- The CET1 ratio stands at 17.7%, equal to a decrease of 1.2pp compared to year-end 2023

CEO Mark Luscombe comments on the result:

- It is good news that our half-year performance is historically high. We were able to lift core income and total income in the first 6 months of the year from their all-time high levels last year. Costs have risen by 4% compared with a year ago. The Bank has had a constant focus on becoming increasingly efficient. As a result the increase in costs is smaller than the effects of the agreed overall pay rises and the abolition of Great Prayer Day. Profit for H1 2024 outperforms profit a year ago by 9% and equals a return on equity of 22.4%, which is highly satisfactory.

Mark Luscombe comments on developments in business volume:

- We are pleased to see that the continued effect of our strong focus on providing value-creating advice to our customers has boosted our business volume in terms of bank loans and advances, deposits and the investment area. Bank loans and advances went up by DKK 4.7bn in H1 and deposits returned to the record level of year-end 2023.

Board chairman Lars Mikkilgaard-Jensen comments:

- In times of significant macroeconomic uncertainty due to the challenging geopolitical climate it is good news that the Bank remains highly capitalised and resilient. At 30 June 2024 the Bank's CET1 ratio stands at 17.7%, which is 6.0pp above the capital requirements. This means that Sydbank is extremely well prepared to navigate this uncertainty and support our customers.

Outlook for 2024

- Moderate growth is projected for the Danish economy.
- Profit after tax is expected to be in the range of DKK 2,800-3,100m.
- The profit forecast assumes that Danmarks Nationalbank will lower the rate of interest on certificates of deposit by a further 0.50pp in 2024.
- The outlook is subject to uncertainty and depends on financial market developments and macroeconomic factors which may affect eg the level of impairment charges.

Sydbank's strategy for 2022-24: "Growing our business"

Growing our business centres on 3 themes:

- Better known and bigger
- Sound business
- Stronger competitive position

Better known and bigger – profitable growth
Sydbank has a good reputation – and needs to be better known. On the back of Denmark's Corporate Bank we will increase awareness of Sydbank focusing in particular on large towns and cities. Our growth is profitable and organic and we are in good shape for friendly takeovers. We will incorporate ESG and sustainability in the Bank's products and processes.

Sound business – higher earnings
At Sydbank focus is on banking and sound business. Our employees are highly qualified, proactive and value-creating. We work on the principle of quid pro quo and will increase the Bank's earnings.

Stronger competitive position – efficient bank
We will prioritise the Bank's efforts and reduce costs. We will optimise working procedures and processes to reduce time spent, enhance quality and shorten response times to customers. As a decent and responsible bank our constant focus is on compliance, including IT security.

Strategic goals represent the values from the Bank's underlying philosophy and its core story with promises to its customers, to its employees and to its shareholders.

The strategic goals cover these areas:

- Awareness
- Return on equity
- Rate of costs

Awareness

By means of targeted efforts we will increase awareness of Sydbank and our value creation for

customers. We will elevate unaided brand awareness from its level of around 20% at year-end 2021 to around 40% by the end of the strategy period. At end-H1 2024 unaided awareness had risen to 28%.

Return on equity

We will continue to deliver competitive returns to the Bank's shareholders and our goal is a return on equity in the region of 10% in 2024 – based on a normalised level of impairment charges. The goal was set in the context of a negative interest rate environment. In H1 2024 return on equity constituted 22.4% against 22.0% in H1 2023.

Rate of costs

We will continue to focus on the balance between income and costs. This will be achieved by continuing to increase income while maintaining a constant focus on costs. We will prioritise our initiatives and ensure a better understanding of costs throughout the organisation as well as continue to ensure a powerful engine room. The strategic goal for the rate of costs is around 60%. In H1 2024 the rate of costs stood at 44% compared with 45% in H1 2023.

The Bank's customer portfolio can be divided into the segments: corporate clients, Private Banking clients and retail clients, and institutional clients.

