The Offer will be made for the Shares and Options of Rovio, which is domiciled in Finland, and is subject to Finnish disclosure and procedural requirements. The Offer is made in the United States pursuant to Section 14(e) of, and Regulation 14E under, the Exchange Act, subject to the exemption provided under Rule 14d-1(d) under the Exchange Act for a Tier II tender offer (the “**Tier II Exemption**”), and otherwise in accordance with the disclosure and procedural requirements of Finnish law, including with respect to the Offer timetable, settlement procedures, withdrawal, waiver of conditions and timing of payments, which are different from those applicable under the tender offer procedures and laws of the United States for domestic offers. In particular, the financial information included in the Offer Document and this Supplement Document has been prepared in accordance with applicable accounting standards in Finland, which may not be comparable to the financial statements or financial information of U.S. companies. As permitted under the Tier II Exemption, the settlement of the Offer is based on the applicable Finnish law provisions, which differ from the settlement procedures customary in the United States, particularly as regards to the time when payment of the consideration is rendered. The Offer, which is subject to Finnish law, is being made to U.S. shareholders in accordance with the applicable U.S. securities laws, and applicable exemptions thereunder, in particular the Tier II Exemption. To the extent the Offer is subject to U.S. securities laws, those laws only apply to U.S. shareholders and option holders and will not give rise to claims on the part of any other person. U.S. shareholders and option holders should consider that the Share Offer Price and Option Offer Price for the Offer is being paid in EUR and that no adjustment will be made based on any changes in the exchange rate.

To the extent permissible under applicable law or regulations, the Offeror and its affiliates or its brokers and its brokers’ affiliates (acting as agents for the Offeror or its affiliates, as applicable) may from time to time after the date of the Offer Document and this Supplement Document and during the pendency of the Offer, and other than pursuant to the Offer, directly or indirectly purchase or arrange to purchase Shares or any securities that are convertible into, exchangeable for

or exercisable for Shares. These purchases may occur either in the open market at prevailing prices or in private transactions at negotiated prices, and the consideration in the Offer must be increased to match any such consideration paid outside the Offer. To the extent information about such purchases or arrangements to purchase is made public in Finland, such information will be disclosed by means of a press release or other means reasonably calculated to inform U.S. shareholders and option holders of Rovio of such information. In addition, the financial advisers to the Offeror may also engage in ordinary course trading activities in securities of Rovio, which may include purchases or arrangements to purchase such securities. To the extent required in Finland, any information about such purchases will be made public in Finland in the manner required by Finnish law.

Alex Pelletier-Normand, CEO

The second quarter of 2023 was a challenging period in the mobile gaming market, and we could feel the effect in our results as well. Our financial development was also impacted by the lack of releases so far this year. However, we are approaching the launch window of new games, including Moomin: Puzzle & Design and Wizard Hero.

The global mobile gaming market declined in the second quarter by 0.8% compared to the same period in the previous year and by 3.4% sequentially. At the same time, our comparable gross bookings decreased by 3.6% and 3.5%, respectively. The star of recent quarters, Angry Birds Dream Blast, slowed down in its growth, in part due to algorithm changes in certain advertising channels, but remained at a high level and continued to show impressive growth of 61.8% compared to a year ago. Angry Birds 2 had a soft second quarter, but the third quarter started stronger. We continue to advance with our turnaround plan, improving the game in multiple areas and strengthening the team with additional key

talents, including a new game lead and a new Head of Studio for Stockholm. We are encouraged to note that our group revenue grew in every region, apart from North America.

Our new game titles continued to make good progress. Moomin: Puzzle & Design remains on track for global launch, targeted to happen later this year. Wizard Hero by Ruby Games is showing promising test results, and we are looking forward to making it available to all players. The second quarter was the best one for Ruby Games since Q2 2022, and we expect this game to help them continue to grow. We also have some fresh exciting news: our studio in Toronto has signed a contract with Apple to develop a new Angry Birds game to Apple Arcade. We expect the game to be a profit driver and improve the visibility of the Angry Birds brand.

