VINCI Autoroutes and VINCI Airports traffic in February 2025

I- Change in VINCI Autoroutes' intercity networks traffic

	February % change 2025/2024	YTD at the end of February (2 months) % change 2025/2024
VINCI Autoroutes	+2.0%	+5.6%
Light vehicles	+3.1%	+6.3%
Heavy vehicles	-3.1%	+2.4%

In February, traffic across all vehicle categories rose thanks to a favourable basis for comparison. Traffic remained indeed disrupted by farmers' blockades in February 2024.¹ There was otherwise a negative calendar effect, as 2024 is a leap year: adjusted for this, traffic for heavy vehicle would have risen slightly.

Overall since the beginning of the year, it has risen by 5.6%.

¹ At the beginning of the month on almost the entire network and at the end of the month on several stretches in the south-west.

II- Change in VINCI Airports passenger traffic¹
