

Interim Report, January – March 2019  
Malmö, May 16, 2019

## “CADScor®System will shorten waiting lists and add value for both patients and healthcare system”

Dr. Werner Kommer Facharzt für Innere Medizin und Kardiologie in Wolkersdorf, Austria

”After almost a year at Acarix, I am truly inspired by the opportunities our products offer to revolutionize heart diagnosis. We participate actively in congresses and scientific conferences and see that the need for precise tools to make quick and appropriate decisions continues to grow. Acarix has an important role to play in fulfilling that need.”

*Extract from CEO Per Persson’s commentary to the Interim Report.*

### **First quarter 2019 compared with same period 2018**

- During the first quarter, sales amounted to five CADScor®System and 640 patches compared with four CADScor®System and 520 patches in same period previous year.
- Revenue amounting to 299 kSEK (230), with gross profit of 209 kSEK (158) and a gross margin of 70% (69).
- Operational costs amounting 13 038 kSEK (8 170).
- Result before tax amounted to –12 822 kSEK (–7 963).
- Net cash flow from operating activities amounted to –13 101 kSEK (–9 444).
- Basic earnings per share amounted to –0.56 SEK (–0.35). No dilution arose.

### **Events in the first quarter, 2019**

In February Acarix announced that filing for German reimbursement will go directly with the Federal Joint Committee (G-BA) for its CADScor®System. Previously, Acarix was aiming for full reimbursement in Germany by the end of 2019, after initial discussions with relevant associations. However, a new legislation is underway which will impact the local reimbursement process and result in delays. Furthermore, private reimbursement is not affected by the above changes.

### **Events after March 31, 2019**

No major events occurred after March 31, 2019.

### **About Acarix**

Acarix was established in 2009 and is listed on Nasdaq First North Premier. Acarix's CADScor®System uses an advanced sensor placed on the skin above the heart to listen to the sounds of cardiac contraction movement and turbulent flow. It has been designed to be an all-in-one system in the sense that the heart signal will be recorded, processed and displayed as a patient specific score, the CAD score, on the device screen. Readings are obtained in less than 8 minutes. Safe and suitable for use in both out- and inpatient settings, the CADScor®System thus has the potential to play a major role in patient triage, avoiding the need for many patients to undergo stressful and invasive diagnostic procedures.