On the brand licensing front, we announced that Prime Video and Amazon Kids+ are set to release an animated series called Angry Birds Mystery Island, the first Angry Birds series created with Amazon. Another highlight was the opening of the first ever Angry Birds Café in New York, US in early July. We are delighted to see the Angry Birds brand expand, enabling fans to interact with it in new and fun ways.

This week, we announced the result of the cash tender offer by SEGA to acquire all shares and options of Rovio. Accordingly, the shares validly tendered in the offer represent approximately 96.3% of all issued and outstanding shares and votes in Rovio. In addition, 100% of the options were tendered. This means that the strengths of Rovio and SEGA will soon be combined, which presents an incredibly exciting future for both parties.

As we are heading towards the end of Rovio's journey as a listed company, I would like to sincerely thank all our shareholders for their support throughout the years. Being listed made Rovio the stronger and more resilient company that it is today and led to the acquisition by SEGA. Now it is time for the company to start a new chapter and bring even more joy to our players, enhancing and expanding Rovio's and SEGA's vibrant IPs.

2023 outlook (unchanged)

We expect our comparable revenue and adjusted operating profit to be at last year's level.

Additional information on user acquisition investments in Q3 2023

User acquisition investments in Q3 2023 are expected to be 25–30% of games' revenues.

Half-Year Financial Report 1-6/2023

A description of the accounting standards applied in the preparation of this report is provided in Note 1 Key accounting principles.

Market review

According to the market intelligence provider Newzoo's latest global mobile gaming market report published in July 2023, the size of the global mobile gaming market in end-user generated revenue was estimated to be USD 91.8 billion in 2022, which represented a 6.7% decline compared to the previous year. This was the first time the global mobile gaming market declined. The market normalized after supercharged growth during the onset of Covid-19 in 2020 and 2021, when the global market grew annually by 30.1% and 12.5%, respectively. Furthermore, Apple's App Tracking Transparency (ATT) framework has heavily impacted game publishers' ability to target high-value players, especially visible in the mid-core genres. There were also fewer major new game launches in 2022, and macroeconomic headwinds worldwide have impacted consumers' behavior and purchasing power.

Short-term uncertainty remains higher than usual, driven by the same headwinds that impacted the market in 2022. This is visible in how the 2023 market has developed so far, and in the full year 2023 market estimates prepared by market intelligence providers. Newzoo took down its 2023 global mobile gaming market estimate after the weak start of the year, and is now expecting only 0.8% annual growth, compared to 4.6% at the beginning of the year, resulting in a USD 92.6 billion market size estimate for 2023. Data.ai anticipates the global market to continue to decline at a rate of -3% in 2023 to USD 107 billion. Based on Q2 2023 data provided by data.ai, the global mobile gaming market declined by 0.8% compared to the same period in 2022 and by 3.4% compared to the previous quarter.

In the long term, Newzoo considers the mobile gaming market's growth potential to be attractive, with mobile continuing to be the world's most popular and largest form of gaming. In 2022-2026, the global mobile gaming market is expected to grow annually by 2.4% on average, while the Western market growth is estimated to be 2.2% (CAGR).

Revenue and result

April-June 2023

In the second quarter of 2023, Rovio's group revenue declined by 7.4% to EUR 72.6 million (78.4). On a comparable basis (at constant fx rates), revenue declined by 6.0%. The decrease in revenue was mostly due to a weaker quarter for Rovio's largest game Angry Birds 2 and lower revenue for Angry Birds Journey.

Games' revenue decreased by 6.8% to EUR 70.7 million (75.9). Games' gross bookings declined by 5.1% to EUR 68.7 million (72.4). Comparable (at constant fx rates) gross bookings declined by 3.6%. Sequentially, comparable games' gross bookings declined by 3.5%, which was close to the US mobile gaming market decline of 2.4% (source: data.ai).

Brand licensing revenue decreased by 25.0% to EUR 1.9 million (2.6), mainly due to lower revenue from feature films, as expected.

