

Prospectus with Articles of Association

This prospectus has been prepared in accordance with the Norwegian Securities Fund Act and corresponding regulations. The objective of the prospectus is to provide investors with information so that they are able to make an informed assessment of the fund and the risk associated with investing in the fund. The fund's Articles of Association contain additional information and is regarded as an appendix to the prospectus.

Verdipapirfondet **Storebrand Global Solutions**

UCITS (equity fund) launch date 2012-10-01

Managed by Storebrand Asset Management AS | Org. No. 930 208 868 | a subsidiary of Storebrand ASA

Objective and Investment Policy

Storebrand Global Solutions is a fossil-free equity fund that aims to achieve a long-term excess return by investing in global equity markets, including emerging markets. The fund is actively managed and invests in sustainable companies that we believe are well positioned to solve the challenges related to the climate crisis. The fund is subject to additional criteria beyond the Storebrand standard, which means that it refrains from investing in companies that have more than 5 per cent of their revenues from: fossil fuels, weapons/war materials, tobacco, alcohol, gambling or pornography or companies with large fossil sources.

Derivatives may be used to ensure less expensive or more efficient management. The Fund's benchmark is MSCI All Countries Net. The benchmark index can be used as a benchmark to compare the return on the fund. The index can also be a source for choosing the fund's investments, but the fund's composition may deviate significantly from the index.

Risk and Reward Profile

The risk / return indicator shows the relationship between risk and return for the fund. A higher ranking on the scale means an opportunity for higher returns, but also a greater risk of losing money. The indicator is based on how the fund's value has changed over the past five years (benchmark index is used for funds with shorter history), and is not a sure indicator of future development. The lowest category, 1, cannot be considered completely risk-free. This fund is placed in risk class 5, but over time the fund can move both right and left on the scale. This is because the indicator is based on historical data, which gives no guarantee of future risk / return.

The value of the Fund's investments is affected, positively and negatively, by the daily developments in the markets in which the securities are traded (market risk). The indicator does not take into account particularly unusual events, such as devaluation, political changes or major unforeseen fluctuations in the securities markets. Several other types of risk can also affect the value of the fund without being fully reflected in the risk / return indicator.

Active Share classes

Share class	Currency	ISIN	Management Fee (p.a.)
A	NOK	NO0010657273	0,75%
N	NOK	NO0010817703	0,60%
A3	EUR	NO0010817711	0,75%
N3	EUR	NO0010817729	0,60 %
A4	USD	NO0010817737	0,75%
N4	USD	NO0010893167	0,60%
A5	DKK	NO0010841612	0,75%

Rights and duties of the unit holders

Each unit holder owns a notional share in the Fund that is equivalent to the holder's share of the total fund units issued. A unit holder does not have the right to demand the division or dissolution of the Fund. The unit holders have no liability with regard to the obligations of the mutual fund in excess of the deposits they have made. The operation of a mutual fund is conducted by a management company, which makes all arrangements concerning the fund. Amendments in the Articles of Association and merger of funds require 75% unitholders' approval and subsequent approval by regulatory authorities. Similar method is assumed by substantial changes to the fund's investment strategy. With the consent of the supervisory authorities, the management of the fund can be assigned to another management company or a decision can be made to wind up the fund. Notices shall be conveyed by letter or through the public media. Unitholders of the mutual funds managed by Storebrand Asset Management AS choose two of its board members. Elections occur on election meetings in accordance with rules laid down in Storebrand Asset Management AS funds' Articles of Association. Negotiable unit certificates are not issued. The register of unit holders is maintained by Storebrand Asset Management AS. The units are registered by name, and powers of attorney governing their disposal can be attached to them. The units are not subject to a lock-in period. Unitholders will be notified of changes in holdings, annual statements and realization statements, and other fund reporting through Storebrand's or Delphi's trading portal (via log in solution on www.storebrand.no or www.delphi.no). Shareholders may, by agreement, receive annual statements and realization statements by mail.

Publication of net asset value (NAV)

The price of a unit is announced by Oslo Stock Exchange and sent to a number of different media. The prices are published daily on a number of websites, including www.storebrand.no, www.ose.no and www.morningstar.no, as well as to some extent also in some media houses' websites and newspapers. Further information about unit trading, placement of orders and pricing calendar (holiday calendar) can be found at www.storebrand.no/en/asset-management.

Valuation

The basis for calculating the value of a unit (NAV) shall be the market value of the securities portfolio plus the value of the fund's liquid assets/receivables, accrued income not yet due and the value of any deficit to be brought forward, minus liabilities and accrued expenses not yet due, including contingent tax liabilities. Delphi Global, Delphi Europe and Delphi Nordic are valued at current market prices at 16:00 Norwegian time. The calculations for all other funds is normally based on the first closing price of the underlying stock exchange for the respective fund's cut-off time. In the absence of any useful market rates, the management company shall make its valuation based on the most recently negotiated prices and/or the market's interest rate level for corresponding securities.

To prevent existing unit holders from dilution as a result of subscriptions and redemptions made by other unit holders in the fund, swing pricing can be used. This means that the NAV is adjusted by a swing factor on days when the fund has a net subscription or redemption that exceeds a predetermined share of the fund's total assets (threshold value). A net subscription above the set threshold value means that the NAV is adjusted upwards, and vice versa upon net redemption. The adjusted NAV will therefore intend to cover costs resulting from portfolio adjustments. The size of the swing factor is calculated per fund and is based on estimates of expected direct and indirect costs as a result of trading. The management company's routine for swing pricing is carried out in accordance with the Norwegian Fund and Asset Management Association's standard on subscription and redemption, available at www.vff.no.

