Slawomir Krupa, the Group's Chief Executive Officer, commented:

"This quarter was marked by a good commercial performance in most businesses, limited increase in operating expenses and a low cost of risk. Global Banking and Investor Solutions notably posted stable revenues compared to a high level last year, and International Retail Banking maintained a solid performance. The Group's net result was penalized by the negative effect of short-term hedges on net interest income in French retail, the impact of which peaked in Q3 23. It also includes, as announced during our Capital Markets Day, exceptional accounting items, with no impact on the capital ratio, or on shareholder distribution. Finally, in line with previous quarters, the balance sheet is very solid with a CET 1 ratio of 13.3%, up 20 basis points, and a robust liquidity profile."

Net banking income

Net banking income decreased in Q3 23 by -6.2% (-9.2%*) vs. Q3 22 largely due to the decline in the net interest income in French Retail, Private Banking and Insurance, and to negative revenue in the Corporate Centre (in particular, impacts from the unwinding of hedges on TLTRO operations and other volatile items).

Revenues recorded by French Retail, Private Banking and Insurance decreased by -16.4% vs. Q3 22 owing to the decline in the net interest income which continues to be impacted by short-term hedges that were taken until 2022. Insurance's revenues climbed by +11% vs. Q3 22.

9. APPENDIX 2: METHODOLOGY

1 -The financial information presented for the third quarter and nine months 2023 was examined by the Board of Directors on November 2nd, 2023 and has been prepared in accordance with IFRS as adopted in the European Union and applicable at that date. This information has not been audited

2 - Net banking income

The pillars' net banking income is defined on page 41 of Societe Generale's 2023 Universal Registration Document. The terms "Revenues" or "Net Banking Income" are used interchangeably. They provide a normalised measure of each pillar's net banking income taking into account the normative capital mobilised for its activity.

3 - Operating expenses

Operating expenses correspond to the "Operating Expenses" as presented in notes 5 and 8.2 to the Group's consolidated financial statements as at December 31st, 2022. The term "costs" is also used to refer to Operating Expenses. The Cost/Income Ratio is defined on page 41 of Societe Generale's 2023 Universal Registration Document.

4 - Cost of risk in basis points, coverage ratio for doubtful outstandings

The cost of risk is defined on pages 42 and 691 of Societe Generale's 2023 Universal Registration Document. This indicator makes it possible to assess the level of risk of each of the pillars as a percentage of balance sheet loan commitments, including operating leases.

French Retail, Private Banking and Insurance	Net Cost Of Risk	144	196	342	264

The **gross coverage ratio for doubtful outstandings** is calculated as the ratio of provisions recognised in respect of the credit risk to gross outstandings identified as in default within the meaning of the regulations, without taking account of any guarantees provided. This coverage ratio measures the maximum residual risk associated with outstandings in default ("doubtful").

5 - ROE, ROTE, RONE

The notions of ROE (Return on Equity) and ROTE (Return on Tangible Equity), as well as their calculation methodology, are specified on page 43 of Societe Generale's 2023 Universal Registration Document. This measure makes it possible to assess Societe Generale's return on equity and return on tangible equity. RONE (Return on Normative Equity) determines the return on average normative equity allocated to the Group's businesses, according to the principles presented on page 43 of Societe Generale's 2023 Universal Registration Document.

Group net income used for the ratio numerator is book Group net income adjusted for "interest net of tax payable on deeply subordinated notes and undated subordinated notes, interest paid to holders of deeply subordinated notes and undated subordinated notes, issue premium amortisations" and "unrealised gains/losses booked under shareholders' equity, excluding conversion reserves" (see methodology note No. 9). For ROTE, income is also restated for goodwill impairment.

Details of the corrections made to book equity in order to calculate ROE and ROTE for the period are given in the table below:

7 - Calculation of Earnings Per Share (EPS)

The EPS published by Societe Generale is calculated according to the rules defined by the IAS 33 standard (see page 44 of Societe Generale's 2023 Universal Registration Document). The corrections made to Group net income in order to calculate EPS correspond to the restatements carried out for the calculation of ROE and ROTE. As specified on page 45 of Societe Generale's 2023 Universal Registration Document, the Group also publishes EPS adjusted for the impact of non-economic and exceptional items presented in methodology note No. 5 (underlying EPS).

The calculation of Earnings Per Share is described in the following table:

8 - The Societe Generale Group's Common Equity Tier 1 capital is calculated in accordance with applicable CRR2/CRD5 rules. The fully loaded solvency ratios are presented pro forma for current earnings, net of dividends, for the current financial year, unless specified otherwise. When there is reference to phased-in ratios, these do not include the earnings for the current financial year, unless specified otherwise. The leverage ratio is also calculated according to applicable CRR2/CRD5 rules including the phased-in following the same rationale as solvency ratios.

9 – Funded balance sheet, loan to deposit ratio

The **funded balance sheet** is based on the Group financial statements. It is obtained in two steps:

- A first step aiming at reclassifying the items of the financial statements into aggregates allowing for a more economic reading of the balance sheet. Main reclassifications:

Insurance: grouping of the accounting items related to insurance within a single aggregate in both assets and liabilities.

Customer loans: include outstanding loans with customers (net of provisions and write-downs, including net lease financing outstanding and transactions at fair value through profit and loss); excludes financial assets reclassified under loans and receivables in accordance with the conditions stipulated by IFRS 9 (these positions have been reclassified in their original lines).

Wholesale funding:

Includes interbank liabilities and debt securities issued.

Financing transactions have been allocated to medium/long-term resources and short-term resources based on the maturity of outstanding, more or less than one year.

Reclassification under customer deposits of the share of issues placed by French Retail Banking networks (recorded in medium/long-term financing), and certain transactions carried out with counterparties equivalent to customer deposits (previously included in short term financing).

(1) The number of shares considered is the average number of ordinary shares of the period, excluding treasury shares and buybacks, but including the trading shares held by the Group.

Deduction from customer deposits and reintegration into short-term financing of certain transactions equivalent to market resources.

- A second step aiming at excluding the contribution of insurance subsidiaries, and netting derivatives, repurchase agreements, securities borrowing/lending, accruals and “due to central banks”.

The Group **loan/deposit ratio** is determined as the division of the customer loans by customer deposits as presented in the funded balance sheet.