Impairment charges – quarterly

In H1 2024 reported losses amounted to DKK 51m (H1 2023: DKK 29m). Of the reported losses DKK 47m has previously been written down (H1 2023: DKK 23m).

At 30 June 2024 the impairment ratio for the period represented 0.02% relative to bank loans and advances and guarantees.

Impairment charges are made for expected credit losses as regards all financial assets measured at amortised cost and similar provisions are made for expected credit losses as regards undrawn credit commitments and financial guarantees. Impairment charges for expected credit losses depend on whether the credit risk of a financial asset has increased significantly since initial recognition and follow a 3-stage model. The portfolio in stage 3 acquired from Alm. Brand Bank is recognised under "credit impaired at initial recognition":

Stage 1 – facilities with no significant increase in credit risk. The asset is written down by an amount equal to the expected credit loss as a result of the probability of default over the coming 12 months.

Stage 2 – facilities with a significant increase in credit risk. The asset is transferred to stage 2 and is written down by an amount equal to the expected credit loss over the life of the asset.

Stage 3 – facilities where the financial asset is in default or is otherwise credit impaired.

Credit impaired at initial recognition (POCI) – facilities which were credit impaired at the time of

acquisition of Alm. Brand Bank. They are recognised on acquisition at the fair value of the debt acquired.

The Group's loans and advances and impairment charges at 30 June 2024 allocated to these stages are shown below.

The development in the capital ratio in H1 2024 is shown below.

In H1 2024 the capital ratio was unchanged at 21.1pp, which is attributable to the inclusion of half of profit for the period as well as the issue of T2 capital of NOK 650m and SEK 550m set off against the effect of the initiated share buyback programme of DKK 1,200m as well as an increase in the risk exposure amount.

At 30 June 2024 the individual solvency need represented 10.2% (31 December 2023: 10.2%).

Solvency of the parent

At 30 June 2024 the CET1 ratio and the capital ratio of the parent stood at 17.7% and 21.1% respectively (31 December 2023: 18.3% and 20.4% respectively).

Capital and solvency and capital requirements

The Group's capital management is anchored in the Internal Capital Adequacy Assessment Process (ICAAP), a review conducted to identify risks and determine the individual solvency need.

At end-June 2024 the individual solvency need represented 10.2%. The solvency need consists of a minimum capital requirement of 8% under Pillar I and a capital add-on under Pillar II. Approximately 56% of the solvency need must be covered by CET1 capital, equal to 5.9% of the risk exposure amount.

In addition to the solvency need the Group must meet a combined buffer requirement of 6.0% at 30 June 2024.

| Capital and solvency and capital requirements (% of REA) | 30 Jun 2024 | 31 Dec 2023 |
|--|-------------|-------------|
| Capital and solvency | | |

| - of which countercyclical buffer** | 2.3 | 2.3 |
| Excess capital | | |
| CET1 capital | 6.0 | 7.4 |
| Total capital | 4.9 | 5.1 |

* The total capital requirement consists of an individual solvency need and a combined buffer requirement. The countercyclical buffer is determined by the Danish Ministry of Industry, Business and Financial Affairs and may not exceed 2.5%. The rate currently makes up 2.5%.

** The countercyclical buffer is calculated as an exposure weighted average of the specific rates as regards the countries in which the companies to which exposures have been granted are domiciled. The rate as regards exposures to companies domiciled in Denmark constitutes 2.5%.

Market risk

At 30 June 2024 the Group's interest rate risk represented DKK 94m. The Group's exchange rate risk continues to be very low and its equity position modest.

Funding and liquidity

The guidelines for calculating the Liquidity Coverage Ratio (LCR) specify a run-off of exposures while taking into account counterparties, funding size, hedging and maturity. Consequently the most stable deposits are favoured relative to large deposits, in particular from businesses and financial counterparties.

