

International Petroleum Corporation Successfully Completes USD 150 Million Tap Issue

International Petroleum Corporation ("IPC" or the "Corporation") (TSX, Nasdaq Stockholm: IPCO) announces that it has successfully completed a tap issue of USD 150 million of senior unsecured bonds under IPC's existing 7.25% senior unsecured bonds (ISIN NO 0012423476). Following settlement of the tap issue, the amount of senior unsecured bonds outstanding will be USD 450 million, with maturity in February 2027. The bonds are rated B+ by S&P Global Ratings and B1 by Moody's.

Settlement of these additional bonds is expected to occur on or around September 28, 2023, subject to the satisfaction of customary conditions precedent. IPC intends to make an application to list these additional bonds on the Oslo Stock Exchange. Net proceeds of the tap issue will be used for IPC's general corporate purposes.

Arctic Securities and Pareto Securities acted as Joint Lead Managers, and SpareBank 1 Markets acted as Co-Manager, in connection with the tap issue.

Mike Nicholson, Chief Executive Officer of IPC comments: "We are very pleased to have successfully completed IPC's USD 150 million tap issue, bringing our outstanding bonds to USD 450 million. We are accessing the debt capital markets at a favourable time when our balance sheet and our production base are strong. This financing further enhances IPC's strong liquidity position and gives us significant additional flexibility to implement our capital allocation strategies."

International Petroleum Corp. (IPC) is an international oil and gas exploration and production company with a high quality portfolio of assets located in Canada, Malaysia and France, providing a solid foundation for organic and inorganic growth. IPC is a member of the Lundin Group of Companies. IPC is incorporated in Canada and IPC's shares are listed on the Toronto Stock Exchange (TSX) and the Nasdaq Stockholm exchange under the symbol "IPCO".

Forward-Looking Statements

This press release contains statements and information which constitute "forward-looking statements" or "forward-looking information" (within the meaning of applicable securities legislation). Such statements and information (together, "forward-looking statements") relate to future events, including the Corporation's future performance, business prospects or opportunities. Actual results may differ materially from those expressed or implied by forward-looking statements. The forward-looking statements contained in this press release are expressly qualified by this cautionary statement. Forward-looking statements speak only as of the date of this press release, unless otherwise indicated. IPC does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by applicable laws.

All statements other than statements of historical fact may be forward-looking statements. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, forecasts, guidance, budgets, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "forecast", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe", "budget" and similar expressions) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements include, but are not limited to, statements with respect to: the settlement of the tap issue, the listing of the bonds on the Oslo Stock Exchange, the credit rating of the bonds, and the use of proceeds of the tap issue.

The forward-looking statements are based on certain key expectations and assumptions made by IPC, including expectations and assumptions concerning: prevailing commodity prices and currency exchange rates; applicable royalty rates and tax laws; interest rates; future well production rates and reserve and contingent resource volumes; operating costs; the timing of receipt of regulatory approvals; the performance of existing wells; the success obtained in drilling new wells; anticipated timing and results of capital expenditures; the sufficiency of budgeted capital expenditures in carrying out planned activities; the timing, location and extent of future drilling operations; the successful completion of acquisitions and dispositions; the benefits of acquisitions; the state of the economy and the exploration and production business in the jurisdictions in which IPC operates and globally; the availability and cost of financing, labour and services; and the ability to market crude oil, natural gas and natural gas liquids successfully.

Although IPC believes that the expectations and assumptions on which such forward-looking statements are based are reasonable, undue reliance should not be placed on the forward-looking statements because IPC can give no assurances that they will prove to be correct. Since forward-looking statements address future events and conditions, by

their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to: the risks associated with the oil and gas industry in general such as operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of estimates and projections relating to reserves, resources, production, revenues, costs and expenses; health, safety and environmental risks; commodity price fluctuations; interest rate and exchange rate fluctuations; marketing and transportation; loss of markets; environmental risks; competition; incorrect assessment of the value of acquisitions; failure to complete or realize the anticipated benefits of acquisitions or dispositions; the ability to access sufficient capital from internal and external sources; failure to obtain required regulatory and other approvals; and changes in legislation, including but not limited to tax laws, royalties and environmental regulations. Readers are cautioned that the foregoing list of factors is not exhaustive.

Additional information on these and other factors that could affect IPC, or its operations or financial results, are included in the management's discussion and analysis (MD&A) for the three and six months ended June 30, 2023 (See "Cautionary Statement Regarding Forward-Looking Information" "Risks and Uncertainties" and "Reserves and Resources Advisory" therein), the Corporation's Annual Information Form (AIF) for the year ended December 31, 2022 (See "Cautionary Statement Regarding Forward-Looking Information", "Reserves and Resources Advisory" and "Risk Factors" therein) and other reports on file with applicable securities regulatory authorities, including previous financial reports, management's discussion and analysis and material change reports, which may be accessed through the SEDAR+ website (www.sedarplus.ca) or IPC's website (www.international-petroleum.com).
