

Spineway wins new approvals in Vietnam and registers initial orders

The Spineway Group, a specialist in innovative implants for the treatment of severe spine disorders, announces that it has obtained approvals for its ACIFBOX, VEOS, KAPHORN and TWIN PEAKS ranges in Vietnam. Following this approval, initial orders have been placed, confirming the growing interest in Spineway products in the region.

These approvals will enable Spineway to meet the needs of Vietnamese surgeons by offering high-performance solutions adapted to local requirements. They will also allow the Group to strengthen its presence and market share in this country, where its ESP prostheses have already been on the market for several years.

To help drive this momentum, the Group lent its support to its local distributors during the first product presentations at the 23rd Vietnam Neurosurgery Conference (VNC 2024), held in Ho Chi Minh City on December 6 and 7. This event brought together the major players in the field of spine surgery in Southeast Asia and provided an ideal platform to showcase Spineway's innovations while strengthening ties with healthcare professionals in Asia.

Spineway continues to consolidate its presence in Asia, demonstrating its ability to meet the expectations of international surgeons. These advances illustrate and confirm the Group's strategy to position itself as a benchmark in spine surgery.
