

VINCI CONSTRUCTION: DESIGN-BUILD OF A WATER TREATMENT PLANT IN PHNOM PENH (CAMBODIA)

A **182 million** euros contract

More than **500 local jobs created** at the height of activity

Design-build of a drinking water treatment plant and **10.8 km** of pipelines

27,000 sq. metres of solar panels will supply the plant with electricity

Eventually, a treatment capacity of **390,000 cu. metres** per day

Objectives:

Provide drinking water for 1 million residents of Phnom Penh

Expand water access in Cambodia