The group EBITDA decreased to EUR 9.9 million (14.3), and the EBITDA margin decreased to 13.6% (18.2). The group adjusted EBITDA decreased to EUR 10.7 million (15.0), and the adjusted EBITDA margin declined to 14.8% (19.1).

The group operating profit decreased to EUR 6.9 million (10.5), and the operating profit margin

decreased to 9.5% (13.4). The group adjusted operating profit declined to EUR 7.8 million (11.3), while the adjusted operating profit margin declined to 10.7% (14.3). The adjustments in the reporting period were in total EUR 0.9 million and were mainly legal fees related to the SEGA tender offer. Adjustments in the comparison period amounted to EUR 0.7 million and were related to changes in the contingent liability of the Ruby Games acquisition.

User acquisition investments increased to EUR 21.4 million (20.9), representing 30.2% of games' revenue (27.5).

The user acquisition investments were split between Rovio's different game categories as follows: 62.5% in the "Grow" category (Angry Birds Journey and Angry Birds Dream Blast) and 23.1% in the "Earn" category (Angry Birds 2, Angry Birds Match, Angry Birds Friends, Small Town Murders), practically almost all of which concerned Angry Birds 2. The share of user acquisition investments made in hyper-casual games (i.e. Ruby Games) was 14.3%, while 0.1% of the investments were made in the "Catalogue" category.

The Group's profit before taxes decreased to EUR 7.9 million (12.5). Earnings per share decreased to EUR 0.09 (0.13), and adjusted earnings per share decreased to EUR 0.10 (0.14).

In the first half of 2023, Rovio's group revenue declined by 9.0% to EUR 148.7 million (163.4). On a comparable basis (at constant fx rates), revenue declined by 10.6%. The decrease in revenue was mainly due to the high spike of Angry Birds Journey launch in Q1'22.

Games' revenue decreased by 8.6% to EUR 144.6 million (158.1). Games' gross bookings declined by 8.1% to EUR 140.8 million (153.2). Comparable (at constant fx rates) gross bookings declined by 9.8%.

Brand licensing revenue decreased by 21.9% to EUR 4.1 million (5.3), mainly due to lower revenue from feature films as expected.

The group EBITDA decreased to EUR 22.0 million (25.4), and the EBITDA margin declined to 14.8% (15.5). The group adjusted EBITDA decreased to EUR 22.8 million (28.6), and the adjusted EBITDA margin declined to 15.3% (17.5).

The group operating profit decreased to EUR 15.7 million (18.0), and the operating profit margin decreased to 10.5% (11.0). The group adjusted operating profit declined to EUR 16.5 million (21.2), while the adjusted operating profit margin declined to 11.1% (13.0). The adjustments in the reporting period were in total EUR 0.8 million and were mainly legal fees related to the SEGA tender offer. Adjustments in the comparison period amounted to EUR 3.2 million and were related to changes in the contingent liability of the Ruby games acquisition.

User acquisition investments decreased to EUR 45.2 million (52.0), representing 31.3% of games' revenue (32.9). The decrease was driven by the AB Journey global launch in early 2022.

Key performance indicators of games

Games' key performance indicators use gross bookings instead of revenue, as it gives a more accurate view of Rovio's operating performance at a specific point in time. Gross bookings represent in-app purchases and in-app advertising sales in the given calendar month, reported at the date of purchase/sale. Gross bookings do not include revenue from custom contracts, revenue deferrals or accounting adjustments due to, for example, foreign exchange rate differences between revenue accruals and actual payments, and thus differ from reported revenue. The reconciliation of gross bookings to revenue is presented in the notes.

In the second quarter of 2023, games' gross bookings declined to EUR 68.7 million (72.4), out of which

Ruby Games generated gross bookings of EUR 3.7 million (4.5) and declined by 16.5% in comparable currencies.

The number of monthly active users (MAU) increased slightly to 18.7 million (18.5 million in Q1'23) for the top 5 games and increased to 47.0 million (44.7 million in Q1'23) for the whole portfolio. The increase is mainly attributable to hyper-casual games.

