 million or more in the consolidated financial statements of the ultimate parent entity for at least two of the four fiscal years immediately prior to such fiscal year ("Bermuda Constituent Entity Group"). Further, Bermuda Constituent Entity's international shipping income and qualified ancillary international shipping income shall be excluded from the computation of its taxable income or loss. In order for a Bermuda Constituent Entity's international shipping income and ancillary international shipping income to qualify for the exclusion from its net taxable income or loss under this section, the Bermuda Constituent Entity must demonstrate that the strategic or commercial management of all ships concerned is effectively carried on from or within Bermuda. We believe that we will qualify for international shipping income exclusion.

Where corporate income tax is chargeable to a Bermuda Constituent Entity Group, the amount of corporate income tax chargeable to a Bermuda Constituent Entity Group for a fiscal year shall be 15% of the net taxable income of the Bermuda Constituent Entity Group, less tax credits applicable under the Corporate Income Tax Act (foreign tax credits) or as prescribed by regulation by the Minister of Finance of Bermuda (qualified refundable tax credits).

Qualified refundable tax credits, to be developed in 2025, will be incorporated into the new corporate income tax regime to provide incentives for investment by international companies. The Minister of Finance of Bermuda has stated that investments could be encouraged in areas such as infrastructure, education, healthcare, innovation and housing. As Bermuda continues to participate in the global minimum tax initiative, it will closely track the manner in which this is implemented around the world.

There is no income tax treaty between the United States and Bermuda pertaining to the taxation of income other than applicable to insurance enterprises.

Liberian Taxation

Under the Consolidated Tax Amendments Act of 2010, our Liberian subsidiaries should be considered non-resident Liberian corporations which are wholly exempted from Liberian taxation effective as of 1977. All Liberian subsidiaries were re-domiciled to Bermuda in 2024 and as of December 31, 2024, we had no companies registered in Liberia.

Marshall Islands Taxation

Because we do not (and do not expect in the future that we will) conduct business or operations in the Republic of the Marshall Islands, we are not subject to income, capital gains, profits or other taxation under current Marshall Islands law. All Marshall Islands subsidiaries were re-domiciled to Bermuda in 2024 and as of December 31, 2024, we had no companies registered in Marshall Islands.

Changes in Global Tax Laws

In October 2021, over 135 jurisdictions had agreed to update the international tax system to address concerns over unequal distribution of income. On December 12, 2022, the European Union member states agreed to implement the OECD's Pillar Two global corporate minimum tax rate of 15% on companies with revenues of at least €750 million effective from 2024. Various countries have either adopted implementing legislation or are in the process of drafting such legislation to amend their local tax laws. The rules have two main charging provisions: Income Inclusion Rule and Undertaxed Profit Rule.

The Income Inclusion Rule applies on a top-down basis, giving the ultimate parent entity country, or an intermediate parent entity country, the right to collect top-up tax for underlying foreign operations, unless the tax is collected in the foreign country. Bermuda, where we are incorporated, has not to date proposed to implement BEPS Pillar Two rules, and therefore Income Inclusion Rule will not be applicable to Golden Ocean Group Limited and is not expected to apply for any intermediary parent entity in the Group. Norway has implemented the Income Inclusion Rule effective from 2024, but the Golden Ocean group entities located in Norway is not parent to any subsidiaries.

Undertaxed Profit Rule means that any shortfall in tax will be collected in a jurisdiction that has implemented the under taxed payments rule and in which the Group has operating subsidiaries. Under our current group structure, Undertaxed Profit Rule will be applicable for Singapore and Norway companies. We do not expect Undertaxed Profit rules to be implemented before 2025 for either Singapore or Norway.

Further, in accordance with BEPS Pillar Two rules, qualified international shipping income and qualified ancillary international shipping income shall be excluded from the computation of taxable income or loss, providing that commercial or strategic management is carried out from the jurisdiction where the entity is located.

The Company is in the process of evaluating the impact of BEPS Pillar Two and expects to apply the international shipping exemption.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We interpret market risk as the risk arising from fluctuations in interest rates, foreign currency exchange rates, commodity prices and other factors affecting the rate, index or price of an underlying financial instrument.

Interest Rate Risk

We are exposed to interest rate fluctuations primarily due to our floating interest rate bearing long-term debt. The international dry bulk industry is a capital-intensive industry, which requires significant amounts of financing, typically provided in the form of secured long-term debt. Our current bank financing agreements bear floating interest rates, typically three-month USD SOFR. Significant adverse fluctuations in floating interest rates could adversely affect our operating and financial performance and our ability to service our debt.

From time to time, we may take positions in interest rate derivative contracts to manage the risk associated with fluctuations in interest payments resulting from fluctuations of the underlying floating interest rates of our long-term debt. Adverse fluctuations in floating interest rates could adversely affect our free cash position as we may be required to secure cash as collateral, under our interest rate derivative contracts.

We are exposed to credit risk in the event of non-performance by the counterparties of our interest rate derivative contracts. In order to mitigate the credit risk, we enter into derivative transactions with counterparties, usually well-established banks, which have reliable credit ratings. The possibility of a counterparty contractual non-performance event to materialize is considered remote and hence, the credit risk is considered minimal.

Our variable rate borrowings as of December 31, 2024 amounted to \$1,302.5 million compared to \$1,370.1 million as of December 31, 2023 and bear interest at SOFR plus a margin.

Interest Rate Swap Agreements

Our swaps are intended to reduce the risk associated with fluctuations in interest rates payments whereby and as of December 31, 2024, the floating rate on a total notional principal amount of \$550 million (December 31, 2023: \$650 million) was swapped to fixed rate.

As at December 31, 2024, a notional principal amount of \$550 million, with SOFR as reference rate, had a weighted average fixed interest rate of 2.20%. As at December 31, 2023, a notional principal amount of \$650 million, with SOFR as reference rate, had a weighted average fixed interest rate of 2.07%.

As at December 31, 2024 and 2023, the carrying value of the derivatives which represents their fair value is as follows:

<i>(in thousands of \$)</i>	2024	2023
Interest rate swaps - asset positions	27,261	27,930
Interest rate swaps - liability positions	—	—

During 2024, we recorded a net gain on interest rate swaps of \$14.8 million in the consolidated statements of operations, which resulted from unrealized loss of \$0.7 million (change in fair value), offset by realized gain (interest expense) of \$15.5 million. During 2023, we recorded a net gain on interest rate swaps of \$10.8 million in the consolidated statements of operations, which resulted from unrealized loss of \$4.9 million (change in fair value), offset by realized gain (interest expense) of \$15.7 million.

As at December 31, 2024, our estimated interest expense until the maturity of our floating-rate long-term debt based on the applicable three-month USD SOFR plus the relevant margin of applicable to each of our floating-rate credit facilities is tabled below. The table below also sets forth the sensitivity of our estimated interest expense to a 100 basis point increase in the applicable three-month USD SOFR.

<i>(in thousands of \$)</i>	Estimated interest expense	Estimated interest expense - increase of 100 basis points in floating rate	Sensitivity
2025	78,810	91,699	12,889
2026	69,711	81,446	11,735
2027	56,929	66,939	10,010
2028	39,178	46,443	7,265
2029	16,159	19,333	3,174
Thereafter	15,723	18,436	2,713
	276,510	324,296	47,786

Foreign Currency Risk

The majority of our transactions, assets and liabilities are denominated in United States dollars, our functional currency. However, we incur expenditure in currencies other than the functional currency, mainly in Norwegian kroner and Singapore dollars. There is a risk that currency fluctuations in transactions incurred in currencies other than the functional currency will have a negative effect of the value of our cash flows. We may enter into foreign currency swaps to mitigate such risk exposures. The counterparties to such contracts are major banking and financial institutions. Credit risk exists to the extent that the counterparties are unable to perform under the contracts but this risk is considered remote as the counterparties are, in our opinion, well established banks.

Foreign currency Swap Agreements

As of December 31, 2024, we had contracts to swap USD to NOK for a notional amount of \$1.8 million. As of December 31, 2023, we had contracts to swap USD to NOK for a notional amount of \$2.1 million. As of December 31, 2024, the fair value of our swaps was a liability of \$0.1 million (2023: receivable of \$0.1 million). In 2024, we recorded total net loss on our foreign currency swaps of \$0.2 million (2023: gain of \$0.1 million).

Inflation

Inflation has only had a moderate effect on our expenses given current economic conditions. Significant global inflationary pressures (such as various economic stimuli and the war between Russia and the Ukraine) increase operating, voyage, general and administrative, and financing costs. However, in the event of a shipping downturn, costs subject to inflation can usually be controlled as shipping companies typically monitor costs to preserve liquidity and encourage suppliers and service providers to lower rates and prices.

Inflationary effects were immaterial in the period ended December 31, 2024. In particular, we have observed inflation affecting ship operating expenses, mainly crew costs and spares; however, these effects were not material in comparison to our total ship operating expenses.

The impact that inflation will have on our future financial and operational results, which could be material, will depend on the overall macroeconomic environment, duration and severity of the Russian-Ukrainian War, and the imposition of tariffs. Going forward, we expect an annual increase in crew expenses of up to 2.5% due to among other factors, increased wage pressures and Russian seafarers no longer being present in the global pool, decreasing the overall number of seafarers in the world. There will, therefore, be an increased demand for qualified crew, and this has and will continue to put inflationary pressure on crew costs. Additionally, we expect an annual increase of up to 4.5% for spares due to factors such as shortage of raw materials, global supply chain pressures, regulatory compliance and tariffs. Tariffs can increase the cost of imported goods and materials, thereby contributing to higher operational costs. To stay compliant with environmental requirements and meet and exceed the demand from charterers and terminals, we expect to incur additional drydock costs per vessel of up to approximately 10% in 2025 as a result of increased yard work scope and docking spares. Services are also expected to increase globally by up to 4.5% on an annual basis due to tight labour markets, growing wages, and the impact of tariffs on service-related imports.

Commodity Price Risk

Fuel costs represent the largest component of our voyage expenses. An increase in the price of fuel may adversely affect our profitability if these increases cannot be passed onto customers. The price and supply of fuel is unpredictable and fluctuates as a result of events outside our control, including geo-political developments, supply and demand for oil and gas, actions by members of OPEC and other oil and gas producers, war and unrest in oil producing countries and regions, regional production patterns and environmental concerns and regulations.

Bunker Swap Agreements

From time to time we may enter into contracts of affreightment and time charter contracts with fixed bunker prices on redelivery. We are exposed to fluctuations in bunker prices, when the contracts of affreightment and time charter contracts are based on an assumed bunker price for the trade. There is no guarantee that a bunker swap agreement removes all the risk from the bunker exposure, due to possible differences in location and timing of the bunkering between the physical and financial position. The counterparties to such contracts are major banking and financial institutions, and fuel suppliers. Credit risk exists to the extent that the counterparties are unable to perform under the contracts but this risk is considered remote as the counterparties are, in our opinion, usually well-established banks or other well-known institutions in the market.

As of December 31, 2024, we had no outstanding bunker swap agreements (December 31, 2023: outstanding bunker swap agreements for about 4.2 thousand metric tonnes). In 2024, we recorded a total net gain on our bunker swaps of \$0.3 million. In 2023, we recorded total net gain on our bunker swaps of \$1.6 million.

Spot Market Rate Risk

The cyclical nature of the dry bulk shipping industry causes significant increases or decreases in the revenue that we earn from our vessels, particularly those vessels that operate in the spot market.

Forward Freight Agreements

We take positions from time to time in the freight forward market, either as a hedge to a physical contract or as a speculative position. All such contracts include a margin maintenance requirement based on marking the contract to market and are fully settled in cash through what we consider reputable clearing houses on a daily basis, as such there are no balances relating to FFAs on the Consolidated Balance Sheets. Generally, freight derivatives may be used to hedge a vessel owner's exposure to the charter market for a specified route and period of time. By taking positions in FFA or other derivative instruments, we could suffer losses in the settling or termination of these agreements. This could adversely affect our results of operation and cash flow.

In 2024, we recorded a net gain on our portfolio of FFA of \$0.3 million (2023: net loss of \$1.1 million).

Please see Note 27, "Financial Assets and Liabilities", to our Consolidated Financial Statements included herein for additional information on our financial instruments.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

None.

ITEM 15. CONTROLS AND PROCEDURES

a) Disclosure Controls and Procedures

Management assessed the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) of the Securities Exchange Act of 1934, as of the end of the period covered by this annual report as of December 31, 2024. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective as of the evaluation date.

b) Management's annual report on internal control over financial reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) promulgated under the Exchange Act of 1934.

Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Exchange Act of 1934 as a process designed by, or under the supervision of, our principal executive and principal financial officers and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of the Company's management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted the evaluation of the effectiveness of the Company's internal controls over financial reporting using the control criteria framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in its report entitled Internal Control-Integrated Framework (2013).

Our management with the participation of our principal executive officer and principal financial officer assessed the effectiveness of the design and operation of our internal controls over financial reporting pursuant to Rule 13a-15 of the Exchange Act of 1934, as of December 31, 2024. Based upon that evaluation, our management with the participation of our principal executive officer and principal financial officer concluded that our internal controls over financial reporting are effective as of December 31, 2024.

The effectiveness of our internal control over financial reporting as of December 31, 2024 has been audited by PricewaterhouseCoopers AS, as an independent registered accounting firm, as stated in their report which appears herein.

c) Attestation report of the registered public accounting firm

The independent registered public accounting firm that audited the consolidated financial statements, PricewaterhouseCoopers AS, has issued an attestation report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2024, appearing under Item 18, "Financial Statements", and such report is incorporated herein by reference.

d) Changes in internal control over financial reporting

There were no changes in our internal controls over financial reporting that occurred during the period covered by this annual report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16. [Reserved]

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

The Board has determined that Mr. O'Shaughnessy, who is an independent director, is our audit committee's financial expert.

ITEM 16B. CODE OF ETHICS

We have adopted a code of ethics that applies to all entities controlled by us and all of our employees, directors, officers and agents. We have posted a copy of our code of ethics, as well as waivers to our code of ethics, if any, on our website at www.goldenocan.bm. We will provide any person, free of charge, a copy of our code of ethics upon written request to our registered office.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Our principal accountant for 2024 and 2023 was PricewaterhouseCoopers AS (PCAOB ID 01318). The following table sets forth for the two most recent fiscal years the fees paid or accrued for audit and services provided by PricewaterhouseCoopers AS.

<i>(in thousands of \$)</i>	2024	2023
Audit Fees (a)	855	855
Audit-Related Fees (b)	5	5
Tax Fees (c)	—	—
All Other Fees (d)	2	—
Total	862	860

(a) Audit Fees

Audit fees represent professional services rendered for the audit of our annual financial statements and services provided by the principal accountant in connection with statutory and regulatory filings or engagements.

(b) Audit-Related Fees

Audit-related fees consisted of assurance and related services rendered by the principal accountant related to the performance of the audit or review of our financial statements which have not been reported under Audit Fees above.

(c) Tax Fees

Tax fees represent fees for professional services rendered by the principal accountant for tax compliance, tax advice and tax planning.

(d) All Other Fees

All other fees include services other than audit fees, audit-related fees and tax fees set forth above.

Our Board has adopted pre-approval policies and procedures in compliance with paragraph (c)(7)(i) of Rule 2-01 of Regulation S-X that require the Board to approve the appointment of our independent auditor before such auditor is engaged and approve each of the audit and non-audit related services to be provided to us by such auditor under such engagement. All services provided by the principal auditor in 2024 and 2023 were approved by our Board pursuant to the pre-approval policy.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

On October 4, 2022, we introduced a share buy-back program (the “2022 share buy-back program”) of up to \$100.0 million to purchase up to an aggregate of 10,000,000 of our common shares for a period up to 12 months. In each of October 2023 and October 2024, the 2022 share buy-back program was extended for an additional 12 months with the 2022 share buy-back program currently expiring in October 2025. Under the 2022 share buy-back program we acquired on the OSE and on the NASDAQ the following shares: (i) in 2024, an aggregate of 625,000 at a total purchase price of \$5.7 million, (ii) in 2022 (since inception) and 2023, an aggregate of 1,507,328 of our common shares at a total aggregate purchase price of \$11.8 million. As of the date of this annual report, we have bought back an aggregate of 2,132,328 shares at a total aggregate purchase price of \$17.4 million and thus we have 7,867,672 of remaining authorization available under our 2022 share buy-back program.

