TOTAL GROUP AUM (GBP)

- Total AUM of the Group as at 31 December 2023 of £3.01 billion, of which £2.44 billion is held on the balance sheet in relation to the Group's ETPs issued by XBT Provider and CoinShares Digital Securities Limited. The remaining amount of £0.57 billion is attributable to the BLOCK index which is not included on the balance sheet as while we decide the index constituents and their weighting within the index, the ETF and mutual funds that replicate the index are provided by Invesco;
- The AUM figure has shown a significant increase since the end of 2022 of 109% due to price recovery during 2023, further helped by net inflows into CoinShares Physical products.
- Fluctuations in the Group's AUM, regardless of whether it be assets on or off-balance sheet result in fluctuations in management fee revenues. Fluctuations do not impact the Group's equity in a material way as the on-balance sheet assets are held to hedge against corresponding liabilities arising from the issuance of the Group's ETPs.

Key Events During the Quarter

- Share buy-back program As part of the Group's ongoing share buy-back program, 299,074
 shares were repurchased over the quarter, for total consideration of SEK 12,239,115 (£942,412);
- Valkyrie option As announced on 16 November 2023, CoinShares secured an exclusive option to acquire Valkyrie Funds LLC, a U.S. digital asset manager's investment advisory business specialising in actively managed cryptocurrency exchange traded funds, from Valkyrie Investments Inc.

Key Events Following Quarter End

- US Spot Bitcoin ETF approval On 10 January 2024, the SEC approved the first U.S. listed exchange traded funds to track bitcoin, with a total of 11 applications within the first cohort of approvals, inclusive of Valkyrie;
- Valkyrie option exercise On 12 January 2024, CoinShares announced it had exercised the
 option to acquire Valkyrie Funds LLC, and that the acquisition was pending the completion of
 satisfactory due diligence, the finalisation of necessary legal agreements and final Company
 board approval.
- Major fee reduction for CoinShares Physical Bitcoin On 25 January 2024 the Group announced a reduction in the management fees for its CoinShares Physical Bitcoin product. This move, effective from 1 February 2024, significantly decreased the management fee from 0.98% p.a. 0.35% p.a.
- Staking rewards on CoinShares Physical Ethereum On 1 February 2024 the Group announced that it has implemented a 1.25% p.a. Staking Reward in its flagship Physical Ethereum ETP, effective 1 February 2024, the latest move in a longer-term strategic drive to lower costs for European investors looking to enter the digital asset market.

Dividend Policy

The board of directors has adopted an amended dividend policy. While we remain committed to growth, we also wish to reward our shareholders for their trust and support.

The policy stipulates that the annual dividend payment will be between 20% and 40% of the Group's annual total comprehensive income, excluding currency translation differences.

The annual dividend payment will be made payable in SEK in four quarterly instalments via the Euroclear Sweden settlement system, subject to an assessment by the Board of the financial health and cash requirements of the Group prior to each payment being made.

CoinShares maintains a variety of strong banking relationships globally, however the ability to pay a dividend remains subject to the successful establishment of the requisite Swedish banking relationship to facilitate payment through Euroclear. A further update will be made in due course.

Q4 2023 MESSAGE FROM THE CEO

We continued to execute our strategy and delivered combined revenue, gains and income of £33.3 million in Q4. Our focus on profitability has led to adjusted EBITDA of £25.7 million for the quarter, at a margin of 77%.

Reflecting on the final quarter of 2023 and the beginning of 2024, it is clear we are witnessing a momentous shift in the digital asset industry. The SEC's approval of spot Bitcoin ETFs represents a significant milestone, reinforcing our long-held belief in the institutionalisation of Bitcoin and potentially other digital assets. This development, acknowledged by leading asset managers like BlackRock, Fidelity, Invesco and Franklin Templeton underlines the intrinsic value of Bitcoin in the global financial landscape. Larry Fink, CEO of BlackRock, aptly compared Bitcoin to gold, highlighting its role as a protective asset class and a stepping stone towards asset tokenization. A sentiment we share and have advocated for a long time.

Since the launch of Europe's first digital asset ETP in 2015, XBT Provider, we have observed the European crypto ETP category flourish, reaching over \$8.8 billion at the end of 2023. However, the journey towards broader acceptance of regulated crypto products has been gradual, particularly in regions where traditional financial institutions have been reticent such as Southern Europe and former EU member, the United Kingdom. The SEC's recent decision is poised to catalyse a shift, encouraging European institutions to reconsider their stance on crypto exposure. This is evident in countries like France, where we're seeing a growing openness to offering crypto exposure through regulated products such as ETPs.

