Optimal VerdensIndex Moderat

Beslutning om etablering

Afdelingen Optimal VerdensIndex Moderat er besluttet etableret på bestyrelsens møde den 23. august 2010.

Formål

Afdelingens formål er:

- At tilbyde en global veldiversificeret eksponering mod finansielle værdipapirer, herunder aktier og obligationer, som tilnærmelsesvis afspejler sammensætningen af det globale finansielle værdipapirmarked.
- At tilbyde de bedste forudsætninger for et attraktivt merafkast på langt sigt som følge af en løbende re-balancering af aktivklasser og valuta og en aktiv omkostnings- og risikominimeringsstrategi.
- At skabe en omsættelig investeringsforening med lavest mulige handelsomkostninger.
- At skabe en sikker investeringsforeningsafdeling med investering i globale værdipapirer.

Langt sigt er defineret ved mere end 10 år og helt op til 30 år.

Investeringsområde

Afdelingens investeringer foretages i overensstemmelse med kapitel 14 og 15 i lov om investeringsforeninger m.v.

Afdelingen investerer i andele i udenlandske investeringsinstitutter eller afdelinger heraf samt i andele i danske UCITS eller i disse foreningers afdelinger i henhold til bestemmelserne herom i lov om investeringsforeninger m.v.

Afdelingen vil primært investere i andele, som har fået adgang til eller er optaget til handel på et reguleret marked, der er medlem af World Federation of Exchanges og fuldgyldigt medlem af OECD eller medlem af Federation of European Securities Exchanges (FESE), eller som handles på et andet reguleret marked i Den Europæiske Union, der er regelmæssigt arbejdende, anerkendt og offentligt. Afdelingen kan sekundært investere i foreningsandele, der ikke er optaget til handel på et reguleret marked.

Afdelingen kan endvidere investere i ovennævnte finansielle instrumenter optaget til handel på de i vedtægternes bilag 1 opregnede markeder, som af bestyrelsen vurderes at leve op til Finanstilsynets retningslinjer for godkendte markeder.

Afdelingen kan endvidere indskyde midler i et kreditinstitut i henhold til bestemmelserne herom i lov om investeringsforeninger m.v.

Investeringsstrategi

Investeringsforeningen er aktivt forvaltet og investerer i henhold til retningslinjerne fastsat i prospektet og investeringsstrategien med den hensigt som minimum at opnå et afkast, på niveau med benchmark.

Investeringsmålene søges opnået ved investering på forskellige markeder og aktivklasser gennem placering i passive investeringsinstitutter og investeringsforeninger (Exchange Traded Funds), som investerer efter et indeks. Afdelingen målsætning er at skabe den bedste balance mellem afkast, risiko og sikkerhed til lave omkostninger. Afdelingen investerer i en balanceret global markedsportefølje ved hjælp af børshandlede indeksforeninger (ETF'ere). Afdelingen investerer indirekte i 5.000 - 6.000 aktier og stats-, realkredit-, erhvervs-, inflationsindeks- og emerging markets og high yield obligationer. På baggrund af en aktiv omkostningsminimeringsstrategi søges udvalgt de investeringsinstitutter og investeringsforeninger, som oppebærer de laveste samlede omkostninger. Afdelingen søger således alene at investere i passivt forvaltede investeringsinstitutter og investeringsforeninger, som har til formål at følge et indeks.

Afdelingens midler ønskes primært placeret i Exchange Traded Funds, som skal være UCITS godkendte. Afdelingen forventes derfor alene at investere i europæiske ETF'ere, som er optaget til handel.

Investeringsbegrænsninger

Afdelingen kan investere i obligationer udstedt af den danske stat samt realkreditobligationer udstedt af danske realkreditinstitutter.

- At tilbyde en global veldiversificeret eksponering mod finansielle værdipapirer, herunder aktier og obligationer, som tilnærmelsesvis afspejler sammensætningen af det globale finansielle værdipapirmarked.
- At tilbyde de bedste forudsætninger for et attraktivt merafkast på langt sigt som følge af en løbende rebalancing af aktivklasser og valuta og en aktiv omkostnings- og risikominimeringsstrategi.
- At skabe en omsættelig investeringsforening med lavest mulige handelsomkostninger.
- At skabe en sikker investeringsforeningsafdeling med investering i globale værdipapirer.

