

Q3 2020 | Interim report January-September 2020

Positive EBIT and cash flow on lower revenues

JULY–SEPTEMBER 2020

- Revenue decreased -22.5% to EUR 37.5 million (48.4). Ports & maritime decreased -21.9% and Airports & Industry decreased -22.9%
- EBIT decreased to EUR 0.7 million (3.1), corresponding to a margin of 2.0% (6.4%)
- Net result for the period was EUR -1.5 million (3.5)
- Earnings per share basic and diluted amounted to EUR -0.016 (0.038)
- Operating cash flow amounted to EUR 3.5 million (7.6)
- Net debt amounted to EUR 19.0 million (Q2 2020: 22.1)

JANUARY–SEPTEMBER 2020

- Revenue decreased -20.3% to EUR 118.2 million (148.2)
- EBIT decreased to EUR 4.4 million (7.0), corresponding to a margin of 3.7% (4.7%)
- Net result for the period was EUR 0.7 million (5.7)
- Earnings per share basic and diluted amounted to EUR 0.008 (0.061)
- Operating cash flow amounted to EUR 6.1 million (4.9)
- Leverage ratio improved to 0.97x (1.76x)
- Order backlog decreased -6.7% compared to the previous quarter to EUR 91.6 million

Unless otherwise stated, figures in brackets refer to the same period in the preceding year.

Key events during the quarter

- Airports division won orders for airport expansion projects in the middle east worth close to EUR 7 million
- Ports and Maritime signed the first order for the next generation automated vacuum mooring system; MoorMaster NxG

Key events after the quarter

- Cavotec to open new innovation center at the beginning of 2021 focusing on profitable sustainability solutions for maritime customers
- Cavotec's e-truck charging won the American Association of Port Authorities 2020 Facilities Engineering Award
- Cavotec launched Moormaster NXG
- Cavotec held an Investor Information Meeting giving an in-depth update on strategy and growth plans

Comment from the CEO

Accelerated investments in long term growth markets

The overall market situation continued to be challenging in the third quarter due to the Covid-19 situation with consequences for both revenues and order backlog. After the summer the global uncertainty has impacted the decision making of our customers with delays to the delivery of existing projects as well as getting the final approval for new projects taking longer than previously.

As a result, revenue for the period decreased 22.5% to EUR 37.5 million (48.4) and EBIT decreased to EUR 0.7 million (3.1), corresponding to a margin of 2.0% (6.4%). The profit decrease, due to the negative volume impact, was partially offset by savings in employee costs, consultancy and travelling expenses. We have also, during the period, utilised Covid-19 related government salary assistance where available, although the effect on the financial performance of this was not material.

Despite the current impact of Covid 19, we continue to see strong interest in our solutions in select areas, especially for MoorMaster and Shore Power systems. For Airports & Industry, sales of individual ground support and fueling products developed well and revenue from our offering within Industry were in line with previous year, but in total delays of several projects resulted in lower revenues for the division as a whole. Services remain negatively impacted by the Covid travel restrictions. The proportion of Service revenues compared to total revenue was 21% in the third quarter.

The order backlog decreased 7% compared to the end of the previous quarter to EUR 91,6 million and 16.5% compared to the same period in 2019. The decrease is related to delays in final decisions on a number of projects in Ports & Maritime, while the order backlog for Airports & Industry was slightly higher compared to both the previous quarter and the previous year due to orders for airport expansion projects in the middle east worth close to EUR 7 million.

During the quarter we signed an order for a Moormaster system for ASKO Maritime in Norway. This was the first order for our new generation Moormaster, the NxG, which was launched globally on October 27th.

We have redesigned MoorMaster from the ground up, to deliver faster, smarter installation, improved performance, continuous monitoring and easier maintenance. All in a unit with a smaller more streamlined footprint and an aesthetically pleasing design. These are qualities that ASKO Maritime have seen as crucial when they are planning the introduction of the world's first fully autonomous, zero emissions vessels. We are very proud of having been selected as a key partner to ASKO and very excited about the future of MoorMaster as the NxG opens up new large, untapped market segments such as typical container terminals.