The below table presents a summary of the common shares repurchased by the Company under the 2022 share buy-back program for the year ended December 31, 2024.

Period	Issuer Purchases of Equity Securities				(c) Total Number of Common Shares Purchased as Part of Publicly Announced Plans or Program	(d) Maximum Number (or Approximate Dollar Value) of Common Shares that May Yet Be Purchased Under the Plans or Programs (1)(2)
	(a) Total Number of Common Shares Purchased	(b) Average Price Paid per Common Share	OSE	NASDAQ		
			(in NOK)	(in USD)		
January 1, 2024 – January 31, 2024	—	—	—	—	—	8,492,672
February 1, 2024 – February 29, 2024	—	—	—	—	—	8,492,672
March 1, 2024 – March 31, 2024	—	—	—	—	—	8,492,672
April 1, 2024 – April 30, 2024	—	—	—	—	—	8,492,672
May 1, 2024 – May 31, 2024	—	—	—	—	—	8,492,672
June 1, 2024 – June 30, 2024	—	—	—	—	—	8,492,672
July 1, 2024 – July 31, 2024	—	—	—	—	—	8,492,672
August 1, 2024 – August 31, 2024	—	—	—	—	—	8,492,672
September 1, 2024 – September 30, 2024	—	—	—	—	—	8,492,672
October 1, 2024 – October 31, 2024	—	—	—	—	—	8,492,672
November 1, 2024 – November 30, 2024	—	—	—	—	—	8,492,672
December 1, 2024 – December 31, 2024	500,000	125,000	101.23	9.21	625,000	7,867,672
Total	500,000	125,000	101.23	9.21	625,000	7,867,672

(1) On October 4, 2022, the Company announced the 2022 share buy-back program of up to \$100.0 million to purchase up to an aggregate of 10,000,000 of our common shares for a period up to 12 months. In October 2023 and October 2024, the share buy-back program was extended for an additional 12 months. The specific timing and amounts of the repurchases will be in the sole discretion of the Company and may vary based on market conditions and other factors. We are not obligated under the terms of the program to repurchase any of our common shares.

(2) From January 1, 2025 to the date of this annual report, the Company did not repurchase any shares pursuant to the 2022 share buy-back program.

See Note 24, "Share Capital, Treasury Shares and Dividends", to our audited Consolidated Financial Statements included herein for more information.

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable.

ITEM 16G. CORPORATE GOVERNANCE

Pursuant to the NASDAQ listing standards available to foreign private issuers, we are not required to comply with all of the corporate governance practices followed by U.S. companies under the NASDAQ listing standards. The significant differences between our corporate governance practices and the NASDAQ standards applicable to listed U.S. companies are set forth below.

Independence of Directors. NASDAQ requires that a U.S. listed company maintain a majority of independent directors. We are exempt from certain NASDAQ requirements regarding independence of directors. Consistent with Bermuda law, our board of directors is not required to be composed of a majority of independent directors. Our Board is currently comprised of six directors, four of whom are independent, including Ola Lorentzon, James O'Shaughnessy, Cato Stonex and Tonesan Amissah.

Executive Sessions. NASDAQ requires that independent directors meet regularly in executive sessions at which only independent directors are present. While Bermuda law and our Bye-laws do not require independent directors to regularly hold executive sessions, our independent directors regularly hold such sessions from time to time.

Nomination of Directors. NASDAQ requires that independent directors select or recommend nominees for directors. As permitted under Bermuda law and our Second Amended and Restated Bye-Laws, we do not currently require that independent directors select or recommend nominees for directors. Our Board, consisting of both independent and non-independent directors, is responsible for identifying and recommending potential candidates to become board members and recommending directors for appointment to board committees.

Audit Committee. NASDAQ requires, among other things, that a listed U.S. company have an audit committee consisting solely of independent directors who also satisfy the requirements of SEC Rule 10A-3 and who can read and understand fundamental financial statements. NASDAQ also requires that the audit committee have at least three members. As permitted under Bermuda law and our Second Amended and Restated Bye-Laws, our audit committee consists of one member of our Board, Mr. James O'Shaughnessy, the Audit Committee financial expert, who currently meet the independence requirements of SEC Rule 10A-3. We have determined that a director may sit on the board of three or more audit committees and such simultaneous service would not impair the ability of such member to effectively serve on the Board or Audit Committee. For more information, please see "Item 6.A. Directors and Senior Management."

Compensation Committee. NASDAQ requires that a listed U.S. company have a compensation committee composed solely of independent directors and having at least two members. NASDAQ requires that the compensation committee must determine, or recommend to the full board for determination, the compensation of the chief executive officer and all other executive officers. As permitted under Bermuda law and our Second Amended and Restated Bye-Laws, we do not currently have a compensation committee and compensation of executive officers is not required to be determined by a committee composed of independent members.

Related Party Transactions. NASDAQ requires that a listed U.S. company conduct appropriate review and oversight of all related party transactions for potential conflict of interest situations on an ongoing basis by the company's audit committee or another independent body of the Board. As permitted under Bermuda law and our Second Amended and Restated Bye-Laws, our directors are not prohibited from being a party to, or otherwise interested in, any transaction or arrangement with us or in which we are otherwise interested, provided that the director makes proper disclosure of same as required by our Second Amended and Restated Bye-Laws and Bermuda law.

Proxy Materials. NASDAQ requires that a listed U.S. company solicit proxies and provide proxy statements for all shareholder meetings. Such company must also provide copies of its proxy solicitation to NASDAQ. As permitted under Bermuda law and our Second Amended and Restated Bye-Laws, we do not currently solicit proxies or provide proxy materials to NASDAQ. Our Second Amended and Restated Bye-Laws also require that we notify our shareholders of meetings no less than five (5) days before the meeting.

Share Issuance. In lieu of obtaining shareholder approval prior to the issuance of securities or the adoption of equity compensation plans or material amendments to such equity compensation plans, consistent with Bermuda law and our Second Amended and Restated Bye-Laws, our Board approves share issuances and the adoption of and material amendments to equity compensation plans.

Quorum. NASDAQ rules provide that the minimum quorum requirement for a meeting of shareholders is 33 1/3% of the outstanding common shares. The Company follows applicable Bermuda laws with respect to quorum requirements. The Company's quorum requirement is set forth in its Second Amended and Restated Bye-Laws, which provide that a quorum for the transaction of business at any meeting of shareholders is two or more shareholders either present in person or by proxy throughout the meeting. If we only have one shareholder, then one shareholder present in person or proxy shall constitute the necessary quorum.

ITEM 16H. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 16I. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

ITEM 16J. INSIDER TRADING POLICIES

Our Board of Directors has adopted an insider trading policy governing the purchase, sale and other dispositions of our securities by our officers, directors and employees. Copies of our insider trading policies are included as exhibits to this annual report.

ITEM 16K. CYBERSECURITY

Risk management and strategy

The Company's cybersecurity risk management program consists of:

- i. An overall strategy to develop, improve and maintain its cybersecurity processes, policies, and governance frameworks that have been integrated into our existing risk management framework
- ii. Detailed set of cybersecurity policies and procedures
- iii. Investment in IT security and a cybersecurity team
- iv. Engaging external cybersecurity service providers
- v. Leveraging third-party cybersecurity tools and technologies
- vi. Robust training plan for all its employees
- vii. Governance - Board and management oversight

The underlying control framework of the Company's cybersecurity program is based on recognized best practices and standards set by the U.S. National Institute of Standards and Technology, which organizes cybersecurity risks into five categories: identify, protect, detect, respond and recover.

The Company has established policies and procedures for all key aspects of its cybersecurity program including an information security policy, password policy, incident management policy, third-party security management policy, business continuity plans, cyber incident response plans and information security management system contingency plans.

As part of the Company's cybersecurity strategy, it continues to expand its investments in IT security, including to identify and protect critical assets, strengthen, monitor and alert its information security management system and engage with cybersecurity experts. The Company has a Chief Information Security Officer ("CISO"), who has served within the IT department of related parties for over 20 years and is a Certified Cyber Risk Officer. The Company holds regular cybersecurity meetings, led by its CISO who is employed by related party Front Ocean Management AS, to assess and manage cybersecurity threats and to provide cybersecurity updates to senior management and the Board of Directors. For a description of the relationship with Front Ocean Management AS, please see "Item 7. Major Shareholders and Related Party Transactions - B. Related Party Transactions."

The Company has engaged a third-party IT cybersecurity firm to help integrate its information security management system to protect the Company's operations. In addition, the third-party firm conducts risk and vulnerability assessments to identify cybersecurity weaknesses and recommend enhancements.

The Company leverages several third-party tools and technologies as part of its efforts to enhance its cybersecurity functions. This includes a third-party security firm which performs continuous vulnerability assessments on the Company's IT infrastructure. As part of the Company's established cybersecurity governance framework, the Company also assesses potential cybersecurity threats related to the third-party providers and counterparties.

The Company has a robust training program for its employees that covers the Company's cybersecurity risk management program and other Company policies and practices to ensure compliance therewith and to promote best practices. The Company regularly provides cybersecurity awareness trainings to employees to increase awareness of cybersecurity threats.

Governance

The Board of Directors considers cybersecurity risk as part of its risk oversight function and oversees the Company's cybersecurity risk exposures and the steps taken by management to monitor and mitigate cybersecurity risks. The Board of Directors ensures allocation and prioritization of resources and overall strategic direction for cybersecurity and ensures alignment with the Company's overall strategy.

The Board of Directors has delegated the day-to-day oversight of cybersecurity and other technology risks to the CISO, who closely coordinates with the IT and compliance departments and engages with third-party cybersecurity providers.

The CISO, working together with certain members of management and the IT department, is responsible for assessing and managing cybersecurity threats and for reporting cybersecurity threats and updates, including updates on monitoring cybersecurity incidents and strategies to prevent cybersecurity threats, to senior management, and to the Board of Directors on a quarterly basis or more often as needed.

Cybersecurity Threats

For the year ended December 31, 2024 through the date of this annual report, the Company is not aware of any material risks from cybersecurity threats, that have materially affected or are reasonably likely to materially affect the Company, including its business strategy, results of operations or financial condition. Please also see Item 3. Key Information - D. Risk Factors - "We rely on our information security management system to conduct our business, and failure to protect this system against security breaches could adversely affect our business and results of operations, including on our vessels. Additionally, if this system fails or becomes unavailable for any significant period of time, our business could be harmed."

PART III

ITEM 17. FINANCIAL STATEMENTS

Not applicable.

ITEM 18. FINANCIAL STATEMENTS

Consolidated Statements of Changes in Equity for the years ended December 31, 2024, 2023 and 2022	F-9
Notes to Consolidated Financial Statements	F-10

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Golden Ocean Group Limited

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Golden Ocean Group Limited and its subsidiaries (the “Company”) as of December 31, 2024 and 2023, and the related consolidated statements of operations, consolidated statements of cash flows and consolidated statements of changes in equity for each of the three years in the period ended December 31, 2024, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 15(b). Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or

disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Assessment of impairment indicators for owned vessels and right of use assets

As described in Notes 2, 15 and 17 to the consolidated financial statements, the Company's Vessels and equipment, net, and Finance leases, right of use assets, net, were USD 2,959,129 thousand and USD 53,656 thousand, respectively, as of December 31, 2024. Management reviews the carrying values of the vessels and right of use assets for potential impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may no longer be recoverable. Indicators of impairment are identified based on a combination of factors which includes significant management's judgments and assumptions such as development of second hand vessel values based on external appraisals of the ships, development of forward freight rates and spot rates.

The principal considerations for our determination that performing procedures relating to the assessment of impairment indicators for owned vessels and right of use assets is a critical audit matter are that there was significant judgment by management when assessing the impairment indicators, which in turn led to a high degree of auditor judgment, effort and subjectivity in performing procedures and evaluating audit evidence obtained relating to management's significant assumptions, such as development of second hand vessel values based on external appraisals of the ships, development of forward freight rates and spot rates.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's impairment indicator assessment for owned vessels and right of use assets including controls over development of second hand vessel values based on external appraisals of the ships, development of forward freight rates and spot rates. These procedures also included, among others, testing management's process for assessing impairment indicators; testing the completeness, accuracy, and relevance of underlying data and evaluating the significant assumptions used by management. Evaluating management's assumptions related to development of second hand vessel values based on appraisals of the ships, development of forward freight rates and spot rates involved (i) testing the assumptions used in the assessment to external data, (ii) evaluating management's assessment of the indicators and (iii) testing whether the assumptions were consistent with evidence obtained in other areas of the audit and third party industry information.

Golden Ocean Group Limited
Notes to Consolidated Financial Statements

1. ORGANIZATION AND BUSINESS

Historical Structure and Business of the Company

We were incorporated as Knightsbridge Tankers Limited in Bermuda as an exempted company under the Bermuda Companies Act of 1981 on September 18, 1996. On October 7, 2014, we entered into the Merger Agreement, with the Former Golden Ocean, a dry bulk shipping company based in Bermuda and listed on the Oslo Stock Exchange ("OSE"), pursuant to which the two companies agreed to merge, with us as the surviving company. Following the completion of the Merger on March 31, 2015, we changed our name to Golden Ocean Group Limited.

Our common shares commenced trading on the NASDAQ Global Select Market ("NASDAQ") in February 1997 and currently trade under the symbol "GOGL". We obtained a secondary listing on the OSE in April 2015.

As of December 31, 2024, we own and operate dry bulk carriers of primarily four sizes: Newcastlemax vessels, which are between 200,000 and 210,000 dwt, Capesize vessels, which are between 90,000 and 200,000 dwt, Kamsarmax vessels, which are vessels between 80,000 and 90,000 dwt and Panamax vessels, which are between 65,000 and 80,000 dwt. Throughout 2024, we operated through subsidiaries in Bermuda, Liberia, the Marshall Islands, Norway, Singapore and the UK. During 2024, we re-domiciled certain subsidiaries to Bermuda and closed the subsidiary in the UK and as of December 31, 2024, we had subsidiaries located in Bermuda, Norway and Singapore. We are also involved in the charter, purchase and sale of vessels.

As of December 31, 2024, we owned 83 dry bulk vessels. In addition, we had eight vessels chartered-in from SFL Corporation Ltd. ("SFL"), of which seven are chartered in on finance leases and one is chartered in on an operating lease. With reference to Note 29, "Subsequent Events", we declared a purchase option for eight SFL vessels in January 2025. Our owned vessels are owned and operated by one of our subsidiaries and are flagged either in the Marshall Islands or Hong Kong.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. The consolidated financial statements include the assets and liabilities of us and our wholly-owned subsidiaries. All intercompany balances and transactions have been eliminated upon consolidation.

Use of estimates

The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles requires us to make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. Such estimates and assumptions impact, among others, the following: judgements involved in identifying performance obligations in revenue contracts, estimating the amount of variable consideration to include in the transaction price, and allocating the transaction price to each performance obligation, impairment of assets, the amount of uncollectible accounts and accounts receivable, the amount to be paid for certain liabilities, including contingent liabilities, the amount of costs to be capitalized in connection with the construction of newbuildings and the determination of useful life of our vessels. Actual results could differ from those estimates.

Fair values

We have determined the estimated fair value amounts presented in these consolidated financial statements using available market information and appropriate methodologies. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. The estimates presented in these consolidated financial statements are not necessarily indicative of the amounts that we could realize in a current market exchange. Estimating the fair value of assets and liabilities requires the use of estimates and significant judgments, among others, the following: the market assumptions used when valuing acquired time charter contracts, the expected revenues earned by vessels and the operating costs (including drydocking costs) of those vessels and the discount rate used in cash flow based valuations. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Reporting and functional currency

Our functional currency is the United States dollar as all revenues are received in United States dollars and a majority of our expenditures are made in United States dollars. We and our subsidiaries report in United States dollars.

Foreign currency

Transactions in foreign currencies during the year are translated into United States dollars at the rates of exchange in effect at the date of the transaction. Foreign currency monetary assets and liabilities are translated using rates of exchange at the balance sheet date. Foreign currency non-monetary assets and liabilities are translated using historical rates of exchange. Foreign currency transaction gains or losses are included in the consolidated statements of operations.