Subscriptions and redemptions

Units can be subscribed for and redeemed through Storebrand Asset Management AS or through the management company's selected distributors. Units are subscribed for and redeemed on a forward unknown price basis. The cut-off time for unit trades is initially 15:00 CET every business day, but the management company can set a different cut-off time in connection with public holidays. Information about changed cut-off time will be announced on the management company's website (www.storebrand.no/saminfo). For a trade to be processed on the same day, it must be in the hands of the management company before in the cut-off time. Redemptions will then be executed in such a way that unit holders receive a price based on the subsequent valuation. Subscriptions will be executed as soon as the management company has received the calculated value of the funds that the unit holders deposit. Regarding subscriptions and redemptions, the management company makes reservations concerning delayed processing of the unit trades as a result of technical or other factors. Subscription and redemption orders can be sent to Storebrand Asset Management AS, mutual fund administration, P.O. Box 484, 1327 Lysaker. Alternatively, orders can be scanned and sent electronically to fondskunde@storebrand.no.

If interests of the unit holders or general public interests require action, the management company may apply the Norwegian Financial Supervisory Authority (Finanstilsynet) for permission to postpone the fund value calculation and redemption claims from the unit holders partly or in total. Accordingly, Finanstilsynet may instruct the management company to suspend the right of redemption partly or in total, if they find it appropriate in order to protect the interest of the unit holders or the general public.

Savings agreement

A savings agreement can be set up with regular subscriptions to the mutual fund. The number of subscribed units is calculated at the subscription rate determined on the day the money is value-dated to the fund's bank account. Unitholders are encouraged to additional monitoring of their savings agreement subsequent to changes, and if necessary contact the management company. This is to ensure that fund, savings amount, payment date and other issues around the savings agreement are correct at any time.

Fees and expenses

All fees and expenses associated with the management of the fund, with the exception of transaction based expenses and expenses related to the sale and redemption of units, are included in the management commission. Transaction-based expenses are brokerage fees as well as bank charges and deposit fees that are incurred in the execution of transactions for the trust. Fees and commission for the depositary are agreed separately each year. Commission is incurred daily according to account. The management company is under the obligation to cover other direct expenses for the fund with the exception of tax liabilities and other extraordinary costs which may occur if necessary to protect the interest of the unit holders. If deemed to be in the interest of the unit holders, the management company will, on behalf of the fund, claim refund of withholding tax and pursue legal claims (including class actions). In this regard, the fund can be charged costs directly, or indirectly by reducing the payment (gain) for the fund. If a unit holder acts in a way that may have negative consequences for the other unit holders of the fund (e.g frequent trading), Storebrand Asset Management AS reserve the right to charge the unit holder with subscription and/or redemption fees as specified in the fund's Articles of Association in order to cover additional transaction costs incurred.

Remuneration from or to others than the mutual fund

Storebrand Asset Management AS will be able to enter into individual income sharing agreements with customers based on their deposits in one or more mutual funds managed by the management company. Such an agreement is linked to the disposition of the management company's income and has no bearing on the relationship between the respective mutual fund and the customer, who pays the same management fee as other unit holders.

Agreements on revenue sharing can be entered into with internal or external customers with significant amount assets in the management company's mutual funds, and must be of such a nature that the agreement benefits all unit holders. An agreement will be based on objective criteria that ensure equal treatment and will be entered into in accordance with Section 2-32 of the Securities Fund Regulations, which set conditions for entering into such agreements. A revenue sharing agreement means that the customer will be reimbursed parts of the management fee after the costs associated with the management of the fund have been covered. The portion that is repaid to the customer reduces the management company's profit.

Further information, including which objective criteria form the basis for such an agreement, can be obtained by contacting Storebrand Asset Management AS, Fondadministrasjon, PO Box 484, 1327 Lysaker, alternatively via email to fondskunde@storebrand.no.

Techniques for achieving efficient portfolio management

The mutual fund has an opportunity to lend out the fund's securities in accordance with section 6-8 of the Securities Regulations with the aim of achieving incomes for the fund. The scope of the lending will vary, but must be limited to a maximum of 20 per cent of the fund's assets, and only shares may be lent out. It is assumed that the fund's financial risk will not be significantly affected by the lending operations. The fund's securities may only be lent out to credit institutions, insurance companies, investment companies or clearing houses, and borrowers must provide the fund with security. The fund uses J.P. Morgan Bank Luxembourg S.A. as broker of securities loans. The broker will receive a fee for this brokerage activity. All net incomes resulting from the loans will accrue to the fund. Neither the management company nor other companies in the Storebrand Group receive any payment from the fund for administering or executing loans apart from the funds' normal management fees. The loans are provided on market terms. The lending activity is not regarded as entailing any increased risk of a conflict of interest.

Depositary for the mutual fund

Company: J. P. Morgan SE - Oslo Branch

Address: Tordenskjoldsgate 6, PO Box 1219 Vika, 0110 Oslo, Norway
Address Head Office: Taunustor 1, 60310 Frankfurt am Main, Germany
Legal form: limited liability company
Enterprise no.: 921 560 427
Principal business activity: banking

Marketing and distribution

The information in this prospectus is intended solely for investors domiciled in the countries where the mutual funds are registered for sales and marketing. The mutual funds may not be marketed in countries other than the countries where the fund has marketing approval. Units of the Fund shall not be distributed or sold in the United States or to any natural or legal person falling within the definition of "US Person" under Regulation S of the US Securities Act of 1933. This includes, inter alia, any natural person resident in the United States and any company, partnership or other entity that is organized or incorporated under U.S. law.

Tax regulations

Tax rules for the securities fund

The mutual fund is a separate taxpayer that is on the whole subject to normal corporation tax and has some of its share revenues taxed according to the Tax Exemption Method. The fund is exempt from paying tax on share gains and is not granted any tax allowance for share losses. Three per cent of the dividend earned in the EEA is taxable while dividend earned outside the EEA is taxable in its entirety. Other incomes are mainly taxable at a prevailing tax rate that is equivalent to the rate for ordinary income and a tax allowance is granted for losses. A fund whose portfolio consisted of less than 20 per cent shares at the beginning of the year is granted a tax deduction for all the return it has distributed. Funds that consist of 20-80 per cent shares may deduct a proportionate share of the return they have distributed, while funds that consist of 80 per cent shares are not granted any tax allowance for amounts they have distributed. The fund is exempt from wealth tax.