The number of monthly unique payers (MUP) decreased slightly to 406 thousand (411 thousand in Q1'23) for the top 5 games and to 446 thousand (454 thousand in Q1'23) for the whole portfolio.

Average revenue per daily active user (ARPDau) decreased slightly to 21 cents (22 in Q1'23) for the top 5 games and was stable at 13 cents (13 in Q1'23) for the whole portfolio. Share-based incentive program

Rovio operates a share-based program that consists of an employee share savings plan for employees in Finland, Sweden, Denmark, Canada and Spain, as well as a performance share plan, a restricted share plan and an option plan directed to the key employees of the company.

The objective of the Employee Share Savings Plan (ESSP) is to motivate employees to invest in Rovio shares by offering them additional shares in relation to their investment after a designated holding period. The ESSP consists of three (3) annually commencing Plan periods, each one consisting of a 12-month savings period and a holding period following the savings period. The first plan period commenced on April 1, 2020 and ended on August 31, 2022. The second plan period commenced on April 1, 2021 and will end on August 31, 2023. The third plan period commenced on April 1, 2022 and will end on August 31, 2024. The fourth plan period commenced on April 1, 2023 and will end on August 31, 2025. The total amount of all savings during the plan period may not exceed 2,400,000 euros. The matching shares will be paid out as soon as practically possible after the applicable holding period. Participation is voluntary.

Rovio has a performance share plan (PSP) for key employees, including the CEO and the members of the leadership team. The objective of the performance share plan is to motivate key employees to work to increase shareholder value in the long term by offering them a share-based reward for achieving the set performance criteria established by the Board of Directors of Rovio.

The performance share plan launched in 2020 consisted originally of three (3) annually commencing performance periods, covering the consecutive calendar years of 2020, 2021 and 2022. Each performance period was followed by a one-year waiting period, covering the calendar years 2021, 2022 and 2023. The third performance period was canceled, due to an extension in the performance share plan periods, and a new performance share plan was established accordingly. On February 11, 2022 Rovio established a new performance share plan 2022–2026 for key employees. The performance share plan 2022–2026 consists of three performance periods, covering the consecutive calendar years of 2022–2024, 2023–2025 and 2024–2026.

The main principles of both performance share plans offer the participants a possibility to earn shares for reaching the required levels set for the performance criteria. The required performance levels are

decided by Rovio's Board of Directors on an annual basis for each performance period at a time.

The performance criteria for the 2021 performance period were Rovio's sales growth (%) and adjusted operating profit margin (%). Potential rewards based on the performance period 2021 correspond to a total maximum gross amount of 613 548 Rovio Entertainment Corporation shares, including the proportion paid in cash. The performance contributed to the realization of 23.64% of the maximum allocation. The performance period continued with a holding period covering the calendar year 2022. A reward payment of 59,464 shares was made on March 31, 2023.

The performance criteria for the performance period 2022–2024 are the Group's EBITDA (EUR) for the financial year 2024 (weight 50%) and the Group's net revenue (EUR) for the financial year 2024 (weight 50%). The rewards to be paid on the basis of the performance period 2022–2024 correspond to the value of an approximate maximum total of 11,000,000 euros.

The performance criteria for the performance period 2023–2025 are Group's EBITDA (EUR) for the financial year 2025 (weight 50 %) and Group's Net Revenue (EUR) for the financial year 2025 (weight 50 %). The rewards to be paid on the basis of the performance period 2023–2025 correspond to the value of an approximate maximum total of 15,000,000 euros.

The Restricted Share Unit Plan (RSU) is constructed as a restricted share pool from which a predetermined number of Rovio shares can be allocated to a limited number of selected key employees. The plan was published on May 17, 2018 and continues according to the same set of terms. The aim of the RSU is to engage the Company's key persons and to link the long-term interests of the participants and the shareholders. The plan offers selected key personnel an opportunity to receive a predetermined number of the Company's shares after a specific restriction period, which varies from twelve (12) to thirty-six (36) months based on business needs and the decision by the Board of Directors.