Langt sigt er defineret ved mere end 10 år og helt op til 30 år.

Investeringsområde

Afdelingens investeringer foretages i overensstemmelse med kapitel 14 og 15 i lov om investeringsforeninger m.v.

Afdelingen investerer i andele i udenlandske investeringsinstitutter eller afdelinger heraf samt i andele i danske UCITS eller afdelinger heraf i henhold til bestemmelserne herom i lov om investeringsforeninger m.v. Derudover investerer afdelingen i UCITS godkendte ETF'ere.

Afdelingen vil primært investere i andele, som har fået adgang til eller er optaget til handel på et reguleret marked, der er medlem af World Federation of Exchanges og fuldgyligt medlem af OECD eller medlem af Federation of European Securities Exchanges (FESE), eller som handles på et andet reguleret marked i Den Europæiske Union, der er regelmæssigt arbejdende, anerkendt og offentligt. Afdelingen kan sekundært investere i foreningsandele, der ikke er optaget til handel på et reguleret marked.

Afdelingen kan endvidere indskyde midler i et kreditinstitut i henhold til bestemmelserne herom i lov om investeringsforeninger m.v.

Afdelingen kan endvidere investere i ovennævnte finansielle instrumenter optaget til handel på de i vedtægternes bilag 1 opregnede markeder, som af bestyrelsen vurderes at leve op til Finanstilsynets retningslinjer for godkendte markeder.

Investeringsstrategi

Investeringsforeningen er aktivt forvaltet og investerer i henhold til retningslinjerne fastsat i prospektet og investeringsstrategien med den hensigt som minimum at opnå et afkast, på niveau med benchmark.

Investeringsmålene søges opnået ved investering på forskellige markeder og aktivklasser gennem placering i passive investeringsinstitutter og investeringsforeninger (Exchange Traded Funds), som investerer efter et indeks. Afdelingen målsætning er at skabe den bedste balance mellem afkast, risiko og sikkerhed til lave omkostninger. Afdelingen investerer i en balanceret global markedsportefølje ved hjælp af børshandlede indeksforeninger (ETF'ere). Afdelingen investerer indirekte i 5.000 - 6.000 aktier og stats-, realkredit-, erhvervs-, inflationsindeks- og emerging markets og high yield obligationer. På baggrund af en aktiv omkostningsminimeringsstrategi søges udvalgt de investeringsinstitutter og investeringsforeninger, som opbebærer de laveste samlede omkostninger. Afdelingen søger således alene at investere i passivt forvaltede investeringsinstitutter og investeringsforeninger, som har til formål at følge et indeks.

Afdelingens midler ønskes primært placeret i Exchange Traded Funds, som skal være UCITS godkendte. Afdelingen forventes derfor alene at investere i europæiske ETF'ere, som er optaget til handel.

Investeringsbegrænsninger

Afdelingen kan investere i obligationer udstedt af den danske stat samt realkreditobligationer udstedt af danske realkreditinstitutter.

En afdelings risikoklasse er markeret på en skala fra 1 til 7. Risikoklasse 1 betyder små kursudsving og dermed lav risiko, og er typisk kombineret med lavere afkast. Risikoklasse 7 betyder store kursudsving og dermed høj risiko, typisk kombineret med mulighed for højere afkast.

Aktiv Balance

Investor skal især være opmærksom på, at aktiemarkedsrisiko, rente- og obligationsmarkedsrisiko, kreditrisiko, risiko på kontantindestående og valutarisiko kan påvirke værdien af investeringen. De enkelte risikofaktorer er nærmere beskrevet i afsnittet 'Risikoforhold og risikofaktorer'.