Revenue and expense recognition

Our shipping revenues are primarily generated from time charters and voyage charters. In a time charter, the vessel is hired by the charterer for a specified period of time in exchange for consideration which is based on a daily hire rate. Generally, the charterer has the discretion over the ports visited, shipping routes and vessel speed. The contract/charter party generally provides typical warranties regarding the speed and performance of the vessel. The charter party generally has some owner protective restrictions such as that the vessel is sent only to safe ports by the charterer and carries only lawful or non-hazardous cargo. In a time charter contract, where we charter the ship out to a charterer, we are responsible for all the costs incurred for running the vessel such as crew costs, vessel insurance, repairs and maintenance and lubes. The charterer bears the voyage related costs such as bunker expenses, port charges, canal tolls during the hire period. The performance obligations in a time charter contract are satisfied over the term of the contract beginning when the vessel is delivered to the charterer until it is redelivered back to us. The charterer generally pays the charter hire in advance of the upcoming contract period. The time charter contracts are considered operating leases because (i) the vessel is an identifiable asset (ii) we do not have substantive substitution rights and (iii) the charterer has the right to control the use of the vessel during the term of the contract and derives the economic benefits from such use. Time charter contracts are generally accounted for under ASC 842 leases and revenues are recorded over the term of the charter. When a time charter contract is linked to an index, we recognize revenue for the applicable period based on the actual index for that period.

Variable lease payments included into our time-charter agreements, such as positioning bonuses or profit sharing for fuel savings from scrubbers, that do not depend on an index or rate are excluded from the calculation of lease payments and recognized in the period in which the variability is resolved.

In a voyage charter contract, the charterer hires the vessel to transport a specific agreed-upon cargo for a single voyage. The consideration for such a contract is determined on the basis of a freight rate per metric ton of cargo carried or occasionally on a lump sum basis. The charterer is responsible for any short loading of cargo or "dead" freight. The voyage charter party generally has standard payment terms of 90 or 95% freight paid within three to five days after completion of loading. The voyage charter party generally has a "demurrage" or "despatch" clause. As per this clause, the charterer reimburses us for any potential delays exceeding the allowed laytime as per the charter party clause at the ports visited, which is recorded as demurrage revenue. Conversely, the charterer may be given credit if the loading/discharging activities happen within a shorter period than the allowed laytime, which is despatch and results in a reduction in revenue. Estimates and judgments are required in ascertaining the most likely outcome of a particular voyage and actual outcomes may differ from estimates. In a voyage charter contract, the performance obligations begin to be satisfied once the vessel begins loading the cargo.

Certain of our voyage charter contracts contain a lease. Voyage charters contain a lease component if the contract (i) specifies a specific vessel asset; and (ii) has terms that allow the charterer to exercise substantive decision-making rights, which have an economic value to the charterer and therefore allow the charterer to direct how and for what purpose the vessel is used. Voyage charter revenues and expenses are recognized ratably over the estimated length of each voyage, which the Company has assessed commence on loading of the cargo. ASC 842 Leases provides a practical expedient for lessors in which the lessor may elect, by class of underlying asset, to not separate non-lease components from the associated lease component and, instead, to account for these components as a single component if both of the following are met: (1) the timing and pattern of transfer of the non-lease component(s) and associated lease component are the same and (2) the lease component, if accounted for separately, would be classified as an operating lease.

When a lessor, we have elected this expedient for our time charter contracts and voyage charter contracts that qualify as leases and thus not separate the non-lease component, or service element, from the lease. Furthermore, ASC 842 Leases requires the Company to account for the combined component in accordance with ASC 606 revenues from contracts with customers if the non-lease components are the predominant components. Under this guidance the Company has assessed that the lease components were the predominant component for all of its time charter contracts. Furthermore, for certain of its voyage charter contracts the lease components were the predominant components.

Voyage and other contracts not qualifying as leases are accounted for under the provisions of ASC 606. We have determined that our voyage charter contracts consist of a single performance obligation of transporting the cargo within a specified period. Therefore, the performance obligation is met evenly as the voyage progresses, and the revenue is recognized on a straight line basis over the voyage days from the commencement of loading to completion of discharge.

The voyage charters generally have variable consideration in the form of demurrage or despatch, which is recognized as we satisfy the performance obligations under the contract. We estimate demurrage or despatch at contract inception using either the expected value or most likely amount approaches. Such estimate is reviewed and updated over the term of the voyage charter contract.

In a voyage contract, we bear all voyage related costs such as fuel costs, port charges and canal tolls. To recognize costs incurred to fulfill a contract as an asset, the following criteria shall be met: (i) the costs relate directly to the contract, (ii) the costs generate or enhance resources of the entity that will be used in satisfying performance obligations in the future and (iii) the costs are expected to be recovered. The costs incurred during the period prior to commencement of loading the cargo, primarily bunkers, are deferred as they represent setup costs and recorded as a current asset and are subsequently amortized on a straight-line basis as we satisfy the performance obligations under the contract. Costs incurred to obtain a contract, such as commissions, are also deferred and expensed over the same period. Costs related to the voyage which are incurred during the period between loading and discharging the cargo, are expensed as incurred.

Other revenues primarily comprise revenues earned from the commercial management of related party vessels, which are recognized on an accruals basis as the services are provided and performance obligations are met. Other revenues also include insurance proceeds.

Gains and losses on the sale of vessels

Gains and losses on the sale of vessels are recognized when the vessel has been delivered and all risks have been transferred and are determined by comparing the net proceeds received with the carrying value of the vessel.

Charter hire expense

Charter hire expense is charged to the consolidated statement of operations on a straight-line basis over the lease term.

Contingent rental expense (income)

Any contingent elements of rental expense (income), such as profit share or interest rate adjustments included in our leases, are recognized when the contingent conditions have materialized.

Drydocking

Normal vessel repair and maintenance costs are expensed when incurred. We recognize the cost of a drydocking at the time the drydocking takes place, applying the "expense as incurred" method.

Impairment of vessels, newbuildings and right of use assets

The carrying values of our vessels, newbuildings and right of use assets are reviewed for potential impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may no longer be recoverable. Indicators of impairment are identified based on a combination of factors which include amongst other, development of secondhand vessel values based on external appraisals of our ships, development of forward freight rates and spot rates. If impairment indicators exist, we assess the recoverability of the carrying value of each asset on an individual basis. We assess recoverability of the carrying value of owned vessels and newbuildings on an individual basis by estimating the future undiscounted cash flows expected to result from the asset, including any remaining construction costs for newbuildings, and eventual disposal. Fair value for our owned vessels and newbuildings is estimated based on values achieved for the sale/purchase of similar vessels and external appraisals. In addition, owned vessels held for sale are reported at the lower of carrying amount and fair value less estimated costs to sell. Recoverability of right of use assets is assessed on an asset by asset basis by estimating the future undiscounted cash flows from the right of use assets earned over the remaining lease term of our operating and finance leases. For owned vessels, newbuildings and right of use assets, if the future net undiscounted cash flows are less than the carrying value of the asset, or the current carrying value plus future newbuilding commitments, an impairment loss is recorded equal to the difference between the asset's carrying value and estimated fair value derived from cash flow based valuations.

Interest expense

Interest costs are expensed as incurred except for interest costs that are capitalized. For any newbuildings that are constructed, we capitalize interest expenses during construction of newbuildings based on accumulated expenditures for the applicable project at our current rate of borrowing. The capitalization of interest expenses ceases when the newbuilding is considered substantially completed. The amount of interest expense capitalized in an accounting period shall be determined by applying an interest rate (the "capitalization rate") to the average amount of accumulated expenditures for the asset during the period. The capitalization rates used in an accounting period are based on the rates applicable to borrowings outstanding during the period. We do not capitalize amounts beyond the actual interest expense incurred in the period.

Earnings per share

Basic earnings per share is computed based on the income available to common stockholders and the weighted average number of shares outstanding. Treasury shares are weighted for the portion of the period they are outstanding. Diluted earnings per share includes the effect of the assumed conversion of potentially dilutive instruments.

Cash and cash equivalents

All demand and time deposits and highly liquid, low risk investments with original maturities of three months or less at the date of purchase are considered equivalent to cash. Cash includes cash on hand and in the Company's bank accounts. The Company is required to maintain a minimum cash balance in accordance with its debt facility agreements with various banks. Such amounts are included in Cash and cash equivalents.

Restricted cash

Restricted cash consists of cash, which may only be used for certain purposes under our contractual arrangements and primarily comprises collateral deposits for derivative trading.

Marketable securities

Our marketable securities are investments in equity securities with readily determinable fair values. These investments are measured at fair value and any resulting unrealized gains and losses are recorded in the consolidated statement of operations.

Derivatives

Our derivative instruments include interest-rate swaps, foreign currency swaps, forward freight agreements and bunker derivatives. These derivatives are considered to be economic hedges. However, none of these derivative instruments have been designated as hedges for accounting purposes. These transactions involve the conversion of floating rates into fixed rates over the life of the transactions without changes in the fair values are recognized as assets or liabilities. Changes in the fair value of these derivatives are recorded in Gain (loss) on derivatives in our consolidated statement of operations. Cash outflows and inflows resulting from economic derivative contracts are presented as cash flows from operations in the consolidated statement of cash flows.

Financial instruments

In determining the fair value of our financial instruments, we use a variety of methods and assumptions that are based on market conditions and risks, including determining the impact of nonperformance risks, existing at each balance sheet date. For the majority of financial instruments, including most derivatives and long-term debt, standard market conventions and techniques such as options pricing models are used to determine fair value. All methods of assessing fair value result in a general approximation of value, and such value may never actually be realized.

Receivables

Trade receivables, other receivables and long-term receivables are presented net of allowances for credit losses.

The company creates the allowance for expected credit losses to reflect the risk of estimated loss during the lifetime of receivables. The Company makes significant judgements and assumptions to estimate its expected losses. The allowance for credit losses can be determined using various methods, such as loss-rate methods, probability-of-default method or methods that utilize an aging schedule. At each reporting date, the allowance for credit losses is recorded as a reduction of receivables. Net income is adjusted to reflect the change in estimate from prior period.

If trade accounts receivable become uncollectible, they are charged as an operating expense.

Interest income on interest bearing receivables is recognized on an accrual basis using prevailing contractual interest rates.

Inventories

Inventories, which are comprised principally of fuel and lubricating oils, are stated at the lower of cost and net realizable value. Cost is determined on a first-in, first-out basis.

Vessels, newbuildings and depreciation

Vessels are stated at cost less accumulated depreciation. Newbuildings represent the accumulated costs to the balance sheet date which we have paid by way of purchase installments and other capital expenditures together with capitalized interest and associated finance costs. Depreciation is calculated based on cost less estimated residual value, using the straight-line method, over the useful life of each vessel. For newbuildings no charge for depreciation is made until the vessel is available for use. The useful life of each vessel is deemed to be 25 years. The residual value is calculated by multiplying the lightweight tonnage of the vessel by the market price of scrap per tonne. The market price of scrap per tonne is calculated as the 10-year historical

average up to the date we take ownership of the vessel, across the two main recycling markets (Indian sub-continent and Bangladesh). Residual values are reviewed annually.

Finance leases

We charter in certain vessels and equipment under leasing agreements. Leases of vessels and equipment where we have substantially all the risks and rewards of ownership are classified as finance leases and we recognize on the balance sheet the right to use those assets and a corresponding liability. As most of our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments. We make significant judgments and assumptions to estimate our incremental borrowing rate that a lessee would have to pay to borrow on a 100% collateralized basis over a term similar to the lease term and in an amount equal to the lease payments in a similar economic environment. We perform the following steps in estimating our incremental borrowing rate: (i) gather observable debt yields of our recently issued debt facilities; and (ii) make adjustments to the yields of the actual debt facilities to reflect changes in collateral level, terms, the risk-free interest rate, and credit ratings. Each lease payment is allocated between liability and finance charges to achieve a constant rate on the finance balance outstanding. The interest element of the finance cost is expensed to the Consolidated Statement of Operations over the lease period.

Variable lease payments that depend on an index or a rate are included in the calculation of lease payments and are measured using the prevailing index or rate at the measurement date. Future changes in an index or a rate are recognized as part of lease-related cost in each year.

Depreciation of vessels and equipment under finance lease is included within "Depreciation" in the Consolidated Statement of Operations. Vessels and equipment under finance lease are depreciated on a straight-line basis over the vessels' remaining economic useful life or on a straight-line basis over the expected term of the lease if shorter.

Upon termination of a finance lease, any remaining assets and obligations related to the vessel are written off to the Statement of Operations. The net position, including any termination payments, are presented in Other operating gains (losses).

Operating leases

Our operating leases relate to vessels, offices and equipment under leasing agreements that do not meet the criteria to be classified as finance leases. We recognize on the balance sheet the right to use those assets and a corresponding liability in respect of all material lease contracts with a duration, or lease term, of 12-months or above. Similar to our finance leases, the discount rate used for calculating the cost of the operating leases is the incremental cost of borrowing. The amortization of right of use assets relating to operating leased vessels is presented under charter hire expenses in the statement of operations. Impairment loss related to operating leases is presented in the income statement as a separate line within operating expense under Impairment loss on right of use assets.

For our time charter-in contracts, a non-lease component, or service element has been determined which is reported under ship operating expenses. We make significant judgements and assumptions to separate the lease component from the non-lease component of our time chartered-in vessels. For purposes of determining the standalone selling price of the vessel lease and technical management service components of our time charters, we have concluded that the residual approach would be the most appropriate method to use given that vessel lease rates are highly variable depending on shipping market conditions, the duration of such charters, and the age of the vessel. We believe that the standalone transaction price attributable to the technical management service component is more readily determinable than the price of the lease component and, accordingly, the price of the service component is estimated and the residual transaction price is attributed to the vessel lease component.

The amortization of right of use assets relating to office leases is reported under administrative expenses in the statement of operations.

Upon termination of an operating lease, any remaining assets and obligations related to the vessel are written off to the Statement of Operations.

Value of long-term charter contracts

We account for the fair value of acquired long-term charter contracts, as either a separate asset or liability. The fair value is calculated as the net present value of the difference in cash flows arising over the period of the contract when the expected cash flows from the contract are compared to expected cash flows from comparable contracts at the acquisition date. An asset is recorded for contracts, which are favorable to us and a liability has been recorded for contracts, which are unfavorable to us.

The amortization of time charter out contracts is recorded and presented under time charter revenues and the amortization of time charter-in contracts is amortized and presented under charter hire expenses in the consolidated statement of operations.

Equity method investments

Investments in companies over which we have the ability to exercise significant influence but do not control are accounted for using the equity method. We record our investments in equity-method investees in the consolidated balance sheets as "Investment in associated companies" and our share of the investees' earnings or losses in the consolidated statements of operations as "Share of results of associated companies". The excess, if any, of purchase price over book value of our investments in equity method investees is included in the accompanying consolidated balance sheets in "Investment in associated companies".

The carrying values of equity method investments are reviewed for potential impairment whenever events or changes in circumstances indicate that the carrying amount of the investment may no longer be recoverable. Such indicators may include depressed spot rates and depressed second-hand vessel values. We assess recoverability of the carrying value of each individual equity method investments by estimating the fair value of the net assets of the company. An impairment loss is recorded equal to the difference between the investments carrying value and fair value. Fair value of investment is estimated based on values achieved for the sale/purchase of similar vessels and appraised valuations of the investments underlying assets.

Sales of shares of an investee is accounted for as gains or losses under non-operating items equal to the difference at the time of sale between selling price and carrying amount of the shares sold.

Deferred charges

Loan costs, including debt arrangement fees, are capitalized and amortized on a straight-line basis over the term of the relevant loan. The straight line basis of amortization approximates the effective interest method. If a loan is repaid early, any unamortized portion of the related deferred charges is charged against income in the period in which the loan is repaid. Amortization of debt issuance cost is included in interest expense. Debt issuance costs are presented in the balance sheet as a direct deduction from the carrying amount of the related debt.

Distributions to shareholders

Distributions to shareholders are applied first to retained earnings and recorded as dividends. When retained earnings are not sufficient or we declare distributions from contributed surplus, distributions are applied to the contributed capital surplus account.

Stock-based compensation

Stock based compensation represents the cost of vested and non-vested shares and share options granted to employees and to directors, for their services, and is included in "General and administrative expenses" in the consolidated statements of operations. The fair value of share options grants is determined with reference to option pricing models, and depends on the terms of the granted options. The fair value is recognized as compensation expense over the requisite service period for all awards that vest based on the 'straight-line method' which treats such awards as a single award and results in recognition of the cost ratably over the entire vesting period.