The maximum number of shares that can be distributed through the RSU is 1,300,000. Once the maximum number of shares has been allocated, the Board of Directors can decide on a new maximum number. In total, 66,606 rights entitling to shares had been allocated under the restricted share plan as of June 30, 2023.

In February 2022, the Board of Directors resolved to launch a new stock option plan 2022A directed to the key employees of the company. As per June 30, 2023, a total of 742,300 series 2022A option rights had been allocated. The share subscription price for shares subscribed by virtue of the stock options is EUR 7.90 per share. The share subscription period for stock options will be March 1, 2025–February 28, 2027. The total theoretical market value of all stock options 2022A is EUR 1,300,000.

Based on the Company's assessment, there were no material changes in the risks and uncertainties during the review period.

The most significant risks are related to the financial performance of Rovio's top games in the market, the continuous development of these games, and the ability to develop new successful games. Risks in user acquisition relate to the accuracy of the profit models and the impact on the Group's net profit. New games introduced by competitors and changes in the competitive landscape may also impact the success of Rovio's games', Rovio's revenue, the size of user acquisition investments and the Group's profit. Changes in governmental regulations in different countries and content distributors' terms and policies can have both short- and long-term implications in the business. Disturbances related to the general network infrastructure and cyber incidents may render gaming services unavailable and cause business disruptions. Macro-economic factors, including inflation and changes in consumers' purchasing power, can have an impact on spending patterns.

Other significant risks relate to the demand for Angry Birds branded consumer products and other

content that may impact the brand licensing revenue.

The Company engages in business in several currencies, the euro and the U.S. dollar being the most significant ones. Fluctuations in exchange rates, particularly between the euro and the U.S. dollar, could have a material impact on the Company's result.

Further information on risks, uncertainties, and Rovio's risk management can be found online at <https://investors.rovio.com/en> and in the most recently published financial statements.

2023 outlook (unchanged)

We expect our comparable revenue and adjusted operating profit to be at last year's level.

Rovio presents alternative performance measures as additional information to financial measures presented in the consolidated income statements, consolidated balance sheets, and consolidated statements of cash flows prepared in accordance with IFRS. In Rovio's view, the alternative performance measures provide the management, investors, securities analysts, and other parties with significant additional information related to Rovio's results of operations, financial position or cash flows, and are often used by analysts, investors, and other parties.

Rovio presents adjusted EBITDA and adjusted operating profit, which have been adjusted for material items outside the ordinary course of business such as material net gains and losses from business disposals, direct transaction costs related to business acquisitions, restructuring costs for business operations and changes in fair value of contingent considerations, significant impairment losses and reversals, legal fees related to claims, and costs relating to enlargement of the ownership base of the company. Adjusted EBITDA and adjusted operating profit are presented as complementing measures to the measures included in the consolidated income statement presented in accordance with IFRS as, in Rovio's view, they increase understanding of Rovio's results of operations.

EBITDA, EBITDA margin, adjusted EBITDA, adjusted EBITDA margin, operating profit, operating profit margin, adjusted operating profit, and adjusted operating profit margin are shown as complementing measures to assess the profitability and efficiency of Rovio's operations. User acquisition costs, user acquisition costs' share of games' revenue, %, and gross bookings are presented to enhance the comparability to other actors in the industry. Dividend per share, equity ratio, return on equity (ROE), net gearing, and capital expenditure are useful measures in assessing the efficiency of Rovio's operations, and Rovio's ability to obtain financing and service its debts.

The alternative performance measures should not be considered in isolation or as substitutes to the measures under IFRS. All companies do not calculate alternative performance measures in a uniform way and, therefore, the alternative performance measures presented here may not be comparable with similarly named measures presented by other companies.

Gross bookings

The following table sets out reconciliation of gross bookings used in key operational metrics and reported revenue.