Risikoforhold og risikofaktorer

Risikoforhold

Investering i andele i foreningens afdelinger indebærer en risiko for tab på samme måde som ved enhver anden investering. Værdien af andele i en afdeling kan svinge med tiden og kan således på et vilkårligt tidspunkt være enten mindre, det samme eller mere værd end på investeringstidspunktet. Investor skal derfor være opmærksom på, at investering i foreningsandele ikke kan sammenlignes med indskud i en bank, og at værdien ikke er garanteret.

De enkelte afdelinger er fordelt i risikoklasser. Risikoklassen angiver den typiske sammenhæng mellem risikoen og muligheden for afkast ved at investere i afdelingen, og den er bestemt af udsvingene i afdelingens indre værdi i de seneste fem år og/eller repræsentative data. Vær opmærksom på, at en afdelings risikoklasse kan ændre sig med tiden, og at de historiske data, der ligger bag den nuværende placering i en risikoklasse, ikke nødvendigvis giver et billede af den fremtidige risikoprofil.

I skemaet herunder er afdelingernes risikoklasse vist på en skala fra 1 til 7. Risikoklasse 1 betyder små kursudsving og dermed lav risiko og er typisk kombineret med lavere afkast. Risikoklasse 7 betyder store kursudsving og dermed høj risiko, typisk kombineret med mulighed for højere afkast.

Foreningen arbejder løbende med at fastholde risikoprofilen for den enkelte afdeling gennem en passende spredning af afdelingens investeringer inden for de rammer, som lovgivningen og foreningens vedtægter sætter.

Risikofaktorer

Afdelingerne kan være påvirket af forskellige risikofaktorer. En række af disse mulige risikofaktorer er listet op herunder:

Aktiemarkedsrisiko

Kursudviklingen på aktiemarkederne kan til tider svinge voldsomt, og kursværdien på aktier kan falde meget og hurtigt. Aktiemarkederne kan blive utsat for særlige politiske eller reguleringsmæssige forhold, som kan påvirke værdien af en afdelings aktieinvesteringer. Desuden vil markedsmæssige, sektormæssige, nationale, regionale eller generelle økonomiske forhold kunne påvirke værdien af en afdelings investering både positivt og negativt.

Aktivfordelings risiko

Investerer en afdeling i forskellige aktivklasser, vil vægtvalget af aktivklasser i forhold til benchmark udgøre en risikofaktor.

Emerging markets risiko

Emerging markets dækker lande i Østeuropa, Latinamerika, Afrika og Asien. Fælles for landene er, at de kan være kendtegnet ved politisk ustabilitet og risiko for fx nationalisering og konfiskation af private virksomheder eller statslig overvågning og kontrol. Korruption kan være udbredt. De finansielle markeder kan være præget af usikre forhold omkring depoter, registrering og afvikling, og den økonomiske udvikling kan være usikker og forbundet med risiko for devaluering af valutaen og hyperinflation. Desuden kan likviditeten på emerging markets være lav. Emerging markets kan således være forbundet med risici, som ikke findes på de udviklede finansielle markeder.

Risikoforhold og risikofaktorer

Kreditrisiko

Kreditrisiko knytter sig især til en afdelings investering i obligationer. En obligation indebærer en risiko for tab, hvis udstederen ikke kan overholde sine betalingsforpligtelser i form af rente og afdrag på obligationsgælden.

Modpartsrisiko

Når en afdeling investerer i afledte finansielle instrumenter og depotbeviser, som fx ADR's og GRD's, eller foretager udlån af værdipapirer kan der være en risiko for, at modparten ikke overholder sine forpligtelser. Det kan betyde et tab for afdelingen.

Risiko på kontantindestående

En afdeling kan have en større eller mindre del af sin formue som kontantindestående eller aftaleindskud i et pengeinstitut, bl.a. i foreningens depotselskab. Det giver afdelingen en risiko for tab, hvis pengeinstituttet går konkurs.