Tax rules for personal unit holders with tax liability in Norway

Personal unit holders in a mutual fund are taxed at the tax rate for ordinary income and granted a tax allowance for losses. Share incomes are taxed in accordance with the Shareholder Model, which means that some of the fund's share incomes are protected from tax (threshold interest rate). The use of the threshold interest rate requires the units to be redeemed at a gain and the full use of the threshold interest rate requires the total gain during the ownership period to exceed the total threshold interest rate during the ownership period. Any unused threshold interest rate for some units may not be transferred to other units. Before taxation, the tax basis is to be increased by an adjustment factor so that the effective tax rate for share incomes is higher than the rate for ordinary income. Transfers between funds are regarded as a sale.

Unit holders that own equity fund units through a share savings account (ASK) are taxed according to the separate rules applicable to such accounts. Further information on the taxation of share savings accounts may be obtained from the Norwegian Tax Administration (skatteetaten) and/or at storebrand.no.

Investments in mutual funds through an insurance solution (unit linked) are taxed according to separate tax rules. Further information on such taxation may be obtained from the Norwegian Tax Administration (skatteetaten) and/or the relevant product supplier.

Tax rules for companies with tax liability in Norway

Unit holders that are legal person are treated as company shareholders and taxed according to the exemption model. Companies refers to limited liability companies and companies that are equivalent to limited liability companies. In addition, associations, foundations, municipalities, county municipalities, inter municipal companies and certain estates in bankruptcy or administration are covered by the exemption model.

Tax rules for unit holders with tax liability abroad

Foreign unit holders are liable to withholding tax in Norway at the rate resulting from the tax agreement. The individual tax agreement may contain exemptions for withholding tax if the proportion of units owned by the unit holder in the trust comprise a specified percentage.

Tax rules - change

If the tax rules are changed in Norway or in the unit holder's home country, and new tax agreements are entered into, the rules above can be changed. The fund must at all times comply with current regulations.

Reporting of tax information

Mutual funds and management companies are required to report financial information about unit holders and beneficial owners to the Norwegian tax authorities. If these are tax resident or domiciled in states other than Norway, the tax authorities will pass on the information to the respective states in accordance with the rules in the FATCA (Foreign Account Tax Compliance Act), CRS (Common Reporting Standard) and bilateral tax agreements. Unitholders receive a copy of what is reported via realization statements and holding statements at year-end.

Risk

Historical returns are no guarantee of future returns. Future returns will i.a. depend on market developments, the portfolio manager's skills, the fund's risk, as well as the costs of subscription, management and redemption. The return can be negative as a result of price losses. The fund's return can vary within a year. The individual unit holder's loss or gain will therefore depend on the exact times of purchase and sale of the units. For updated information related to the fund's historical return and risk, please refer to information about the fund on the management company's website, www.storebrand.no/en/asset-management. Information on returns and risk is also available through official information providers such as the Oslo Stock Exchange, Morningstar, Finansportalen and Fondsdata at the Norwegian Fund and Asset Management Association.

Complaints

The Complaints Board for Consumers in Banking and Finance Matters (www.finansklagenemda.no) handles complaints related to mutual funds. The Board is an independent, publicly financed body with a permanent secretariat consisting of legal professionals. If a complaint is to be processed by the Complaints Board, the issue must have been discussed with the management company, without reaching an agreement. Initially, the Complaints Board will motivate the management company and the unit holder to find a solution. If the dispute cannot be resolved, the case will be submitted for a formal consideration by the Board. Complaints to the Board shall be made in writing; cases are handled free of charge.

Articles of Association

The mutual fund is an independent legal entity with separate articles of association regulating the operation of the fund. The Articles of Association are drawn up in line with the standards of the Financial Supervisory Authority of Norway (Finanstilsynet) and approved by the Financial Supervisory Authority of Norway. The fund's Articles of Association is enclosed to the prospectus, but can otherwise be obtained upon request to the fund management company, its distributors or from the company's website at www.storebrand.no.

Accounts

The accounts are concluded as at 31 December each year. The annual and semi annual reports are available upon request to the management company, or at www.storebrand.no. Unitholders may request that the documents be sent free of charge.

Index aware funds from Storebrand Asset Management AS are expected to have a low expected tracking error under normal market conditions. The intervals given in the table above must not be considered absolute, and may be exceeded for shorter or longer periods. There are several possible sources of expected tracking error, for example, but not limited to a) the nature of the product with handling of subscriptions and redemptions, as well as, cash holdings b) properties of the product such as exclusions as a result of the Storebrand standard or other sustainability criteria, internal limitations in investment universe, or as a result of currency hedging and the selection of hedged currencies, or c) other matters related to investments such as tax, reinvestment of dividends, investments with lower liquidity or that the methodology for currency hedging of the fund differs compared with the benchmark index.

The management process applies a risk model which describes the correlation between the shares' time series, as well as an optimization algorithm aiming at keeping the expected tracking error as low as possible. All the index aware funds are invested directly in equities, except Storebrand Global ESG Plus Valutasikret and Storebrand Global Indeks Valutasikret, which invest in Storebrand Global ESG Plus and Storebrand Global Indeks, respectively (master feeders). Storebrand Indeks - Norge shall at all times comply with the placement limit for index funds pursuant to the Securities Funds Act section 6-8, which means that investments in shares issued by the same issuer may amount to up to 20 per cent of the Fund's assets. However, the 20 percent limit can be increased to 35 percent for a single issuer when necessary for special market conditions, such as the Norwegian market, which is relatively small with some large companies that have high weight in the index.

Information About the Management Company

Company name: Storebrand Asset Management AS

Business office: Professor Kohts vei 9, 1366 Lysaker

Organization number: 930.208.868

Date of establishment: 1 July 1981

Subscribed and paid-in share capital: NOK 1,800,000.

