

Uppsala 20 March 2019

PRESS RELEASE

New AroCell patent granted by the EPO

AroCell announced today that the patent nr. 3083698 and titled” Monoclonal Anti-TK1 Antibodies” is granted by European Patent Office and will be published on April 10, 2019

The patent is referring to AroCell’s proprietary technology of specific and sensitive immunological measurement of Thymidine Kinase 1 in serum. More specifically, the monoclonal antibody, XPA210-Ar1, is covered in the patent

“We are delighted that the EPO has granted this patent. This reinforce AroCell’s position and increases our attractiveness as a business partner. We will continue to develop our portfolio of proprietary assets to further expand its business opportunities.” Says Michael Brobjer, CEO AroCell.

About AroCell

AroCell AB (AROC) is a Swedish company that develops standardized modern blood tests to support the prognosis and follow up of cancer patients. AroCell's new technology is based on patented methods to measure Thymidine Kinase 1 (TK1) protein levels in a blood sample. The TK 210™ ELISA test provides valuable information mainly about the condition of cancer patients. This may help clinicians to optimize treatment strategies and estimate the risk of recurrence of tumor disease during the monitoring of the disease. AroCell (AROC) is listed at Nasdaq First North with Redeye AB as Certified Adviser: Certifiedadviser@redeye.se, +46 (0)8 121 576 90. For more information; www.arocell.com