Treasury shares

When the Company repurchases its share capital, the amount of the consideration paid is recognized as a deduction from equity and classified as treasury shares, pending future use. Treasury shares are recognized and measured at historic costs. In the event of a future resale, any price above the repurchase price would be allocated to additional paid in capital. Any price below the repurchase price would be first deducted from the amounts previously allocated to additional paid in capital, and the excess will be recognized as a reduction of retained earnings. The weighted average treasury shares reduce the number of shares outstanding used in calculating earnings per share.

Comprehensive income

The statement of comprehensive income presents the change in equity (net assets) during a period from transactions and other events and circumstances from non-owner sources. It includes all changes in equity during a period except those resulting from investments by shareholders and distributions to shareholders. Reclassification adjustments are presented out of other comprehensive income on the face of the statement in which the components of other comprehensive income are presented or in the notes to the financial statements. The Company follows the provisions of ASC 220 "Comprehensive Income", and presents items of net income (loss), items of other comprehensive income ("OCI") and total comprehensive income in two separate and consecutive statements.

3. RECENT ACCOUNTING PRONOUNCEMENTS*Accounting Standards Updates, recently adopted*

In November 2023, the FASB issued ASU 2023-07, Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures. The guidance expands public entities' segment disclosures by requiring disclosure of significant segment expenses that are regularly reviewed by the chief operating decision maker ("CODM") and included within each reported measure of segment profit or loss, an amount and description of its composition for other segment items, and interim disclosures of a reportable segment's profit or loss and assets. The guidance also allows, in addition to the measure that is most consistent with U.S. GAAP, the disclosure of additional measures of segment profit or loss that are used by the CODM in assessing segment performance and deciding how to allocate resources. This guidance is effective for interim periods beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted. The amendments in this update should be applied retrospectively to all periods presented in the financial statements. The adoption of ASU 2023-07 had no material impact on our consolidated financial statements and related disclosures.

Accounting Standards Updates, not yet adopted

On December 14, 2023, the FASB issued ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures. The guidance requires disaggregated information about a reporting entity's effective tax rate reconciliation as well as information on income taxes paid. The standard is intended to benefit investors by providing more detailed income tax disclosures that would be useful in making capital allocation decisions. This guidance is effective for periods beginning after December 15, 2024, with early adoption permitted. The amendments in this update should be applied either prospectively or retrospectively to all periods presented in the financial statements. The Company has not yet adopted this ASU and is in the process of evaluating the impact of the adoption of this pronouncement on its consolidated financial statements and related disclosures.

In November 2024, the FASB issued ASU No. 2024-03, Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses ("ASU 2024-03"). This ASU requires entities to disclose specific information about certain costs and expenses in the notes to the financial statements for interim and annual reporting periods. The objective of the disclosure requirements is to provide disaggregated information about a public business entity's expenses to help investors (a) better understand the entity's performance, (b) better assess the entity's prospects for future cash flows, and (c) compare an entity's performance over time and with that of other entities. In January 2025, the FASB issued ASU No. 2025-01, Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Clarifying the Effective Date ("ASU 2025-01"), which clarified that all public entities are required to adopt the guidance in ASU 2024-03 in annual reporting periods beginning after December 15, 2026, and interim periods within annual reporting periods beginning after December 15, 2027. The Company is currently evaluating the impact that ASU 2024-03 and ASU 2025-01 will have on the Company's financial statements and related disclosures.

The Company has reviewed all other recently issued accounting pronouncements and has not identified any new or amended standards that would have a material impact on the Company's current accounting policies.

4. INCOME TAXES

Global Tax Laws

In October 2021, over 135 jurisdictions had agreed to update the international tax system to address concerns over unequal distribution of income. On December 12, 2022, the European Union member states agreed to implement the OECD's Pillar Two global corporate minimum tax rate of 15% on companies with revenues of at least €750 million effective from 2024. Various countries have either adopted implementing legislation or are in the process of drafting such legislation to amend their local tax laws. The rules have two main charging provisions: Income Inclusion Rule and Undertaxed Profit Rule.

The Income Inclusion Rule applies on a top-down basis, giving the ultimate parent entity country, or an intermediate parent entity country, the right to collect top-up tax for underlying foreign operations, unless the tax is collected in the foreign country. Bermuda, where we are incorporated, has not to date proposed to implement BEPS Pillar Two rules, and therefore the Income Inclusion Rule will not be applicable to Golden Ocean Group Limited and is not expected to apply for any intermediary parent entity in the Group. Norway has implemented the Income Inclusion Rule effective from 2024, but the Golden Ocean group entities located in Norway are not parent to any subsidiaries.

Undertaxed Profit Rule means that any shortfall in tax will be collected in a jurisdiction that has implemented the under taxed payments rule and in which the Group has operating subsidiaries. Under our current group structure, Undertaxed Profit Rule

will be applicable for Singapore and Norway companies. We do not expect Undertaxed Profit rules to be implemented before 2025 for either Singapore or Norway.

Further, in accordance with BEPS Pillar Two rules, qualified international shipping income and qualified ancillary international shipping income shall be excluded from the computation of taxable income or loss, providing that commercial or strategic management is carried out from the jurisdiction where the entity is located.

The Company is in the process of evaluating the impact of BEPS Pillar Two on its Financial Statements and expects to apply the international shipping exemption.

Bermuda

In 2024, 2023 or 2022 we were not required to pay taxes in Bermuda on either income or capital gains.

On December 27, 2023 the Bermuda Corporate Income Tax Act of 2023 (the "Corporate Income Tax Act") became law in response to the OECD's Pillar Two global minimum tax initiative to impose a 15% corporate income tax. The tax is effective beginning on or after January 1, 2025. The Bermuda corporate income tax regime will supersede the previously granted tax assurances which provided an exemption from corporate income taxes until March 31, 2035. Subject to certain exceptions, Bermuda entities that are part of a multinational group will be in scope of the provisions of the Corporate Income Tax Act if, with respect a fiscal year, such group has annual revenue of €750 million or more in the consolidated financial statements of the ultimate parent entity for at least two of the four fiscal years immediately prior to such fiscal year ("Bermuda Constituent Entity Group"). Further, Bermuda Constituent Entity's international shipping income and qualified ancillary international shipping income shall be excluded from the computation of its taxable income or loss. In order for a Bermuda Constituent Entity's international shipping income and ancillary international shipping income to qualify for the exclusion from its net taxable income or loss under this section, the Bermuda Constituent Entity must demonstrate that the strategic or commercial management of all ships concerned is effectively carried on from or within Bermuda. We believe that we will qualify for international shipping income exclusion, and therefore there will be no material effect of enacted tax law on our financial statements.

The Company currently does not plan to apply the Economic Transition Adjustment ("ETA") provisions and, as such, the transitional opening tax loss carry forward period for the entities located in Bermuda was calculated starting January 1, 2020. In light of emerging guidance and uncertainty as to the potential impact for the Company, no decision has yet been taken as to whether to take advantage of available tax deductions arising from the transitional calculated losses carry forward or whether to elect the ETA provisions which will limit period of the transitional carry forward loss calculation from October 1, 2023.

In the event the Company makes a future decision to make use of the transitional losses carry forward calculation, it expects to have a potential deferred tax assets relating to these transition rules and elections available in the Bermuda corporate income tax legislation, but does not believe these are material and does not consider that taxable profits from non-shipping related activities for 2025 and subsequent years can currently be considered to be sufficiently probable to allow for recognition of any potential deferred tax assets in the short term.

United States

We do not accrue U.S. income taxes as we are not engaged in a U.S. trade or business and are exempted from a gross basis tax under Section 883 of the U.S. Internal Revenue Code. A reconciliation between the income tax expense resulting from applying the U.S. Federal statutory income tax rate and the reported income tax expense has not been presented herein as it would not provide additional useful information to users of the financial statements as our net income is subject to neither Bermuda nor U.S. tax.

Singapore

We are eligible and participate under the Maritime Sector Incentive-Approved International Shipping Enterprise (MSI- AIS) award in Singapore. All qualified shipping income derived from the shipping activity in our Singapore subsidiary is exempt from taxation for the duration of our MSI-AIS approval. The MSI-AIS approval was in June 2015 for a period of ten years.

Other Jurisdictions

Our subsidiaries in Norway are subject to income tax. The tax paid by subsidiaries of the Company that are subject to income tax is not material to our consolidated financial statements and related disclosures.

We do not have any unrecognized tax benefits, material accrued interest or penalties relating to income taxes.

5. SEGMENT INFORMATION

The CODM, is our Chief Executive Officer, who measures performance based on our overall return to shareholders based on consolidated net income. The CODM does not review a measure of operating result at a lower level than the consolidated group and we only have one reportable operating consolidated segment. The measure of segment assets is reported on the balance sheet as total consolidated assets.

The Company's single operating consolidated segment derives revenue from transporting dry bulk cargoes and chartering vessels to customers on time charter or voyage charter contracts. The accounting policies of the consolidated segment are the same as the Company's accounting policies.

The CODM uses net income to evaluate segment assets in deciding whether to reinvest profits into the consolidated segment or into other strategic activities, such as for acquisitions, construction or modernization for existing vessels, repurchase shares or to pay dividends.

Our vessels operate worldwide and therefore management does not evaluate performance by geographical region as this information is not meaningful.

	2024	2023	2022
Total operating revenues	968,420	885,767	1,113,456
Gain on sale of assets	21,427	9,188	34,185
Other operating income (expenses), net - related party	—	—	(413)
Less:			
Voyage expenses and commissions	192,890	246,161	278,550
Running operating expenses	223,449	202,307	186,679
Drydock expenses	55,107	24,114	15,123
Upgrading expenses	7,219	3,194	6,907
Other segment operating expense items	8,196	22,335	
Charter hire expenses	22,715	42,225	57,406
Administrative expenses	24,303	18,679	20,375
Impairment losses on vessels	—	11,780	—
Depreciation	141,627	135,548	129,839
Interest income	6,872	4,717	2,345
Interest expense	(108,215)	(103,664)	(56,248)
Share of results of associated companies	(4,070)	12,316	40,793
Gain on derivatives	15,212	11,371	39,968
Gain on marketable equity securities	—	287	503
Other financial items	(378)	(830)	(222)
Income tax expense	548	541	379
Segment net income	223,214	112,268	461,847
Adjustments and reconciling items	—	—	—
Consolidated net income	223,214	112,268	461,847

For the year ended December 31, 2024, two customers accounted for 10% or more of our consolidated revenues in the amount of \$123.1 million and \$105.3 million. The accounts receivable from these two customers as of December 31, 2024, were \$0.8 million and \$4.1 million, respectively. For the years ended December 31, 2023 and December 31, 2022, no customer accounted for 10% or more of our consolidated revenues.

6. EARNINGS PER SHARE

The components of the numerator and the denominator in the calculation of basic and diluted earnings per share are as follows:

<i>(in thousands of \$)</i>	2024	2023	2022
Net income	223,214	112,268	461,847
<i>(in thousands)</i>	2024	2023	2022
Weighted average number of shares outstanding - basic	199,911	199,924	200,685
Dilutive impact of stock options	81	557	503
Weighted average number of shares outstanding - diluted	199,992	200,481	201,188

In March 2024, 400,000 share options held by the management were exercised and as of December 31, 2024 there are no outstanding options. As of December 31, 2023 and 2022, there were 400,000 and 650,000 outstanding options which were dilutive under the treasury stock method by 370,085 and 503,047 shares, respectively.

With reference to Note 24, "Share Capital, Treasury Shares and Dividends", in 2024, 2023 and 2022, the Company acquired an aggregate of 625,000, 1,107,328 and 400,000 of our own shares in open market transactions under our 2022 share buy-back program. On October 2, 2024, the Company renewed its existing share buy-back program for a further 12 months, up to October 4, 2025. All of the Company's own shares and distributions have been weighted for the portion of the period they were outstanding. As a result, the treasury shares reduced the weighted average number of shares outstanding in 2024, 2023 and 2022 by 1,283,567, 1,266,619 and 506,096 shares, respectively.

7. OPERATING REVENUES

The following table shows the revenues earned from time charters, voyage charters and other revenues for the year ended December 31, 2024, 2023 and 2022:

<i>(in thousands of \$)</i>	2024	2023	2022
Time charter revenues	622,569	434,827	593,795
Voyage charter revenues	341,926	446,666	518,398
Other revenues	3,925	4,274	1,263
Total operating revenues	968,420	885,767	1,113,456

In 2024, 2023 and 2022, we recognized a total of \$21.1 million, \$24.5 million and \$29.3 million, respectively, in demurrage which is included under voyage charter revenues. Most of our voyage contracts are considered service contracts which fall under the provisions of ASC 606 because we, as the shipowner, retain control over the operations of the vessel such as directing the routes taken or the vessel speed. However, some of our voyage charter contracts could be considered to contain a lease. A voyage charter contains a lease component if the contract (i) specifies a specific vessel asset; and (ii) has terms that allow the charterer to exercise substantive decision-making rights, which have an economic value to the charterer and therefore allow the charterer to direct how and for what purpose the vessel is used. When a lessor, we have elected the practical expedient for our time charter contracts and voyage charter contracts that qualify as leases to not separate the non-lease component, or service element, from the lease. Furthermore, ASC 842 requires us to account for the combined component in accordance with ASC 606 revenues from contracts with customers if the non-lease components are the predominant components. Under this guidance we have assessed that the lease components were the predominant component for all of our time charter contracts. Furthermore, for certain of our voyage charter contracts the lease components were the predominant components.

For the year ended December 31, 2024 the split between lease and non-lease component was as follows:

<i>(in thousands of \$)</i>	Lease	Non-lease	Total
Time charter revenues	622,484	85	622,569
Voyage charter revenues	19,880	322,046	341,926
Other revenues	—	3,925	3,925
Total operating revenues	642,364	326,056	968,420

Variable lease income included into our time-charter agreements amounted to \$26.7 million, \$22.6 million and \$18.9 million for the years ended December 31, 2024, 2023 and 2022, respectively.

For the year ended December 31, 2023 the split between lease and non-lease component was as follows:

<i>(in thousands of \$)</i>	Lease	Non-lease	Total
Time charter revenues	434,827	—	434,827
Voyage charter revenues	—	446,666	446,666
Other revenues	—	4,274	4,274
Total operating revenues	434,827	450,940	885,767

For the year ended December 31, 2022 the split between lease and non-lease component was as follows:

<i>(in thousands of \$)</i>	Lease	Non-lease	Total
Time charter revenues	579,673	14,122	593,795
Voyage charter revenues	49,746	468,652	518,398
Other revenues	—	1,263	1,263
Total operating revenues	629,419	484,037	1,113,456

Certain voyage expenses are capitalized between the previous discharge port, or contract date if later, and the next load port and amortized between load port and discharge port. \$18.6 million of contract assets were capitalized in the year ended December 31, 2024 under "Other current assets", of which \$17.2 million was amortized up to December 31, 2024, leaving a remaining balance of \$1.1 million. In 2024, \$3.6 million of contract assets were amortized in relation to voyages in progress at the end of December 31, 2023.

\$24.9 million of contract assets were capitalized in the year ended December 31, 2023 under "Other current assets", of which \$21.3 million was amortized up to December 31, 2023, leaving a remaining balance of \$3.6 million. In 2023, \$4.9 million of contract assets were amortized in relation to voyages in progress at the end of December 31, 2022. In 2022, we amortized an aggregate of \$24.7 million of capitalized voyage expenses, or contract assets classified as other current assets.

No impairment losses related to capitalized fulfillment costs were recognized in any of the periods.

As of December 31, 2024, we reported trade accounts receivable and the following contract assets in relation to our contracts with customers, including contracts containing lease components where the non-lease component was the predominant component and the revenues were therefore accounted for under ASC 606:

<i>(in thousands of \$)</i>	2024	2023
Voyages in progress (contract assets)	6,943	15,651
Trade accounts receivable	7,338	11,066
Other current assets (capitalized fulfillment costs)	1,084	3,558
Total	15,365	30,275

As of December 31, 2024, we recorded \$2.4 million (2023: \$5.3 million) in total deferred charter revenue for consideration received or unearned revenue related to ongoing voyages at period end. In 2024, we recognized \$5.3 million in revenue, which was deferred as at December 31, 2023, as the performance obligations were met. Credit loss allowance as of December 31, 2024 relating to the contract assets above amounted to \$0.1 million. No impairment losses were recognized as of December 31, 2024.