Our strategy, refined at the end of 2022, positions CoinShares at the nexus of two pivotal trends: the securitisation of digital assets and the tokenization of real-world assets. This strategy reflects our commitment to transforming digital assets from decentralised systems into regulated, traditional financial instruments, effectively bridging two distinct financial ecosystems. Our ambition extends beyond maintaining our status as the leading European investment company in digital assets; we are determined to become a global player. This ambition underpinned our decision to exercise the option to acquire Valkyrie Funds, a strategic move we anticipate finalising in early Q2 2024. This acquisition, following our expansion into the American market with the launch of Hedge Fund Solutions in September, would mark a significant step in our global growth strategy.

Valkyrie and CoinShares share a pioneering spirit and a commitment to innovation in the digital asset space. Valkyrie's entry into the US spot Bitcoin ETF market, their traditional finance acumen and their unparalleled understanding of the decentralised finance landscape aligns perfectly with our ambition and expertise. This acquisition will represent a new era for CoinShares, allowing us to offer a comprehensive investment experience across Europe and the US, with a diverse and complete suite of products. Our existing European portfolio, including passive products issued by XBT Provider and CoinShares Physical, will be enhanced by the inclusion of the Valkyrie Bitcoin Fund (BRRR) listed on Nasdaq in the US. In terms of digital asset industry exposure, our CoinShares Blockchain Global Equity Index (Block Index) will be complemented by the Valkyrie Bitcoin Miners ETF (WGMI), an actively managed ETF focusing on public companies in the Bitcoin mining industry and best ETF performer in 2023 in the US (Nasdaq). Additionally, this partnership will enable us to leverage our expertise in quantitative trading within Valkyrie's actively managed ETF platform, offering a dynamic and comprehensive investment approach for our clients.

In the pursuit of brand cohesion and to amplify our corporate brand's strength, we plan to rebrand Valkyrie under the CoinShares umbrella. This strategic move is not merely a change in name; it's a deliberate step towards unifying our product portfolio, enhancing brand recognition among American investors, and fostering trust. We believe that this rebranding will not only solidify our position in the market but also project positive value onto CoinShares stock.

Performance

We started 2023 positively following the turbulence of 2022, and have consistently reported strong EBITDA throughout the year, with Q4 being no exception. While the market recovery has played a large part in this performance, The Group's individual business units have been performing well in their own right.

The Group's Asset Management platform generated management fees in Q4 of £13.0 million, driven by both digital asset prices and solid net flow to close the year. The inflow we have seen is driven by CoinShares Physical, and the Q4 figure of \$159.4 million has brought the total for the year for this platform to \$213.2 million. CoinShares Physical product suite is increasingly establishing itself as a key contributor to this performance alongside our legacy product XBT Provider. Closing Q4 AUM for CoinShares Physical was £567.3 million, and this now represents 19% of the Group's total AUM of £3.01 billion alongside XBT Provider and the Block Index. Speaking of the Block Index, it saw a very strong Q4, with the ETF returning 51%, which compares with 11.4% for the MSCI World and 11.7% for the S&P 500. The strong performance was led by the surge in the Bitcoin price, which spiked a rally in Bitcoin miners, positively impacting performance. The Block Index finished 2023 with £576.1 million in assets benchmarked to its strategy, making it the second largest product of its kind globally. Our expansion into the US market heralds an era of expanded opportunities for our Asset Management business, especially given the vast scale of the US market, which is 10 times larger than Europe, and the potential for allocations from both American and Asian investors to such products.

Capital Markets has also performed well in Q4, achieving topline performance of £12.7 million at a gross margin of 82%. Much of the performance has come from staking, further bolstered by trading gains from the strategies deployed within our Hedge Fund Solutions products and lending activities. The products that we launched in 2023 within our Hedge Fund Solutions are a clear testament to the proficiency and dedication of our trading and quantitative teams. In particular, our Bitcoin strategy has strongly outperformed its benchmark since its launch in August. As this track record further establishes itself in 2024, we expect it to attract significant inflow and generate further gains, allowing external investors to benefit from our strategies and the expertise of our team.

Looking at 2023 as a whole for Capital Markets, one of the Group's key goals at the outset of the year was to achieve greater stability within this business unit. The measures we have put in place have achieved this, with the gross margin for the year averaging out at 79%.