The Moormaster NxG is an example of how we are taking the opportunity during these challenging times to invest in areas where we expect to see rapid growth and where we can be the number one player. To underpin these ambitions, we announced in the beginning of October that we will open a new innovation center in the Netherlands in 2021. Focusing primarily on the maritime sector, the new center will be in charge of Cavotec's research and development activities to bring to maturity new breakthrough solutions. The center will bring together the company's capabilities within areas such as artificial intelligence, remote connectivity, high power high speed electrical charging, and battery technology.

The interest by our marine customers in finding solutions which increase productivity and simultaneously offer sustainable operations has grown drastically. The creation of an innovation center is an important step in building on Cavotec's leading position in delivering what we call profitable sustainability for our customers.

A good example of how we have already today come far in this respect is our innovative high-power e-truck charging solution which recently won an important industry award. With our solution, we provide rapid and efficient high-power charging of battery powered heavy-duty terminal trucks in ports, thereby offering substantial operational, safety, and environmental benefits. The project with our partner, the Port of Long Beach in California, provides us with leading experience on how to convert the more than 30,000 diesel powered yard trucks operating in ports around the world to more sustainable and cost-efficient electrical operations.

With these steps, and more to come, we are positioning ourselves to leverage on trends such as automation, sustainability and workplace safety as leading ports and airports move towards more safe and efficient operations with a smaller environmental footprint.

In early October we held an investor information meeting in Stockholm at which we gave an in-depth update on the execution of our strategy and growth plans. I recommend watching the presentation at <https://tv.streamfabriken.com/cavotec-investor-information-meeting-2020>.

Lugano, 30 October 2020

Mikael Norin
Chief Executive Officer

Financial Review

JULY–SEPTEMBER 2020

Revenue decreased 22.5% in the third quarter compared to the same period previous year to EUR 37.5 million (48.4), mainly as a result of disruption related to the Covid-19 situation. Despite revenues decreasing in Ports & Maritime and Airports, our Industry business was less affected by the pandemic situation, where revenues shifted from main OEMs to new customer mainly in the Americas and Australia regions. The proportion of Service revenue compared to total revenue was 21% in the third quarter.

Ports & Maritime

Ports & Maritime's revenue decreased 21.9% compared to the same period previous year to EUR 16.6 million (21.3). A high share of the revenue was generated in the Nordic Region related especially to deliveries of solutions to the Port of Tallin and the Port of Helsinki. Continuing travel restrictions had a negative impact on our ability to deliver and certain projects were delayed.

The order backlog decreased 14.0% compared to the end of the previous quarter and 29.8% compared to the same period in 2019 to EUR 45.9 million (65.4).

Airports & Industry

Airports & Industry's revenues decreased 22.9% compared to the same period previous year to EUR 20.9 million (27.1). The majority of the revenue was related to sales of individual aircraft ground support and fuelling products as there were no large project deliveries in Airports during the quarter. Revenue from industrial customers was slightly higher than previous year and is as we continue to pivot towards new OEMs and geographies.

During the quarter, Cavotec won orders for airport expansion projects in the middle east worth close to EUR 7 million. As a result the order backlog increased 1.9% compared to the end

of the previous quarter and 3.2% compared to the same period in 2019 to EUR 45.7 million (44.2).

EBIT

EBIT decreased to EUR 0.7 million (3.1), corresponding to a margin of 2.0% (6.4%). The decrease is mainly due to the negative volume impact but partially offset by savings in employee costs, consultancy and travelling expenses.

Cavotec has also, during the period, utilised Covid-19 related government salary assistance as appropriate. The effect on the financial performance of this is not material.

Profit for the period and earnings per share

Finance costs amounted to EUR -0.5 million (-0.6).

Currency exchange differences amounted to EUR -2.7 million, a EUR 4.8 million negative swing versus the same period last year (2.1).

Income tax expenses for the third quarter 2020 amounted to EUR 0.9 million (-1.1).