8. GAIN ON SALE OF ASSETS

In September 2024, we entered into agreements to sell a Newcastlemax vessel, *Golden Gayle*, and a Panamax vessel, *Golden Diamond*, to unrelated third parties for a total gross amount of \$57.5 million. Upon delivery of the vessels in November 2024 and October 2024, respectively, we recorded gains of \$16.1 million from the sales.

In June 2024, we entered into an agreement to sell a Panamax vessel, *Golden Ruby*, to an unrelated third party for a total gross amount of \$21.0 million. Upon delivery of the vessel in August 2024, we recorded a gain of \$4.2 million from the sale.

In December 2023, we entered into an agreement to sell a Panamax vessel, *Golden Bull*, to an unrelated third party for a total gross amount of \$16.0 million. Upon delivery of the vessel in February 2024, we recorded a gain of \$1.1 million from the sale.

With reference to Note 10, "Operating Leases", in September 2023, we entered into an agreement to sell a Supramax vessel⁽¹⁾, *Golden Hawk*, to an unrelated third party for \$21.6 million. Upon delivery of the vessel in November 2023, we recorded a gain of \$5.8 million from the sale.

In September 2023, we entered into an agreement to sell a Panamax vessel, *Golden Suek*, to an unrelated third party for a total gross amount of \$15.0 million. Upon delivery of the vessel in September 2023, we recorded a gain of \$0.8 million from the sale.

In November 2022, we entered into an agreement to sell two Panamax vessels, *Golden Ice* and *Golden Strength*, to an unrelated third party for a total gross amount of \$30.3 million. Upon delivery of the vessels in December 2022 and January 2023, respectively, we recorded a gains of \$2.8 million and \$2.6 million from the sales.

In June 2022, we entered into an agreement to sell en-bloc two Ultramax vessels⁽²⁾, *Golden Cecilie* and *Golden Cathrine*, to an unrelated third party for a total gross amount of \$63.0 million. Upon delivery of the vessels, we recorded a gain of \$21.9 million from the sale in the third quarter of 2022.

In February 2022, we entered into an agreement to sell en-bloc three older Kamsarmax vessels, *Golden Empress*, *Golden Enterprise* and *Golden Endeavour*, to an unrelated third party for a total gross amount of \$52.0 million. Upon delivery of the vessels, we recorded a gain of \$9.5 million from the sale in the second quarter of 2022.

- (1) Defined, together with Ultramax vessels, as vessels carrying capacities of between 55,000 and 65,000 dwt. As of December 31, 2024, we do not own or operate any Supramax vessels.
- (2) Defined as vessels carrying capacities of between 55,000 and 65,000 dwt. As of December 31, 2024, we do not own or operate any Ultramax vessels.

9. IMPAIRMENT OF VESSELS

No impairment on vessels was recorded in 2024. In March 2023, we entered into an agreement to sell two Capesize vessels, *Golden Feng* and *Golden Shui*, to an unrelated third party for a total gross amount of \$44.0 million. The vessels were delivered to their new owners in May 2023. In the first quarter of 2023, we recorded an impairment loss of \$11.8 million in connection to the sale.

10. OPERATING LEASES

As of December 31, 2024, we leased in one vessel (2023: one vessel) from SFL and no vessels from unrelated third parties (2023: no vessel), classified as operating leases. Additionally, as of December 31, 2024, we had one operating lease for our office in Singapore. As of December 31, 2023, we had two operating leases for our offices in Oslo and Singapore. All of these leases had an initial duration above 12 months.

In total we have leased in eight vessels from SFL, of which one of these vessels was classified as operating lease and remaining seven were classified as finance lease as of December 31, 2024. With reference to Note 26, "Related Party Transactions", these contracts were a result of a sale and leaseback transaction with SFL for eight Capesize vessels agreed in 2015. These vessels were sold en-bloc for an aggregate price of \$272.0 million. The vessels were delivered to SFL in the third quarter of 2015 and were time chartered-in by one of our subsidiaries for a period of ten years. The daily time charter rate for SFL operating lease was \$17,600, of which \$7,000 is for operating expenses (including drydocking costs) up until the third quarter of 2022 when the daily time charter rate was reduced to \$14,900 until the expiration of the contracts. In addition, 33% of our aggregate profit from revenues above the daily time charter rate for all eight vessels are calculated and paid on a quarterly basis to SFL. The daily hire payments are adjusted if the actual three-month reference rate should deviate from a base reference rate of 0.233% per annum for SOFR. For each 0.1% point increase/decrease in the interest rate level, the daily charter hire will increase or decrease by \$50 per day in the first seven years and \$25 per day in the remaining three years. This resulted in an average daily rate of \$16,127 for SFL operating lease in 2024 and there was \$6.4 million in profit share for all eight SFL vessels in 2024 (nil and \$3.0 million in 2023 and 2022, respectively recorded as charter hire expense). Contingent or variable lease expense for the eight SFL leases was recorded in 2024 as interest expense of \$2.6 million. In 2023 and 2022 we recorded the variable lease expense of \$2.5 million and \$0.6 million, respectively. We have a purchase option of \$112 million en-bloc after 10 years since inception of the leases in 2015. If such option is not exercised, SFL has the option to extend the charters by three years at a daily time charter rate of \$14,900 per day. The lease term for these vessels has been determined to be 13 years and expires in 2028. With reference to Note 29, "Subsequent Events", we exercised the purchase option for the eight SFL vessels in January 2025. Accordingly, in January 2025, we modified lease assets and liabilities to include the purchase option and adjust for the decrease in lease term. The estimated financial effect is expected to be an increase in finance lease assets and liabilities of \$47.5 million, where total finance lease liabilities will be considered current.

For the Ultramax vessel, *Golden Hawk*, which was chartered in from an unrelated third party, the daily rate was \$13,200 until the expiration of the fixed term of the contract in the first quarter of 2022. Based on an agreement, if the 6-T/C Baltic Exchange Supramax Index exceeds the daily rate of \$13,200, any such excess should be paid to the lessor but limited to the agreed compensation of \$1.75 million. In 2021, index linked compensation of \$1.75 million was paid in full. In 2021 and 2022, we extended *Golden Hawk* lease for approximately two years in total by using the first and second extension options in the contract. The daily rates were \$13,700 and \$14,200 during the first and the second extension periods, respectively. In September 2023, the Company declared an option under the time charter contract to acquire the vessel at a net purchase price of \$15.3 million. Back-to-back with entering into the purchase agreement, the Company entered into the sale agreement with an unrelated third party, for a total consideration of \$21.6 million. As a result of declaring the purchase option, the Company included the option price of \$15.3 million into lease asset and lease liability and reclassified the lease from operating lease to finance lease. In November 2023, we paid the full purchase price to the charterer and the vessel was delivered to us and recorded as vessel and equipment. Further, in November 2023, the vessel was sold and delivered to its new owners. Upon delivery of vessel to the buyer a gain of \$5.8 million from the sale was recognized.

Admiral Schmidt and *Vitus Bering* are 2019-built 104,550 dwt ice-class vessels, chartered in 2019 on time charter for a firm period of three years, with four annual options exercisable by us to extend the lease. The contracts have been determined to be operating leases with a lease term of three years, respectively. The gross hire is determined based on a weighted average of the Baltic Panamax Index (BPI 4TC) and the Baltic Capesize Index (BCI 5TC) with a floor of \$9,000 per day. In February 2022, we exercised the option to extend *Admiral Schmidt* and *Vitus Bering* contracts for one year each. In May 2022, we suspended time charter agreements with respect to *Admiral Schmidt* and *Vitus Bering* and redelivered the vessels to their owners, after understanding that those vessels were financed by owners as part of a sale-leaseback arrangement with a Russian-state owned entity. Exercise of extension options and suspension of the charter contract resulted in reassessment of the lease liability which was recorded as additions to right of use assets and right of use liabilities in the amount of \$9.5 million during the first six months of 2022. As suspension agreement expired in November 2022 and vessels were not redelivered back to us, we are relieved from any duties, obligations, liabilities or commitments under the current contracts. In 2022, right of use assets, right of use liabilities and other contract related assets were written off and credited to charter hire expense in the total net positive amount of \$2.0 million.

For operating leases mentioned above and vessels chartered in on short-term time charters, we have allocated the consideration due between the lease and non-lease components based upon the estimated stand-alone price of the services provided by the owner of the vessels. We have presented a total of \$8.2 million, \$22.3 million and \$17.3 million of the non-lease component, or service element, under ship operating expenses for 2024, 2023 and 2022, respectively.

Furthermore, we are committed to making rental payments under operating leases for office premises. Lease expenses of \$0.8 million, \$0.6 million and \$0.6 million were recorded as administrative expenses in the Consolidated Statement of Operations for 2024, 2023 and 2022, respectively.

Our right of use assets for long-term operating leases were as follows:

	SFL Leases	Golden Hawk Lease	Office Leases	Total
<i>(in thousands of \$)</i>				
Balance as of December 31, 2022	10,361	3,764	1,521	15,646
Additions	—	14,549	—	14,549
Amortization	(1,820)	(2,032)	(524)	(4,376)
Impact of modification of operating leases	—	(16,281)	—	(16,281)
Balance as of December 31, 2023	8,541	—	997	9,538
Amortization	(1,825)	—	(208)	(2,033)
Impact of lease cancellation	—	—	(657)	(657)
Balance as of December 31, 2024	6,716	—	132	6,848

With reference to description above, the lease cancellation relates to our Oslo office lease being reclassified to short-term lease, resulting in a derecognition of the right of use lease asset and obligations.

With reference to description above, additions for *Golden Hawk* relate to declaring purchase option in the amount of \$15.3 million decreased by \$0.8 million as a result of reduction in charter hire period. The amortization of right of use assets relating to leased vessels is presented under charter hire expenses in the statement of operations. The amortization of right of use assets relating to office leases is presented under administrative expenses in the statement of operations.

In 2024, 2023 and 2022, we recorded no impairment of right of use assets for operating leases.

Our lease obligations for long-term operating leases were as follows:

	SFL Leases	Golden Hawk Lease	Office Leases	Total
<i>(in thousands of \$)</i>				
Balance as of December 31, 2022	13,355	3,837	1,405	18,597
Additions	—	14,549	—	14,549
Repayments	(2,010)	(2,105)	(501)	(4,616)
Impact of modification of operating lease	—	(16,281)	—	(16,281)
Foreign exchange translation	—	—	4	4
Balance as of December 31, 2023	11,345	—	908	12,253
Repayments	(2,147)	—	(216)	(2,363)
Impact of lease cancellation	—	—	(558)	(558)
Balance as of December 31, 2024	9,198	—	134	9,332
Current portion	2,280	—	134	2,414
Non-current portion	6,918	—	—	6,918

Charter hire and office rent expense

The future minimum operating lease expense payments (including lease and non-lease components) under our non-cancelable fixed rate operating leases as of December 31, 2024 are as follows:

(in thousands of \$)

2025	2,961
2026	2,809
2027	2,809
2028	1,960
Total minimum lease payments	10,539
Less: Imputed interest	(1,207)
Present value of operating lease liabilities	9,332

The future minimum operating lease expense payments are based on the contractual cash outflows under non-cancelable contracts. The charter hire expense recognition is based upon the straight-line basis.

As of December 31, 2024, the future rental payments include \$0.2 million (2023: \$1.1 million, 2022: \$1.7 million) in relation to office rent costs and \$10.4 million (2023: \$13.2 million, 2022: \$19.9 million) in relation to charter hire costs for leased in vessels.

Total expense for operating leases reflected as charter hire expense was \$22.7 million in 2024 (2023: \$42.2 million, 2022: \$57.2 million), which included \$19.8 million for short-term leases (2023: \$35.5 million, 2022: \$50.1 million). Total cash paid in respect of operating leases was \$23.3 million in 2024 (2023: \$36.1 million, 2022: \$66.7 million). The weighted average discount rate in relation to our operating leases was 6.50%, 6.50% and 5.02% for 2024, 2023 and 2022, respectively. The weighted average lease term was 3.6, 4.5 and 4.7 years in 2024, 2023 and 2022, respectively.

Rental income

As of December 31, 2024, we leased out eight vessels on fixed time charter rates (2023: nine vessels) and 27 vessels (2023: 31 vessels) on index-linked time charter rates to third parties with initial periods ranging between one year and ten years. All of these leases are classified as operating leases.

The future operating lease receipts under our operating leases as of December 31, 2024 are as follows:

(in thousands of \$)

2025	48,281
2026	2,340
2027	—
2028	—
2029 and thereafter	—
	50,621

An index-linked rate in time charter operating leases usually refers to freight rate indices issued by the Baltic Exchange, such as the Baltic Capesize Index and the Baltic Panamax Index, and as such essentially these contracts are operating in the spot market. Index-linked time charter rate operating leases in the table above are included at the minimum rate level of zero.

As of December 31, 2024, the cost and accumulated depreciation of the 35 vessels leased out to third parties, were \$1,881.6 million and \$463.4 million, respectively.

As of December 31, 2023, the cost and accumulated depreciation of the 40 vessels leased out to third parties, were \$2,134.3 million and \$475.0 million, respectively.

11. CASH, CASH EQUIVALENTS AND RESTRICTED CASH

As of December 31, 2024, 2023 and 2022, the following table provides a reconciliation of cash, cash equivalents, and restricted cash reported within the statement of financial position that sum to the total of the same such amounts shown in the statement of cash flows.

<i>(in thousands of \$)</i>	2024	2023	2022
Cash and cash equivalents	129,106	116,382	134,784
Short-term restricted cash	2,623	2,254	3,289
Total cash, cash equivalents and restricted cash shown in the statement of cash flows	131,729	118,636	138,073

According to our accounting policy, amounts included in cash and cash equivalents include cash balances that are required to be maintained by the financial covenants in our loan facilities. Under our debt facilities, we need to maintain free cash of the higher of \$20 million or 5% of total interest-bearing debt. We have covenanted to retain at least \$68.5 million of cash and cash equivalents as of December 31, 2024 (as of December 31, 2023: \$72.9 million and as of December 31, 2022: \$61.3 million).

Restricted cash consists of cash, which may only be used for certain purposes under our contractual arrangements and primarily comprises collateral deposits for derivative trading.

12. MARKETABLE EQUITY SECURITIES

Our marketable securities consist of equity securities in Eneti Inc. ("Eneti"), a company engaged in marine based renewable energy. Eneti Inc. was listed on the New York Stock Exchange until December 29, 2023.

<i>(in thousands of \$)</i>	2024	2023
Balance at start of year	—	2,187
Disposals	—	(2,474)
Unrealized gain (loss), net	—	287
Total marketable equity securities	—	—

In 2024, we received no dividends from our investment in Eneti (2023: \$6.4 thousand). In December 2023, Eneti completed a merger, where each Eneti common stock with par value \$0.01 per share, was converted into the right to receive \$11.36755 per share in cash. As a result, investment was reclassified to other current assets as of December 31, 2023. The settlement was received in full in January 2024.

13. TRADE ACCOUNTS RECEIVABLE, NET

Trade accounts receivables are stated net of allowance for expected credit losses.

<i>(in thousands of \$)</i>	2024	2023	2022
Trade accounts receivable	26,362	30,231	15,397
Allowance for expected credit losses	(877)	(422)	(447)
Total trade accounts receivable, net	25,485	29,809	14,950

Movements in allowance for credit losses in the three years ended December 31, 2024 are summarized as follows:

<i>(in thousands of \$)</i>	
Balance as of December 31, 2021	297
Additions charged to income	447
Deductions credited to trade receivables	(297)
Balance as of December 31, 2022	447
Additions charged to income	422
Deductions credited to trade receivables	(447)
Balance as of December 31, 2023	422
Additions charged to income	877
Deductions credited to trade receivables	(422)
Balance as of December 31, 2024	877

14. OTHER CURRENT ASSETS

<i>(in thousands of \$)</i>	2024	2023
Capitalized fulfillment costs	1,390	3,558
Agent receivables	530	969
Advances	1,023	1,238
Claims receivables	9,591	8,784
Bunker receivables on time charter-out contracts	28,362	21,659
Other receivables	13,058	11,604
Total other current assets	53,954	47,812

Other receivables are presented net of allowances for credit losses amounting to \$46.3 thousands as of December 31, 2024 and \$46.3 thousands as of December 31, 2023.

