Recruitment of a Study (Project) Manager for the Viscaria Copper Project

Copperstone Resources AB is a Nasdaq First North listed exploration company operating in Sweden. Copperstone is looking for a Study Manager for the newly acquired Viscaria Copper project. The experienced candidate is a passionate multi-tasker who has been through pre-mine development phases, mining operations and/or a mine construction. Copperstone has wholly-owned exploration assets and permits in Kiruna, Arvidsjaur and Smedjebacken municipalities. Copperstone's vision is to become a significant base and precious metals company based out of Scandinavia. The work place will be situated in the modern tailor-made Viscaria offices in Kiruna, several travelling days expected.

The Study Manager's responsibilities/accountabilities include the following:

- Prepare, submit for approval, implement, control and revise as necessary, the Study Execution Plan;
- Manage the study through its various activities in accordance with procedures and sound industry practices,
- Manage the study as outlined in an approved Study Execution Plan and mitigate any deviations from the plan;
- Manage safety, health and community issues associated with the study;
- Identify, analyse and resolve any conflicts that arise during execution of the study;
- Properly consider all alternative solutions identified by option studies;
- Arrange tenders and recommend requests for services/contracts and other awards for approval;
- Authorise all expenditure on the study through the negotiation and payment of work orders and internal and external contracts, within approved budgets and approval levels;
- Integrate activities of team members, chair meetings and report on progress and performance throughout the course of the study;
- Communicate with Copperstone Management towards key stakeholders;
- Report study progress and performance to Copperstone Management;
- Ensure quality procedures are in place for all work done on the study and provide technical input as required.

Direct responsibility (incl. management of internal resources, contractors and consultants) for;

- Interim deliverables (strategy workshops, interim memoranda, trade-off studies, option studies internal and external reviews)
- Final deliverables (Mineral Resource Estimate, Ore Reserve, financial analyses, cost estimates, designs, layouts, chapter reports)

The above-mentioned role description applies for the following areas;

- Geology, Mineralisation and Resources
- Geotechnical
- Mine Plan and Ore Reserves
- Hydrogeology, Hydrology and Water Balance
- Site Selection, Access Routes and Haulage Routes
- Metallurgical Testwork and Ore Characterisation
- Processing
- Tailings Disposal
- Power Supply and Distribution
- Water Supply and Management
- Ancilliary Facilites and Services
- Marketing and Product Logistics
- Project Execution Plan
- Implementation Schedule
- Capital Cost
- Operating Costs
- Economic Analysis
- Financing
- Environmental, Community and Environmental Impact Assessment
- External Affairs, Ownership and Legal Matters
- Operations and Operational Readiness
- Risk Assessment

We are looking forward to receiving your application; resumé and cover letter!
