

Technip Energies awarded a large authorization by Commonwealth LNG for key equipment purchase orders

Technip Energies (PARIS:TE) has received a large⁽¹⁾ authorization from Commonwealth LNG which includes the issuance of purchase orders for the key equipment needed for its 9.5 Mtpa⁽²⁾ liquefied natural gas (LNG) facility in Cameron Parish, Louisiana, USA.

This authorization is part of the engineering, procurement, and construction (EPC) contract previously signed with Commonwealth LNG, and marks a significant milestone towards Commonwealth LNG's final investment decision (FID), anticipated in the first quarter of 2026.

The purchase orders cover long lead time equipment needed to facilitate the accelerated construction features of Commonwealth LNG's modular approach. They include orders with industry leaders such as Baker Hughes, for six mixed-refrigerant compressors driven by LM9000 gas turbines; Honeywell, to supply six main cryogenic heat exchangers; and Solar Turbines, providing four Titan 350 gas turbine-generators.

Arnaud Pieton, CEO of Technip Energies, commented: *"This award for critical equipment purchase orders marks another significant milestone in advancing the Commonwealth LNG project toward its final investment decision. This progress reflects our strong collaboration with Commonwealth LNG and a shared commitment to delivering a world-class modular LNG facility, enhancing energy security while addressing growing global demand for gas and LNG. Technip Energies continues to leverage its leadership in modular solutions to deliver transformative energy projects."*

David Lawler, CEO of Caturus, said: *"This significant capital investment in the Commonwealth LNG platform is a key milestone, along with the financing process, which is well underway, and illustrates our level of commitment to developing this global-scale LNG project. The Commonwealth project is a crucial component of Caturus' wellhead-to-water strategy, and this is another important step toward building the nation's leading independent integrated natural gas company."*

The Commonwealth LNG project, with a capacity of 9.5 million Mtpa, is designed with a modular construction approach. It will consist of six identical liquefaction trains using Technip Energies' SnapLNG by T.EN™ modular and scalable solution. By leveraging a single design replicated across all six trains, SnapLNG by T.EN™ enables schedule acceleration and cost optimization, while offering greater predictability and certainty at scale.

(1) A "large" award for Technip Energies is an award representing between €250 million and €500 million of revenue. This order intake will be recorded in the Project Delivery segment's backlog in Q4 2025.

(2) Mtpa: million tons per annum

About Technip Energies

Technip Energies is a global technology and engineering powerhouse. With leadership positions in LNG, hydrogen, ethylene, sustainable chemistry, and CO₂ management, we are contributing to the development of critical markets such as energy, energy derivatives, decarbonization, and circularity. Our complementary business segments, Technology, Products and Services (TPS) and Project Delivery, turn innovation into scalable and industrial reality.

Through collaboration and excellence in execution, our 17,000+ employees across 34 countries are fully committed to bridging prosperity with sustainability for a world designed to last.

Technip Energies generated revenues of €6.9 billion in 2024 and is listed on Euronext Paris. The Company also has American Depositary Receipts trading over the counter.

Important Information for Investors and Securityholders

Forward-Looking Statements

This press release contains forward-looking statements that reflect Technip Energies' (the "Company") intentions, beliefs or current expectations and projections about the Company's future results of operations, anticipated revenues, earnings, cashflows, financial condition, liquidity, performance, prospects, anticipated growth, strategies and opportunities and the markets in which the Company operates. Forward-looking statements are often identified by the words "believe", "expect", "anticipate", "plan", "intend", "foresee", "should", "would", "could", "may", "estimate", "outlook", and similar expressions, including the negative thereof. The absence of these words, however, does not mean that the statements are not forward-looking. These forward-looking statements are based on the Company's current expectations, beliefs and assumptions concerning future developments and business conditions and their potential effect on the Company. While the Company believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting the Company will be those that the Company anticipates.

All of the Company's forward-looking statements involve risks and uncertainties, some of which are significant or beyond the Company's control, and assumptions that could cause actual results to differ materially from the Company's historical experience and the Company's present expectations or projections. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those set forth in the forward-looking statements.

For information regarding known material factors that could cause actual results to differ from projected results, please see the Company's risk factors set forth in the Company's 2024 Annual Financial Report filed on March 10, 2025, with the Dutch Autoriteit Financiële Markten (AFM) and the French Autorité des Marchés Financiers (AMF) and in the Company's 2025 Half-Year Report filed on July 31, 2025 with the AFM and the AMF, which include a discussion of factors that could affect the Company's future performance and the markets in which the Company operates.

Forward-looking statements involve inherent risks and uncertainties and speak only as of the date they are made. The Company undertakes no duty to and will not necessarily update any of the forward-looking statements in light of new information or future events, except to the extent required by applicable law.