15. VESSELS AND EQUIPMENT, NET

<i>(in thousands of \$)</i>	Cost	Accumulated Depreciation	Net Book Value
Balance as of December 31, 2022	3,300,778	(634,993)	2,665,785
Acquisition of vessels from H-Line	295,900	—	295,900

Depreciation	—	(126,640)	(126,640)
Balance as of December 31, 2024	3,783,144	(824,015)	2,959,129

*this line includes vessels sold and delivered to new owners during 2024 and 2023.

**this line includes transfer to Vessels held for sale which are reflected on the balance sheet as of December 31, 2023.

As of December 31, 2024, we owned 18 Newcastlemaxes, 33 Capesizes, 28 Kamsarmaxes and 4 Panamaxs (as of December 31, 2023: 19 Newcastlemaxes, 33 Capesizes, 24 Kamsarmaxes and 7 Panamaxs).

In September 2024, we entered into agreements to sell one Newcastlemax vessel, *Golden Gayle*, and one Panamax vessel, *Golden Diamond*, to unrelated third parties for a total gross amount of \$57.5 million. The vessels was delivered to its new owners in November 2024 and October 2024, respectively, upon which we recorded gains of \$16.1 million from the sales.

In June 2024, we entered into an agreement to sell one Panamax vessel, *Golden Ruby*, to an unrelated third party for a total gross amount of \$21.0 million. Upon delivery of the vessel in August 2024, we recorded a gain of \$4.2 million from the sale.

In December 2023, we entered into an agreement to sell one Panamax vessel, *Golden Bull*, to an unrelated third party for a total gross amount of \$16.0 million. The vessel was delivered to its new owner in February 2024, upon which we recorded a gain of \$1.1 million from the sale.

In September 2023, we entered into an agreement to sell one Panamax vessel, *Golden Suek*, to an unrelated third party for a gross consideration of \$15.0 million. The vessel was delivered to its new owner in September 2023, upon which we recorded a gain of \$0.8 million from the sale.

With reference to Note 10 "Operating Leases" and Note 17 "Finance Leases", in September 2023, we declared the purchase option for *Golden Hawk* in the amount of \$15.3 million. We paid the full amount in November 2023, upon which finance lease was terminated and we recorded additions to vessels and equipment. Further, we sold the vessel to a third-party buyer in November 2023 and recorded a gain of \$5.8 million from the sale.

In March 2023, we entered into an agreement to sell two Capesize vessels, *Golden Feng* and *Golden Shui*, to an unrelated third party for a total gross amount of \$44.0 million. We recorded an impairment loss of \$11.8 million in connection with the sale.

In February 2023, we entered into an agreement to acquire six modern 208,000 dwt Newcastlemax vessels equipped with exhaust gas cleaning systems, or scrubbers, for a total consideration of \$291.0 million. The acquired vessels are chartered back to their former owner, an unrelated third party, for approximately 36 months at an average net TCE rate of just above \$21,000 per day. As of December 31, 2024, all six vessels were delivered to us and full consideration was paid for these vessels.

The time charter contracts attached to the six Newcastlemax vessels delivered in the year ended December 31, 2023, were valued to net \$4.9 million, which was capitalized upon delivery of vessels and recorded as an asset of \$2.0 million and a liability of \$6.9 million.

In November 2022, we entered into an agreement to sell two Panamax vessels, *Golden Ice* and *Golden Strength*, to an unrelated third party for a total gross amount of \$30.3 million. Upon delivery of *Golden Strength* in January 2023, we recorded a gain of \$2.6 million from the sale. *Golden Ice* was delivered to its new owner in December 2022, at which time we recorded a gain of \$2.8 million.

In June 2022, we entered into an agreement to sell en-bloc two Ultramax vessels, *Golden Cecilie* and *Golden Cathrine* to an unrelated third party for a total gross amount of \$63.0 million. The vessels were delivered to their new owner in the third quarter of 2022, upon which we recorded a gain of \$21.9 million from the sale.

In February 2022, we entered into an agreement to sell en-bloc three older Kamsarmax vessels, *Golden Empress*, *Golden Enterprise* and *Golden Endeavour* to an unrelated third party for a total gross amount of \$52.0 million. The vessels were delivered to their new owner in the second quarter of 2022 upon which we recorded a gain of \$9.5 million from the sale.

With reference to Note 16, "Newbuildings", during the year ended December 31, 2024 and December 31, 2023, four and six newbuildings were delivered to us and related accumulated costs were transferred to the "Vessels and equipment, net" in the total amount of \$153.8 million and \$219.5 million, respectively.

In 2024, we capitalized a total of \$1.3 million in relation to the completed installation of Mewis Duct and nil in relation to the installation of ballast water treatment systems ("BWTS") and scrubbers. In 2023 and 2022, we capitalized a total of \$9.1 million and \$6.0 million in relation to the installation of BWTS and scrubbers, respectively.

Total depreciation expense for own vessels was \$126.6 million, \$120.6 million and \$114.9 million in 2024, 2023 and 2022, respectively. For depreciation expense for finance leases, please refer to Note 17, "Finance Leases".

16. NEWBUILDINGS

Movements in the year ended December 31, 2024, are summarized as follows:

(in thousands of \$)

Balance as of December 31, 2022	91,898
Installments paid	172,892
Capitalized interest expense	5,194
Other	4,297
Transfer to vessels and equipment	(219,504)
Balance as of December 31, 2023	54,777
Installments paid	94,675
Capitalized interest expense	2,152
Other	2,233
Transfer to vessels and equipment	(153,837)
Balance as of December 31, 2024	—

In 2021 and 2022, we entered into agreements for the construction of ten high-specification latest generation 85,000 dwt ECO-type Kamsarmax vessels. As of December 31, 2024, all ten vessels have been delivered to us, with six being delivered in 2023 and the remaining four during 2024.

In 2024, we paid installments, net of commissions, in total of \$94.7 million. In 2023, we paid installments, net of commissions, of \$172.9 million. In 2024 and 2023, we capitalized interest expense of \$2.2 million and \$5.2 million, respectively, for our ten Kamsarmax newbuildings.

As of December 31, 2024, there were no remaining newbuilding commitments.

17. FINANCE LEASES

As of December 31, 2024, we held seven vessels under finance lease (December 31, 2023: seven vessels). With reference to Note 10, "Operating Leases", we have leased in eight vessels from SFL, a related party, one of these vessels was classified as operating lease and remaining seven were classified as finance lease as of December 31, 2024. The daily time charter rate for vessels classified as finance lease was \$19,135, of which \$7,000 is for operating expenses (including drydocking costs) up until the third quarter of 2022 when the daily time charter rate was reduced to \$16,435 up until June 30, 2025. Subsequently, the daily time charter rate will be reduced to \$14,900 until the expiration of the contracts. For the finance leases, the profit share mechanism is calculated based on a base rate of \$14,900 adjusted for a reference rate dependent variable lease consideration. For further description of the calculation of the profit share element and payment structure, refer to Note 10, "Operating Leases". The average daily rate was calculated to be \$17,662 for finance leases in 2024 and there was \$6.4 million in profit share for all eight SFL vessels in 2024 (nil and \$3.0 million in 2023 and 2022, respectively). Contingent or variable lease expense for the eight SFL leases was recorded in 2024 as interest expense of \$2.6 million. In 2023 and 2022 we recorded the variable lease expense of \$2.5 million and \$0.6 million, respectively. The lease term for these vessels has been determined to be 13 years and expires in 2028. With reference to Note 29, "Subsequent Events", we exercised the purchase option for the eight SFL vessels (including one vessel classified as an operating lease) in January 2025.

Our right of use asset for our finance leases were as follows:

(in thousands of \$)

Balance as of January 1, 2023	83,589
Additions	16,281
Depreciation	(14,946)
Impairment	—
Disposal	(16,281)
Balance as of December 31, 2023	68,643
Additions	—
Depreciation	(14,987)
Impairment	—
Disposal	—
Balance as of December 31, 2024	53,656

Our lease obligations for our finance leases were as follows:

(in thousands of \$)

Balance as of January 1, 2023	105,975
Additions	16,281
Repayments	(40,568)
Foreign exchange translation	(198)
Interest expense on obligations under finance lease	6,098
Balance as of January 1, 2024	87,588
Additions	—
Repayments	(24,550)
Foreign exchange translation	—
Interest expense on obligations under finance lease	4,949
Balance as of December 31, 2024	67,987
Current portion	18,829
Non-current portion	49,158

With reference to Note 10, "Operating Leases", upon declaring the purchase option for one Supramax vessel, *Golden Hawk*, we included the option price into lease asset and lease liability and reclassified the lease from operating lease to finance lease in 2023. Repayments of finance leases above includes repayment of \$15.3 million for Golden Hawk upon purchase of the vessel in November 2023 before the end of the lease term.

The weighted average discount rate in relation to our SFL finance leases was 6.3% and the weighted average lease term was 3.6 years as of December 31, 2024. The weighted average discount rate was 6.3% and the weighted average lease term was 4.6 years as of December 31, 2023.

The outstanding obligations under finance leases as of December 31, 2024 are payable as follows:

(in thousands of \$)

2025	22,551
2026	20,617
2027	20,617
2028	12,319
Thereafter	—
Minimum lease payments	76,104
Less: imputed interest	(8,117)
Present value of obligations under finance leases	67,987

With regard to the eight SFL Capesize vessels, we have a purchase option of \$112.0 million en-bloc that was, with reference to Note 29, "Subsequent Events", exercised in January 2025. Accordingly, in January 2025, we modified lease assets and liabilities to include the purchase option and adjust for the decrease in lease term. The estimated financial effect of the purchase option is expected to be an increase in finance lease assets and liabilities of \$47.5 million.

18. VESSELS HELD FOR SALE

There were no vessels held for sale as of December 31, 2024. In December 2023, we entered into an agreement to sell a Panamax vessel, *Golden Bull*, to an unrelated third party for a total gross amount of \$16.0 million. The vessel was delivered to its new owner in February 2024 and was classified as held for sale as of December 31, 2023.

19. INVESTMENTS IN ASSOCIATED COMPANIES

As of December 31, 2024, the Company had the following participation in investments that are recorded using the equity method:

(% of ownership)	2024	2023
TFG Marine Pte Ltd ("TFG Marine")	10.00 %	10.00 %
SwissMarine Pte. Ltd. ("SwissMarine")*	15.92 %	15.92 %
United Freight Carriers LLC. ("UFC")	50.00 %	50.00 %

* In March 2023, our ownership in SwissMarine was diluted from 16.4% to 15.92%.

Movements in investments in associated companies for the years ended December 31, 2024 and 2023 are summarized as follows:

(in thousands of \$)	Swiss Marine	UFC	TFG Marine	Other	Total

Equity in net income of associated companies	21,543	19,250	40,793

(4) In 2023 and 2022, our percentage of ownership in TFG Marine was 10.00% and in UFC 50.00%.

We have an equity investment of 15.92% in SwissMarine, a dry bulk freight operator. Our ownership in SwissMarine was diluted in March 2022 from 17.5% to 16.4% as a result of issuance of additional shares by SwissMarine to its employees, and in March 2023 from 16.4% to 15.92%. We have also provided a \$10.7 million subordinated shareholder loan with a five-year term to SwissMarine, which was partially repaid by SwissMarine in 2020 and remaining balance of subordinated shareholder loan of

\$5.35 million was fully repaid by SwissMarine in 2022. We account for this investment under the equity method as we determined that we have a significant influence over the investee.

In January 2020, we entered into a joint venture agreement with Frontline and its subsidiary Bandama Investments Ltd and Trafigura Pte Ltd to establish TFG Marine, a leading global supplier of marine fuels. As a result, we acquired a 10% interest in TFG Marine. We also provided a shareholder loan of \$1.0 million to TFG Marine. In 2020, the shareholder loan in the total amount of \$75,000 was converted to equity of TFG Marine, reducing the balance of the loan to \$0.9 million. The loan was fully repaid in February 2023. The loan had a five-year term and priced with an interest rate of LIBOR plus a margin of 7%. We account for this investment under the equity method as we determined that we have a significant influence over the investee.

We also have an equity investment of 50% of the shares in UFC, a dry cargo vessel operator and logistics service provider. We account for this investment under the equity method, and the book value of the investment amounted to \$2.0 million as of December 31, 2024.

In 2024, cash dividends received from equity method investees amounted to \$1.4 million (2023: \$19.2 million, 2022: \$16.3 million).

A summary of our interest bearing loans and borrowings, including lease financing, as of December 31, 2024 is as follows:

\$150.0 million term loan facility

In October 2024, we entered into a \$150.0 million sustainability linked term loan facility with a group of first tier European shipping banks to refinance our obligations under the \$175.0 million loan facility described below. The loan facility is secured by six Newcastlemax vessels, and has a five-year tenor and an age adjusted amortization profile of 20 years. The facility is priced with an interest rate of SOFR plus a margin of 165 basis points per annum, and includes a sustainability linked pricing element with an additional 5 basis points pricing adjustment dependent on emission reduction performance. Repayments are made on a quarterly basis from first quarter of 2025 onward, with a balloon payment of \$0.9 million at maturity, in addition to all undrawn amounts of the revolving credit facility. During 2024, we drew \$100.0 million under the facility and there was an available undrawn amount of \$50.0 million.

\$180.0 million term loan facility

In April 2024, we signed a \$180.0 million sustainability linked term loan facility to refinance six Newcastlemax vessels under the \$233.0 million facility described below. The financing has a five-year tenor and a linear age adjusted amortization profile of 20 years. The facility is priced with an interest rate of SOFR plus a margin of 160 basis points per annum, and includes a sustainability linked pricing element with an additional 5 basis points pricing adjustment dependent on emission reduction performance. Repayments are made on a quarterly basis from third quarter of 2024 onward, with a balloon payment of \$126.6 million at maturity. During 2024, \$5.6 million was repaid.

\$360.0 million term loan facility

In February 2024, we signed a \$360.0 million sustainability linked credit facility to refinance our obligations under the \$120.0 million and \$304.0 million loan facilities described below. The loan facility is secured by 19 vessels, and has a five-year tenor and an age adjusted amortization profile of 20 years. The facility is priced with an interest rate of SOFR plus a margin of 175 basis points per annum, and includes a sustainability linked pricing element with an additional 5 basis points pricing adjustment dependent on emission reduction performance. Repayments are made on a quarterly basis from second quarter of 2024 onward, with a balloon payment of \$164.4 million at maturity, in addition to all undrawn amounts of the revolving credit facility. During 2024, \$27.8 million was repaid, which included repayment of debt in connection to the sale of *Golden Diamond* of \$6.6 million. There was an available undrawn amount of \$50.0 million.

\$85.0 million lease financing

In December 2023, we signed a sale and leaseback agreement for an amount of \$85.0 million to partially finance the four Kamsarmax newbuildings to be delivered during 2024. The lease financing has a ten-year tenor and an interest rate of SOFR plus a margin of 185 basis points per annum. The lease is repaid over a straight-line amortization profile of 21 years and with purchase options throughout the term and at maturity, with the purchase options being the "Net Purchase Option Price"

equivalent to the amount of the outstanding capital element at the purchase option exercise date. As of December 31, 2024, all four newbuildings were delivered and we drew \$85.0 million under the facility. During 2024, \$2.0 million was repaid.

\$40.0 million term loan facility

In July 2023, we entered into a \$40.0 million credit facility to partially finance the two Kamsarmax newbuildings delivered during the third quarter of 2023. The facility has a seven-year tenor and an interest rate of SOFR plus a margin of 175 basis points per annum. Repayments are made on a quarterly basis from fourth quarter of 2023 onward, with a balloon payment of \$26.5 million at maturity. During 2024, \$2.0 million was repaid and there was no available undrawn amount.

\$80.0 million term loan facility

In April 2023, we signed an agreement for a \$80.0 million facility to partially finance the four Kamsarmax newbuildings delivered during the second quarter of 2023. The facility has a seven-year tenor and an interest rate of SOFR plus a margin of 180 basis points per annum. Repayments are made on a quarterly basis from third quarter of 2023 onward, with a balloon payment of \$52.0 million at maturity. During 2024, \$4.0 million (2023: \$2.0 million) was repaid and there was no available undrawn amount.