Owner: Storebrand Asset Management AS is fully owned by Storebrand ASA

Storebrand Asset Management AS has had a license to conduct mutual fund management since the company was founded on 1 July 1981. The company was granted a license to manage alternative investment funds on 16 October 2015. The company has introduced a requirement for additional equity to cover potential claims in connection with activities related to national funds covered by the law on alternative investment funds.

The Board

Shareholder-elected representatives:

Odd Arild Grefstad (Chairman)

Lars Aa. Løddesøl

Jenny Rundbladh (deputy)

Lars-Erik Eriksen (deputy)

Unitholder-elected representatives:

Sverre Dale Moen

Brita Cathrine Knutson

Sondre Gullord Graff (deputy)

Employee-elected representatives:

Hilde Marit Lodvir Hengebøl

Karsten Solberg

The management company's board shall consist of at least six members and at least two deputies. One third of the board members are elected by unit holders in the mutual funds managed by Storebrand Asset Management AS. At least two board members are elected by the management company's general meeting. For both groups of board members, elected by unit holders and the general meeting, respectively, at least half as many deputies are elected. Deputies shall have the right to attend, but not the right to vote when the board is otherwise full. Two of the board members are elected by and from among the employees.

The management company appoints a nomination committee, which nominates unitholder elected representatives to the board before the election meeting. The unitholder elected board members and deputies are elected at the election meeting on the recommendation of the nomination committee. The election meeting is convened by public announcement with at least 2 weeks notice. The election meeting is held every year by the end of June.

In 2021, the members of the board received a total of NOK 556,000 in remuneration for the position. Board remuneration are not paid to shareholder-elected board members employed by the Storebrand Group.

Chief Executive Officer

Jan Erik Saugestad, Storebrand Asset Management AS, Professor Kohts vei 9, N-1366 Lysaker

Compensation to CEO amounted to NOK 6,684,000 in 2021.

Remuneration scheme

The remuneration scheme in Storebrand Asset Management AS consists of fixed salary and variable remuneration. Fixed salary is determined on the basis of a market-based assessment, and the variable remuneration is based on a comprehensive assessment of the team's and individual employee's results, including achieved relative returns where relevant. A more detailed description of the scheme is available at www.storebrand.no/saminfo. Paper copy is sent free of charge on request.

Auditors

PwC Norway, state certified auditors, Dronning Eufemias gate 8, 0191 Oslo, is the auditor for the management company and for the accounts of the mutual funds.

Ernst & Young AS, state certified auditors, Dronning Eufemias gate 6, 0191 Oslo, is the internal auditor for the management company and for the accounts of the mutual funds.

Outsourcing of functions and other information

The management company has not entered into any consultancy agreements outside of the Storebrand group that will affect operations to a significant degree.

Storebrand Asset Management AS has outsourced certain tasks to Storebrand's strategic partner Cognizant. This outsourcing includes a selection of operational tasks, and Cognizant delivers these outsourced tasks from its office in Vilnius, Lithuania.

Intra-group agreements have also been entered into for outsourcing of IT, finance, marketing functions, etc. with other companies in the Storebrand Group.

Companies in the Storebrand Group may subscribe and redeem units free of cost in mutual funds managed by a management company in the same group as Storebrand Asset Management AS.

The prospectus has been prepared in accordance with Regulation 21 December 2011, no. 1467 to the Securities Fund Act § 8-2 and Commission Regulation (EU) No. 583/2010), cf. Regulations to the Securities Fund Act § 13-7.

The Board of Storebrand Asset Management AS is responsible for this prospectus meeting the requirements of the Regulations to the Securities Fund Act. The Board gives its statement that the information in the Prospectus as far as they are aware, in accordance with the facts and that there are no omissions which are of such a nature that they can change the meaning of the prospectus.

The Prospectus was approved by the Board on 7 June 2022

The Prospectus was last updated on 1 January 2023

Articles of Association for Verdipapirfondet Storebrand Global Solutions

§ 1 Name of the securities fund and of management company

The securities fund Storebrand Global Solutions ("the Fund") is managed by Storebrand Asset Management AS. The Fund is authorized in Norway and is regulated by the Financial Supervisory Authority of Norway (Finanstilsynet).

The Fund is regulated in accordance with the Norwegian Securities Funds Act no 44 of 25 November 2011 ("the Securities Funds Act").

§ 2 UCITS fund

The Fund is a UCITS fund which complies with the investment regulations in chapter 6 of the Norwegian Securities Funds Act, and the regulations on subscription and redemption in § 4-9 (1) and § 4-12 (1).

The fund has share classes with further details outlined in section 7 of the Articles.

§ 3 Rules for the investment of the securities fund's assets

3.1 Investment guidelines and risk profile

The Fund is an equity fund according to the definitions issued by the Norwegian Fund and Asset Management Association. The Fund mainly invests in shares issued by companies in global markets. The fund's investment mandate is described in greater detail in the prospectus. The fund is characterized by a relatively large risk of fluctuations (volatility). The risk profile is specified in greater detail in the fund's Key Investor Information Document (KIID).

3.2 In general about the investment guidelines

The Fund's assets may be invested in the following financial instruments and/or as deposits with a credit institution:

transferable securities	<input checked="" type="checkbox"/> yes	<input type="checkbox"/> no
securities fund/mutual fund units	<input checked="" type="checkbox"/> yes	<input type="checkbox"/> no
money-market instruments	<input checked="" type="checkbox"/> yes	<input type="checkbox"/> no
derivatives	<input checked="" type="checkbox"/> yes	<input type="checkbox"/> no
deposits with a credit institution	<input checked="" type="checkbox"/> yes	<input type="checkbox"/> no

The Fund may, independently of the investment alternatives in this clause, possess liquid assets.

Investments in other mutual funds equal a maximum of 10 percent of the fund's assets:

yes no

The Fund's investments in mutual fund units must, together with the fund's other investments, be in accordance with these rules.