The Group's LCR constituted 240% at 30 June 2024 (31 December 2023: 223%).

| LCR (DKKbn) | 30 Jun 2024 | 31 Dec 2023 | 30 Jun 2023 |
|------------------------|-------------|-------------|-------------|
| Total liquidity buffer | 60.6 | 57.7 | 53.0 |
| Net cash outflows | 25.2 | 25.9 | 23.4 |
| LCR (%) | 240 | 223 | 227 |

The Group meets the LCR requirement of 100% and its excess cover is significant at 30 June 2024.

NSFR

The guidelines for calculating the Net Stable Funding Ratio (NSFR) require that the available stable funding exceeds the required stable funding. The required stable funding is calculated on the basis of the balance sheet values and degree of stability of assets where the strictest requirements in terms of degree of stability are imposed on long-term illiquid assets. The available stable funding is calculated on the basis of

the balance sheet values and degree of stability of the funding where the highest degrees of stability apply to equity and long-term funding.

The Group's NSFR constituted 141% at 30 June 2024 (year-end 2023: 140%).

| NSFR (DKKbn) | 30 Jun 2024 | 31 Dec 2023 | 30 Jun 2023 |
|--------------------------|-------------|-------------|-------------|
| Required stable funding | 95.8 | 90.8 | 89.6 |
| Available stable funding | 135.3 | 126.9 | 118.9 |
| NSFR (%) | 141 | 140 | 133 |

The Group meets the NSFR requirement of 100% and its excess cover is significant at 30 June 2024.

Supervisory Diamond

The Supervisory Diamond sets up a number of benchmarks to indicate banking activities that initially should be regarded as involving a higher risk. Any breach of the Supervisory Diamond is subject to reactions by the Danish FSA.

At 30 June 2024 the Group as well as the parent comply with all the benchmarks of the Supervisory Diamond.

| Supervisory Diamond benchmarks | 30 Jun 2024 | 31 Dec 2023 | 30 Jun 2023 |
|------------------------------------|-------------|-------------|-------------|
| Sum of 20 largest exposures < 175% | 111 | 137 | 142 |
| Lending growth < 20% annually | 6 | 1 | 1 |
| Commercial property exposure < 25% | 11 | 10 | 9 |
| Excess liquidity coverage > 100% | 246 | 241 | 234 |

The calculation of the sum of the 20 largest exposures has been changed and is now identical to the definitions of CRR. The change in calculation method is the main reason why the benchmark has dropped from 137 at year-end 2023 to 111 at 30 June 2024.

Subordinated debt and MREL requirements

Once a year the Danish FSA sets requirements as to subordinated debt and own funds and eligible liabilities (MREL) for Danish institutions, including Sydbank.

At 1 January 2024 the subordinated debt and MREL requirements were set at 26.4% and 24.1% respectively of the risk exposure amount.

The subordinated debt requirement can be calculated as follows:

| Subordinated debt at 30 Jun 2024 | Requirement (%) | DKKm |
|--|-----------------|---------------|
| REA | | 63,261 |
| Total requirement | 26.4 | 16,701 |
| Total capital | | 13,378 |
| SNP loans with maturities exceeding 1 year | | 14,895 |
| Total subordinated debt | 44.7 | 28,272 |
| Excess cover | 18.3 | 11,572 |

At 30 June 2024 the Group met the subordinated debt requirement with an excess cover of DKK 11,572m. The excess cover corresponds to an increase in the solvency need of 9.1pp or an increase in the risk exposure amount of DKK 43,831m.

The MREL can be calculated as follows:

| MREL at 30 Jun 2024 | Requirement (%) | DKKm |
|--|-----------------|---------------|
| REA | | 63,261 |
| Total requirement | 24.1 | 15,246 |
| Total capital | | 13,378 |
| SNP loans with maturities exceeding 1 year | | 14,895 |
| Cover of combined buffer requirement | | (3,799) |
| Total MREL | 38.7 | 24,474 |
| Excess cover | 14.6 | 9,228 |

At 30 June 2024 the Group met the MREL with an excess cover of DKK 9,228m. The excess cover corresponds to an increase in the solvency need of 7.3pp or an increase in the risk exposure amount of DKK 38,287m.