\$250.0 million term loan facility

In January 2023, we signed a loan agreement for a \$250.0 million credit facility with a group of leading shipping banks. The facility has an interest rate of SOFR plus a margin of 180 basis points and matures in January 2028 and is secured by a fleet of 16 Capesize, Kamsarmax and Panamax vessels. Repayments are made on a quarterly basis from second quarter of 2023 onward, with a balloon payment of \$112.1 million at maturity. During 2024, \$50.4 million (2023: \$26.0 million) was repaid, which included repayment of debt in connection to the sale of *Golden Bull* (\$7.7 million), *Golden Ruby* (\$8.1 million) and *Golden Gayle* (\$12.4 million). There was no available undrawn amount.

\$275.0 million term loan facility

In May 2022, we signed a loan agreement for a \$275.0 million term loan and revolving facility. The facility bears an interest of SOFR plus a margin of 190 basis points. It also includes a \$50.0 million non-amortizing revolving credit tranche. All tranches under the \$275.0 million term loan facility and revolving credit tranche mature in May 2027. Repayments are made on a quarterly basis from third quarter of 2022 onward, with a balloon payment of \$114.4 million at maturity, in addition to all undrawn amounts of the revolving credit facility. During 2024, \$72.1 million (2023: \$22.1 million) was repaid, which included a \$50 million repayment of the revolving credit tranche, leaving an available undrawn amount of \$50.0 million.

\$260.0 million lease financing

In August 2021, we signed a sale and leaseback agreement for an amount of \$260.0 million, refinancing the remaining nine vessels and three newbuildings financed by the Sterna Facility. The lease financing has a seven-year tenor, bears an interest of SOFR plus a margin of 200 basis points, has a straight line amortization profile of 21 years and has purchase options throughout the term, with a purchase obligation at maturity. Repayments are made on a quarterly basis from fourth quarter of 2021 onward. During 2024, \$12.4 million (2023: \$12.4 million) was repaid and there was no available undrawn amount.

A summary of our interest bearing loans and borrowings, including lease financing, that has been refinanced during the year ended December 31, 2024 and 2023 is as follows:

\$175.0 million term loan facility (refinanced)

This facility had a five-year tenor and a 19-year age adjusted repayment profile. The facility carried interest of SOFR plus a margin of 216 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$175.0 million loan facility and drew down on the \$150.0 million loan facility described above. In total, during 2024, \$127.3 million (2023: \$35.1 million, including \$25.0 million on the revolving credit tranche) was repaid, including \$25.0 million on the revolving credit tranche, leaving an available undrawn amount of \$50.0 million before the loan facility was refinanced.

\$304.0 million term loan facility (refinanced)

This facility had a five-year tenor and a 20-year age adjusted repayment profile. The facility carried interest of SOFR plus a margin of 261 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$304.0 million loan facility and drew down on the \$360.0 million loan facility described above. In total, during 2024, \$197.9 million (2023: \$18.7 million) was repaid.

\$120.0 million term loan facility (refinanced)

This facility had a seven-year tenor and a 20-year age adjusted amortization profile. The facility carried interest of SOFR plus a margin of 251 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$120.0 million loan

facility and drew down on the \$360.0 million loan facility described above. In total, during 2024, \$58.6 million (2023: \$5.0 million) was repaid.

\$233.0 million term loan facility (refinanced)

This facility had a two-year tenor and a 20-year age adjusted amortization profile. The facility carried interest of SOFR plus a margin of 190 basis points. In 2024, we refinanced and fully repaid the outstanding amounts under the \$233.0 million loan facility and drew down on the \$180.0 million loan facility described above. In total, during 2024, \$181.4 million (2023: \$33.2 million) was repaid.

Financial covenants

Our loan agreements contain loan-to-value clauses, which could require us to post additional collateral or prepay a portion of the outstanding borrowings should the value of the vessels securing borrowings under each of such agreements decrease below required levels. In addition, the loan agreements contain certain financial covenants, including the requirement to maintain a certain level of free cash, positive working capital as defined in the loan agreement and a value adjusted equity covenant. Under most of our debt facilities the aggregate value of the collateral vessels shall not fall below 130% of the loan outstanding, depending on the facility (for \$150 million loan facility, the value should not fall below 135%. For \$40 million loan facility, the value should not fall below 125%. For \$260 million and \$85 million lease financings, the value should not fall below 115%). We need to maintain free cash of at least \$20 million or 5% of total interest bearing debt, maintain positive working capital and maintain a value adjusted equity of at least 25% of value adjusted total assets.

With regards to free cash, we have covenanted to retain at least \$68.5 million of cash and cash equivalents as of December 31, 2024 (December 31, 2023: \$72.9 million) and in accordance with our accounting policy this is classified under cash and cash equivalents. In addition, none of our vessel owning subsidiaries may sell, transfer or otherwise dispose of their interests in the vessels they own without the prior written consent of the applicable lenders unless, in the case of a vessel sale, the outstanding borrowings under the credit facility applicable to that vessel are repaid in full. Failure to comply with any of the covenants in the loan agreements could result in a default, which would permit the lender to accelerate the maturity of the debt and to foreclose upon any collateral securing the debt. Under those circumstances, we might not have sufficient funds or other resources to satisfy our obligations.

As of December 31, 2024 and December 31, 2023, we were in compliance with our financial covenants.

On March 4, 2025, CMB.TECH, through its subsidiary CMB.TECH Bermuda Ltd., entered into a share purchase agreement with Hemen to purchase all of Hemen's 81,363,730 of our common shares at a purchase price of \$14.49 per common share (the "Share Purchase"). Following the closing of the Share Purchase on March 12, 2025, Hemen ceased to hold any of our common shares of the Company. All of our loan agreements contain a change of control compliance clause that prohibits any person, other than Hemen Holdings Limited ("Hemen") and certain of its affiliates, without the lenders prior written approval from either acquiring (directly or indirectly): (i) more than 33.33% of the shares or the votes of the Company; or (ii) the right to control the appointment of a majority of the members of the Board of Directors of the Company. The Share Purchase has resulted in a breach of change of control compliance clause described above for all our loan agreements with the total outstanding debt of \$1,314.2 million as of December 31, 2024. Although we are not currently in default, our lenders may declare a default if they serve a notice of non-compliance and we fail to rectify the issue within 14 days period. As of March 20, 2025, the Company has not received any request to rectify the non-compliance. We are currently in discussions with our existing lenders to address the change in the Company's largest shareholder as a result of the Share Purchase, and the discussions have not resulted in any rejections as of March 20, 2025.

Additionally, CMB.TECH has identified syndicate banks to refinance all or part of our current outstanding debt and has entered into credit committee approved commitment letters with these banks as of March 4, 2025 for outstanding borrowings of up to \$2.0 billion, that are subject only to the execution of satisfactory documentation and customary covenants and closing conditions. If we are unable to reach agreements with our existing lenders, we plan on refinancing our existing debt with the committed financing described above, which may have, among others, the expected terms, as follows: Golden Ocean is the borrower, the guarantors are CMB.TECH, and the subsidiaries of Golden Ocean that own the vessels are serving as collateral under the loan. The financing is expected to have a 5-year tenor and a linear age adjusted amortization profile of 20 years. The facility is expected to be priced with an interest rate of SOFR plus a market-based margin.

Deferred charges

Debt issuance costs of \$11.7 million as of December 31, 2024 (2023: \$10.6 million) are presented as a deduction from the carrying value of our debt.

The outstanding debt as of December 31, 2024 is repayable as follows:

(in thousands of \$)

2025	113,848
2026	113,848
2027	217,223
2028	353,627
2029	371,360
Thereafter	144,287
Total U.S. dollar denominated floating rate debt	1,314,193
Deferred charges	(11,666)
Total debt	1,302,527

Assets pledged

As of December 31, 2024, 83 vessels (2023: 83 vessels) with an aggregate carrying value of \$2,959.1 million (2023: \$2,987.4 million) were pledged as security for our floating rate debt.

Weighted average interest

The weighted average interest rate related to our floating rate debt (margin excluding SOFR) as of December 31, 2024 and 2023 was 1.80% and 2.05%, respectively.

21. ACCRUED EXPENSES

Distribution of treasury shares	400,000	250,000	450,000
Outstanding number of shares: Balance at end of year	199,403,293	199,628,293	200,485,621

In 2024, 2023 and 2022, we acquired an aggregate of 625,000, 1,107,328 and 400,000, respectively, of our own shares, in open market transactions under our 2022 share buy-back program. In 2024, 2023 and 2022, the shares were acquired on the OSE and on NASDAQ at an aggregate purchase price of \$5.7 million, \$8.4 million and \$3.3 million, respectively. As of December 31, 2024, the Company held 1,787,328 treasury shares out of which 1,732,328 were repurchased under the 2022 share buy-back program and 55,000 were repurchased under the 2019 share buy-back program (December 31, 2023: 1,562,328 treasury shares, December 31, 2022: 705,000 treasury shares).

In 2024, 2023 and 2022, 400,000, 250,000 and 450,000 share options held by the management were exercised, respectively. We settled the options by distributing the same amount of treasury shares acquired as part of 2022 and 2019 share buy-back programs and recorded a loss of \$2.4 million, \$1.2 million and \$1.7 million in the equity statement.

In 2024, 2023 and 2022, we paid \$239.9 million, \$100.0 million and \$471.7 million in dividends to our shareholders, respectively, corresponding to a dividend per share of \$1.20, \$0.50 and \$2.35. Refer to Note 29, "Subsequent Events", for any subsequent dividend declarations.

As of December 31, 2024, 199,403,293 common shares were outstanding (December 31, 2023: 199,628,293 common shares, December 31, 2022: 200,485,621 common shares), which includes an adjustment for treasury shares in 2024, 2023 and 2022 of 1,787,328, 1,562,328 and 705,000, respectively.

25. SHARE OPTIONS

2016 Share Option Plan:

In November 2016, the Board approved the adoption of the 2016 Plan. The 2016 Plan permits share options to be granted to directors, officers and employees (the "Option holders"), of the Company and its subsidiaries. The plan has a 10-year term effective November 2016. The share options entitle the Option holders to subscribe for common shares at a price per share equal to the exercise price as determined by the Board on the date the share options are granted. The share options have no voting or other shareholder rights.

In 2020, in accordance with the terms of the 2016 Plan, 550,000, 275,000 and 275,000 share options were granted to the Chief Executive Officer, Chief Financial Officer and Chief Commercial Officer of Golden Ocean Management AS, respectively. The share options have a five-year term and vest equally over three years with a subscription price per share as specified below. The total fair value for share option award was estimated to be \$0.8 million, \$0.4 million and \$0.4 million, respectively. All outstanding share options granted in 2020 were exercised in 2024.

	Number of options		Weighted Average Exercise Price ¹⁾	Weighted Average Grant date Fair Value
	Management	Total		
Total Outstanding as of December 31, 2022	650,000	650,000	\$6.27	\$1.28
Granted during 2023	—	—	—	—
Exercised during 2023	250,000	250,000	\$6.70 ²⁾	\$1.29
Forfeited during 2023	—	—	—	—
Exercisable as of December 31, 2023	400,000	400,000	\$5.63 ²⁾	\$1.20
Outstanding as of December 31, 2023 - Unvested	—	—	—	—
Total Outstanding as of December 31, 2023	400,000	400,000	\$5.63	\$1.20
Granted during 2024	—	—	—	—
Exercised during 2024	400,000	400,000	\$5.86 ²⁾	\$1.08
Forfeited during 2024	—	—	—	—
Exercisable as of December 31, 2024	—	—	—	—
Outstanding as of December 31, 2024 - Unvested	—	—	—	—
Total Outstanding as of December 31, 2024	—	—	—	—

1) not adjusted for dividends. For all share options granted the share options exercise price is adjustable for distribution of dividend before the share options are exercised.

2) Accumulated dividends as of exercise date during 2023, as of December 31, 2023 and as of exercise date during 2024 are approximately \$4.40, \$4.80 and \$5.10 per share, respectively.

As of December 31, 2024 and 2023, outstanding vested options amounted to nil and 400,000, respectively.

The following table summarizes certain information about the options outstanding as of December 31, 2024 and 2023:

Weighted Average Exercise Price of Outstanding Options	Options Outstanding and Unvested, December 31, 2024			Options Outstanding and Exercisable, December 31, 2024		
	Number of options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Number of options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
\$0.00	—	\$0.00	0	—	\$0.00	0

Weighted Average Exercise Price of Outstanding Options	Options Outstanding and Unvested, December 31, 2023			Options Outstanding and Exercisable, December 31, 2023		
	Number of options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Number of options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
\$5.63	—	\$0.00	0	400,000	\$5.63 ¹⁾	1.79

1) Accumulated dividends as of December 31, 2023 are approximately \$4.80 per share.

For the year ended December 31, 2024 and 2023 the share based compensation was nil and \$0.3 million, respectively, and are included in "Administrative expenses" in the consolidated statement of operations. In 2024 and 2023, we settled the exercise of 400,000 and 250,000 share options, respectively, by distributing the same amount of treasury shares.

As of December 31, 2024 and 2023, the estimated cost relating to non-vested share options not yet recognized was nil and nil respectively.

26. RELATED PARTY TRANSACTIONS

We transacted business with the following related parties, consisting of companies in which Hemen, our largest shareholder prior to the closing of the Share Purchase on March 12, 2025, and companies associated with Hemen have a significant interest: Frontline plc and its subsidiaries (referred to as "Frontline"), SFL, Seatankers Management Co. Ltd and companies related to it (referred to as "Seatankers") and Front Ocean Management ("Front Ocean"). We also transacted business with our associated companies. With reference to Note 29, "Subsequent Events", as of March 12, 2025, Hemen ceased to hold any of our common shares of the Company.

SFL

In April 2015, we agreed to a sale and leaseback transaction with SFL for eight Capesize vessels. These vessels were sold en-bloc for an aggregate price of \$272.0 million. The vessels were delivered to SFL in the third quarter of 2015 and were time chartered-in by one of our subsidiaries for a period of ten years. We have a purchase option of \$112 million en-bloc after ten years and, if such option is not exercised, SFL will have the option to extend the charters by three years at \$14,900 per day. Refer to Note 10, "Operating Leases", and Note 17, "Finance Leases", for additional information related to these contracts. With reference to Note 29, "Subsequent Events", we exercised the purchase option in January 2025.

Seatankers

During the twelve months ended December 31, 2024, we have been the commercial manager of 10 (2023: 10) dry bulk vessels owned and operated by Seatankers, with the number reduced to nine in March 2024. Pursuant to the management agreements, we receive \$125 (2023: \$125, 2022: \$125) per day per vessel for managing the dry bulk vessels. From time to time we may also charter in dry bulk vessel owned by Seatankers on short-term time charters.

United Freight Carriers

With reference to Note 19, "Investments in Associated Companies", we also have an equity investment of 50% of the shares in UFC, a dry cargo vessel operator and logistics service provider that primarily focuses its activity around smaller bulk carriers with deadweight of up to 50,000 tonnes.

SwissMarine

With reference to Note 19, "Investments in Associated Companies", in 2019 we made an equity investment in SwissMarine, a dry bulk freight operator of which we have determined to have significant influence. In 2019, we provided SwissMarine with a \$10.7 million subordinated shareholder loan, for which remaining balance of \$5.35 million was fully repaid by SwissMarine in 2022 and there is no outstanding balance as of December 31, 2024.

In addition, we have entered into several charter agreements with SwissMarine and total time charter revenues from SwissMarine amounted to \$0.9 million in the year ended December 31, 2024 (December 31, 2023: total time charter and voyage charter revenues of \$3.9 million).

TFG Marine

With reference to Note 19, "Investments in Associated Companies", in 2020 we made an equity investment in TFG Marine, in which we have determined to have significant influence. We provided a shareholder loan of \$1.0 million to TFG Marine. In 2020, the shareholder loan in the total amount of \$75,000 was converted to equity of TFG Marine, reducing the balance of the loan to \$0.9 million. The loan had a five-year term and bears interest of LIBOR plus a margin of 7%. In February 2023, TFG Marine fully repaid the outstanding loan of \$0.9 million. We also entered into a bunker supply arrangement with TFG Marine, under which we have paid \$134.7 million to TFG Marine in relation to bunker procurement in 2024 (2023: \$159.8 million) and \$3.1 million remains due as of December 31, 2024 (December 31, 2023: \$8.5 million).