Finally, while our Principal Investments portfolio was marked down in Q3, the end of the year has seen some notable increases in some of our strategic holdings, namely 3iQ (full divestment) and SBG (partial divestment following a merger with another trust company). We are now starting to see some realisations within this portfolio which will bring in free cash that we are able to then deploy into our other business activities to generate further gains.

With adjusted EBITDA for the quarter amounting to £25.7 million, the full year figure stands at £56.9 million. This marks one of the Group's strongest ever annual performances (second only to 2021), and we hope to continue posting positive quarterly performances as we move into 2024.

Outlook for 2024

As we move into 2024, our focus is firmly set on consolidating our leadership in Europe and expanding our reach in the US market through the Valkyrie partnership by building a strong product platform. Simultaneously we are enhancing our Hedge Fund Solutions with a series of new strategies, designed to broaden our investment portfolio and cater to the evolving needs of our clients. In addition to these new strategies, we are leveraging our French AIFMD licence, CoinShares Asset Management, to extend our European outreach. Integral to our plan is a concentrated effort on distribution and marketing of our funds, particularly in the US, UK, and other regions where our products are eligible. The importance of distribution in these key markets cannot be overstated as it is a critical factor in raising Assets Under Management (AUM). A robust distribution network, combined with effective marketing initiatives will be pivotal in capturing market share and driving the growth of our fund offerings. In 2024, we will also continue to assess opportunities to realise gains within our Principal Investments portfolio should they arise. A focused divestment strategy is integral to our objective of maximising returns and reinforcing our financial position as we continue to innovate in the industry.

Our objective remains to establish CoinShares as a comprehensive one-stop shop for digital asset investment, providing a diverse and sophisticated range of options to investors. The journey so far has been both challenging and rewarding and we are poised to continue on this path of innovation and leadership. As the digital asset industry matures, CoinShares remains dedicated to delivering exceptional value and cutting-edge investment opportunities to our clients and shareholders. We look forward to navigating these exciting times and capitalising on the opportunities.

• Q4 marks a fourth consecutive quarter of strong profitability and continued solid performance in the core business units of the Group.

- Digital asset prices and strong inflows have bolstered the Group's Asset Management fees, while the core activities of the Capital Markets team have continued to show strength in their diversity. Additionally, we have seen some gains within our Principal Investment portfolio due to a number of positive developments towards the end of the calendar year.
- Combined revenue, gains and other income for Q4 stands at £33.3 million (Q4 2022: £14.3 million).
- Adjusted EBITDA for the quarter amounted to £25.7 million (Q4 2022: £23.8 million loss due to a significant provision in respect of FTX and a goodwill impairment in respect of the Group's consumer platform). This has brought the Adjusted EBITDA for the full year to £56.9 million, marking the second best year in the Group's history after 2021.
- Further analysis of both the Asset Management platform and the Capital Markets activities are included on pages 11 and 12 respectively. Additionally, a breakdown of the core holdings within the Group's Principal Investments portfolio has been included on page 13.
- The level of administrative expenses and direct costs within the business have remained consistent throughout the year and comparable to 2022.
- Total Comprehensive Income for the quarter of £15.3 million has been impacted on consolidation due to translation fx arising from USD/ GBP fluctuations, but still remains positive and brings our full year performance to a figure of £37.9 million (FY 2022: £2.9 million).

- Total management fees (inclusive of staking fees on CSDS products) of £13.0 million (Q4 2022: £8.5 million) mark the strongest quarter of 2023 for the Asset Management platform, bringing the full year topline performance to £43.4 million (FY 2022: £50.1 million). This performance remains predominantly driven by XBT Provider, although the continued growth of CSDS is continuing to represent a larger portion of overall management fees over time.
- The cost base of the business unit remains stable, as can be seen from the consistent gross profit margins being achieved.
- In terms of flows, the CoinShares Physical product suite generated net inflows over Q4 of \$159.4 million (Q4 2022: \$15.1 million), bringing total net inflow on CoinShares Physical for the year to \$213.2 million (2022: \$140.8 million).
- Over Q4, XBT Provider saw net outflow of \$37.4 million (Q4 2022: outflow of \$58.8 million) bringing total net outflow for the year to \$125.0 million (2022: outflow of \$447.4 million).
- The overall net flow seen on both of these product suites, combined with price movements in the quarter have resulted in a notable increase in AUM for the year of £1.57 billion (109%). Together with Group's Block Index, the closing AUM for 2023 stands at £3.01 billion compared to £1.44 billion at the start of the year.
- This closing AUM of £3.01 billion is comprised of XBT Provider (62%), CSDS (19%) and the Block Index (19%). The pattern previously noted of CSDS products representing an increasing portion of the Group's AUM continues to be evident. As at the start of the year the CSDS product suite comprised just 9% of overall AUM.
- The flows for both ETP product suites and those of our key competitors is published in our Weekly Digital Funds Flows
 Report available on our website. Additionally, the level of AUM held within each of our products is disclosed and subject to
 daily attestation by LedgerLens, an independent firm's solution embedded into our website designed to provide additional
 transparency and comfort to all our stakeholders.

