Positive EBITDA on 4.564 TDKK

ÅRSREGNSKABSMEDDELSE 2019

ANNUAL REPORT 2019

Hovedaktiviteter

Enalyzer koncernen er en førende leverandør af løsninger til målinger og analyser af medarbejderes trivsel samt kunders og borgers holdninger til forskellige emner. Koncernen leverer disse løsninger i form af software- og konsulentprodukter.

Udviklingen i selskabets økonomiske aktiviteter og forhold

Jævnfør tidligere markedsmeddelelse har Enalyzer A/S med virkning for regnskabsåret 2019 ændret regnskabspraksis. Koncernens salg af software er tidligere indregnet i henhold til årsregnskabsloven ved levering. Fremover indregnes salg af software i henhold til årsregnskabsloven efter den internationale regnskabsstandard IFRS 15, hvor abonnementsbaserede indtægter fra software indregnes som en Software as a Service (SaaS) løsning. Disse indtægter indregnes lineært over kontraktperioden. Sammenligningstal for 2018 er ligeledes beregnet efter de nye principper. Fra årsregnskabet fremhæves følgende:

Enalyzer koncernens omsætning blev på t. DKK 23.637 i 2019 mod t.DKK 24.110 i 2018.

EBITDA var i 2019 på t.DKK 4.564 mod t.DKK 4.730 i 2018.

Resultat før skat i 2019 var på -491 t.DKK mod 375 t.DKK i 2018.

Selskabets/koncernens kortfristede gældsforpligtelser overstiger omsætningsaktiverne. Selskabets/koncernens likviditetsberedskab vurderes dog at være tilstrækkeligt til finansiering af det kommende års aktiviteter. Særligt bemærkes, at de kortfristede gældsforpligtelser indeholder t.DKK 10.961 periodeafgrænsningsposter, som udgøres af periodiseret fremtidig omsætning, der indtægtsføres over de kommende 1 – 3 regnskabsår. Der påhviler ingen tilbagebetalingspligt i forhold til disse indtægter.

Til trods for et mindre fald i omsætningen er det selskabets opfattelse, at Enalyzer med den fortsatte relativt store investering i forbedring af software platformen, har styrket konkurrenceevnen i det direkte salg af større software kontrakter og i online kanalen. Selvom Enalyzer har et stigende antal brugere globalt, leverer online forretningen dog stadig ikke et signifikant positivt bidrag til omsætningen, da hovedparten af brugere er på gratis abonnementer.

I 2019 har selskabet endvidere fremskyndet software funktionalitet, der understøtter at Enyzers konsulentforretning leverer en større andel af gennemførte projekter til kunder på den nye platform. Denne udvikling forventes at fortsætte i 2020. Langt hovedparten af denne funktionalitet har generisk karakter og vil således kunne benyttes af samtlige brugere.

Enalyzer Consulting gennemførte mange interessante projekter i året. Som tidligere år er der høj tilfredshed med gennemførte projekter og en stor anbefalingsvillighed. Enalyzer realiserede en Net Promoter Score (NPS) på 53. En NPS score over 50 anses i branchen som fremragende.

Til trods for et udemærket forretningsmæssigt udgangspunkt, anser bestyrelsen årets resultat som værende utilfredsstillende grundet et negativt resultat og svagt faldende omsætning.

Betydningsfulde hændelser indtruffet efter regnskabsårets afslutning

Efter regnskabsårets afslutning er der sket udbrud af sygdommen COVID-19 som følge af spredningen af Coronavirus. Det vurderes at alle koncernens markeder kan blive påvirket af udbruddet. Om end det er i et tidligt stadie at vurdere effekterne heraf, er det ledelsens vurdering, at udbruddet kan resultere i betydelige økonomiske konsekvenser for kommende regnskabsår.

Der er ikke indtruffet andre begivenheder efter regnskabsårets afslutning, som vil kunne forrykke selskabets finansielle stilling væsentligt.

Selskabets forventede udvikling

Enalyzer koncernen forventer overskudsgivende drift i 2020

Main activities

The Analyzer Group is a leading provider of solutions for measurement and analysis of employee and customer satisfaction, as well as citizen views on various topics. Analyzer Group provides these solutions in the form of software and consulting products.

Development in the company's financial activities and conditions

According to previous market announcement, Analyzer A / S has changed its accounting policies for the financial year 2019. The group's sale of software has previously been recognised on delivery according to the Danish Financial Statements Act (Årsregnskabsloven). In the future, the sale of software will be recognised according to the Financial Statements Act and the International Accounting Standard IFRS 15, where subscription-based revenue from software is considered as a Software as a Service (SaaS) solution. This revenue is recognised on a straight-line basis over the contract period.

The Analyzer Group's revenue was DKK 23,637 thousand in 2019 against DKK 24,110 thousand in 2018.

- EBITDA in 2019 was DKK 4,564 thousand against DKK 4.730 thousand in 2018.

- Profit before tax in 2019 was DKK -491 thousand against DKK 375 thousand in 2018.

The company's / group's current liabilities exceed current assets. However, the liquidity preparedness of the company / group is deemed sufficient to finance the activities of the coming year. In particular, it is noted that the current liabilities comprise DKK 10,961 thousand prepayments, which consist of accrued future revenue, which will be recognized over the next 1 - 3 financial years. There is no repayment obligation in relation to this income.

Despite a slight decline in revenue, the company believes that Analyzer, with its continued relatively large investment in improving the software platform, has strengthened its competitiveness in the direct sale of major software contracts and in the online channel. Although Analyzer has a growing number of users globally, the online business however still does not make a significant positive contribution to revenue, as the majority of users are on free subscriptions.

In 2019, the company has further accelerated software functionality that supports Analyzer's consulting business to deliver a larger proportion of completed projects to customers on the new platform. This development is expected to continue in 2020. The vast majority of this functionality is generic in nature and will thus be usable by all users.

Analyzer Consulting completed many interesting projects this year. As in previous years, there is high satisfaction with completed projects and a high level of willingness to recommend. Analyzer achieved a Net Promoter Score (NPS) of 53. An NPS score above 50 is considered excellent in the industry.

Despite a good business base, the Board of Directors considers the year's results unsatisfactory due to a negative result and slightly declining revenue.

Important events occurring after the reporting period

After the closure of the financial year 2019, the disease COVID-19 was erupted as a result of the spread of Coronavirus. It is estimated that all of the Group's markets may be affected by the outbreak. Although it is at an early stage to assess its effects, it is the management's assessment that the outbreak can result in significant financial consequences for future financial years.

No other events have occurred since the end of the financial year that could significantly affect the company's financial position.

The company's outlook

The Analyzer Group expects profitable operation in 2020.
