Strong Cresemba[®] (isavuconazole) sales performance in Asia Pacific and China triggers fourth milestone payment for this region to Basilea this year

Allschwil, Switzerland, October 10, 2024

Basilea Pharmaceutica Ltd, Allschwil (SIX: BSLN), a commercial-stage biopharmaceutical company committed to meeting the needs of patients with severe bacterial and fungal infections, announced today that the continued strong sales performance of the antifungal Cresemba[®] (isavuconazole) by its license partner Pfizer Inc. in the Asia Pacific region and China exceeded the sales threshold triggering a USD 1.25 million milestone payment.

David Veitch, Basilea's Chief Executive Officer, stated: "This is the fourth milestone payment for Asia Pacific and China this year and it reflects the significant medical need and strong growth momentum of Cresemba in this region. We are pleased to see that Cresemba continues to serve a medical need in patients suffering from life-threatening invasive mold infections."

The license agreement between Basilea and Pfizer for Cresemba covers Europe (excluding the Nordic countries) as well as 16 countries in the Asia Pacific region and China.

Cresemba is approved and marketed in more than 70 countries, including the United States, most EU member states and additional countries inside and outside of Europe. According to the latest available market data, total global in-market sales of Cresemba amounted to USD 505 million in the 12 months between July 2023 and June 2024, a 20 percent growth year-on-year.¹

About isavuconazole (Cresemba[®])

Isavuconazole is an intravenous (i.v.) and oral azole antifungal, commercialized under the trade name Cresemba[®]. Basilea has entered into several license and distribution agreements for isavuconazole covering approximately 115 countries. In the 27 European Union member states, as well as in Iceland, Liechtenstein and Norway, isavuconazole is approved for patients aged from 1 year of age and older for the treatment of invasive aspergillosis and for the treatment of mucormycosis in patients for whom amphotericin B is inappropriate.² In China, the oral and intravenous formulations are approved for the treatment of adult patients with invasive aspergillosis and invasive mucormycosis. Isavuconazole is also approved in the United States (US) and several additional countries in Europe and beyond, including Japan and the U.K.³ It has orphan drug designation in the US, Europe and Australia for its approved indications.

About Basilea

Basilea is a commercial-stage biopharmaceutical company founded in 2000 and headquartered in Switzerland. We are committed to discovering, developing and commercializing innovative

drugs to meet the needs of patients with severe bacterial or fungal infections. We have successfully launched two hospital brands, Cresemba for the treatment of invasive fungal infections and Zevtera for the treatment of bacterial infections. In addition, we have preclinical and clinical anti-infective assets in our portfolio. Basilea is listed on the SIX Swiss Exchange (SIX: BSLN). Please visit [basilea.com](https://www.basilea.com).
