

Atos partners with GCH to open new AI-Driven Security Operations Center in the UAE

Next Gen Dubai-based SOC supports local data residency, national cyber resilience priorities and faster response to regional and AI- threats

Dubai, United Arab Emirates - September 17, 2026 - [Atos](#), a global leader of AI-powered digital transformation, today announced the opening of its new AI-driven Security Operations Center (SOC) in the United Arab Emirates in partnership with GCH. The new Dubai-based SOC will provide sovereign security operations with local data residency, helping organizations strengthen cyber resilience, address regional and AI-driven threats, and support compliance with UAE Information Assurance Standards and National Electronic Security Authority requirements.

The opening supports the UAE's national cyber resilience priorities by providing locally operated monitoring, detection and incident response capabilities. The SOC is designed to help government entities, critical infrastructure operators and enterprises, retain greater control over security data and operations within the UAE, while strengthening governance and alignment with local regulatory requirements.

The SOC will use advanced analytics, automation and AI-driven operations to accelerate threat detection, investigation and response. Using Agentic AI to significantly reduce Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR), Atos aims to help customers reduce cyber risk and strengthen overall business resilience as threat actors increasingly use AI to automate and scale attacks.

The UAE SOC will collaborate with the Atos Global Threat Research Center to provide curated threat intelligence informed by global visibility and tailored to the local and regional threat landscape. This approach combines Atos' international cyber expertise with locally relevant intelligence to support faster and more informed security decisions.

Daniele Principato, head of International Markets, Atos, said: *"We are proud to bring AI-powered security operations to the UAE, combining local control with global intelligence in an increasingly complex and fast-evolving threat landscape. Together with GCH, we enable customers to respond faster, safeguard critical operations, and advance their digital sovereignty."*

Surendrasinh Gohil, CEO, Gulf Cyberfender Hub (GCH), said : *"The launch a joint UAE Security Operations Center reflects our shared commitment with Atos to*

supporting the UAE's vision for digital sovereignty and cyber resilience. By bringing together Atos' global cybersecurity expertise and GCH's regional capabilities, we are enabling organizations to benefit from locally hosted, AI-powered security operations that deliver faster threat detection, rapid incident response and enhanced protection against emerging cyber threats."

Designed to defend against both conventional and AI-driven attacks, the SOC will combine human expertise with AI-enabled detection, investigation and response. Its local operating model and connection to Atos' global threat research capabilities as well as the Atos Global SOC network will support organizations across the UAE and the wider region as they modernize their security operations and build more resilient digital environments.

Omar Beydoun, General Manager UAE, Atos; Hemalsinh Gohil, Director Sales, Middle East & Africa, Gulf Cyberfender Hub; Surendrasinh Gohil, CEO, Gulf Cyberfender Hub (GCH); Mohammed Himmath, Chief Information Officer, Gulf Data Hub; Ghassan Muheisen, Client Delivery Manager, Atos; Daniele Principato, EVP & Head of International Markets, Atos; Amit Roy, Global Head of Growth, Cyber, Atos.

About Atos

Atos is the Atos Group brand dedicated to AI-powered, secure, end-to-end digital services. Atos designs, develops, and operates critical digital environments that drive performance, resilience and sovereignty, helping public and private organizations worldwide retain control over their data and infrastructures, while meeting regulatory requirements.

With more than 52,000 employees serving over 4,500 clients across 54 countries, Atos helps modernize core IT systems, accelerate cloud and data transformation, strengthen cybersecurity, and deliver secure digital workplace environments to support its clients, its employees and society. Atos also provides consulting and advisory services through its Atos Amplify brand.

A trusted partner in operating complex and mission-critical environments, Atos supports organizations across highly regulated and sovereign contexts.

About Atos Group

Atos Group is a global leader in digital transformation with c. 54,000 employees and annual revenue of c. €7.2 billion, operating in 54 countries under two brands - Atos for services and Eviden for products and systems. European number one in cybersecurity and a leader in cloud, Atos Group is committed to a secure and decarbonized future and provides tailored AI-powered, end-to-end solutions for all industries. Atos Group is listed on Euronext Paris.

About Gulf Cyberfender Hub (GCH)

Gulf Cyberfender Hub (GCH) is a technology consulting and digital solutions company headquartered in Dubai, UAE. GCH is helping enterprises to innovate, automate, optimize and protect their business in the area of Infrastructure Management, Application Management and Cybersecurity. GCH guides enterprises' digital security architecture during their digital transformation and helps customers understand the cyber security landscape, create a cyber security roadmap that aligns with IT strategy and business goals, and ensure maximum return on their Information Technology Investment.