The mutual funds invested in may themselves invest a maximum of 10 percent of their assets in mutual fund units:

yes no

Investments in mutual funds which are not UCITS meet the conditions stated in section 6-2 (2) of the Securities Funds Act and do not in aggregate constitute more than 10 percent of the fund's assets:

yes no

The Fund's assets are invested in money market instruments which are normally traded in the money market, are liquid, and have a value which can be accurately determined at any time:

yes no

The Fund may use the following derivative instruments: options, futures/forward contracts and swap contracts. The assets underlying the derivatives will be transferable shares, indices based on transferable shares, foreign currency or exchange rates.

The expected risk and expected return on the Fund's underlying securities portfolio are not affected by the investments in derivatives.

3.3 Liquidity requirements

The Fund's assets may be invested in financial instruments which:

1. are admitted to official quotation or are traded on a regulated market in an EEA state, including a Norwegian regulated market, as defined in Directive 2014/65/EU Art. 4 (1) point 21 and the Securities Trading Act section 2-7 (4).

yes no

2. are traded on another regulated market in an EEA state which functions regularly and is open to the public.

yes no

3. are admitted to official quotation on a stock exchange in a country outside the EEA or are traded in such a country on another regulated market which functions regularly and is open to the public.

yes no

All stock exchanges or regulated markets in the world are relevant. Investments are made in developed markets and emerging markets.

4. are recently issued provided a condition for issue is that admission to trading will be applied for on a stock exchange or market as described in nos. 1 to 3 above. Admission to trading must take place no later than one year after the expiry of the subscription deadline.

yes no

The fund's assets may be invested in money market instruments traded on a market other than those stated in nos. 1-3 above if the issue or the issuer of the instruments is regulated for the purpose of protecting investors and savings and the instruments are covered by section 6-5 (2) of the Securities Funds Act.

The Fund's assets may be invested in derivatives traded on a market other than those stated in nos. 1 to 4 above.

Up to 10 percent of the Fund's assets may be invested in financial instruments other than those mentioned in this clause.

3.4 Investment restrictions – on the fund's assets

The Fund's holdings of financial instruments shall have a composition that provides an appropriate diversification of the risk of loss.

The Fund's investments shall at all times comply with the investment limits stated in section 6-6 and section 6-7 (1,2 and 4) of the Securities Funds Act.

3.5 Investment restrictions – ownership interest with issuer

The Fund's investments shall at all times comply with the investment limits stated in section 6-9 of the Securities Funds Act.

3.6 Techniques for efficient portfolio management

The Fund may, in accordance with the Securities Fund Act Section section 6-11 and the Securities Fund Regulations section 6-8 use techniques to achieve effective portfolio management. The techniques are specified in greater detail in the Fund's prospectus.

§ 4 Capital gains and dividends

Capital gains shall be reinvested in the Fund. Dividends are not distributed to the unit holders.

The board of directors of the management company may determine that proceeds from financial instruments and such, may be distributed to the unit holders. The board of directors of the management company may determine that share dividends, interest income and/or other income shall be distributed to the unit holders.

§ 5 Costs

Management fees are the management company's remuneration for the management of the Fund.

The basis for calculating management fees is the day-to-day value of the Fund. When calculating the Fund's net asset value (total net assets), the basis shall be the market value of the portfolio of financial instruments and deposits in banks and credit institutions, the value of the Fund's liquid assets and other receivables, the value of earned non-due revenues and the value of any loss carry forwards deducted for debt and accrued non-due costs including latent tax liabilities.

In addition to the management fee, the following costs may also be covered by the Fund:

1. Transaction costs related to Fund investments;
2. Payment of taxes imposed on the Fund;
3. Interest on borrowings as specified in Section 6-10 of the Securities Funds Act; and
4. Any extraordinary costs necessary to protect the interests of unit holders, cf. Section 4-6 (2) of the Securities Funds Act.

The management company may debit a fixed management fee to the Fund. The fixed management fee is to be calculated daily and debited monthly.

The management fee is to be divided equally among each unit in the Fund. The size of the management fee is stated in section 7 of the Articles.

All fees received from any sub-funds shall be credited the Fund.

§ 6 Subscription and redemption of fund units

The Fund is normally open for subscriptions and redemptions on every Norwegian business day.

Subscriptions may be charged with a subscription fee of up to 0.2 percent of the subscription amount.

Redemptions may be charged with a redemption fee of up to 0.2 percent of the redemption amount.

No subscription or redemption fees are incurred if the Fund invests in funds managed by a management company in the same group as Storebrand Asset Management AS.

The Board of Directors of Storebrand Asset Management AS can decide that the subscription cost will increase up to 10 percent of the subscription amount. The difference between 0.2 percent and adopted increased subscription cost of up to 10 percent shall accrue to the fund. The Board may fix an increased subscription cost for a certain period of time, with the possibility of extension, or shortening, based on a Board decision.

The management company can use swing pricing. Reference is made to the prospectus for further description.

§ 7 Share classes

The Fund's assets are divided into the following share classes:

Share class	Currency	Annual Management Fee
Share class A	NOK	Maximum 0.75 %
Share class N	NOK	Maximum 0.6 %
Share class A3	EUR	Maximum 0.75 %
Share class N3	EUR	Maximum 0.6 %
Share class A4	USD	Maximum 0.75 %
Share class N4	USD	Maximum 0.6 %
Share class A5	DKK	Maximum 0.75 %

What characterizes the different share classes is:

Share class A

The share class is open to investors who have units in the fund at a cost of at least NOK 100. The management company may charge the share class with a fixed management fee. The fixed management fee is 0.75 per cent per annum. The fixed management fee is calculated daily and charged monthly.

Share class N

The share class is open to investors who subscribe for NOK through distributors who, by agreement with the management company, do not receive remuneration from the management company. The management company may charge the share class with a fixed management fee. The fixed management fee is 0.6 per cent per annum. The fixed management fee is calculated daily and charged monthly.

Share class A3

The share class is open to investors who have units in the fund at a cost of at least EUR 100. The management company may charge the share class with a fixed management fee. The fixed management fee is 0.75 per cent per annum. The fixed management fee is calculated daily and charged monthly.

