

PRESS RELEASE

CNH's 'A Sustainable Year' series spotlights sustainable production in Lecce

Basildon, July 8, 2024

In the third installment of CNH's 'A Sustainable Year' series learn more about how our first electric compact wheel loader started production this month at our Lecce plant in Italy.

The article explains how we redesigned every aspect of this new 3.7-ton machine, and how investment in more sustainable manufacturing processes is transforming operations at the plant. Lecce is home to CNH's largest photovoltaic power installation to date. This comprises 7,300 solar panels, with a peak power of 3.3 Megawatts (MW) at any one time, reducing CO₂ emissions by more than 1,200 tons per year – the equivalent of a petrol-powered car circumnavigating the world 125 times.

The site produces machines for CNH's CASE Construction Equipment and New Holland Construction brands with more than 200 models rolling off seven production lines, including a brand new one for the electric compact wheel loaders.