The net result for the period amounted to EUR -1.5 million (+3.5).

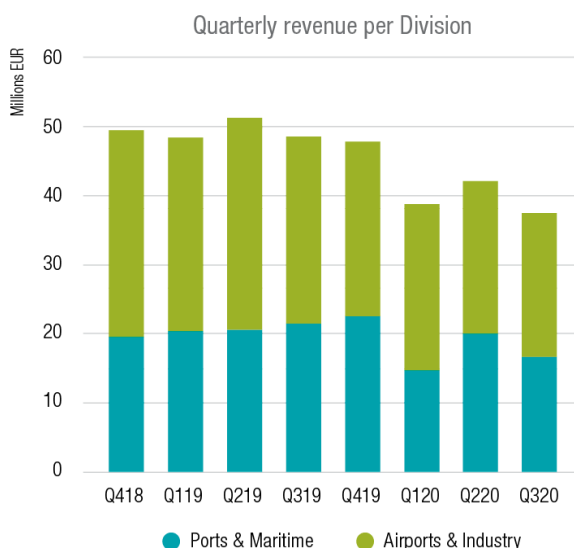

Earnings per share basic and diluted amounted to EUR -0.016 (0.038)

Cash flow

The operating cash flow amounted to EUR 3.5 million (7.6), which represented 116% of the EBITDA of the quarter.

Cash flow from financing activities was EUR -1.9 million (-11.5), mainly due to the repayment of IFRS 16 lease liabilities.

Cash and cash equivalents amounted to EUR 16.0 million as of 30 September 2020 (13.5).

JANUARY–SEPTEMBER 2020

The order backlog decreased 6.7% to EUR 91.6 million compared to the end of the previous quarter and 16.5% compared to the previous year (109.6). The decrease is related to project delays in Ports & Maritime, while the order backlog for Airports & Industry improved slightly compared to the same period previous year, especially in the EMEA region.

Revenues for the period decreased 20.3% to EUR 118.2 million (148.2) compared the same period 2019.

EBIT

EBIT for the first nine months decreased 37.7% to EUR 4.4 million (7.0), corresponding to a margin of 3.7% (4.7%).

Profit for the period and earnings per share
Finance costs amounted to EUR 1.2 million (1.6).

Currency exchange differences negatively impacted the profit by EUR -2.2 million versus a positive impact in the previous year of EUR 2.5 million.

Income tax expenses for the first nine months 2020 amounted to EUR -0.3 million (-2.1), with an effective tax rate of 27%.

The net result for the period amounted to EUR 0.7 million (5.7).

Earnings per share, basic and diluted, decreased to EUR 0.008 (0.061).

Financial Position

Cavotec's total assets amounted to EUR 204.4 million (222.2) as of 30 September 2020. Leverage ratio was stable in the quarter at 0.97x (0.98x at 31 December 2019).

In June 2020, Cavotec secured long-term financing by signing a five years agreement with Credit Suisse and others to provide a EUR 40M single currency term and multicurrency revolving credit facility. As a consequence, the old credit facility, classified as current liabilities, has been repaid and the new credit facility has been recognized as non-current financial liabilities.

Employees

The number of full-time equivalent employees in the Cavotec Group was 751 as of 30 September 2020 (769 at 31 December 2019).

Report on the Review

of Interim consolidated financial statements to the Board of Directors of
Cavotec SA

Lugano

Introduction

We have reviewed the interim consolidated financial statements on pages 7 to 10 (consolidated statement of comprehensive income, consolidated balance sheet, consolidated statement of changes in equity, consolidated statement of cash flow and notes on pages 11-12 and 15-16) of Cavotec SA for the nine months period ended 30 September 2020. The Board of Directors is responsible for the preparation and presentation of these interim consolidated financial statements in accordance with International Accounting Standard 34 "Interim Financial Reporting". Our responsibility is to express a conclusion on these interim consolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with Swiss Auditing Standard 910 and International Standard on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Swiss Auditing Standards and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements have not been prepared, in all material respects, in accordance with International Accounting Standard 34 "Interim Financial Reporting".

