HIGHLIGHTS

Equity markets experienced more volatility during August, reversing July's rally and selling off significantly in both Europe and the US. The Euro Stoxx 50® Total Return was down -5.1% and the S&P500® Total Return down -4.1% in August taking their year to date returns to -16.3% and -16.1% respectively.

Credit markets also widened in line with the risk off sentiment with the iTraxx Crossover® (S37) moving to 588bps from 509bps at the end of July. The market implied volatility measure VStoxx® increased from 22.3% to 27.9%.

In this context, BG Fund returned a robust +4.33% (USD A class) during the month with positive returns coming from nearly all strategies, with notable contributions from convertible arbitrage, equity special situations, risk arbitrage and trading.

As commented in last month's newsletter, we expect the tougher macro backdrop and financing environment to generate activity from companies in order to bolster balance sheets, rationalising businesses through restructurings and spin offs or, absent organic growth, merging and consolidating to drive balance sheet efficiency.

The story of a building pipeline for primary issuance and corporate activity remains very strong. The choppy market backdrop and increasingly discriminating financing environment will drive new hybrid issues (convertible bonds, mandatories, and private deals/ corporate collars) in order for companies to get ahead of the ever-growing concerns of higher interest rates and persistent inflation.

We expect the environment to be very favourable for BG Fund across the full range of its core arbitrage strategies where we are positioned to deploy further capital into convertible bond arbitrage, mandatory convertible bond arbitrage, capital structure arbitrage, and Vol trading, while continuing to extract returns from event driven and special situations with hard catalysts. BG's portfolio is tightly hedged, already invested in some very attractive positions and remains well-placed to capitalize on inflation, elevated rates and economic uncertainty.