Reconciliation of gross bookings to revenue

EUR million	4-6/ 2023	4-6/ 2022	1-6/ 2023	1-6/ 2022	1-12/ 2022
Gross bookings	68.7	72.4	140.8	153.2	298.0

Other adjustments	0.1	1.8	-0.2	2.2	2.3
Games' revenue	70.7	75.9	144.6	158.1	306.7

Custom contracts are distribution contracts that are signed with partners who pre-download Rovio's games onto their own devices or distribute Rovio's games through their proprietary distribution platforms, or other types of revenue arrangements, which differ from revenue recognition through gross bookings. Custom contracts can for instance contain a minimum guarantee and revenue share to Rovio. Rovio recognizes the corresponding minimum guarantee revenue over the contract period. Custom contracts do not include the application stores operated by Apple and Google.

Calculation principles of IFRS performance measures

Earnings per share, which is the net result for the review period divided by the average number of shares in the review period, less treasury shares.

Calculation principles of alternative performance measures

EBITDA (Earnings before interest, taxes, depreciation and amortization), which is operating profit before depreciations and amortizations.

EBITDA margin, %, which is defined as EBITDA as a percentage of revenue.

Items affecting comparability, which are defined as material items outside the ordinary course of business such as material net gains and losses from business disposals, direct transaction costs related to business acquisitions, restructuring costs for business operations, legal fees related to claims, changes in fair value of contingent considerations, significant impairment losses and reversals, and costs relating to enlargement of the ownership base of the company.

Adjusted EBITDA, which is defined as EBITDA excluding items affecting comparability.

Adjusted EBITDA margin, %, which is defined as comparable EBITDA as a percentage of revenue.

Operating profit margin, %, which is operating profit as a percentage of revenue.

Adjusted operating profit, which is defined as operating profit excluding items affecting comparability.

Adjusted operating profit margin, %, which is defined as adjusted operating profit as a percentage of revenue.

Adjusted profit for the period, which is defined as profit for the period excluding items affecting comparability and their tax impact.

Adjusted earnings per share, which is defined as adjusted profit for the period divided by the average number of shares less treasury shares.

User acquisition, which relate to acquisition of new players in the Company's games through performance marketing campaigns.

User acquisition share of games' revenue, %, which is user acquisition costs as a percentage of games' revenue.

Dividend per share, which is total dividend divided by number of shares, adjusted for share issues, at the end of the financial period less treasury shares.

Equity ratio, %, which is calculated by dividing (i) Total equity by (ii) Total equity and liabilities less advances received and deferred revenue.

Return on equity (ROE), which is calculated by dividing profit before tax, quarterly reports adjusted to correspond with 12 months, by the average of total equity in the opening and closing balance sheet

Capital expenditure, which is cash flow of purchase of tangible and intangible assets.

Net debt, which is calculated by subtracting cash and cash equivalents from current and non-current interest-bearing loans and borrowings.

Net gearing %, which is calculated by dividing net debt by the total equity.

Gross bookings represent in-app purchases and in-app advertising sales in the given calendar month, reported on the basis of the date of purchase/sale. Gross bookings do not include revenue from custom contracts, revenue deferrals or accounting adjustments due to e.g., foreign exchange rate differences between revenue accruals and actual payments, and thus differs from the actual reported revenue.

Player, which is defined as the user who plays one of Rovio's games on at least one device. A player can continue playing the game on multiple devices by synchronizing the game progress. Under the following metrics, a player who plays a given game in two devices is counted as one player.

DAU (Daily Active Users), which is defined as the number of players that played one of our games during a particular day. Under this metric, a player that plays two different games on the same day is counted as two DAUs. We primarily use information provided by Rovio's own technology, but we also use third-party tracking solutions for historical data and in cases when a game does not contain Rovio's tracking tools. Average DAUs for a particular period is the average of the DAUs for each day during that period.

MAU (Monthly Active Users), which is defined as the number of players that played one of our games during a particular calendar month. Under this metric, a player that plays two different games in the same month is counted as two MAUs. We primarily use information provided by Rovio's own technology, but we also use third party tracking solutions for historical data and in cases when a game does not contain Rovio's tracking tools.

