

SOITEC'S ENGINEERED SUBSTRATES FOR AUTOMOTIVE

- Soitec to participate today in the Evercore ISI E-Mobility & EV Supply Chain Conference
- New presentation available on the company's website highlighting Soitec's portfolio of engineered substrates for automotive markets and applications

Bernin (Grenoble), France, May 19th, 2020 – Soitec (Euronext Paris), a world leader in designing and manufacturing innovative semiconductor materials, today announced the availability on its website of a new presentation focused on engineered substrates for automotive markets and applications.

Dr. Bernard Aspar, Soitec's Global Business Units Executive Vice President, commented: ***"We are expanding our portfolio of engineered substrates to support the adoption of automotive megatrends where new vehicles are required to be connected, autonomous, shared and electric. We offer an extensive products portfolio, ranging from Power-SOI (powertrain, in-vehicle networking, audio amplifiers, battery management systems), FD-SOI (application and vision processors, microcontrollers) and RF-SOI (connectivity), while we continue to develop new engineered substrates such as Silicon Carbide Substrate (SiC) and Gallium Nitride (GaN) epiwafers to serve the inverter systems in electric vehicles."***

The presentation referred to is available from the investors section of Soitec's website:
