

Atos named on CDP 'A List' for leading effort against climate change

Paris, January 20, 2020 – Atos, a global leader in digital transformation, has been commended for its climate action this year, achieving a place on global environmental impact non-profit CDP's prestigious 'A List' for climate change, based on the company's climate reporting in 2019.

Atos was recognized for its actions to cut emissions, mitigate climate risks and develop the low-carbon economy, based on the data submitted by the company through CDP's 2019 climate change questionnaire. Atos is one of a small number of high-performing companies out of thousands that were scored.

CDP's annual environmental disclosure and scoring process is widely recognized as the gold standard of corporate environmental transparency.

A detailed and independent methodology is used by CDP to assess these companies, allocating a score of A to D- based on the comprehensiveness of disclosure, awareness and management of environmental risks and demonstration of best practices associated with environmental leadership, such as setting ambitious and meaningful targets.

Elie Girard, CEO of Atos, said – *"Atos is recognized by CDP for the seventh year running for its effort to combat climate change. This recognition reflects our active engagement towards carbon neutral IT. We believe that as a global leader in digital transformation, our role is also to help our customers to better assess the impact of IT systems on climate, and deploy digital solutions powering a low carbon economy."*

Paul Simpson, CEO of CDP, said: *"Congratulations to the companies that achieved a position on CDP's A List this year, for leading in environmental performance and transparency. The scale of the business risks from the climate emergency, deforestation and water insecurity are vast – as are the opportunities from addressing them – and it's clear the private sector has a vital role to play at this critical time. The A List companies are leading the market in corporate sustainability, tackling environmental risks and setting themselves up to thrive in tomorrow's economy."*

In 2019, Atos was also recognized as Industry leader by other sustainability ratings companies such as [EcoVadis and the DJSI \(Dow Jones Sustainability Index\)](#).

The Climate Change A List is published by CDP each year, alongside the A Lists for leadership on protecting forests and water security.

The full list of companies that made this year's CDP Climate Change A List is available here, along with other publicly available company scores:

About CDP

CDP is a global non-profit that drives companies and governments to reduce their greenhouse gas emissions, safeguard water resources and protect forests. Voted number one climate research provider by investors and working with institutional investors with assets of US\$96 trillion, we leverage investor and buyer power to motivate companies to disclose and manage their environmental impacts. Over 8,400 companies with over 50% of global market capitalization disclosed environmental data through CDP in 2019. This is in addition to the over 920 cities, states and regions who disclosed, making CDP's platform one of the richest sources of information globally on how companies and governments are driving environmental change. CDP is a founding member of the We Mean Business Coalition. Visit <https://cdp.net/en> or follow us @CDP to find out more.