Share class N3

The share class is open to investors who subscribe for EUR through distributors who, by agreement with the management company, do not receive remuneration from the management company. The management company may charge the share class with a fixed management fee. The fixed management fee is 0.6 per cent per annum. The fixed management fee is calculated daily and charged monthly.

Share class A4

The share class is open to investors who have units in the fund at a cost of at least USD 100. The management company may charge the share class with a fixed management fee. The fixed management fee is 0.75 per cent per annum. The fixed management fee is calculated daily and charged monthly.

Share class N4

The share class is open to investors who subscribe for USD through distributors who, by agreement with the management company, do not receive remuneration from the management company. The management company may charge the share class with a fixed management fee. The fixed management fee is 0.6 per cent per annum. The fixed management fee is calculated daily and charged monthly.

Share class A5

The share class is open to investors who have units in the fund at a cost of at least DKK 100. The management company may charge the share class with a fixed management fee. The fixed management fee is 0.75 per cent per annum. The fixed management fee is calculated daily and charged monthly.

Annex II

Template pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Storebrand Global Solutions (the "Fund") **Legal entity identifier:** 5967007LIEEXZXBVA860

Sustainable investment objective

Does this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: 10 % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It will make a minimum of sustainable investments with a social objective: 10 %	<input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The Fund has a sustainable investment objective of being fossil free and targeting investments in companies contributing to achieving the 17 United Nations Sustainable Development Goals ("SDGs"). Such objective is expected to contribute to the transition to a more sustainable society and more particularly to climate change mitigation and climate change adaptation, which are among the environmental goals pursued by the EU Taxonomy. The Fund seeks to achieve its sustainable investment objective by investing notably in companies within four themes;

- Renewable Energy (Energy Production and Energy Storage and Distribution)

- Smart Cities (Water, Urban Planning, Mobility)
- Circular Economy (Recycling and Re-use, Sustainable Products and Eco-design)
- Equal Opportunities (Access to financial services, Access to Digital Services and Access to Healthcare services)

The Fund also seeks to contribute to a transition to a world with low carbon dioxide emissions (greenhouse gases) by excluding entities which derive a large part of their net sales from the production and/or distribution of fossil fuels and entities with large fossil fuel reserves.

The Fund considers social characteristics by excluding investments in companies with business operations linked to banned weapons, nuclear weapons, weapons and war materials, alcohol, tobacco, cannabis, pornography and commercial gambling, as well as by excluding companies that violate international norms and conventions related to human rights, labor law or combating corruption and bribery.

The Fund's environmentally sustainable investments may contribute to one or more of the environmental objectives of the Taxonomy Regulation (EU) 2020/852 (the "EU Taxonomy"), such as but not limited to climate change mitigation and climate change adaptation.

As part of the objective of making sustainable investments in the areas specified above, the Fund also applies an exclusion strategy. The Fund excludes investments in companies with business activities associated with fossil fuels and in companies that violate international norms and conventions related to environmental issues.

No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

- Storebrand Sustainability ESG Score
- Carbon intensity scope 1 and 2
- Green Revenue
- PAI 4 (Exposure to companies active in the fossil fuel sector)
- PAI 5 (Share of non-renewable energy consumption and production)
- PAI 6 (Energy consumption intensity per high impact climate sector)
- PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises)
- PAI 14 (Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons))
- Revenues from business activities related to the production and distribution of nuclear weapons, weapons, alcohol, tobacco, cannabis, pornography, commercial gambling.

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Fund can only invest in financial instruments that are part of its defined investment universe. The Management Company has a dedicated team (Risk & Ownership team) that monitors the financial instruments investable for the Fund. The team follows a methodology that is based on a screening process where the investments exposure and impact on several sustainability indicators are measured.

The result of this screening will give an indication of whether the investment is exposed to adverse impacts, based on the indicators we measure. If any of our investments are exposed to impacts that we consider to be significant, then the investment is considered to harm our environmental or social objectives and the financial instrument will be excluded from the Fund's investment universe.

All investments are subject to a screening process to assess whether the investee is negatively affecting environmental or social objectives related to:

- human rights,
- labour law and international law,
- corruption and financial crime,
- serious climate and environmental damage,
- controversial weapons (land mines, cluster bombs and nuclear weapons),
- fossil fuels,
- tobacco,
- weapons,
- alcohol,
- gambling,
- pornography,
- cannabis,
- companies with large fossil fuels reserves

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Management Company takes into account the indicators for adverse impacts on sustainability factors in all of the Investment Management's investment decisions on an ongoing basis. The Fund will only invest in companies that have gone through the Management Company's own sustainability analysis. The Fund's viable investments are made in companies whose products and services contribute to achieving a positive impact and achieving a more sustainable development.

The DNSH-test consists of an exclusionary screening of companies which exceed set thresholds. The exclusionary screening consists of three components: 1) norm-based exclusion screening, 2) product-based exclusion screening and 3) sovereign bond screening.

Companies that are non-compliant with the below are not eligible as sustainable investments.

All of the underlying securities are assessed for adverse impacts as part of the DNSH-process in the following manner:

- 1) For several of the adverse impact indicators the set thresholds defines what is considered as significant harm to environmental or social objectives, based on the indicators measured by the Management Company. An investment that exceeds the defined thresholds is excluded from the Fund's investment universe.

For indicators without a defined threshold, the dedicated sustainability team is responsible to assess each entity on an individual basis, where data from an external data provider is used to assess whether an entity is involved with a breach or in risk of breaching one of these indicators. In this assessment conditions such as severity, scope of harm, and risk of recurrence is analyzed using a predefined scoring table to ensure consistency in the evaluation process. The final decision to exclude the investment from Fund's investment universe is however qualitative and based on the evaluation of the dedicated sustainability team and the assessment of the issue by the Management Company's Sustainable Investment Committee.