Leverage ratio

The CRR2 Regulation stipulates that T1 capital must constitute at least 3% of total exposures.

The Group's leverage ratio constituted 6.1% at 30 June 2024 (year-end 2023: 6.5%) taking into account the transitional rules.

SIFI

Sydbank has been designated as a SIFI in Denmark and there is an additional buffer requirement of 1% as regards CET1 capital. The intention is to bring Danish SIFI capital requirements on a par with the requirements in other comparable European countries.

Bank Recovery and Resolution Directive

The directive, including the bail-in provisions, was implemented in Danish law on 1 June 2015. According to legislation each credit institution must meet a minimum requirement for own funds and eligible liabilities (MREL).

The general resolution principle for SIFIs is that it should be possible to restructure them and send them back to the market with adequate capitalisation to ensure market confidence. The Group's MREL is based on the risk exposure amount using a factor which has been set at the sum of twice the solvency need plus the combined capital buffer requirement, excluding the countercyclical buffer.

The establishment of a resolution fund is underway. Credit institutions must make contributions to the fund according to their relative size and risk in Denmark. The resolution fund must be established and have assets at its disposal equal to at least 1% of the covered deposits of all Danish credit institutions by 31 December 2024.

The Group's contribution to the resolution fund for 2024 is expected to represent DKK 34m.

Basel IV

Since the Basel Committee on Banking Supervision published its recommendations regarding changes to the calculation of capital requirements – Basel IV – in 2017, the EU has worked on implementing these changes into CRR (regulation) or CRD (directive).

Some of the recommended changes have already been implemented and the remainder were adopted at end-May 2024 to take effect on 1 January 2025. Implementation will take place over a protracted period and with significant transitional rules.

However the part of the FRTB regulation covering market risk has been postponed to 1 January 2026. The Group expects a limited impact on its capital requirements.

Sector-specific systemic buffer

On 30 June 2024 the government activated the sector-specific systemic buffer for exposures to real estate companies at a rate of 7% of the exposures' risk-weighted assets.

The buffer applies to exposures to real estate companies, ie under activity code "Development of building projects" as well as "Real estate" whereas exposures to "Social housing associations" and "Cooperative housing societies" under activity code "Real estate" are exempt.

As a result the Bank will be subject to a sector-specific systemic risk buffer of approx 0.2% in addition to the regulatory capital requirements.

Operating segments

The Group's segment statements are divided into the following business units: Banking, Asset Management, Sydbank Markets, Treasury and Other.

Banking serves all types of retail and corporate clients.

Asset Management primarily comprises the Bank's advisory-related income from customers and investment funds.

Sydbank Markets comprises trading income as well as a share of the income from customers with decentral affiliation calculated on the basis of its market price. The share represents the payment by Banking for Sydbank Markets' facilities, including advisory services and administration.

Treasury comprises the Group's return on positions handled by Treasury, including liquidity allocation.

Other includes non-recurring items, costs to the Group Executive Management etc as well as return on strategic shareholdings that are not allocated to Banking or Sydbank Markets.

Inter-segment transactions are settled on an arm's length basis. Centrally incurred costs are allocated to the business units in accordance with their estimated proportionate share of overall activities.

Excess liquidity is settled primarily at short-term money market rates whereas other balances are settled on an arm's length basis.

Notes

Note 1

Accounting policies

The interim report covers the period from 1 January to 30 June 2024 and is prepared in compliance with IAS 34 "Interim Financial Reporting" as adopted by the EU and in compliance with Danish disclosure requirements for interim reports of listed financial companies. As a result of the use of IAS 34, the presentation is less complete compared with the presentation of an annual report and the recognition and measurement principles are in compliance with IFRS.

The accounting policies are consistent with those adopted in the 2023 Annual Report, to which reference is made.

The 2023 Annual Report provides a comprehensive description of the accounting policies applied.