Rente- og obligationsmarkedsrisiko

En afdeling, der investerer på obligationsmarkeder, vil være utsat for risiko ved svingende renteniveau. Renteniveauet bliver påvirket af både nationale og internationale makroøkonomiske forhold, som fx konjunkturer, finans- og pengepolitik og inflationsforventninger. Når renteniveauet stiger, betyder det kursfald på obligationer, så værdien af en afdelings investeringer falder. Renterisikoen kan beskrives ved begrebet varighed, som bl.a. er et udtryk for kursrisikoen på de obligationer, afdelingen investerer i. Jo lavere varighed, desto mere kursstabile er obligationerne, hvis renten ændrer sig.

Politisk risiko

Værdien af investeringen i værdipapirer kan påvirkes af politiske beslutninger, der ikke var kendt på tidspunktet for investeringen.

Udstederspecifik risiko

Et enkelt værdipapir vil kunne svinge mere i værdi end det samlede marked og vil dermed kunne give et afkast, der er meget forskelligt fra markedets. Værdien af det enkelte værdipapir vil bl.a. afhænge af indtjeningen hos udstederen, fx selskabet bag en aktie eller en virksomhedsobligation, som igen kan være påvirket af fx lovgivningsmæssige, konkurrence- og likviditetsmæssige forhold. Hvis en afdeling investerer en stor procentdel af sin formue i ét enkelt værdipapir, bliver den mere følsom over for udviklingen hos denne udsteder, og værdien af afdelingen kan variere meget. Hvis udsteder går konkurs, kan afdelingen få et tab.

Risiko ved kreditspænd/rentespænd

Kreditspænd/rentespænd udtrykker renteforskellen mellem sikre statsobligationer og andre obligationstyper, der er udstedt i samme valuta og med samme løbetid. Kreditspændet viser den præmie i form af ekstra rente, som investor får, for at påtage sig en ekstra kreditrisiko ved investeringer i de mindre sikre obligationer. I perioder med uro på de finansielle markeder kan rentespændene udvide sig hurtigt og meget, og det kan give kurstab på en afdelings investeringer.

Valutarisiko

Investeringer i udenlandske værdipapirer giver en risiko ved omveksling fra udenlandske valutaer til danske kroner, fordi valutakurserne kan svinge. Disse udsving kan påvirke værdien af investeringerne i en afdeling, der investerer i udenlandske værdipapirer i både positiv eller negativ retning. En afdeling, som investerer i danske værdipapirer, har fx ingen direkte valutarisiko, mens en afdeling, som investerer i europæiske værdipapirer, har begrænset valutarisiko. En afdeling, som systematisk kurssikrer mod danske kroner, har en meget begrænset valutarisiko. Det vil være beskrevet under den enkelte afdelings investeringsområde, om den laver en sådan kurssikring.

Vær opmærksom på, at listen kun er eksempler, og at andre forhold kan spille ind på værdien af investeringen. Vær også opmærksom på, at forskellige dele af de finansielle markeder kan reagere forskelligt på disse forhold.

Nykredit Bank A/S er bevisudstede institut for foreningen. Andelene opbevares gratis i depot hos depotselskabet eller andre danske pengeinstitutter. Ved beholdningsændringer på kontoen hos Euronext Securities betales dog almindeligt gebyr til Euronext Securities.

Løbende emission

Tegning i afdelingerne sker i henhold til vedtægterne. Andelene i afdelingerne bliver udbudt i løbende emission uden fastsat højeste beløb. Andele tegnet i den løbende emission afregnes til den aktuelle emissionskurs og med kutymemæssige handelsomkostninger. Afregning foregår to dage efter tegningen ved registrering af andelene på investors konto hos Euronext Securities.

Løbende emission kan suspenderes efter bestyrelsens beslutning, såfremt det eksempelvis vurderes, at der er væsentlig tvivl om værdien af de respektive afdelingers midler på emissionstidspunktet. Eventuel suspension og genoptagelse af emission efter suspension vil blive meddelt via Nasdaq Copenhagen A/S og på foreningens hjemmeside.

Ved større emissioner på 10 mio. kr. og derover kan foreningens investeringsforvaltningsselskab tillade emissioner ved apportindskud af værdipapirer.

