

Technip Energies awarded two services contracts for first-of-a-kind waste-to-methanol Ecoplanta project in Spain

Technip Energies (PARIS:TE) has been awarded two engineering services contracts by Repsol for the development of the Ecoplanta Molecular Recycling Solutions (Ecoplanta) project, a first-of-a-kind waste-to-methanol facility to be built in El Morell, near Tarragona, Spain.

The plant will be the first in Europe to transform, at scale, non-recyclable municipal solid waste and biomass into renewable and circular methanol. By diverting waste from landfills to produce low-carbon methanol, it will enable to reduce CO₂ emissions in hard-to-abate sectors and use of renewable fuels. The project supports European ambitions for circularity and the broader transition to a more sustainable industrial model.

Utilizing Enerkem's cutting-edge gasification technology, the facility will process up to 400,000 tons of residual municipal waste annually and produce approximately 240,000 tons of methanol, a renewable alternative that can be used to manufacture new circular materials and to produce advanced biofuels.

As part of its role in the project, Technip Energies has been awarded two contracts covering the entire delivery scope: one for the Enerkem Core Process, developed in partnership between Enerkem and Technip Energies, and the other for the Balance of Plant, ensuring the integration of all the project units.

Under these contracts, Technip Energies will provide engineering and procurement services. The company will also oversee the integration of Enerkem's groundbreaking gasification technology, which converts non-recyclable waste into renewable fuels and chemicals. Building on the strategic collaboration agreement signed between Technip Energies and Enerkem in 2024, this award illustrates the strength of the partnership in accelerating the deployment of circular solutions at scale.

The project is co-funded by the European Union's Innovation Fund and is expected to reduce greenhouse gas emissions by 3.4 million tons of CO₂-equivalent over its first ten years of operation.

Sylvain Cabalery, SVP Business Line Sustainable Fuels, Chemicals & Circularity at Technip Energies, commented: *"We are honored to be part of the Ecoplanta project, a landmark in circularity and a breakthrough for waste-based feedstock transformation in Europe. These awards build on the strategic partnership we established with Enerkem last year and underscore our shared commitment to scaling circular solutions. Supporting the first commercial-scale facility of its kind in Europe illustrates our commitment for a more circular and sustainable future in the Iberian Peninsula, and the ability of our Technology, Products and Services (TPS) segment in driving innovation."*

These awards will be recorded in Q3 2025 backlog in the Technology, Products & Services segment.

About Technip Energies

Technip Energies is a global technology and engineering powerhouse. With leadership positions in LNG, hydrogen, ethylene, sustainable chemistry, and CO₂ management, we are contributing to the development of critical markets such as energy, energy derivatives, decarbonization, and circularity. Our complementary business segments, Technology, Products and Services (TPS) and Project Delivery, turn innovation into scalable and industrial reality.

Through collaboration and excellence in execution, our 17,000+ employees across 34 countries are fully committed to bridging prosperity with sustainability for a world designed to last.

Technip Energies generated revenues of €6.9 billion in 2024 and is listed on Euronext Paris. The Company also has American Depositary Receipts trading over the counter.

Important Information for Investors and Securityholders

Forward-Looking Statements

This press release contains forward-looking statements that reflect Technip Energies' (the "Company") intentions, beliefs or current expectations and projections about the Company's future results of operations, anticipated revenues, earnings, cashflows, financial condition, liquidity, performance, prospects, anticipated growth, strategies and opportunities and the markets in which the Company

operates. Forward-looking statements are often identified by the words “believe”, “expect”, “anticipate”, “plan”, “intend”, “foresee”, “should”, “would”, “could”, “may”, “estimate”, “outlook”, and similar expressions, including the negative thereof. The absence of these words, however, does not mean that the statements are not forward-looking. These forward-looking statements are based on the Company’s current expectations, beliefs and assumptions concerning future developments and business conditions and their potential effect on the Company. While the Company believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting the Company will be those that the Company anticipates.

All of the Company’s forward-looking statements involve risks and uncertainties, some of which are significant or beyond the Company’s control, and assumptions that could cause actual results to differ materially from the Company’s historical experience and the Company’s present expectations or projections. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those set forth in the forward-looking statements.

For information regarding known material factors that could cause actual results to differ from projected results, please see the Company’s risk factors set forth in the Company’s 2024 Annual Financial Report filed on March 10, 2025, with the Dutch Autoriteit Financiële Markten (AFM) and the French Autorité des Marchés Financiers (AMF) and in the Company’s 2025 Half-Year Report filed on July 31, 2025 with the AFM and the AMF, which include a discussion of factors that could affect the Company’s future performance and the markets in which the Company operates.

Forward-looking statements involve inherent risks and uncertainties and speak only as of the date they are made. The Company undertakes no duty to and will not necessarily update any of the forward-looking statements in light of new information or future events, except to the extent required by applicable law.