MUP (Monthly Unique Payers), which is defined as the number of players that made a payment at least once during the calendar month through a payment method for which we can quantify the number of individuals, including payers from our mobile games. MUPs does not include individuals who use certain payment methods for which we cannot quantify the number of unique payers. We only use information provided by Rovio's own payment verification technology.

ARPPU (Average Revenue Per Daily Active User), which is defined as Sum of quarterly Gross Bookings divided by number of days in the quarter divided by average DAU for the quarter.

MARPPU (Monthly Average Revenue Per Paying User), which is defined as Monthly Gross IAP Bookings divided by MUP from verified purchases. MARPPU does not include revenue from custom contracts, revenue deferrals or accounting adjustments such as foreign exchange rate differences between revenue accruals and actual payments.

Notes

1. Key accounting principles

Rovio's consolidated financial statements are prepared in accordance with the International Financial Reporting Standards (IFRS) adopted by the EU. The Half Year Financial Report has been prepared in accordance with IAS 34, Interim Financial Reporting. The accounting principles and methods used in the preparation of the interim report are essentially the same as those applied in the consolidated financial statements for the year 2022.

The figures in the consolidated interim financial statements have been rounded and consequently the sum of individual figures may deviate from the sum presented. Key figures have been calculated using exact figures.

This Financial Statement Bulletin does not include all the information or disclosures as presented in the consolidated financial statements of December 31, 2022.

2. Notes to the statement of profit or loss

Rovio has previously defined its operating segments as Games, Brand Licensing (BLU) and Other. Starting from 1.1.2022 Rovio combines Games, Brand Licensing and Other into one segment.

Rovio defines the Group's Board of Directors as its chief operating decision maker (CODM).

The CODM follows Rovio's performance on the group level EBITDA is the primary performance measure that CODM follows.

Rovio did not during the interim period have customers that would require disclosure (i.e. 10% or more of revenues from transactions with a single customer).

2.1 Geographical distribution of revenue

The Group's business is very international. North America, and the United States in particular, is Rovio's largest market. The geographical distribution of revenue is presented below.

For in-app purchases and advertising revenue, the revenue has been allocated to the geographical markets based on gross bookings, which can be monitored on a country-specific basis. Revenue from custom contracts is presented based on the customer's home country. Revenue deferrals and other adjustment items have been allocated to the geographical markets in proportion to gross bookings, as they are estimated to largely follow the same structure.

The brand licensing revenue has been allocated to the geographical markets based on reported royalties and, for terminating contracts, according to the partner's home country. Revenue from content sales (movie, short form animations) has been allocated to the geographical markets based on the home country of the distribution partner or contractual partner.

4. Financial assets and liabilities measured at fair value

All assets and liabilities for which fair value is measured are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Fair value measured at the quoted price in the active market
- Level 2 – Fair value that is calculated using the observable price other than categorized in Level 1 directly or indirectly
- Level 3 – Fair value that is calculated based on valuation techniques which include inputs that are not based on observable market data.

All Rovio Group's financial assets and liabilities are classified to be measured at amortised cost, or at fair value through profit or loss, or at fair value through other comprehensive income, with no effect on profit or loss.

Financial assets carried at amortised costs consist of cash and cash equivalents and trade receivables. Rovio Group's financial instruments measured at amortised cost are classified at level 2. With regards to short-term financial assets and short-term financial liabilities, their fair value approximates the carrying amount.

Financial assets at fair value through profit or loss consist of money market investments. In the non-current asset, convertible capital loan receivable and a private equity investment in Gutsy Animations Oy are recognised at fair value through profit or loss.

Financial assets recognized at fair value through other comprehensive income consist of a capital investment in the Play Ventures fund. Changes in the fair value of the fund are presented in the fair value reserve in equity.

The fair value of the contingent consideration on the acquisition date is recognized as part of the consideration transferred for the acquiree. Contingent consideration liabilities are measured at fair value at the end of each reporting period. Any changes in fair value will be recognized in profit or loss.
