

News release from Vestas-American Wind Technology

Portland, 10 May 2019

Vestas secures 459 MW order from PacifiCorp

Vestas has received an order for 459 MW of V136-4.2 MW turbines operating in 4.3 MW power optimised mode from PacifiCorp, a subsidiary of Berkshire Hathaway Energy, for two wind projects, TB Flats I and II, located in Wyoming. Including previously purchased V110-2.0 MW turbines, the projects will have a combined capacity of 503 MW.

TB Flats I and II are part of PacifiCorp's Energy Vision 2020 initiative, a USD 3.1 billion investment to expand wind power via repowering existing projects, adding 1,150 MW of new wind resources by the end of 2020, and building a 140-mile transmission line segment in Wyoming to enable wind generation.

As part of Energy Vision 2020, Vestas and PacifiCorp previously partnered on repowering the Marengo and Marengo II wind projects in Washington, upgrading the site's existing V80-1.8 MW turbines with V100-2.0 MW turbines.

"We're pleased PacifiCorp has selected our V136-4.2 MW, operating in 4.3 MW power optimised mode for the TB Flats I and II projects," said Chris Brown, President of Vestas' sales and service division in the United States and Canada. *"With their Energy Vision 2020 initiative and commitment to expanding wind energy, PacifiCorp brings both the environmental and economic benefits of low-cost, competitive, and clean wind energy to their customers and communities."*

The order includes supply and commissioning of the turbines as well as a 12-year AOM 4000 service agreement, designed to ensure optimized performance of the project. Turbine delivery will begin in the second quarter of 2020, with commissioning scheduled for the fourth quarter of 2020.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 102 GW of wind turbines in 80 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 87 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 24,500 employees are bringing the world sustainable energy solutions to power a bright future.