Emissionsomkostninger

Emissionsprisen for afdelingerne fastsættes ved anvendelse af dobbelprismetoden i henhold til § 4, stk. 1 i bekendtgørelse om beregning af emissions- og indløsningspriser ved tegning og indløsning af andele i danske UCITS m.v. ved at dividere formuens værdi på emissionstidspunktet med den nominelle værdi af tegnede andele med tillæg af et beløb til dækning af udgifter ved køb af finansielle instrumenter og nødvendige omkostninger ved emissionen.

Inkluderet i emissionsomkostningerne indgår følgende maksimale udgifter i procent af indre værdi for afdelingerne Optimal VerdensIndex Moderat, Optimal Stabil, Optimal Mix - KL, Optimal Offensiv - KL og Optimal Balance Wealth Akk. - KL:

• Kurtage og direkte omkostninger ved køb af instrumenter:	0,10%

Foreningsandele, tegning og indløsning

De angivne maksimale emissionsomkostninger kan overskrides i perioder med usædvanlige markedsforhold, som medfører en stigning i de øvrige markedsafledte udgifter ved køb og salg af en afdelings instrumenter. Hvis en sådan situation opstår, vil foreningen i denne periode oplyse om de konkrete emissionsomkostninger via Nasdaq Copenhagen A/S og på foreningens hjemmeside, ligesom det vil blive offentliggjort samme steder, når der igen vendes tilbage til det anførte maksimale emissionstillæg.

Omkostningerne for foreningen vil ved store emissioner på 10 mio. kr. og derover være lavere end svarende til de i det ovenfor angivne satser. Ved store emissioner forbeholder foreningen sig derfor ret til i det konkrete tilfælde at reducere emissionstillægget. Emissionstillægget kan dog ikke være lavere end omkostningerne ved køb af finansielle instrumenter, medmindre emissionen sker i forbindelse med apportindskud af værdipapirer i afdelingen.

Flytning

Der gælder ingen særlige regler for investorers flytning fra en afdeling til en anden i foreningen. Flytning betragtes som indløsning med efterfølgende emission på almindelige vilkår.

Lån

Foreningen må optage lån i henhold til lovens bestemmelser herom.

Navnenotering

Andelene skal noteres på navn i foreningens register over investorer. Navnenotering foretages af det pengeinstitut, hvor andelene ligger i depot.

Kursoplysning

Den indre værdi samt emissions- og indløsningskurserne af andele i afdelingerne beregnes hver dag og offentliggøres på Nasdaq Copenhagen A/S samt på foreningens hjemmeside.

Emissions- og indløsningskurserne afrundes efter samme principper som i de af Nasdaq Copenhagen A/S fastlagte retningslinjer for kursangivelse.

Negotiabilitet og omsættelighed

Investeringsforeningsandelene er omsætningspapirer, og der gælder ingen indskrænkninger i andelenes omsættelighed.

Stemmeret/Rettigheder

Hver investor har én stemme for hver andel à 100 kr. Investorer kan alene udøve stemmeret for de andele, som en uge forud for generalforsamlingen er noteret på vedkommende investors navn i foreningens register over investorer. Der gælder ingen stemmeretsbegrænsning.

Ingen andele har særlige rettigheder.

Opløsning

Bestyrelsen kan indstille til investorernes beslutning, at en forening eller afdeling opløses. En sådan indstilling kan være forårsaget af fx utilstrækkeligt kapitalgrundlag eller eventuelt utidssvarende investeringsområde i foreningen eller afdelingen.

Beslutning om ændring af vedtægterne og beslutning om foreningens eller afdelingens afvikling, spaltning eller fusion af den ophørende forening eller afdeling, er kun gyldig, hvis den tiltrædes af mindst 2/3 såvel af de stemmer, der er afgivet, som af den del af formuen, der er repræsenteret på generalforsamlingen.