- The performance of the Group's Capital Market business unit in Q4 and 2023 as a whole demonstrates the benefit that diversification of activities can bring, resulting in total other income/gains for the quarter £12.7 million (Q4 2022: £5.2 million).
- The business unit's performance has resulted in a solid gross profit margin for the quarter which averages out for the year to date at 74%, bringing a level of stability to the business unit following numerous internal improvements and an enhanced approach to risk.
- The main driver for the business unit for both the quarter and the year to date is our staking income. Up significantly on the previous quarter's result of £4.8 million, Q4 income of £8.0 million has brought the total performance to the year to £21.9 million (2022: £13.9 million).
- Liquidity provisioning of £0.4 million arising from supporting the Group's ETPs are comparable with Q4 2022 (£0.5 million) due to levels of flow on XBT Provider remaining muted over the quarter.
- Delta Neutral Trading Strategies of £0.9 million (Q4 2023: £3.0 million) remain driven by the same activities during the first half of the year, taking advantage of opportunities arising from trading CME futures. Additionally, the trading activities of the active funds are also beginning to contribute gains which are manifesting currently within Capital Markets (these will be presented separately during 2024).
- · Fixed income activities comprise both digital asset lending and yield on broker balances and treasury bills.

• The Principal Investments portfolio has generated £7.5 million in gains over Q4, split between our equity holdings and proprietary digital assets holdings, reversing the year to date losses we had seen as at the end of September.

• Digital asset price recovery has had a direct impact on the Group's crypto holdings and has also brought with it interest in certain of our equity holdings, resulting in a number of changes to our carrying values, as shown in the table below.

- Japanese brokerage firm Monex announced at the end of 2023 that it is acquiring a majority stake in 3iQ. The majority of the Group's holding will be disposed of upon closing of this transaction which is expected in Q1 2024. The gain of £2.5 million is recognised to bring the Group's holding in 3iQ to the agreed transaction price.
- Choice/Kingdom Trust, in which SBG holds a material stake, is in the final stages of completing a transaction which will result in a residual holding in a new investment for the Group, which has been valued at the agreed transaction price. This has also triggered a cash payment which is due to the Group, and the disposal of £1.5m represents a reclassification to receivables, with the first tranche of this payment expected in February 2024.
- FlowBank losses for the year are predominantly driven by the prior year losses that were recognised by FlowBank mid 2023 which
 had an impact on the Group's carrying value of this associate. The Group has also elected to reverse in 2023 the cumulative fx gain
 seen on the investment which arose from the investment being considered as a CHF holding, and therefore impacted by CHF/GBP
 fluctuations. We are now classing the initial investment in GBP to mitigate the likelihood of further fx movements between CHF/GBP
 impacting the initial cost in GBP terms.
- Previously, a discount to the price of the last fundraise had been applied to the carrying value of Komainu. Due to market recovery and the progress made at the digital asset custodian we have elected to unwind this discount resulting in a gain of £3.7 million for the year. Progress in the second half of the year included the launch of Komainu Connect, expansion of its relationships with staking providers and regulatory approvals from the FCA (UK) and VARA (Dubai).

OTHER INFORMATION

Basis of Preparation

The condensed consolidated interim financial information included on pages 14 to 19 within this report has been prepared in accordance with IAS 34, "interim financial reporting".

New and revised IFRS Standards in issue

IFRS Standards that have been issued and adopted by the UK Endorsement Board effective from 1 January 2023:

- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12)
- Definition of Accounting Estimates (Amendments to IAS 8)
- Disclosure of Accounting policies and Classification of Liabilities as Current or Non-current (Amendments to IAS 1)
- Amendments to IFRS 17 Insurance Contracts

Buy-back of Shares

During the period, the Company undertook a purchase of its own shares already in issue. The consideration paid, including any directly attributable incremental costs, is deducted from equity attributable to the owners as treasury shares until the shares are cancelled or reissued.