- 2) Adverse impact indicators are accounted for, and for all of the underlying securities based on the data availability, coverage and quality which allows for setting measurable or quantifiable thresholds, or where there is sufficient information to make a qualitative assessment of adverse impact. As the data quality and availability improves, the Management Company will be considering a range of methods to better account for these and mitigate adverse impact.

The Fund's screening and exclusion process described above covers several of the indicators for adverse impacts on sustainability factors listed in Annex I. In the DNSH-process, The Fund currently considers the following indicators from Table 1 of Annex I:

PAI 4 Exposure to companies active in the fossil fuel sector

PAI 7 Activities negatively affecting biodiversity sensitive areas

PAI 8 Emissions to water

PAI 9 Hazardous waste

PAI 10 Violations of UNGC principles and OECD guidelines

PAI 14 Exposure to controversial weapons

PAI 16 Sovereigns: Investee countries subject to social violations

In addition the Fund considers the following indicator from Table 2 of Annex 1:

PAI 15 Deforestation

The Fund's investment universe is monitored daily for potential breaches of Storebrand Sustainable Investment Policy and screened quarterly to assess if companies are in breach of this sustainability policy.

Storebrand Asset Management's Investment Control and Analytics (ICA) department is responsible for verifying that management complies with individual mandates as well as internal and external laws and regulations. As part of the daily compliance controls, all trades and positions are controlled for breaches on the Group Sustainability Policy, including the above-mentioned exclusion criteria's.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Management Company aims to ensure that all investee companies follow the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and the ILO conventions. The Management Company's process for this is to screen all investments in the Fund's investment universe by using data and research from an external data provider.

This screening is intended to assess and screen how companies adhere to these standards, and if in breach of them, how they respond to incidents and implement changes. The Fund will not invest in entities defined as non-compliant, based on this screening.

Once an entity has been defined as non-compliant, the entity is excluded from the Fund's investment universe, and the entity is no longer investable until the status has changed. This

list of excluded entities are updated on a quarterly basis.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes The Fund's screening and exclusion process described above cover several of the principal adverse impacts (the "PAIs") on sustainability factors.

The Investment Manager has been working to reduce adverse impact in its portfolios since the turn of the century and it has identified the following as main adverse sustainability impact categories that apply to all equity and debt portfolios including the Fund:

- Adverse impacts affecting the environment and climate such as: severe environmental damage; Green House Gas emissions; biodiversity loss and deforestation
- Adverse impact affecting workers, communities, and society such as: violations of basic workers' rights; forced labor; gender/diversity discrimination or indigenous rights violations
- Adverse impact in connection with gross corruption and money laundering
- Adverse impact in connection with controversial weapons (landmines, cluster munitions and nuclear weapons)
- Adverse impact in connection with tobacco products

The Management Company has also identified some products as adverse impacts that it aims to avoid such as coal or oil sands and others such as alcohol, gambling, and conventional weapons. These products are associated with significant risks and liabilities to society, the environment or health.

The Management Company's methodology is to identify PAI laggards (red), PAI intermediate performers (yellow) and PAI leaders (green) so that risk can be avoided, and more capital can be allocated to more sustainable companies and solution companies.

RED: Those companies identified as PAI laggards will be further analyzed by the Risk and Active Ownership team and may result in exclusion depending on the risk and severity of the negative impact identified and the total cumulative negative impact identified across all PAI indicators.

YELLOW: PAI intermediate performers will also be further analyzed with the aim to mitigate adverse impact through engagement. Please see 3.3 Addressing of PAIs and Mitigation.

GREEN: In addition, the analyzed PAI data will be further integrated in financial decisions with the aim to allocate more capital to PAI leaders, and thus lift the sustainability value of the Fund. Please see 3.3 Addressing PAIs and Mitigation.

Information on principal adverse impacts considered by the Fund will be available in the the Company's annual report.

No

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What investment strategy does this financial product follow?

In order to promote environmental and social characteristics, the following three methods are central to the Fund's investment strategy:

- Inclusions of products and services
- Exclusions of product and services
- Engagement

The Management Company takes sustainability risks into account in its investment decisions and integrates ESG aspects into the decisions. These aspects include both ESG risks and limiting climate change. In the sustainability analysis of the companies, the Management Company measures, among other things, financially significant risks regarding environmental, social and corporate governance issues that have a significant impact on the company's financial value.

The Management Company analyzes both ESG risks and SDG opportunities and weighs these together into a rating. 50 percent of the rating is based on ESG risks and 50 percent on SDG opportunities. The SDG rating measures opportunities linked to the UN's global sustainability goals and the Paris Agreement with a focus on products and services that help achieve the SDGs. Gender equality constitutes 10 percentage points of the SDG rating.

The Fund has a thematic equity strategy investing in companies that deliver products and services which contributes the SDGs. As such, the investment philosophy is rooted in the SDGs as an investment framework. The strategy applies a holistic focus on sustainable development through investing in companies with business models linked to financially material SDG indicators, and the products and services they offer while maintaining a value chain approach to company identification.

The Fund is designed to have the highest possible impact from its portfolio companies on the real economy. The strategy is not only focused on the most evident ESG solution companies, (i.e. companies that significantly contribute to sustainable development without causing substantial harm to environment or society. Examples are companies whose key business is centered around investment themes like renewable energy, technologies for sustainable city development, circular economy and empowerment etc.), but considers innovative aspects such as how technologies lead to less resources used in the first place or how connectivity lifts people out of poverty.

The value proposition for the proposed strategy is its ability to identify investable themes linked directly to specific SDGs and then identify companies that can have the largest impact in delivering products or services to facilitate meeting these objectives.

The four major themes and corresponding investment opportunities that the Fund has derived from the SDGs and chosen to include are: Renewable Energy, Equal Opportunities, Circular Economy and Smart Cities.