Accounting estimates and judgements

The measurement of certain assets and liabilities requires that management makes accounting estimates as to how future events will affect the value of such assets, liabilities, income and costs. Actual results may deviate from such estimates.

The significant estimates made by management in the use of the Group's accounting policies and the inherent considerable uncertainty of such estimates used in the preparation of the interim report are identical to those used in the preparation of the 2023 Annual Report.

Impairment of loans and advances and provisions for guarantees and undrawn credit commitments are made to take into account the expected losses on conclusion as well as any credit impairment after initial recognition. The determination of impairment charges for expected losses is subject to a number of estimates, including which loans and advances or portfolios of loans and advances are subject to credit impairment as well as calculation of expected losses.

Assessing the degree of credit impairment of exposures involves a number of estimates which may be subject to uncertainty.

To a large extent the determination of expected losses at exposure level is based on risk registrations, models and past experience but it also involves a number of estimates of risks and expected developments in the individual exposure, including the future ability to pay and the value of collateral which in particular comprises mortgages on property. During periods of uncertain economic trends or significant demographic or structural changes uncertainty is greater. This is reflected in the need for management adjustments that by their nature are subject to uncertainty.

The Group's models to calculate impairment of exposures in stages 1 and 2 include expectations as to economic developments. The outlook is based on estimates of the probability of different outcomes of economic growth.

The outlook results in a determination of the probability of the scenarios baseline, upturn and downturn. At 30 June 2024 the probability of the downturn scenario was fixed at 95%, which is unchanged compared with 31 December 2023.

Impairment of exposures in stage 3 and the weak part of stage 2 is based on individual assessments which include expectations of future changes in collateral value etc.

Notes

Note 1 - continued

In addition to the calculated impairment charges, management estimates whether there is a need for special impairment charges as regards exposed industries, customer segments or other elements that are estimated as having not yet been reflected in the Bank's registrations.

At 30 June 2024 the Group maintained its management estimate of DKK 500m to hedge macroeconomic uncertainty. The management estimate represents DKK 400m as regards corporate clients and DKK 100m as regards retail clients.

The management estimate as regards macroeconomic risks covers potential losses related to the negative effects of geopolitical tension, a higher interest rate environment as well as the risk of a recession etc.

The Group's significant risks and the external elements which may affect the Group are described in greater detail in the 2023 Annual Report.

The Group's cash resources primarily comprise Danish mortgage bonds. The interest rate risk concerning these positions is reduced via derivatives. As a result the Group's external income statement is affected in terms of interest income and the market value adjustment of bonds and derivatives. The same applies to the Group's position-taking as regards bonds as well as shares. The breakdown by income statement item does not disclose income independently and consequently these items must be regarded as one as they are in "Segment Reporting" as well as in the Group's financial review, which also takes funding of the positions into account.

Note 20 – continued

Totalkredit loans arranged for by Sydbank are comprised by an agreed right of set-off against future current commission which Totalkredit may invoke in the event of losses on the loans arranged.

Sydbank does not expect that this set-off will have a significant impact on Sydbank's financial position.

As a result of the Bank's membership of Bankdata, the Bank is obligated to pay an exit charge in the event of exit.

As a result of the statutory participation in the deposit guarantee scheme, the industry paid an annual contribution of 2.5‰ of covered net deposits until the Banking Department's capital exceeded 1% of total covered net deposits, which was reached at year-end 2015. The Banking Department will cover the direct losses in connection with the winding-up of distressed financial institutions under Bank Package III and Bank Package IV which are attributable to covered net deposits. Any losses as a result of the final winding-up will be covered by the Guarantee Fund via the Winding-up and Restructuring Department as regards which Sydbank is currently liable for 6.1% of any losses.

As a result of the statutory participation in the resolution financing arrangement (the resolution fund), credit institutions pay an annual contribution over a 10-year period to reach a target funding level totalling 1% of covered deposits. Credit institutions must make contributions to the fund according to their relative size and risk in Denmark. In the period from 2015 to 2023 Sydbank contributed DKK 194m and expects that contributions will total approximately DKK 225m over the 10-year period.

