Allarity Therapeutics Elaborates on the Contents of the Meeting Agenda for the Extraordinary General Meeting Announced on August 16, 2021

Hørsholm, Denmark (August 18, 2021) – Allarity Therapeutics A/S (“Allarity” or the “Company”) yesterday published a notice to convene an Extraordinary General Meeting on August 31, 2021. The Company hereby further elaborates on the information provided in the notice.

Based on questions received from various shareholders with regard to the agenda item for the Extraordinary General Meeting to authorize the Board of Directors to purchase treasury shares in the market, Allarity hereby announces that this authorization is solely requested as a preparatory step towards the contemplated Recapitalization Share Exchange and a move to a listing on the Nasdaq Stock Market (New York, U.S.) as previously announced on May 21, 2021.

It is currently expected that the Recapitalization Share Exchange and listing in the U.S., if approved by the shareholders at another Extraordinary General Meeting to be held after our registration statement is filed and declared effective by the U.S. Securities and Exchange Commission (“SEC”), will include a share buy-back program as one method for shareholders to exchange shares in Allarity Therapeutics A/S against payment in shares in the U.S. entity to be listed.

Similarly, the agenda item for the Extraordinary General Meeting, intended to authorize the Board of Directors to issue a special dividend (agenda item no. 4), is also solely requested as a preparatory step towards the contemplated Recapitalization Share Exchange and move to a listing on the Nasdaq Stock Market in the U.S. It is currently expected that the Recapitalization Share Exchange and listing in the U.S., if approved by the shareholders at another Extraordinary General Meeting to be held after our registration statement is filed and declared effective by the SEC, may include a special dividend as another method for shareholders who do not voluntarily participate in the share buy-back program to receive their allocated ownership in the U.S. entity to be listed.

THE COMPANY IS NOT SOLICITING YOUR APPROVAL OF THE RECAPITALIZATION SHARE EXCHANGE AT THE EXTRAORDINARY GENERAL MEETING ON AUGUST 31, 2021. YOU WILL RECEIVE ANOTHER NOTICE TO CONVOKE AN EXTRAORDINARY GENERAL MEETING TO APPROVE THE CONTEMPLATED RECAPITALIZATION SHARE EXCHANGE AFTER WE FILE OUR REGISTRATION STATEMENT WITH THE SEC AND THE REGISTRATION STATEMENT IS DECLARED EFFECTIVE. AT THAT TIME YOU WILL ALSO RECEIVE AN INFORMATION STATEMENT/PROSPECTUS THAT WILL INCLUDE IMPORTANT INFORMATION ABOUT THE RECAPITALIZATION SHARE EXCHANGE THAT YOU SHOULD CAREFULLY REVIEW BEFORE VOTING TO APPROVE THE RECAPITALIZATION SHARE EXCHANGE AND RELATED TRANSACTIONS.

Both the share buy-back program and special dividend as methods that could be used in completing the Recapitalization Share Exchange were disclosed in the press release of May 21, 2021, that stated: “The Allarity US Inc. common stock issued in exchange for the Company’s net assets will, as soon as practically possible, be

4846-1944-0374.1

distributed to the Company's shareholders either by i) special dividend, ii) share exchange, or iii) liquidation proceeds, and thereafter the Company will be liquidated and dissolved."

About the Drug Response Predictor – DRP[®] Companion Diagnostic

Allarity uses its drug specific DRP[®] to select those patients who, by the genetic signature of their cancer, are found to have a high likelihood of responding to the specific drug. By screening patients before treatment, the response rate can be significantly increased. The DRP[®] method builds on the comparison of sensitive vs. resistant human cancer cell lines, including genomic information from cell lines combined with clinical tumor biology and prior clinical trial outcomes. DRP[®] is based on messenger RNA from the patient's biopsies. DRP[®] has proven its ability to provide a statistically significant prediction of the clinical outcome from drug treatment in cancer patients in nearly 40 clinical studies that were examined, including an ongoing, prospective Phase 2 trial. The DRP[®] platform can be used in all cancer types and is patented for more than 70 anti-cancer drugs.