The Fund does not invest in any companies that violate Storebrand's group sustainability criteria, which reduces the sustainability risk in the Fund. That means that the Fund does not invest in companies which contribute to the violation of human rights, corruption, harming the climate and environment, the production of landmines, cluster munitions, or nuclear weapons, as well as tobacco and companies with low sustainability rating. In addition, the Fund also refrains from investing in companies that extract fossil fuels, carbon intensive power companies and companies whose turnover is more than 5 percent from

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

production/distribution from: fossil fuels, oilsand, tobacco, weapons/arms, alcohol, gambling, pornography, cannabis or companies with large fossil reserves.

● ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The Fund can only invest in solution companies, which are defined as companies contributing to one or more sustainability goals (SDGs). Contribution to SDGs is based on the products the company produces, or the service it supplies, and these activities should exceed certain thresholds of the company's combined activities. For further information on the thresholds applied, please refer to the Management Company's website.

The Fund is also subject to the Management Company's screening process. The screening process, according to which potential investments are excluded from the Fund's investment universe (as specified in the last paragraph of the above section on the investment strategy), represents a binding element for the Management Company. A list of all exclusions is published and updated quarterly on the Management Company's website. The exclusion strategy is monitored by the Management Company's risk control function.

● ***What is the policy to assess good governance practices of the investee companies?***

The Management Company has implemented a norm-based exclusion screening process to assess whether investee companies follow good governance practises. The purpose of this screening is to exclude all companies that do not follow what the Management Company considers to be good governance practices from the Fund's investment universe.

The Management Company has defined criteria for what good governance practices is. In order to assess whether a company follows such criteria, a dedicated team assesses how the investee companies perform in relation to the Management Company's definition of good governance practices using several different governance indicators.

In the assessment specific indicators are considered on:

- board and management quality and integrity,
- board structure,
- ownership and shareholder rights,
- remuneration packages,
- auditing and financial reporting,
- stakeholder governance.

The list is however not inclusive of all indicators used to measure good governance practices, and a full list can be found on our website. To assess each entities performance against the indicators, two steps are followed:

1) A data-driven analysis where the Management Company's external data providers provide a score which gives an indication on how the investee companies perform in relation to the Fund's definition of good governance practices, measured by the specific indicators. The Fund

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

will not invest in any company assessed to be non-compliant with the principles of good governance.

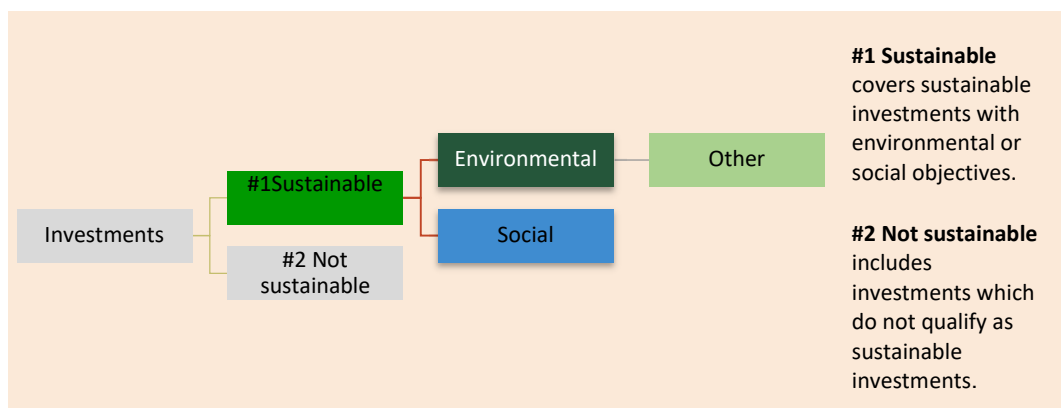

2) Internal qualitative assessment where the dedicated team assesses the seriousness of the breach that either has or may take place. This assessment is based on a qualitative assessment where factors such as geography, sector and the individual incident are considered. The Fund will not exclude companies based on operations in specific countries but will assess the manner in which they run their business in the countries where they operate. The Management Company will screen all investments in a norm-based exclusion assessment, which means that it will not invest if the investee companies have contributed or are involved with violations of its criteria for good governance practices.

What is the asset allocation and the minimum share of sustainable investments?

The Fund intends to only invest in sustainable investments with a minimum proportion of 80% of its investments. The remaining other investments, which are not sustainable, may include cash for liquidity management purposes.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● How does the use of derivatives attain the sustainable investment objective?

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Taxonomy Regulation (EU) 2020/852 (the “EU Taxonomy”) is a classification system that aims to establish common criteria for environmentally sustainable activities. In this respect, the Fund shall report the proportion of its investments that are consistent with the EU Taxonomy. The companies in which the Fund invests have not yet begun to report the extent to which their activities are consistent with the EU taxonomy. Accordingly, the Management Company believes that it currently is not possible to provide reliable information about the proportion of the Fund’s investments that are consistent with the EU Taxonomy and, in light of this, reports that 0% of the Fund’s investments are consistent with the EU taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What is the minimum share of investments in transitional and enabling activities?**

N/A

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is 10%.

The Fund makes investments with both an environmental and a social objective. There is no prioritisation of environmental or social objectives. The investment process accommodates the combination of environmental and social objectives by allowing the Management Company the flexibility to allocate between these based on availability and attractiveness of investment opportunities, while keeping sustainable investments with environmental and/or social objectives to an overall minimum of 80%.

What is the minimum share of sustainable investments with a social objective?

The minimum share of sustainable investment with a social objective is 10%.

The Fund makes investments with both an environmental and a social objective. There is no prioritisation of environmental or social objectives. The investment process accommodates the combination of environmental and social objectives by allowing the Management Company the flexibility to allocate between these based on availability and attractiveness of investment opportunities, while keeping sustainable investments with environmental and/or social objectives to an overall minimum of 80%.

What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

Ancillary liquidity in the form of cash consists typically of 2% of the Fund but could increase in case of adverse marketing conditions. No minimum environmental or social safeguards are applied to cash.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***
N/A
- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
N/A
- ***How does the designated index differ from a relevant broad market index?***
N/A
- ***Where can the methodology used for the calculation of the designated index be found?***
N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

www.storebrand.no/asset-management

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.