The Group is party to legal actions. These legal actions are under continuous review and the necessary provisions made are based on an assessment of the risk of loss. Pending legal actions are not expected to have any significant impact on the financial position of the Group.

Note 21

Collateral

At 30 June 2024 the Group had deposited as collateral securities at a market value of DKK 156m with Danish and foreign exchanges and clearing centres etc in connection with margin calls and securities settlements etc. In addition the Group has provided cash collateral of DKK 590m and deposited as collateral securities at a market value of DKK 12m in connection with GMRA agreements.

In connection with repo transactions, which involve selling securities to be repurchased at a later date, the securities remain on the balance sheet and consideration received is recognised as a debt. Repo transaction securities are treated as assets provided as collateral for liabilities. Counterparties are entitled to sell the securities or deposit them as collateral for other loans.

In connection with reverse transactions, which involve purchasing securities to be resold at a later date, the Group is entitled to sell the securities or deposit them as collateral for other loans. The securities are not recognised in the balance sheet and consideration paid is recognised as a receivable.

Assets received as collateral in connection with reverse transactions may be sold to a third party. In such cases a negative portfolio may arise as a result of the accounting rules. This is recognised under "Other liabilities".

To take into account changes in credit risk concerning derivatives with positive fair value, an adjustment is made – CVA. CVA is a function of the risk of counterparty default (PD), the expected positive exposure and the loss ratio in the event of default. PD is determined on the basis of the Group's credit models – default probability in 12 months. PD beyond 12 months is adjusted on the basis of market data of exposures with a similar PD level. At 30 June 2024 CVA constituted DKK 16m compared to DKK 16m at year-end 2023.

Customer margins recognised in connection with derivatives are amortised over the life of the transaction. At 30 June 2024 customer margins not yet recognised as income totalled DKK 12m compared to DKK 12m at year-end 2023.

Financial instruments recognised at fair value

Measurement of financial instruments is based on quoted prices from an active market, on generally accepted valuation models with observable market data or on available data that only to a limited extent is observable market data.

Measurement of financial instruments for which prices are quoted in an active market or which is based on generally accepted valuation models with observable market data is not subject to significant estimates.

As regards financial instruments where measurement is based on available data that only to a limited extent is observable market data, measurement is subject to estimates. Such financial instruments appear from the column unobservable inputs below and include primarily unlisted shares, including shares in DLR Kredit A/S.

The fair value of unlisted shares and other holdings is calculated on the basis of available information on trades etc – including to a very significant extent on shareholders' agreements based on book value. To an insignificant extent fair value is calculated on the basis of expected cash flows.

A 10% change in the calculated market value of financial assets measured on the basis of unobservable inputs will affect profit before tax by DKK 353m (31 December 2023: DKK 354m).

Management Statement

We have reviewed and approved the Interim Report – First Half 2024 of Sydbank A/S.

The consolidated interim financial statements are prepared in accordance with the IFRS Accounting Standards as adopted by the EU, and the parent company interim financial statements are prepared in accordance with the legislative requirements, including the Danish Financial Business Act.

Furthermore the consolidated financial statements are prepared in compliance with Danish disclosure requirements for listed financial companies.

The Interim Report has not been audited or reviewed. However the Bank's external auditor has conducted a verification of profit for the period, including audit procedures consistent with the requirements as regards a review and has thus verified that the conditions for ongoing recognition of profit for the period in CET1 capital were met.

In our opinion the interim financial statements give a true and fair view of the Group's assets, equity and liabilities and financial position at 30 June 2024 and of the results of the Group's operations and cash flows for the period 1 January – 30 June 2024.

Moreover it is our opinion that the management's review includes a fair review of the developments in the Group's operations and financial position as well as a description of the most significant risks and elements of uncertainty which may affect the Group.
