Re-imagining the workspace

- Attitudes towards work and the workplace have been radically impacted by the pandemic. This presents challenges but also opportunities for office building developers. RSHP's design aims to create a working environment that is integrated with the city, celebrates the office as an exciting place to come to, and is both healthy and flexible – able to capture and retain tenants over the long term.
- According to the architects, the design of the workplace has the power to achieve many things: • Foster a sense of belonging to an organization • Establish an identity for a tenant or tenant companies • Facilitate change management • Encourage collaboration • Harness the full potential of teamwork • Make work enjoyable • Contribute to productivity
- RSHP's design of Project, therefore, addresses all these challenges head-on. Their objective is to create a place of work that encourages accessibility and an architecture that makes the workplace attractive and inspiring.