General information

Cavotec wants to contribute to a future world that is cleaner, safer and more efficient by providing innovative connection solutions for ships, aircraft and mobile equipment today. We thrive by shaping future expectations in the areas we are active in. Our credibility comes from our application expertise, dedication to innovation and world class operations. Our success rests on the core values we live by: Integrity, Accountability, Performance and Team Work. Cavotec's personnel represent a large number of cultures and provide customers with local support, backed by the Group's global network of engineering expertise. Cavotec SA, the Parent company, is a limited liability company incorporated and domiciled in Switzerland and listed on Nasdaq Stockholm Mid Cap.

These unaudited Financial Statements have been approved by the Board of Directors for publication on 30 October 2020.

Basis of preparation of Financial Statements

This quarterly report was prepared in accordance with IFRS, applying IAS 34 Interim Financial Reporting. The same accounting and valuation policies were applied in the most recent annual report. The amendments to the standards that became applicable for the current reporting period did not have an impact on Cavotec accounts. The condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended in December 2019. The preparation of quarterly financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

The fair values of the non-current financial assets, current financial liabilities and non-current financial liabilities are not materially different from their carrying amounts.

Cavotec is not exposed to material seasonal variations in its operations.

Segment information

Operating segments have been determined on the basis of the Group Management structure in place and on the management information and used by the Chief Operating Decision Maker (CODM) to make strategic decisions. Our two divisions are set out below and referred to collectively as the core businesses.

Ports & Maritime – development, manufacture and service of innovative automation and electrification technologies for the global ports and maritime sectors.

Airports & Industry – development, manufacture and service of fully integrated gate and remote apron solutions for Airports, and development and manufacture products for Industry, such as cranes, energy, processing and transportation, surface and underground mining, and tunnelling.

Customers of both divisions are supported by a Services organisation that was launched mid 2018.

Legal disputes

In the long running litigation matter in California the Group's net accounting position is unchanged during the quarter and our view remains that we have accounted for the most likely eventualities of the process. The latest development on the case supports this position.

Noteworthy risks and uncertainties

Cavotec's significant risks and uncertainties are divided into three categories, market, credit and liquidity risks. In these categories, there are both risks due to political and macroeconomic trends and specific risks directly linked to business carried out by the Group. Market risk includes currency and interest rate risk. Credit risk includes the risk of managing our customers and other receivables while liquidity risk includes the management of cash in a diverse, global group.

Covid – 19 Update

The COVID-19 pandemic has had a significant effect on the global economy. The impact on Cavotec is mainly delays in decisions from customers on new orders as well as delays in taking deliveries of product or services. At the date of this report all Cavotec facilities are open.

With the high uncertainty surrounding the situation and potential initiatives by authorities and customers, it is very difficult to predict the full financial impact that the situation may have on the Group for the coming quarters. As of September 30, 2020, there is no significant impact on any balance sheet items. The Group benefited by government assistance funds in different Countries, mainly related to employee costs, but the impact on the financials was not material.

Impairment tests with updated future cash flow projections based on different scenarios and revised discount rates were performed for the Ports & Maritime and Airports, AGC & Fueling cash-generating units, where the current market conditions could have triggered an impairment of the assets. The impairment tests did not lead to any impairment as of 30 September 2020, and the level of sensitivity of the CGUs to the key assumptions has not changed significantly.

A more detailed description of Cavotec's risks and how they are managed is included in the Annual Report 2019.

Forward looking statement

Some statements in this report are forward-looking, and the actual outcome could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcome. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialisation and technological difficulties, interruptions in supply, and major customer credit losses.

Key events during the year

In February 2020 Cavotec USA building located in Mooresville (NC) has been sold for USD 2.6 million (EUR 2.4 million). As the building was accounted as Asset held for Sale with a book value of USD 1.8 million (EUR 1.6 million), the Company recognized in the same month a capital gain of USD 0.8 million (EUR 0.7 million) recognized in Other income.