Indløsning

Enhver investor har ret til når som helst at indløse sine andele helt eller delvist. Indløsningsprisen beregnes ved anvendelse af dobbelprismetoden i henhold til § 4, stk. 2 i bekendtgørelse om beregning af emissions- og indløsningspriser ved tegning og indløsning af andele i danske UCITS m.v. til den indre værdi opgjort på indløsningstidspunktet efter samme principper, som anvendes i årsrapporten ved at dividere formuens værdi på indløsningstidspunktet med den nominelle

Foreningsandele, tegning og indløsning

værdi af tegnede andele med fradrag af et beløb til dækning af udgifter ved salg af finansielle instrumenter og til nødvendige omkostninger ved indløsningen. Ved indløsning i de fem afdelinger skønnes omkostninger til kurtage, spreads og øvrige handelsomkostninger maksimalt at andrage 0,25% af indre værdi.

Indløsning kan suspenderes efter bestyrelsens beslutning, såfremt det eksempelvis vurderes, at foreningen ikke kan fastsætte den indre værdi på grund af forholdene på markedet, eller når foreningen af hensyn til en lige behandling af investorerne først fastsætter indløsningsprisen, når foreningen har realiseret de til indløsningen af andelene nødvendige aktiver. Indløsning kan også suspenderes som følge af systemmæssige eller tekniske fejl. Eventuel suspension og genoptagelse af indløsning efter suspension vil blive meddelt via Nasdaq Copenhagen A/S og på foreningens hjemmeside.

Finanstilsynet kan kræve, at foreningen udsætter indløsning af andele, hvis det er i investorernes eller offentligedens interesse.

De angivne maksimale indløsningsomkostninger kan overskrides i perioder med usædvanlige markedsforhold, som medfører en stigning i de øvrige markedsafledte udgifter ved køb og salg af afdelingens instrumenter. Såfremt en sådan situation opstår, vil foreningen i denne periode oplyse om de konkrete indløsningsomkostninger via Nasdaq Copenhagen A/S og på foreningens hjemmeside, ligesom det vil blive offentliggjort samme steder, når der igen vendes tilbage til det anførte maksimale indløsningsfradrag.

Tilbagesalg eller indløsning af andele kan ske gennem investors pengeinstitut mod betaling af kutymemæssige handelsomkostninger. Afregning foregår to bankdage efter anmodning om indløsning.

Foreningen kan i særlige tilfælde forlange, at indløsningsprisen fastsættes efter, at afdelingen har realiseret de til imødekommenlse af indløsningen nødvendige aktiver. I sådanne tilfælde skal foreningen straks efter udsættelsen underrette

Finanstilsynet og de kompetente myndigheder i andre medlemsstater af Den Europæiske Union og lande, som Fællesskabet har indgået aftale med på det finansielle område, når foreningen markedsfører sine andele der, om udsættelsen.

Ved større indløsninger på 10 mio. kr. og derover kan foreningens investeringsforvaltningsselskab foretage indløsninger ved apportudtræk af værdipapirer, såfremt investor måtte ønske dette, og at det ikke vil være til skade for de tilbageværende investorer. Indløsningsfradraget vil ved apportudtræk afvige fra fornævnte skønnede omkostninger.

Ingen investor er forpligtet til at lade sine andele indløse helt eller delvist.

Andele i Investeringsforeningen Investin, der er købt på det sekundære marked, kan normalt ikke sælges direkte tilbage til Investeringsforeningen Investin. Investorer skal købe og sælge andele på et sekundært marked ved hjælp af en værdipapirhandler (f.eks. en bank eller en børsmægler) og skal muligvis afholde gebyrer i forbindelse hermed. Desuden kan investorer komme til at betale mere end den eksisterende indre værdi, når de køber andele, samt få mindre end den øjeblikkelige indre værdi, når de sælger dem.

Væsentlige aftaler og omkostninger

Depotselskab

Foreningen har indgået depotselskabsaftale med The Bank of New York Mellon ("BNY Mellon"). BNY Mellon påtager sig som depotselskab at opbevare og forvalte værdipapirer og likvide midler for hver af foreningens afdelinger i overensstemmelse med lov om investeringsforeninger m.v., lov om finansiel virksomhed og Finanstilsynets bestemmelser.