In 2020, we issued a \$20.0 million guarantee in respect of the performance of our subsidiaries under a bunker supply arrangement with the joint venture. In May 2022, we increased this guarantee under a bunker supply agreement with TFG Marine from \$20.0 million to \$30.0 million. As of December 31, 2024, there are no exposures under this guarantee and liability recorded relating to the exposure. In addition, should TFG Marine be required to provide a parent company guarantee to its bunker suppliers or finance providers then for any guarantee that is provided by Trafigura and becomes payable, we shall pay an amount equal to our equity proportion of that amount payable. The maximum liability under this guarantee is \$4.0 million. There are no amounts payable under this guarantee as of December 31, 2024.

Management Agreements

Technical Supervision Services

Up until January 1, 2024, we received technical supervision services from Frontline Management (Bermuda) Limited ("Frontline Management"). Pursuant to the terms of the agreement, Frontline Management received an annual management fee of \$25,170 in 2023. From 2024, technical supervision is performed by Golden Ocean's in-house technical team, with the exception of newbuilding supervision services, which have been performed by Frontline Management.

Other Management Services

We aim to operate efficiently through utilizing Front Ocean or other companies with the same main shareholder and these costs are allocated based on a cost plus mark-up model. We receive services in relation to sales and purchase activities, bunker procurement and administrative services in relation to the corporate headquarter. We may also provide certain financial management services to companies with the same main shareholder.

A summary of net amounts charged by related parties in 2024, 2023 and 2022 is as follows:

<i>(in thousands of \$)</i>	2024	2023	2022
Frontline	2,028	4,206	3,902

Credit loss allowance	(21)	(21)
	2,132	3,734

A summary of short-term balances owed to related parties as of December 31, 2024 and 2023 is as follows:

<i>(in thousands of \$)</i>	2024	2023
TFG Marine	3,109	8,479
Seatankers	13	—
Other	109	678
	3,231	9,157

As of December 31, 2024 and December 31, 2023, receivables and payables with related parties mainly comprise unpaid fees for services rendered from and to related parties. In addition to the balances stated above, we have recorded operating lease liabilities and finance lease liabilities related to the eight vessels chartered from SFL. Refer to Note 10, "Operating Leases", and Note 17, "Finance Leases", for additional information.

We have periodically issued share options as disclosed in Note 25, "Share Options", of these consolidated financial statements.

27. FINANCIAL ASSETS AND LIABILITIES

Interest rate risk management

Our interest rate swaps are intended to reduce the risk associated with fluctuations in interest rates payments. As of December 31, 2024, we have interest rate swaps whereby the floating rate (3-months SOFR) on a notional principal amount of

\$550 million (December 31, 2023: \$650 million) are swapped to fixed rate. Credit risk exists to the extent that the counterparties are unable to perform under the swap contracts but this risk is considered remote as the counterparties are well established banks, which may also participate in loan facilities to which the interest rate swaps are related.

Our interest rate swap contracts as of December 31, 2024 of which none are designated as hedging instruments are summarized as follows:

<i>(in thousands of \$)</i>	Notional Amount	Inception Date	Maturity Date	Fixed Interest Rate
Receiving floating, pay fixed	50,000	August 2017 ¹⁾	August 2025	2.41 %
Receiving floating, pay fixed	50,000	August 2017 ¹⁾	August 2025	2.58 %
Receiving floating, pay fixed	100,000	October 2019 ¹⁾	October 2025	2.51 %
Receiving floating, pay fixed	50,000	March 2020 ¹⁾	March 2027	0.94 %
Receiving floating, pay fixed	50,000	March 2020 ¹⁾	March 2027	0.74 %
Receiving floating, pay fixed	50,000	April 2022	December 2030	2.53 %
Receiving floating, pay fixed	50,000	July 2022	September 2030	1.77 %
Receiving floating, pay fixed	50,000	January 2023	March 2030	3.07 %
Receiving floating, pay fixed	50,000	January 2023 ²⁾	January 2030	2.55 %
Receiving floating, pay fixed	50,000	March 2023 ²⁾	January 2030	2.64 %
	<u>550,000</u>			

1) On June 30, 2023, our interest rate swap derivative contracts with LIBOR reference rate transitioned to SOFR reference rate in accordance with Interbank Offered Rate ("IBOR") fallback protocol, as published by International Swaps and Derivatives Association (ISDA) Inc and adhered by us in April 2023. As a result, the floating rate transitioned from LIBOR to SOFR and the fixed rate decreased based on the Credit Adjustment Spread ("CAS") of 26.1 basis points.

2) Forward-looking swaps: first payment date for the \$50 million 2.55% interest rate swap (SOFR) and \$50 million 2.64% interest rate swap is October 2025.

Forward freight agreements

We take positions from time to time in the freight forward market, either as a hedge to a physical contract or as a speculative position. All such contracts are fully settled in cash through what we consider reputable clearing houses on a daily basis, as such there are no balances relating to FFAs on the Consolidated Balance Sheets. Credit risk exists to the extent that our counterparties are unable to perform under the FFA contracts but this risk is considered remote as well as participants post collateral security for their positions.

As of December 31, 2024, we had long positions through FFA of net 495 days with maturity in 2025.

Bunker derivatives

We enter into cargo contracts from time to time. We are therefore exposed to fluctuations in bunker prices, as the cargo contract price is based on an assumed bunker price for the trade. To hedge the risk of fluctuating bunker prices, we sometimes enter into bunker swap agreements. There is no guarantee that the hedge removes all the risk from the bunker exposure, due to possible differences in location and timing of the bunkering between the physical and financial position. The counterparties to such contracts are major banking and financial institutions. Credit risk exists to the extent that the counterparties are unable to perform under the bunker contracts but this risk is considered remote as the counterparties are usually what we consider well established banks or other well-known institutions in the market.

As of December 31, 2024, we had no outstanding bunker swap agreements. As of December 31, 2023, we had outstanding bunker swap agreements for about 4.2 thousand metric tonnes.

Foreign currency risk

The majority of our transactions, assets and liabilities are denominated in United States dollars, our functional currency. However, we incur expenditure in currencies other than the functional currency, mainly in Norwegian Kroner and Singapore Dollars for personnel costs and administrative expenses, and Euro for some of our scrubber equipment investments. There is a risk that currency fluctuations in transactions incurred in currencies other than the functional currency will have a negative effect of the value of our cash flows. Due to the exposure of currency fluctuations we may enter into foreign currency swaps to mitigate such risk exposures. The counterparties to such contracts are what we consider major banking and financial institutions. Credit risk exists to the extent that the counterparties are unable to perform under the contracts but this risk is considered remote as the counterparties are what we consider well established banks.

As of December 31, 2024, we had contracts to swap USD to NOK for a notional amount of \$1.8 million. As of December 31, 2023, we had contracts to swap USD to NOK for a notional amount of \$2.1 million.

Fair values

The guidance for fair value measurements applies to all assets and liabilities that are being measured and reported on a fair value basis. This guidance enables the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The same guidance requires that assets and liabilities carried at fair value should be classified and disclosed in one of the following three categories based on the inputs used to determine its fair value:

- Level 1: Quoted market prices in active markets for identical assets or liabilities;
- Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data;
- Level 3: Unobservable inputs that are not corroborated by market data.

In addition, ASC 815, "*Derivatives and Hedging*" requires companies to recognize all derivative instruments as either assets or liabilities at fair value in the statement of financial position.

The carrying value and estimated fair value of our financial instruments as of December 31, 2024 and December 31, 2023 are as follows:

<i>(in thousands of \$)</i>	Level	2024 Fair Value	2024 Carrying Value	2023 Fair Value	2023 Carrying Value
Assets					
Cash and cash equivalents	1	129,106	129,106	116,382	116,382
Restricted cash	1	2,623	2,623	2,254	2,254
Derivative assets	2	27,294	27,294	28,070	28,070
Liabilities					
Long-term debt - floating	2	1,314,193	1,314,193	1,380,673	1,380,673
Derivative liabilities	2	74	74	172	172

There have been no transfers between different levels in the fair value hierarchy in 2024 and 2023.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

- The carrying value of cash and cash equivalents, which are highly liquid, approximate fair value.
- Restricted cash and investments - the balances relate entirely to restricted cash and the carrying values in the balance sheet approximate their fair value.
- Floating rate debt - the carrying value in the balance sheet approximates the fair value since it bears a variable interest rate, which is reset on a quarterly basis.
- Derivatives - are based on the present value of the estimated future cash flows that we would receive or pay to terminate the agreements at the balance sheet date.

Assets Measured at Fair Value on a Nonrecurring Basis

During the year ended December 31, 2024, the value of *Golden Gayle* and *Golden Diamond*, one Newcastlemax vessel and one Panamax vessel, with sales entered into with unrelated third parties in September 2024, was measured at fair value. The fair value were based on level three inputs and the expected market value based on sales agreement. Upon delivery of the vessels in November 2024 and October 2024, we recorded a gain of \$16.1 million.

During the year ended December 31, 2024, the value of *Golden Ruby*, a Panamax vessel, with sales entered into with an unrelated party in June 2024, was measured at fair value. The fair value were based on level three inputs and the expected market value based on sales agreement. Upon delivery of the vessel in August 2024, we recorded a gain of \$4.2 million.

During the year ended December 31, 2024, the value of *Golden Bull*, a Panamax vessel, with sales entered into with an unrelated party in December 2023, was measured at fair value. The fair value was based on level three inputs and the expected market values based on sales agreement. Upon delivery of the vessel in February 2024, we recorded a gain of \$1.1 million.

During the year ended December 31, 2023, with reference to Note 15 "Vessels and Equipment, net", we took delivery of six Newcastlemax vessels from H-Line and recorded the cost of vessels acquired amounting to \$291.0 million based on the fair value of the total consideration paid.

During the year ended December 31, 2023, fair value of favorable time charter contracts acquired as part of the acquisition of Newcastlemax vessels, was measured at fair value upon delivery of vessels. The fair value was based on level three inputs and calculated as the net present value of the difference in cash flows arising over the period of the contracts between the expected cash flows from the contracts and expected cash flows from comparable contracts at the acquisition date. The time charter contracts were valued to net \$4.9 million, which was capitalized upon delivery of vessels and recorded as an asset of \$2.0 million and a liability of \$6.9 million.

During the year ended December 31, 2023, the value of *Golden Suek* and *Golden Hawk*, one Panamax and one Supramax vessel, with sales entered into with unrelated third parties in August 2023 and September 2023, was measured at fair value. The fair value were based on level three inputs and the expected market values based on sales agreements. Upon delivery of *Golden Suek* and *Golden Hawk* in September 2023 and November 2023, we recorded a gain of \$0.8 million and \$5.8 million, respectively.

During the year ended December 31, 2023, the value of *Golden Strength*, *Golden Feng* and *Golden Shui*, one Panamax vessel and two Capesize vessels, with sales entered into with unrelated third parties in November 2022 and March 2023, was measured at fair value. The fair values were based on level three inputs and the expected market values based on sales agreements. Upon delivery of *Golden Strength* in January 2023, we recorded a gain of \$2.6 million, and upon delivery of *Golden Feng* and *Golden Shui* in May 2023, we recorded an impairment loss of \$11.8 million in connection with the sale.

During the year ended December 31, 2022, the value of *Golden Ice*, *Golden Cecilie*, *Golden Cathrine*, *Golden Empress*, *Golden Enterprise* and *Golden Endeavour*, two Ultramax vessels, three Kamsarmax vessels and one Panamax vessel sold to unrelated third parties, were measured at fair value. The fair values were based on level three inputs and the expected market values based on sales agreements. Upon delivery of *Golden Ice* in December 2022, we recorded a gain of \$2.8 million. *Golden Cecilie* and *Golden Cathrine* was delivered to its new owner in the third quarter of 2022, at which time we recorded a gain of \$21.9 million. *Golden Empress*, *Golden Enterprise* and *Golden Endeavour* was delivered to its new owner in the second quarter of 2022, at which time we recorded a gain of \$9.5 million.

Assets Measured at Fair Value on a Recurring Basis

The fair value (level 2) of interest rate swap, currency swap, bunker and freight derivative agreements is the present value of the estimated future cash flows that we would receive or pay to terminate the agreements at the balance sheet date, taking into account, as applicable, fixed interest rates on interest rate swaps, current interest rates, forward rate curves, current and future bunker prices and the credit worthiness of both us and the derivative counterparty.

Concentrations of risk

There is a concentration of credit risk with respect to cash and cash equivalents to the extent that substantially all of the amounts are carried with SEB, DNB and Danske Bank. However, we believe this risk is remote, as these financial institutions are established and reputable establishments with no prior history of default. We do not require collateral or other security to support financial instruments subject to credit risk.

28. COMMITMENTS AND CONTINGENCIES

We insure the legal liability risks for our shipping activities with Assuranceforeningen SKULD and Assuranceforeningen Gard Gjensidig, both mutual protection and indemnity associations. We are subject to calls payable to the associations based on our claims record in addition to the claims records of all other members of the associations. A contingent liability exists to the extent that the claims records of the members of the associations in the aggregate show significant deterioration, which result in additional calls on the members.

To the best of our knowledge, there are no legal or arbitration proceedings existing or pending which have had or may have significant effects on our financial position or profitability and no such proceedings are pending or known to be contemplated.

As of December 31, 2024, we have seven vessels held under finance lease and one vessel held under operating lease. Refer to Note 10, "Operating Leases", and Note 17, "Finance Leases", for additional information. With reference to Note 29, "Subsequent Events", we exercised the purchase option for the eight SFL vessels in January 2025.

As of December 31, 2024, we had firm commitments totaling \$7.8 million related to estimated yard bills for drydocking of our vessels.

With reference to Note 19, "Investments in Associated Companies", we issued a \$20 million guarantee in respect of the performance of our subsidiaries under a bunker supply arrangement with TFG Marine. In May 2022, we increased this guarantee under the bunker supply arrangement with TFG Marine from \$20 million to \$30 million. As of December 31, 2024, there are no exposures under this guarantee. In addition, should TFG Marine be required to provide a parent company guarantee to its bunker suppliers or finance providers then for any guarantee that is provided by Trafigura and becomes payable, we shall pay an amount equal to its equity proportion of that amount payable. The maximum liability under this guarantee is \$4.0 million. There are no amounts payable under this guarantee as of December 31, 2024.

29. SUBSEQUENT EVENTS

The Company had the option to purchase the eight vessels from SFL en-bloc for an aggregate price of \$112 million on the 10-year anniversary of the commencement of the leases of such vessels. In January 2025, the Company sent a notice to SFL declaring the purchase option for the eight vessels. The purchase will be finalized during the third quarter of 2025 and is expected to be partly financed by a \$90 million credit facility, which is credit approved by the lender but subject to the negotiation and execution of customary documentation including updating change of control clauses due to Share Purchase described above. The two-year facility is non-amortizing and revolving, with an interest of SOFR plus a margin of 145 basis points per annum.

On February 26, 2025, we announced a cash dividend of \$0.15 per share in respect of the fourth quarter of 2024, which is payable on or about March 21, 2025, to shareholders of record on March 11, 2025. Shareholders holding the Company's shares through Euronext VPS may receive this cash dividend later on or about March 24, 2025.

On March 4, 2025, CMB.TECH, through its subsidiary CMB.TECH Bermuda Ltd., entered into a share purchase agreement with Hemen to purchase all of Hemen's 81,363,730 of our common shares at a purchase price of \$14.49 per common share (the "Share Purchase"). Following the closing of the Share Purchase on March 12, 2025, Hemen ceased to hold any of our common shares of the Company.

CMB.TECH has identified syndicate banks to refinance all or part of our current outstanding debt and has entered into credit committee approved commitment letters with these banks as of March 4, 2025 for outstanding borrowings of up to \$2.0 billion, that are subject only to the execution of satisfactory documentation and customary covenants and closing conditions. If we are unable to reach agreements with our existing lenders, we plan on refinancing our existing debt with the committed financing described above, which may have, among others, the expected terms, as follows: Golden Ocean is the borrower, the guarantors are CMB.TECH, and the subsidiaries of Golden Ocean that own the vessels are serving as collateral under the loan. The financing is expected to have a 5-year tenor and a linear age adjusted amortization profile of 20 years. The facility is expected to be priced with an interest rate of SOFR plus a market-based margin.
