

Uppsala 21 February 2019

PRESS RELEASE

AroCell AB (publ) Year-End Report 2018

Word from the CEO

"2018 has been an exciting year for AroCell with several major events. In April, AroCell signed a global non-exclusive license agreement with F. Hoffmann-La Roche Ltd (Roche). Roche is the market leader in diagnostics and the diagnostics part of the company has sales of just over SEK 100 billion and a global market share of around 20%. The license agreement gives Roche global sales rights for which AroCell receives royalties from future sales. Through the license agreement and the future cooperation with Roche, AroCell has very good prospects of making TK1 a standard biomarker in diagnostics and treatment primarily on analysis platforms intended for larger central laboratories."

Michael Brobjer, CEO

Significant events during the reporting period 1 October – 31 December

- AroCell signed a distribution agreement with the French company Eurobio Scientific, for distribution of AroCell TK 210 ELISA in France and Switzerland
- Michael Brobjer started as CEO on December 8, 2018
- Anders Hultman started as CFO on December 1, 2018
- AroCell's Chief Scientific Officer, Professor Staffan Eriksson, presented preliminary results from the U-CAN TK1 lymphoma study at the International Society of Oncology Biomarkers (ISOBM) in Hamburg. The preliminary results suggest that TK 210 ELISA may be used for monitoring the effect of therapy of DLBCL patients under rituximab + CHOP treatment, and for determination of overall survival rate
- AroCell presented a poster at ISOBM in Hamburg Demonstrating Enhanced Diagnostic Value When Using AroCell's Proprietary Sample Preparation Method
- The U.S. Patent and Trademark Office granted AroCell's patent US 10,100,128 titled "Monoclonal Anti-TK1 Antibodies"

Significant events after the reporting period

- AroCell launched a new website. The goal with the new website is to facilitate for customers, business partners and investors to find relevant information about AroCell.
- AroCell signed a distribution agreement with the Beijing based company Gongyingshi for the promotion and distribution of the AroCell TK 210™ ELISA in China.

About AroCell

AroCell AB (AROC) is a Swedish company that develops standardized modern blood tests to support the prognosis and follow up of cancer patients. AroCell's new technology is based on patented methods to measure Thymidine Kinase 1 (TK1) protein levels in a blood sample. The TK 210™ ELISA test provides valuable information mainly about the condition of cancer patients. This may help clinicians to optimize treatment strategies and estimate the risk of recurrence of tumor disease during the monitoring of the disease. AroCell (AROC) is listed at Nasdaq First North with Redeye AB as Certified Adviser: Certifiedadviser@redeye.se, +46 (0)8 121 576 90. For more information; www.arocell.com