Digital Asset Accounting Treatment

Digital assets are classified as intangible assets under IFRS, the accounting standard under which the Group's financial statements are prepared. They are accounted for as intangible assets held at fair value through the revaluation model. As such, fair value gains on the digital asset holdings of the Group are recognised within other comprehensive income (unless reversing previously recognised losses), and fair value losses recognised through the statement of comprehensive income (unless reversing previously recognised gains). Please refer to the line items titled "fair value gain/(loss) on digital assets" within either the statement of comprehensive income, or within other comprehensive income.

Conversely, any movement in the obligation arising from the issuance of the Group's XBT Provider exchange traded products (which is hedged by the digital asset holdings of the Group) is recognised as income or expense within the statement of comprehensive income. These movements can result in a profit after tax figure that does not take into account any gains or losses on the digital asset holdings of the Group recognised through other comprehensive income. In periods that have experienced an increase in digital asset prices and therefore rises in the ETP related obligations, this can manifest as a significant loss after tax.

Therefore, it is the opinion of management that the profit/loss after tax figure presented in accordance with IFRS should be considered in conjunction with the Group's Adjusted EBITDA and total comprehensive income to enhance the reader's understanding of performance over a given period.

The Adjusted EBITDA calculation of the Group takes all fair value gains/losses on digital assets through the Group's statement of comprehensive income and are designed to provide a clear view of the performance of the Group.

Parent Company

Under Article 105(11) of the Companies (Jersey) Law 1991, the directors of a holding company need not prepare separate financial statements. Accordingly, these condensed interim financial statements present the consolidated results of the Group, headed by the Company.

Seasonal Variations

The Group's activities and financial performance are not impacted by seasonality. The activities of the Group are impacted by ongoing developments within the digital asset ecosystem, including (but not limited to) (i) digital asset price fluctuations, (ii) regulatory matters arising in a variety of jurisdictions, and (iii) competing products and services.

Personnel

The number of employees as at the reporting date was 82 (31 December 2022: 88).

Operating Segments

The Group comprises three core operating segments from which it earns both revenues/gains and incurs expenses, being:

- Asset Management
- Capital Markets
- Principal Investments

During 2022, the Group also included a Business to Consumer segment, although this has now ceased and is not included with the 2023 operating segments analysis.

The accounting policies of the operating segments classify the fair value gains generated from digital assets classified as profit and loss movements rather than movements through other comprehensive income. This treatment is consistent with that of the Group's Adjusted EBITDA calculation.

Additionally, administrative expenses as per the Statement of Comprehensive Income are split within the operating segments note between direct costs and other administrative expenses.

The Group does not monitor its assets and liabilities split by operating segment, but rather on a consolidated basis. This is the measure reported to the Group's Chief Executive, being the Group's chief operating decision maker, for the assessment of segment performance.

Operating segment performance is included on page 19 of this report.

The (loss)/gain on ETP liabilities represents the fair value movement in the intercompany collateral obligation of the certificates issued by XBT Provider and CoinShares Digital Securities Limited and is recognised through profit and loss.

Gain on financial instruments settled through digital assets represents the proceeds received from financial instruments that are settled in the underlying digital asset and is recognised through profit and loss.

Loss on other financial instruments represents the proceeds received from financial instruments settled in cash and is recognised through profit and loss.

Fair value gain/(loss) on digital assets represents the fair value movement in digital assets, held principally as collateral for the Group's financial obligations and is recognised through other comprehensive income or profit and loss, in accordance with the treatment outlined on page 20.

Level 1 and 2 valuations and inputs

The finance department performs monthly valuations of the Group's investments that are classified as Level 1 and 2 within the fair value hierarchy, utilising market data (investments in listed equities) and observable inputs (CoinShares Fund II - carried interest and investments held at cost or price of recent investment that may subsequently be reclassified to Level 3). Discussions of valuation processes and results are held between the Chief Financial Officer, Audit & Risk Committee and the Board once every quarter, in line with the Group's reporting periods.

Level 3 valuations and inputs

The finance department performs quarterly valuations of the Group's investments that are classified as Level 3 within the fair value hierarchy, utilising a range of observable and unobservable inputs. Discussions of valuation processes and results are held between the Chief Financial Officer, Audit & Risk Committee and the Board once every quarter, in line with the Group's reporting periods.

The main Level 3 inputs used by the Group are derived and evaluated as follows:

- price of recent investment;
- earnings multiples, estimated based on market information for similar types of companies;
- · AUM multiples, estimated based on market information for similar types of companies; and
- percentage ownership of net asset value of the investee company.
